INTEGRAL: International Gamma Ray Astrophysics Laboratory p 2170 N93-23932

ASTRONOMICAL SPECTROSCOPY
The optical counterparts of the x ray binaries in NGC 6712 and 47 Tucanae p 2538 N93-23914
INTEGRAL: International Gamma Ray Astrophysics Laboratory p 2170 N93-23932
Investigation of serendipitious WFC sources
[NASA-CR-192774] p 2544 N93-24458

ASTRONOMY
Reports of planetary astronomy - 1991
[NASA-TM-4459] p 2542 N93-23055
Activities report of the European Southern Observatory
[ETN-93-93459] p 2542 N93-23118
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
[ESA-ISY-3] p 2533 N93-23878
The German space science programme p 2536 N93-23903
SETI in Europe p 2429 N93-23908
Ground-based optical support for gamma ray satellite activities p 2170 N93-23909

ASTROPHYSICS
Opportunities for research on Space Station Freedom p 2183 N93-22610
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
[ESA-ISY-3] p 2533 N93-23878
The German space science programme p 2536 N93-23903

FIRST: Far Infrared and Submillimeter Space Telescope p 2540 N93-23924
European Space Science and Space Station Freedom p 2163 N93-24387
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue p 2164 N93-24394
Very high energy gamma ray astrophysics [DE93-007625] p 2551 N93-24453

ASYMMETRY
Predicting structure in nonsymmetric sparse matrix factorizations [DE93-004119] p 2468 N93-22938

ASYMPTOTIC METHODS
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems [DE93-006816] p 2480 N93-22714
Asymptotic analysis of: 1: Wave propagation in dispersive optical media with quadratic nonlinearity. 2: A hypersonic wing with three-dimensional self-similarity p 2112 N93-23594
A mechanism for capture into resonance [PB93-145761] p 2469 N93-23648
An asymptotic theory of supersonic propeller noise [NASA-CR-191110] p 2477 N93-24070

ASYMPTOTIC PROPERTIES
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder [PB93-139061] p 2290 N93-22897
Determining nodes and long-time approximations to the Navier-Stokes equations p 2296 N93-23593
Models and analysis for multivariate failure time data p 2322 N93-24198

ASYMPTOTIC SERIES
Topics in stochastic systems, failure time models change-point problems, and sequential analysis [AD-A260047] p 2472 N93-23711
Role of acoustics in flame/vortex interactions [NASA-CR-191429] p 2299 N93-24494

ATLANTIC OCEAN
The environmental biogeochemistry of open ocean and partially enclosed marine systems p 2413 N93-23130
Observing the northeast Atlantic with NOAA-N at the University of Lisbon (Portugal) Space Oceanography Facility p 2362 N93-23779

ATMOSPHERIC ATTENUATION
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128
Aerosol measurements at the South Pole during 1987 [PB93-137016] p 2390 N93-24567

ATMOSPHERIC BOUNDARY LAYER
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles [NASA-CR-192349] p 2110 N93-23108
The effect of current-induced stress perturbation on large- and meso-scale air-sea interactions p 2393 N93-23207
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation p 2407 N93-23495
Turbulent microfronts [AD-A260300] p 2409 N93-24265
Simulation of the formation and transport of ozone in the atmospheric boundary layer [ESA-TT-1243] p 2402 N93-24615

ATMOSPHERIC CHEMISTRY
A gas extraction system for the measurement of carbon dioxide and carbon isotopes in polar ice cores [DE93-005289] p 2412 N93-22225
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models [DE93-005114] p 2402 N93-22408
Gas-Grain Simulation Facility (GGSF) p 2186 N93-22626
Atmospheric Sciences Program [DE93-004891] p 2383 N93-22767
The atmospheric effects of stratospheric aircraft [NASA-RP-1293] p 2385 N93-23057
Chemical kinetics and photochemical data for use in stratospheric modeling [NASA-CR-192795] p 2392 N93-23124
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products [PB93-131449] p 2385 N93-23267
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion [PB93-132702] p 2222 N93-23347
Observations of atmospheric chemistry on the first European polar platform p 2361 N93-23776
MIPAS: Michelson Interferometer for Passive Atmospheric Sounding for POEM-1 p 2363 N93-23786
Global ozone monitoring experiment p 2364 N93-23793
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling [AD-A260252] p 2389 N93-24165
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft [PB93-136117] p 2410 N93-24501

ATMOSPHERIC CIRCULATION
Upper-air circulation systems p 2337 N93-22138
A convective drag theory for surface fluxes [DE93-004037] p 2403 N93-22722
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds [DE93-000690] p 2405 N93-23305
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel [NASA-TM-103920] p 2134 N93-23420
Studies of baroclinic flow [AD-A259739] p 2414 N93-23475
Southward burst mesoscale convective systems: An observational and modeling study p 2406 N93-23494
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation p 2407 N93-23495
Coupling an ocean wave model to an atmospheric general circulation model [MPIM-72] p 2395 N93-23632
Climate variability in a coupled GCM. Part 1: The tropical pacific [MPIM-73] p 2407 N93-23633
On the space-time structure of ENSO [MPIM-74] p 2407 N93-23634
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere [AD-A259659] p 2396 N93-23657
Numerical simulations of the transport and diffusion during the 1991 Winter Validation Study along the front range in Colorado [DE93-002684] p 2396 N93-23674
Normal modes of the atmosphere as estimated by principal oscillation patterns and derived from quasi-geostrophic theory [MPIM-81] p 2397 N93-23857
On regional surface fluxes over partly forested areas [MPIM-82] p 2397 N93-23858
Chaos theory and its application in the atmosphere p 2398 N93-24082
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106
Modeling of forced planetary waves in the Mars atmosphere p 2555 N93-24579
Application of ocean models for the interpretation of AGCM experiments on the climate of the last glacial maximum [MPIM-80] p 2416 N93-24581
Simulation of the formation and transport of ozone in the atmospheric boundary layer [ESA-TT-1243] p 2402 N93-24615

ATMOSPHERIC COMPOSITION
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models [DE93-005114] p 2402 N93-22408
NRC Twin Otter operations in the 1991 California ozone deposition experiment [NRC-LTR-FR-118] p 2383 N93-22472
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects [DE93-002347] p 2384 N93-22972
SO2 on Venus: A final cross-calibration with Pioneer Venus [NASA-CR-192273] p 2554 N93-23096
Carbon and biogeochemistry [DE93-001368] p 2386 N93-23306
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study [PB93-124618] p 2386 N93-23348
Cassini/Huygens: A mission to Saturn and Titan p 2539 N93-23918
Scenario development for the northeast United States 500 millibar height field p 2408 N93-23968
NOAA/CMDL atmospheric methane data from shipboard flask sampling [PB93-136489] p 2389 N93-24226

ATMOSPHERIC DENSITY
A proposed neutral line signature [NASA-CR-192335] p 2393 N93-23211

ATMOSPHERIC EFFECTS
Advanced launch system trajectory optimization using suboptimal control p 2171 N93-22010
The atmospheric effects of stratospheric aircraft [NASA-RP-1293] p 2385 N93-23057
Design and implementation of a computer based site operations log for the ARM Program [DE93-002834] p 2400 N93-24255

ATMOSPHERIC ENTRY
Task Analysis of Shuttle Entry and Landing Activities [NASA-TM-104761] p 2178 N93-22702
Atmospheric transmission of polar meteorites [ESA-TT-1283] p 2547 N93-23206
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system [NASA-TP-3257] p 2297 N93-24096

ATMOSPHERIC GENERAL CIRCULATION MODELS
Prognostic cloud water in the Los Alamos GCM [DE93-000679] p 2404 N93-22772
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds [DE93-000690] p 2405 N93-23305
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation p 2407 N93-23495
Coupling an ocean wave model to an atmospheric general circulation model [MPIM-72] p 2395 N93-23632
Climate variability in a coupled GCM. Part 1: The tropical pacific [MPIM-73] p 2407 N93-23633
On the space-time structure of ENSO [MPIM-74] p 2407 N93-23634
On the cold start problem in transient simulations with coupled atmosphere-ocean models [MPIM-83] p 2397 N93-23859
Intraseasonal relationships between tropical heating and extratropical jets [AD-A260212] p 2408 N93-24004
General circulation model output for forest climate change research and applications [PB93-124626] p 2388 N93-24015
Modeling the tropical ocean response to westerly wind forcing [AD-A260230] p 2416 N93-24099

ATMOSPHERIC HEAT BUDGET
The structure and energetics of Amazon squall lines p 2404 N93-23166

ATMOSPHERIC HEATING
Intraseasonal relationships between tropical heating and extratropical jets [AD-A260212] p 2408 N93-24004
A microclimate model to investigate greenhouse warming of a sub-Alpine ecosystem [DE93-005290] p 2388 N93-24011

ATMOSPHERIC MODELS
User's guide to the Penn State/NCAR Mesoscale Modeling System [PB93-126654] p 2391 N93-22380
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models [DE93-005114] p 2402 N93-22408
A convective drag theory for surface fluxes [DE93-004037] p 2403 N93-22722
CHAMMP [AD-A260190] p 2403 N93-22765
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico [PB93-108090] p 2404 N93-23090
Chemical kinetics and photochemical data for use in stratospheric modeling [NASA-CR-192795] p 2392 N93-23124
Turbulence models for helical flow [GKSS-92/E/12] p 2291 N93-23189
Data ingest and objective analysis for the PSU/NCAR modeling system. Programs DATAGRID and RAWINS [PB93-138519] p 2393 N93-23252
Massively parallel implementation of the Penn State/NCAR mesoscale model [DE93-004874] p 2394 N93-23320
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model [PB93-118586] p 2405 N93-23333
Impact of a Newtonian assimilation and physical initialization on the initialization and prediction in a tropical mesoscale model p 2394 N93-23353
Model of Venus ionopause formation p 2554 N93-23354
Southward burst mesoscale convective systems: An observational and modeling study p 2406 N93-23494
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
Radiolocation of a satellite-borne LOVHF beacon p 2268 N93-23613
A hybrid coupled tropical atmosphere ocean model: Sensitivities and hindcast skill [MPIM-76] p 2396 N93-23635
The joint normal modes of the coupled atmosphere-ocean system observed from 1967 to 1986 [MPIM-78] p 2396 N93-23637

Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
Numerical simulations of the transport and diffusion during the 1991 Winter Validation Study along the front range in Colorado
[DE93-002684] p 2396 N93-23674
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
[AD-A259922] p 2407 N93-23710
Iron fertilization of the austral ocean: A model assessment
[MPIM-84] p 2415 N93-23860
The quasi-biennial oscillation in the middle atmosphere p 2397 N93-23965
Scenario development for the northeast United States 500 millibar height field p 2408 N93-23968
Chaos theory and its application in the atmosphere p 2398 N93-24082
The climate induced variation of the continental biosphere: A model simulation of the last glacial maximum
[AERONAUTICA-ACTA-A-366] p 2389 N93-24089
An investigation of the ERICA IOP-5A cyclone
[AD-A260214] p 2408 N93-24097
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106
Design and implementation of a computer based site operations log for the ARM Program
[DE93-002834] p 2400 N93-24255
Precipitating auroral electron flux characteristics based on UV data obtained by the AIRS experiment onboard the polar BEAR satellite
[AD-A260015] p 2401 N93-24301
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
[AD-A260288] p 2411 N93-24568
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578
Modeling of forced planetary waves in the Mars atmosphere p 2555 N93-24579
Application of ocean models for the interpretation of AGCM experiments on the climate of the last glacial maximum
[MPIM-80] p 2416 N93-24581

ATMOSPHERIC MOISTURE

Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128
Prognostic cloud water in the Los Alamos GCM
[DE93-000679] p 2404 N93-22772
The structure and energetics of Amazon squall lines p 2404 N93-23166
Ground-based microwave radiometric remote sensing of the tropical atmosphere p 2343 N93-23352
Impact of a Newtonian assimilation and physical initialization on the initialization and prediction in a tropical mesoscale model p 2394 N93-23353
Empirical determination of the effects of clouds on the Earth's Radiation Budget over the Pacific Ocean
[NASA-CR-192696] p 2401 N93-24485
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
[PB93-136117] p 2410 N93-24501
Observed annual and interannual variations in tropospheric water
[PB93-123313] p 2411 N93-24588

ATMOSPHERIC PHYSICS

Gas-Grain Simulation Facility (GGSF) p 2186 N93-22626
Atmospheric Sciences Program
[DE93-004891] p 2383 N93-22767
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment
[AD-A259986] p 2401 N93-24424

ATMOSPHERIC RADIATION

iCRCCM. Phase 2: Verification and calibration of radiation codes in climate models
[DE93-005114] p 2402 N93-22408
Design and implementation of a computer based site operations log for the ARM Program
[DE93-002834] p 2400 N93-24255

ATMOSPHERIC SCATTERING

On the hierarchy of processes contributing to equatorial spread F p 2395 N93-23595
Light extinction in the atmosphere
[DE93-005034] p 2397 N93-23978
Aerosol measurements at the South Pole during 1987
[PB93-137016] p 2390 N93-24567
Multiple molecular scattering and albedo action on the solar spectral irradiance in the region of the UVB (less than or equal to 320 nm): A preliminary inventory
[AERONOMICA-ACTA-A-363-1991] p 2558 N93-24637

ATMOSPHERIC SOUNDING

Upper-air circulation systems p 2337 N93-22138
A satellite-based Radar Wind Sounder (RAWS) p 2406 N93-23384
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
IASI (Infrared Atmospheric Sounding Interferometer): Programme objectives and status p 2364 N93-23794
Millimeter wave Atmospheric Sounder (MAS) p 2364 N93-23795
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
[FFI-92/7016] p 2398 N93-24081
A study of high-latitude auroral arcs using radar, optical, and in situ techniques p 2399 N93-24183
Aerosol measurements at the South Pole during 1987
[PB93-137016] p 2390 N93-24567
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
[AD-A260288] p 2411 N93-24568

ATMOSPHERIC TEMPERATURE

Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
[NASA-CR-192349] p 2110 N93-23108
A proposed neutral line signature
[NASA-CR-192335] p 2393 N93-23211
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period p 2405 N93-23219
Ground-based microwave radiometric remote sensing of the tropical atmosphere p 2343 N93-23352
Technical Digest. Detection systems and technology, September 1992
[AD-A259812] p 2271 N93-23670

ATMOSPHERIC TIDES

Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106

ATMOSPHERIC TURBULENCE

Stress calculation for the Sandia 34-meter wind turbine using the local circulation method and turbulent wind
[DE93-004480] p 2375 N93-22045
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
Turbulent microfronts
[AD-A260300] p 2409 N93-24265
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
[AD-A260229] p 2310 N93-24320
Actuator stroke requirements based on a Zernike decomposition of atmospheric turbulence
[DE93-007393] p 2516 N93-24449

ATMOSPHERICS

The tropical school for atmospheric and space sciences: An international project proposal p 2369 N93-23828
Analysis of DGPS MSK receivers in a non-gausian noise environment
[PB93-152866] p 2123 N93-24310

ATOMIC BEAMS

High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
[DE93-005917] p 2479 N93-22418
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
[DE93-006500] p 2228 N93-22710

ATOMIC COLLISIONS

Computer simulation of atomic collision processes in solids
[DE93-005106] p 2483 N93-23310

ATOMIC ENERGY LEVELS

Phase transitions at the fluid-solid interface in a model for the adsorption of hard spheres
[AD-A260304] p 2223 N93-24235
Effect of triplet correlations on the adsorption of a dense fluid onto a crystalline surface
[AD-A260306] p 2223 N93-24236

ATOMIC EXCITATIONS

Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions
[DE93-003478] p 2478 N93-22031
Electron transfer, ionization, and excitation in atomic collisions
[DE93-005918] p 2478 N93-22050
EXCPACK: A package of codes for electron impact excitation of ions by a distorted wave method
[DE93-006095] p 2479 N93-22525
High resolution studies of atoms and small molecules
[DE93-004340] p 2481 N93-22758

ATOMIC PHYSICS

Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis
[DE93-006123] p 2491 N93-22052
The role of the dipole-dipole interaction in the solvation of monoatomic monovalent ions on the basis of the mean spherical approximation
[AD-A260284] p 2483 N93-24234

ATOMIC SPECTRA

Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949

ATOMIC STRUCTURE

Positron studies of defected metals, metallic surfaces
[DE93-006089] p 2499 N93-22051
Metallization and insulization during impact
[DE93-004708] p 2500 N93-22420
Towards a first-principles thermodynamics of solids
[DE93-002544] p 2514 N93-22426
Local vibronic and electronic excitations of doping-induced states in the copper oxides
[DE93-003844] p 2501 N93-22429
Electronic structure studies of YBa2Cu3O(x)(6.2 less than equal to x less than or equal to 6.9) using angle resolved photoemission
[DE93-004811] p 2501 N93-22493
Synchrotron studies of narrow band materials
[DE93-006981] p 2502 N93-22526
Theoretical study of electron-phonon interaction in beta-phase NiTi and Ni-Al alloys
[DE93-004733] p 2228 N93-22738
Computer simulation of the anomalous elastic behavior of thin films and superlattices
[DE93-004154] p 2504 N93-22939
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE93-000050] p 2505 N93-22969
The ground and excited state electronic structures of ruthenium quinones and related species
[AD-A259940] p 2223 N93-24155
Compositional superlattices based on PtCl/PtBr MX materials
[DE93-003700] p 2513 N93-24496
Phase stability and electronic structure of transition-metal aluminides
[DE93-003584] p 2234 N93-24499

ATTENTION

Attention factors associated with head-up display and helmet-mounted display systems
[AD-A260204] p 2427 N93-24001

ATTENUATION COEFFICIENTS

High resolution computed tomography
[AD-A259728] p 2321 N93-23470

ATTITUDE (INCLINATION)

Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290
An overview of optical gyroscopes for navigation p 2119 N93-22783
Aircraft accident report: Air Transport International, Inc., flight 805, Douglas DC-8-63, N794AL. Loss of control and crash, Swanton, Ohio, 15 February 1992
[PB92-910406] p 2117 N93-23086
Concepts for conformal and body-axis attitude information for spatial awareness presented in a helmet-mounted display
[NASA-TM-4438] p 2129 N93-23408
Attitude awareness enhancements for the F-16 head-up display
[AD-A260280] p 2428 N93-24168

ATTITUDE CONTROL

Modal identification experiment p 2188 N93-22635
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Special approach/docking testcase results
[NASA-CR-192294] p 2180 N93-22683
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Attitude control results
[NASA-CR-192291] p 2458 N93-23084
Nonlinear attitude control of spacecraft and momentum management of control moment gyros p 2195 N93-23506

AUDIO EQUIPMENT

Gas source molecular beam epitaxial growth of GaN
[AD-A260524] p 2512 N93-24199

AUDITORY PERCEPTION

Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
[DLR-FB-92-14] p 2422 N93-24093
AudiMir: Directional hearing at microgravity p 2159 N93-24365

AUGER SPECTROSCOPY
Scattering in electron spectrometers, diagnosis, and avoidance. 1: Concentric hemispherical analysers
[NPL-DMM(A)-70] p 2218 N93-22463
Scattering in electron spectrometers, diagnosis, and avoidance. 2: Cylindrical mirror analysers
[NPL-DMM(A)-71] p 2218 N93-22464
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-105961] p 2231 N93-23418
AUGMENTATION
Effect of code augmentation or truncation on the signals produced by a time-integrating correlator
[AD-A259802] p 2264 N93-23458
AURORAL ARCS
On the dynamics of space plasma
[AD-A259898] p 2497 N93-23987
A study of high-latitude auroral arcs using radar, optical, and in situ techniques p 2399 N93-24183
AURORAL ZONES
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A259943] p 2401 N93-24322
AURORAS
Inner Magnetosphere Imager (IMI) instrument heritage
[NASA-CR-4498] p 2391 N93-22685
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere
p 2394 N93-23388
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604
Precipitating auroral electron flux characteristics based on UV data obtained by the AIRS experiment onboard the polar BEAR satellite
[AD-A260015] p 2401 N93-24301
AUSTENITIC STAINLESS STEELS
The sensitivity in eddy current testing of austenitic material
[VTT-JULK-758] p 2231 N93-23368
Damage analysis and fundamental studies for fusion reactor materials development
[DE93-008283] p 2499 N93-24516
AUSTRALIA
Environmental data sets for International Space Year activities in Australia p 2338 N93-22147
AUSTRIA
Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
[OEFZS-4632] p 2375 N93-24456
AUSTRIAN SPACE PROGRAM
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
[ESA-ISY-4] p 2154 N93-24336
The joint Austro-Soviet space project Austromir-91
p 2157 N93-24353
Flight experiences on board Space Station Mir
p 2157 N93-24355
VideoMir: Satellite video conferencing during the AustroMir spaceflight p 2158 N93-24356
Technical management and test procedures for AustroMir-1991 p 2158 N93-24357
AUTOCORRELATION
Effect of code augmentation or truncation on the signals produced by a time-integrating correlator
[AD-A259802] p 2264 N93-23458
Application of Costas codes and quadratic congruential codes to digital pulse compression
[DREO-TN-91-31] p 2271 N93-23726
AUTOMATA THEORY
Learning optimal control using learning automata
[MATHS-REPT-A-176] p 2462 N93-24078
AUTOMATED RADAR TERMINAL SYSTEM
Controller evaluation of initial terminal data link ATC services: Mini study 3
[DOT/FAA/CT-92/18] p 2262 N93-23046
AUTOMATIC CONTROL
Advances in automatic electro-optical tracking systems p 2254 N93-22020
Multi-window registration algorithm for automatic detection and tracking of moving targets
p 2255 N93-22022
A fault-tolerant intelligent robotic control system
p 2465 N93-22159
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
Towards autonomous fuzzy control
p 2450 N93-22213
Autonomous vehicle motion control, approximate maps, and fuzzy logic p 2452 N93-22219
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
[NASA-TM-108598] p 2135 N93-22226
Demonstration of automated proximity and docking technology p 2135 N93-22227
An automated system for spacecraft proximity operations p 2136 N93-22230
Six-Degree-of-Freedom Test Facility
p 2136 N93-22231
Manned versus unmanned rendezvous and capture
p 2137 N93-22234
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237
Autonomous prealignment of a docking mechanism
p 2137 N93-22238
US automated rendezvous and capture capabilities review. Remote umbilical system abstract
p 2138 N93-22239
Automated target recognition and tracking using an optical pattern recognition neural network
p 2138 N93-22240
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation
p 2138 N93-22242
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
Autonomous rendezvous and capture system design
p 2138 N93-22244
An automated rendezvous and capture system design concept for the cargo transfer vehicle and Space Station Freedom p 2146 N93-22287
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575
Space biology initiative program definition review. Trade study 1: Automation costs versus crew utilization
p 2417 N93-23070
Advancing automation and robotics technology for the Space Station Freedom and for the U.S. Economy
[NASA-TM-103895] p 2430 N93-23240
An algebra of discrete event processes
[NASA-TM-102848] p 2469 N93-23413
Autonomus obstacle avoidance using visual fixation and looming
[PB93-146660] p 2459 N93-23442
Automated manufacturing of continuous fibre composite structures for aerospace applications
p 2212 N93-23942
The strategic role of automation and robotics for Columbus utilization p 2164 N93-24389
Columbus automation testbed: A tool for users
p 2164 N93-24390
An automated method for determining mass properties
[AD-A259924] p 2428 N93-24441
AUTOMATIC FLIGHT CONTROL
Approach range and velocity determination using laser sensors and retroreflector targets p 2147 N93-22297
AUTOMATIC LANDING CONTROL
Orbiter Autoland reliability analysis
[NASA-TM-4464] p 2194 N93-23139
AUTOMATIC PILOTS
Piloting decision aid for spacecraft proximity operations p 2147 N93-22295
Bank-to-turn missiles and autopilot design
[ETN-93-93488] p 2131 N93-23373
AUTOMATIC TEST EQUIPMENT
Automated tools for testing computer system vulnerability
[PB93-146025] p 2433 N93-23273
AUTOMATION
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping
p 2259 N93-22174
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
Space Station Freedom automation and robotics: An assessment of the potential for increased productivity
[NASA-TM-108714] p 2195 N93-24149
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
[DE93-006722] p 2442 N93-24327
AUTOMOBILE ENGINES
Assessment of future natural gas vehicle concepts
[PB93-138923] p 2317 N93-24145
AUTOMOBILE FUELS
Analysis of operational, institutional and international limitations for alternative fuel vehicles and technologies: Means/methods for implementing changes
[DE93-005611] p 2312 N93-22737
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
[PB93-144350] p 2313 N93-22901
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
[PB93-144376] p 2313 N93-22902
Use of new oxygenates as gasoline components
[DE93-752864] p 2244 N93-22968
1991 CRC octane number requirement survey
[AD-A259821] p 2245 N93-23667
Assessment of future natural gas vehicle concepts
[PB93-138923] p 2317 N93-24145
A comparative analysis of alternative fuels for the INEL vehicle fleet
[DE93-007224] p 2319 N93-24256
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
[PB93-141059] p 2320 N93-24628
AUTOMOBILES
Analysis of operational, institutional and international limitations for alternative fuel vehicles and technologies: Means/methods for implementing changes
[DE93-005611] p 2312 N93-22737
Biofuels program plan, FY 1992 - 1996
[DE93-000036] p 2245 N93-23048
Semi-active suspension for automotive application
[MEMT-17] p 2316 N93-23377
An integrated car navigation system using a single processor for GPS signal processing, positioning, map display, and reporting p 2124 N93-23533
1991 CRC octane number requirement survey
[AD-A259821] p 2245 N93-23667
A demonstration of motion base design alternatives for the National Advanced Driving Simulator
[NASA-TM-103881] p 2428 N93-24490
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
[PB93-141059] p 2320 N93-24628
Structural impact simulation using program KRASH
[CRANFIELD-AERO-9010] p 2333 N93-24639
AUTONOMOUS NAVIGATION
The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
Radar seeker based autonomous navigation update system using topography feature matching techniques
p 2256 N93-22030
Driving a car with custom-designed fuzzy inferencing VLSI chips and boards p 2451 N93-22218
An autonomous rendezvous and docking system using cruise missile technologies p 2143 N93-22272
New developments in astrodynamics algorithms for autonomous rendezvous p 2144 N93-22279
An overview of autonomous rendezvous and docking system technology development at General Dynamics
p 2145 N93-22281
Autonomous docking ground demonstration (category 3) p 2145 N93-22282
Autonomous rendezvous targeting techniques for national launch system application p 2145 N93-22284
Supervised autonomous rendezvous and docking systems technology evaluations p 2146 N93-22288
A navigation and control system for an autonomous rescue vehicle in the space station environment
p 2146 N93-22289
Use of automated rendezvous trajectory planning to improve spacecraft operations efficiency
p 2146 N93-22292
Automated rendezvous and docking with video imagery p 2148 N93-22298
Office of Space Flight standard spaceborne Global Positioning System user equipment project
p 2148 N93-22301
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking
p 2151 N93-22316
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318
Autonomus obstacle avoidance using visual fixation and looming
[PB93-146660] p 2459 N93-23442
Knowledge-based vision techniques for the autonomous land vehicle program
[AD-A259801] p 2459 N93-23457
Localization and positioning using combinations of model views
[AD-A259734] p 2460 N93-23472
AUTONOMY
Multi-beam range imager for autonomous operations
p 2310 N93-22160
Control of a varying thrust spacecraft for autonomous space rendezvous p 2139 N93-22246
Autonomous rendezvous and docking operations of unmanned expendable cargo transfer vehicles (e.g. Centaur) with Space Station Freedom
p 2140 N93-22252
TRAC based sensing for autonomous rendezvous
p 2140 N93-22253
On-board fault management for autonomous spacecraft p 2140 N93-22255
LADAR vision technology for automated rendezvous and capture p 2141 N93-22258

Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware p 2141 N93-22260
Photonic correlator pattern recognition: Application to autonomous docking p 2148 N93-22303
Simulation models for autonomous rendezvous and capture p 2149 N93-22304
Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper) p 2150 N93-22311
Automatic rendezvous system testing at the Flight Robotics Laboratory p 2150 N93-22312
Visual autonomous automatic landing of airplanes p 2121 N93-22791
Petri net controllers for distributed robotic systems [NASA-CR-193196] p 2320 N93-24658

AVALANCHE DIODES
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656

AVALANCHES
Monte Carlo modeling of solid-state photoswitches [DE93-005829] p 2280 N93-22999

AVIATION PSYCHOLOGY
Human Factors Issues in Aircraft Maintenance and Inspection. Science, technology, and management: A program review
[PB93-146975] p 2427 N93-23647
The five-factor personality model and naval aviation candidates
[AD-A260227] p 2425 N93-24319

AVIONICS
The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
Rendezvous strategy impacts on CTV avionics design, system reliability requirements, and available collision avoidance maneuvers p 2139 N93-22248
An overview of autonomous rendezvous and docking system technology development at General Dynamics p 2145 N93-22281
Computer aided integrated production planning in unit production, as represented in aircraft construction
[MBB-FW-3-S-PUB-0439-A] p 2435 N93-22394
Joint University Program for Air Transportation Research, 1991-1992
[NASA-CP-3193] p 2105 N93-22561
Hazard alerting and situational awareness in advanced air transport cockpits p 2106 N93-22566
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682
Opportunities and challenges in avionics integration, INS/GPS: A case study p 2119 N93-22782
Space Generic Open Avionics Architecture (SGOAA) standard specification
[NASA-CR-188245] p 2199 N93-23003
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
[NASA-CR-192656] p 2152 N93-23033
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
[NASA-CR-184472] p 2258 N93-23176
Testing of a GPS receiver GLOBUS AN 2000 of SEL: A study of selective availability
[DLR-MITT-92-07] p 2123 N93-24138
Operator interface assessment for the sensor fusion flight demonstration program
[AD-A260235] p 2129 N93-24416

AXIAL COMPRESSION LOADS
Metallization and insulization during impact
[DE93-004708] p 2500 N93-22420

AXIAL FLOW
Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592

AXIAL STRAIN
A theoretical analysis of the effect of uniaxial elastic strain on the critical temperature of cuprate superconductors
[DE93-005710] p 2507 N93-23329
Studies in penetration mechanics
[AD-A260436] p 2332 N93-24304

AXIAL STRESS
Advanced reinforcement systems for intermetallic applications
[NASA-CR-4488] p 2209 N93-22875

AXISYMMETRIC BODIES
Evaluation of nozzle shapes for an optical flow meter
[PB93-124147] p 2292 N93-23281

AZIMUTH
Investigation of azimuthal stresses due to welding and cooldown
[DE93-005530] p 2324 N93-22708

AZOLES
Molecular control of liquid crystalline orientation of Poly (p-phenylene -2,6-benzobisoxazole) and Poly (p-phenylene -2,6-benzobisthiazole)
[AD-A259729] p 2508 N93-23471

B

BACKGROUND RADIATION
Observation of the extragalactic x ray background p 2535 N93-23892

BACKSCATTERING
Novel materials synthesis using an intense pulsed ion beam
[DE93-005470] p 2506 N93-23314
Shadow technique for improved inversion of lidar data to cirrus and contrail optical depth
[ESA-TT-1263] p 2405 N93-23332
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604
Automatic feature extraction and localization using data fusion of radar and infrared images p 2270 N93-23628
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
Scattering centre analysis of simple metallic objects
[ESA-TT-1250] p 2274 N93-24619

BACKWARD FACING STEPS
Fully implicit solutions of the benchmark backward facing step problem using finite element discretization and inexact Newton's method
[DE93-005246] p 2293 N93-23299

BACKWARD WAVE TUBES
Study of a plasma-filled X-band backward wave oscillator p 2281 N93-23498

BACTERIA
Biological production of hydrogen
[DE93-002604] p 2219 N93-22736
The design and construction of an ion trap based system for laser pyrolysis/mass spectrometry of single organic aerosol particles
[AD-A260455] p 2222 N93-24115

BALL BEARINGS
The determination of particulate contamination in miniature ball bearings
[DE93-006261] p 2316 N93-23675

BALL LIGHTNING
An experimental search for gamma radiation associated with thunderstorm activity
[DE93-006939] p 2403 N93-22584

BALLISTIC MISSILES
Dual use of distributed remote sensing satellites
[DE93-005442] p 2193 N93-22906

BALLISTICS
Concept definition study for an extremely large aerophysics range facility
[NASA-CR-4491] p 2133 N93-22987

BALLOONING MODES
Anomalous transport modelling of tokamak plasmas
[DE93-006160] p 2493 N93-22764

BALLOONS
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
[NASA-EP-285] p 2399 N93-24148

BANACH SPACE
A priori error estimates of finite element solutions of parametrized nonlinear equations
[AD-A260013] p 2471 N93-24437

BAND STRUCTURE OF SOLIDS
Synchrotron studies of narrow band materials
[DE93-006981] p 2502 N93-22526

BANDWIDTH
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
[NASA-CR-191089] p 2277 N93-22479
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
[NASA-TM-103900] p 2467 N93-22829
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors
[AD-A260532] p 2223 N93-24278
A figure of merit for Transit-Time-Limited time-derivative electromagnetic field sensors
[AD-A260016] p 2273 N93-24459

BARIUM FLUORIDES
Aspects of photoionization of impurities and electron transfer in ionic crystals
[DE93-008544] p 2513 N93-24511

BARIUM OXIDES
Phase diagram effects in rapid thermal processing of RE8a2Cu3O(7-delta)
[DE93-004445] p 2503 N93-22726

BARKHAUSEN EFFECT
Micromagnetic surface studies of materials for nondestructive evaluation
[DE93-006303] p 2321 N93-22695

BAROCLINIC INSTABILITY
Studies of baroclinic flow
[AD-A259739] p 2414 N93-23475

BAROCLINIC WAVES
Studies of baroclinic flow
[AD-A259739] p 2414 N93-23475

BARRIER LAYERS
Amorphous diffusion barriers for electronic device applications
[ETN-93-93476] p 2281 N93-23366

BARYON RESONANCE
Particle physics
[DE93-006894] p 2482 N93-22992

BASE HEATING
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
[NASA-CR-192454] p 2202 N93-22012
Base heating methodology improvements, volume 1
[NASA-CR-192455] p 2202 N93-22350
User's manual for the ALS base heating prediction code, volume 2
[NASA-CR-192457] p 2203 N93-22962
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
[NASA-CR-192456] p 2203 N93-22963

BATHYMETERS
Evaluation of the Bathyscan sweep survey system
[AD-A260162] p 2415 N93-23708
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
[DE93-005038] p 2415 N93-23979

BATTERY CHARGERS
Electric and hybrid vehicle program; Site Operator Program
[DE93-005239] p 2319 N93-24444

BAYES THEOREM
On the prior probabilities for two-stage Bayesian estimates
[DE93-006389] p 2472 N93-22593
Bayesian prediction of mean square errors with covariates
[AD-A259585] p 2470 N93-24064
Meteorological data assimilation by adaptive Bayesian optimization p 2409 N93-24272
Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
Step stress testing of receiver/transmitter units, part 1
[AD-A260182] p 2273 N93-24318
A parameter-controlled relaxation algorithm for Bayesian restoration of images using the maximum entropy method (design, analysis, Mach band simulation and parallelization)
[ISBN-0-315-64776-0] p 2444 N93-24608

BAYS (TOPOGRAPHIC FEATURES)
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
[PB93-136927] p 2387 N93-23438
ISY sea surface temperature validation test program in Mutsu Bay (Japan) p 2371 N93-23839

BCH CODES
Flexible high speed CODEC p 2287 N93-22178
Suboptimum decoding of block codes
[NASA-CR-192342] p 2437 N93-23099

BEACONS
Radiolocation of a satellite-borne LOVHF beacon p 2268 N93-23613

BEADS
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
[PB93-139087] p 2258 N93-23280

BEAM INJECTION
Alpha effects on TAE modes and alpha transport
[DE93-004160] p 2494 N93-22940
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

BEAM NEUTRALIZATION
H(-) beam neutralization measurements in a solenoidal beam transport system
[DE93-005460] p 2481 N93-22908

BEAM SPLITTERS
Design and fabrication of Dammann gratings to illuminate a time-integrating correlator
[CTN-93-60700] p 2305 N93-24650
BEAMS (SUPPORTS)
Large-amplitude forced response of dynamic systems
[AD-A260394] p 2332 N93-24426
BEARING (DIRECTION)
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders
p 2265 N93-23601
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
Bearing determination and bearing quality indication from a goniometric HF DF system p 2268 N93-23617
Relative motion pinwheel
[AD-D015629] p 2123 N93-24222
BEARINGLESS ROTORS
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
[NASA-TM-104224] p 2116 N93-24532
BEARINGS
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
[NASA-TM-105830] p 2312 N93-22826
Experimental and analytical study of a hybrid isolation system using friction controllable sliding bearings
[PB93-150282] p 2320 N93-24595
BEHAVIOR
Japanese treefrog experiment onboard the Space Station Mir p 2166 N93-24402
Investigation of effects of 60-Hz electric and magnetic fields on operant and social behavior and on the neuroendocrine system of nonhuman primates
[DE93-007678] p 2419 N93-24455
BELL AIRCRAFT
Icing cloud simulator for use in helicopter engine induction system ice protection testing
[DOT/FAA/CT-TN92/43] p 2133 N93-23087
The consequence of joint failures
p 2212 N93-23941
BEND TESTS
Bend ductility of tungsten heavy alloys
[DE93-004839] p 2232 N93-23971
BENDING
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
[DE93-005881] p 2207 N93-22410
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
[DE93-003100] p 2322 N93-22412
J-integral of circumferential crack in large diameter pipes
[DE93-003708] p 2326 N93-23050
BENDING FATIGUE
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
[DE93-003253] p 2324 N93-22721
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
[NASA-TM-106080] p 2313 N93-23019
BENDING MOMENTS
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
[DE93-003253] p 2324 N93-22721
BERYLLIUM
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
[DE93-007392] p 2485 N93-24565
BETA PARTICLES
Direct searches for neutrino mass
[DE93-003867] p 2479 N93-22068
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
BIAS
Biases in Monte Carlo eigenvalue calculations
[DE93-004189] p 2471 N93-22061
A local exponential transform method for global variance reduction in Monte Carlo transport problems
[DE92-018992] p 2468 N93-22926
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE93-000050] p 2505 N93-22969
BIBLIOGRAPHIES
Aeronautical engineering: A cumulative index to a continuing bibliography (supplement 287)
[NASA-SP-7037(287)] p 2107 N93-23038
Aeronautical engineering: A continuing bibliography with indexes (supplement 288)
[NASA-SP-7037(288)] p 2107 N93-23039
Bibliography of global change, 1992
[NASA-SP-7102] p 2342 N93-23239
Medical subject headings: Supplementary chemical records, 1993
[PB93-115244] p 2525 N93-23279
Bibliography of the Biosciences Division: 1986 to present
[DCIEM-92-20] p 2419 N93-23343
Annual bibliography, 1989
[ISBN-951-22-0488-6] p 2526 N93-23424
Microgravity science and applications: Program tasks and bibliography for FY 1992
[NASA-TM-4469] p 2253 N93-23428
The IUE archive(s) p 2535 N93-23895
ARTI refrigerant database
[DE93-006431] p 2239 N93-23949
AGRICOLA subject category codes with scope notes (modified AGRIS)
[PB93-152643] p 2528 N93-24202
List of journals indexed in AGRICOLA, 1992
[PB93-152650] p 2528 N93-24204
NASA scientific and technical publications: A catalog of special publications, reference publications, conference publications, and technical papers, 1991-1992
[NASA-SP-7063(06)] p 2529 N93-24654
BICRYSTALS
Studies of microstructure/critical current density relationships for grain boundaries in YBa2Cu3O(7-delta) bicrystals
[DE93-003000] p 2513 N93-24512
BIMETALS
Dynamics of a metal overlayer on metallic substrates: High temperature effects
[DE93-006382] p 2227 N93-22547
Chemistry of bimetallic and alloy surfaces
[DE93-006893] p 2230 N93-22981
BINARY ALLOYS
Generalized melting criterion for amorphization
[DE93-005557] p 2226 N93-22345
Postirradiation deformation behavior in ferritic Fe-Cr alloys
[DE93-004833] p 2229 N93-22881
Acceptable aluminum additions for minimal environmental effect in iron-aluminum alloys
[DE93-006738] p 2234 N93-24329
BINARY DATA
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
[NASA-TM-106079] p 2207 N93-23014
The WG sequences: Quasi perfect binary sequences
p 2271 N93-23631
BINARY FLUIDS
Phase separation under a weak concentration gradient
p 2226 N93-22853
Kinetics of diffusional droplet growth in a liquid/liquid two-phase system
[NASA-CR-192624] p 2292 N93-23220
BINARY MIXTURES
Oscillating-body viscometry and its application to phase-separating liquid mixtures p 2293 N93-23386
BINARY PHASE SHIFT KEYING
Suboptimum decoding of block codes
[NASA-CR-192342] p 2437 N93-23099
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
[DREO-CR-041LM] p 2271 N93-23729
BINARY STARS
HST imaging of the binary pulsar PSR1913+16
p 2536 N93-23902
EUV spectral features of active binaries
p 2536 N93-23904
BINAURAL HEARING
AudiMir: Directional hearing at microgravity
p 2159 N93-24365
BIOASTRONAUTICS
Space life sciences perspectives for Space Station Freedom p 2185 N93-22619
Life sciences utilization of Space Station Freedom
p 2185 N93-22622
Life sciences recruitment objectives
p 2186 N93-22623
Biomedical Monitoring and Countermeasures Facility
p 2186 N93-22624
Two techniques for measuring locomotion impact forces during zero G
[NASA-TP-3305] p 2421 N93-23410
SETI in Europe p 2429 N93-23908
BIOCHEMISTRY
Improved inhalation technology for setting safe exposure levels for workplace chemicals p 2423 N93-22164
Electron conducting adducts of water-soluble redox polyelectrolytes and enzymes
[AD-A259938] p 2241 N93-24154
BIOCONVERSION
Biological conversion of synthesis gas
[DE93-006359] p 2245 N93-24044
BIODYNAMICS
Microcomputer based software for biodynamic simulation p 2429 N93-22191
Materials dispersion and biodynamics project research
p 2192 N93-22651
An automated method for determining mass properties
[AD-A259924] p 2428 N93-24441
BIOELECTRICITY
Comparison of total body water estimates from O-18 and bioelectrical response prediction equations
[NASA-TP-3299] p 2421 N93-23734
BIOGEOCHEMISTRY
The environmental biogeochemistry of open ocean and partially enclosed marine systems p 2413 N93-23130
Carbon and biogeochemistry
[DE93-001368] p 2386 N93-23306
BIOINSTRUMENTATION
Biomedical Monitoring and Countermeasures Facility
p 2186 N93-22624
Construction and evaluation of a metal ion biosensor
[AD-A259775] p 2304 N93-23452
BIOLOGICAL EFFECTS
Laser safety training programs for a large and diverse research and development laboratory
[DE93-006291] p 2307 N93-22546
Atmospheric Sciences Program
[DE93-004891] p 2383 N93-22767
Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendocrine system of nonhuman primates
[DE93-007677] p 2417 N93-22913
Measuring variation in ecosystem sensitivity to stress
[AD-A259521] p 2387 N93-23450
The USO-concept applied to a biological model experiment p 2162 N93-24379
Japanese treefrog experiment onboard the Space Station Mir p 2166 N93-24402
Investigation of effects of 60-Hz electric and magnetic fields on operant and social behavior and on the neuroendocrine system of nonhuman primates
[DE93-007678] p 2419 N93-24455
The process of consensus on EMF: SAB review of the EPA draft document on EMF and cancer
[DE93-007183] p 2273 N93-24466
BIOLOGICAL EVOLUTION
Gas-Grain Simulation Facility (GGSF)
p 2186 N93-22626
Impact contribution of prebiotic reactants to Earth
[NASA-CR-192785] p 2552 N93-24480
BIOLOGICAL MODELS (MATHEMATICS)
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
BIOMAGNETISM
Sensory sensitivities and discriminations and their roles in aviation
[AD-A259742] p 2424 N93-23479
BIOMASS
Biofuels program plan, FY 1992 - 1996
[DE93-000036] p 2245 N93-23048
BIOMEDICAL DATA
An object-oriented database approach to the storage and use of medical data p 2526 N93-23382
BIOPOLYMERS
Photoinduced electron transfer in ordered polymers
[DE93-006784] p 2237 N93-22889
New methods and instrumentation for the characterization of biopolymers using electrospray ionization-mass spectrometry
[DE93-005100] p 2239 N93-23323
BIOPROCESSING
Materials dispersion and biodynamics project research
p 2192 N93-22651
BIOREACTORS
Apparatus and method for cellulose processing using microwave pretreatment
[NASA-CASE-MSC-21936-1-SB] p 2216 N93-22036
Biological production of hydrogen
[DE93-002604] p 2219 N93-22736
Biological conversion of synthesis gas
[DE93-006359] p 2245 N93-24044
BIOSPHERE
A gas extraction system for the measurement of carbon dioxide and carbon isotopes in polar ice cores
[DE93-005289] p 2412 N93-22225
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
BIOSYNTHESIS
Biological production of hydrogen
[DE93-002604] p 2219 N93-22736
Biological conversion of synthesis gas
[DE93-006359] p 2245 N93-24044

BIOTECHNOLOGY
Technology 2002: The Third National Technology Transfer Conference and Exposition, volume 2
[NASA-CP-3189-VOL-2] p 2560 N93-22149
Learning fuzzy information in a hybrid connectionist, symbolic model p 2453 N93-22354
Space Station Freedom Utilization Conference
[NASA-TM-108742] p 2182 N93-22606
Space Station Freedom Utilization Conference: Executive summary p 2182 N93-22607
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642
Commercial opportunities in bioseparations and physiological testing aboard Space Station Freedom p 2192 N93-22649
Biotechnical production and use of pyruvic acid with special reference to coenzyme regeneration
[VTT-PUBS-77] p 2419 N93-23369
Microgravity science and applications: Program tasks and bibliography for FY 1992
[NASA-TM-4469] p 2253 N93-23428
Construction and evaluation of a metal ion biosensor
[AD-A259775] p 2304 N93-23452
Digital mammography, cancer screening: Factors important for image compression p 2424 N93-24551

BIPOLAR TRANSISTORS
Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
[ETN-93-93421] p 2278 N93-22679
High-frequency BiCMOS transconductance integrators
[ISBN-0-315-60484-0] p 2286 N93-24612

BIPOLARITY
Design of low-voltage bipolar operational amplifiers
[ISBN-90-9004571-6] p 2280 N93-23021
GaAs-based optoelectronic neurons
[NASA-CASE-NPO-18497-1-CU] p 2464 N93-24599

BISMALEIMIDE
Polyimide from bis(n-isoprenyl)s of aryl diamides
[NASA-CASE-LAR-14330-2-CU] p 2235 N93-22033

BISMUTH ALLOYS
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
[DE93-006041] p 2230 N93-23024

BISMUTH OXIDES
Growth of precipitates in Bi2Sr2CaCu2O8
[DE93-004443] p 2502 N93-22725
Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
[DE93-004453] p 2503 N93-22728

BIVARIATE ANALYSIS
Improving the chi-squared approximation for bivariate normal tolerance regions
[NASA-TP-3304] p 2472 N93-22670

BL LACERTAE OBJECTS
Emission from relativistic jets in blazars p 2536 N93-23900
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933

BLACK HOLES (ASTRONOMY)
The two black hole problem in 3+1 general relativity: Analytical approximations and numerical solutions of the initial data p 2548 N93-23212
Endpoints of stellar evolution: The incidence of stellar mass black holes in the galaxy p 2533 N93-23882
The x ray transient GS2023+338: The 0(sup d).24 and 6(sup d).5 modulations p 2536 N93-23901

BLADE TIPS
An improved CAMRAD model for aeroelastic stability analysis of the XV-15 with advanced technology blades
[NASA-TM-4448] p 2125 N93-22486
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
[NASA-TM-105978] p 2130 N93-23013
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
[NASA-CR-191087] p 2111 N93-23431
Measurement and prediction of tip-clearance effects in a linear turbine cascade
[ISBN-0-315-68826-2] p 2130 N93-24176

BLAZARS
Emission from relativistic jets in blazars p 2536 N93-23900

BLOCK COPOLYMERS
Use of block copolymer as polymer blend compatibilizer
[AD-A260435] p 2242 N93-24417

BLOOD
Altered fluid shift dynamics with 6 days in microgravity p 2160 N93-24369

BLOOD PLASMA
Altered fluid shift dynamics with 6 days in microgravity p 2160 N93-24369

BLUFF BODIES
The effects of three-dimensional imposed disturbances on bluff body near wake flows
[AD-A259501] p 2298 N93-24311
Control of two- and three-dimensional wake instabilities from bluff-bodies
[AD-A260410] p 2299 N93-24428

BLUNT BODIES
Upwind relaxation method for hypersonic flow simulation
[DLR-FB-91-36] p 2109 N93-22659

BOATS
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810

BODIES OF REVOLUTION
Electromagnetic scattering cross sections from the bodies of revolution, volume 1
[DREV-CR-645] p 2264 N93-23342

BODY FLUIDS
Comparison of total body water estimates from O-18 and bioelectrical response prediction equations
[NASA-TP-3299] p 2421 N93-23734

BODY MEASUREMENT (BIOLOGY)
A body mass measurement device based on the oscillation principle p 2166 N93-24400

BODY SIZE (BIOLOGY)
A body mass measurement device based on the oscillation principle p 2166 N93-24400

BODY TEMPERATURE
AFTERRISE: Deep body temperature following exercise
[AD-A259887] p 2421 N93-23984

BODY-WING CONFIGURATIONS
Automatic computation of wing-fuselage intersection lines and fillet inserts with fixed-area constraint
[NASA-TM-4406] p 2108 N93-22487

BOEING 747 AIRCRAFT
A simulation of the Boeing B-747 aircraft
[CRANFIELD-AERO-9202] p 2127 N93-24074

BOLOMETERS
A bolometric radiometer for investigations in cosmology p 2303 N93-22684
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
[DE93-004784] p 2303 N93-22706

BOLTS
Optimal bolt preload for dynamic loading
[DE92-017527] p 2313 N93-22923

BOLTZMANN TRANSPORT EQUATION
Monte Carlo variance reduction approaches for non-Boltzmann tallies
[DE93-005665] p 2467 N93-22910

BOLTZMANN-VLASOV EQUATION
Hamiltonian structure of the Vlasov-Einstein system and the problem of stability for spherical relativistic star clusters
[DE93-006180] p 2546 N93-22507

BOMBER AIRCRAFT
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682

BONDING
Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
[AD-D015627] p 2241 N93-24221

BORON 10
Neutron cross section standards and instrumentation
[DE93-007675] p 2484 N93-24454

BOUNDARIES
Implementation of the block-Krylov boundary flexibility method of component synthesis
[NASA-TM-106065] p 2325 N93-23044

BOUNDARY CONDITIONS
Green's function methods in heavy ion shielding
[NASA-TP-3311] p 2485 N93-22488
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
[NASA-TM-107741] p 2324 N93-22704
Improved deterministic calculational methods for irregularly shaped shields
[DE93-004955] p 2467 N93-22795
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
[NASA-TM-103900] p 2467 N93-22829
Heat transfer simulation with a conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 2251 N93-22863
Time-stable boundary conditions for finite-difference schemes solving hyperbolic systems: Methodology and application to high-order compact schemes
[NASA-CR-191436] p 2468 N93-23126
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178
An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
[ETN-93-93703] p 2297 N93-23871
On the physical boundary conditions in the ocean/bottom acoustic interaction model
[FFI-92/7023] p 2416 N93-24091
Suspension device for low-frequency structures
[NASA-CASE-LAR-14272-1-CU] p 2169 N93-24598

BOUNDARY ELEMENT METHOD
Application of the boundary element method to finite elasticity p 2327 N93-23200
Solution of a class of Sturm-Liouville problems using the Galerkin method with global basis functions
[DE93-005156] p 2474 N93-23692
Crack deflection at bi-material interfaces
[DE93-003712] p 2332 N93-24479
Boundary element method
[ETN-93-93699] p 2333 N93-24593

BOUNDARY INTEGRAL METHOD
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
Solution of the Helmholtz-Poincare Wave Equation using the coupled boundary integral equations and optimal surface eigenfunctions
[DE93-005300] p 2470 N93-24038
Use of the conventional and tangent derivative boundary integral equations for the solution of problems in linear elasticity p 2331 N93-24121

BOUNDARY LAYER CONTROL
Swept wing attachment line contamination fence
[NASA-CASE-LAR-13400-1] p 2107 N93-22015
Active control of the separation region on a two-dimensional airfoil p 2112 N93-23589
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
[NASA-TP-3247] p 2113 N93-24118

BOUNDARY LAYER EQUATIONS
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
[NASA-CR-185677] p 2109 N93-22802

BOUNDARY LAYER FLOW
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
[NASA-TM-106056] p 2466 N93-22664
Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
[AD-A259923] p 2289 N93-22734
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
[NASA-CR-185677] p 2109 N93-22802
Stability and heat transfer in time-modulated flows
[DE93-006423] p 2293 N93-23339
Hypersonic shock/boundary-layer interaction database
[NASA-CR-177577] p 2299 N93-24526
Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
[NASA-TM-103909] p 2300 N93-24537
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
[NASA-TM-103838] p 2300 N93-24542

BOUNDARY LAYER SEPARATION
Active control of the separation region on a two-dimensional airfoil p 2112 N93-23589
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
[NASA-TP-3247] p 2113 N93-24118
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow p 2114 N93-24209
Experimental study of the separating confluent boundary-layer. Volume 2: Experimental data. Appendices A-E: Data supplement
[NASA-CR-166018-SUPPL] p 2299 N93-24531

BOUNDARY LAYER STABILITY
Swept wing attachment line contamination fence
[NASA-CASE-LAR-13400-1] p 2107 N93-22015
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402

BOUNDARY LAYER TRANSITION
Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
[AD-A259923] p 2289 N93-22734

BOUNDARY LAYERS
Improved two-equation k-omega turbulence models for aerodynamic flows
[NASA-TM-103975] p 2289 N93-22809
Tip-vortex/airframe interactions p 2111 N93-23489
The effect of large-scale unsteady motion on a turbulent reattaching shear layer: Application to the supersonic compression ramp p 2114 N93-24215
Numerical studies for the RAM accelerator
[AD-A259949] p 2224 N93-24423

BOUNDARY VALUE PROBLEMS
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
| NASA-TM-107732 | p 2108 N93-22457
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
| NASA-CR-4503 | p 2466 N93-22672
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
| AD-A260047 | p 2472 N93-23711
Numerical treatment of vertex singularities and intensity factors for mixed boundary value problems for the Laplace equation in R3
| AD-A260107 | p 2469 N93-23713
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
On the regularity of elasticity problems with piecewise analytic data
| AD-A260346 | p 2332 N93-24273
Analytical results for the electromagnetic response of a composite superconducting wire in parallel fields
| MEMO-1059 | p 2287 N93-24625
BOW WAVES
Transverse injection of liquid and gaseous fuels into subsonic/supersonic flow
| AD-A259771 | p 2111 N93-23476
BRAIDED COMPOSITES
Automated manufacturing of continuous fibre composite structures for aerospace applications p 2212 N93-23942
Viscoelastic properties of 3-D braided PEEK/graphite composites p 2214 N93-24103
BRAIN
Adaptive filters for monitoring localized brain activity from surface potential time series
| DE93-003795 | p 2420 N93-22774
Sensory sensitivities and discriminations and their roles in aviation
| AD-A259742 | p 2424 N93-23479
Theory of synaptic plasticity in visual cortex
| AD-A260052 | p 2424 N93-23960
BRAIN STEM
Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
| DLR-FB-92-14 | p 2422 N93-24093
BRANCHING (MATHEMATICS)
Large-amplitude forced response of dynamic systems
| AD-A260394 | p 2332 N93-24426
BRAYTON CYCLE
Lunar electric power systems utilizing the SP-100 reactor coupled to dynamic conversion systems
| NASA-CR-191023 | p 2377 N93-22879
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139
BRAZIL
The Brazilian contributions for the international Space Year, 1992 p 2338 N93-22148
The Mavale project: Evaluation of potential pollution sources to superficial and subterranean water resources in the Paraiba do Sul Valley, Brazil
| INPE-5318-PRE/1715 | p 2385 N93-23105
BREADBOARD MODELS
Laser docking sensor engineering model p 2139 N93-22247
Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware p 2141 N93-22260
First results of a Freon 12 capillary pumped loop p 2249 N93-22846
Design of an imaging spectrometer processing chain for space application p 2364 N93-23792
BRIDGMAN METHOD
Growth and characterization of isotopically enriched Ge-70 and Ge-74 single crystals
| DE93-004697 | p 2510 N93-24050
BRIGHTNESS
Self-amplified spontaneous emission for short wavelength coherent radiation
| DE93-004724 | p 2307 N93-22490
BRIGHTNESS TEMPERATURE
Use of Special Sensor Microwave/Imager (SSM/I) for estimation of precipitation features in a semi-arid, mountain region: A case study of southwest Saudi Arabia p 2407 N93-23721
Inter-comparison of satellite derived passive microwave ice products p 2371 N93-23836
BRILLOUIN EFFECT
Stimulated Brillouin scattering switching in mid fibers
| AD-A260456 | p 2487 N93-22948
BRITISH COLUMBIA
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903
BRITTLENESS
Mesomechanical model for fibre composites: The role of the interface
| AD-A260195 | p 2215 N93-24468
BROADBAND
Widebanding techniques for VHF antennas, 1
| AD-A259301 | p 2260 N93-22399
On using scattering statistics for ultra wideband electromagnetic target classification and identification
| DE93-003809 | p 2260 N93-22433
Self-focusing of broadband laser pulses in dispersive media
| DE93-007369 | p 2307 N93-22529
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723
BROADCASTING
Analysis of DGPS MSK receivers in a non-gausian noise environment
| PB93-152866 | p 2123 N93-24310
BROKEN SYMMETRY
Color sextet quarks and new high-energy interactions
| DE93-004187 | p 2478 N93-22059
Fundamental symmetry tests with antihydrogen
| DE93-005467 | p 2479 N93-22541
BRUNEI
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811
BSCCO SUPERCONDUCTORS
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
| DE93-003792 | p 2504 N93-22808
Superconductivity devices: Commercial use of space
| NASA-CR-192841 | p 2513 N93-24483
BUBBLES
Theoretical and pragmatic modelling of governing equations for a two-phase flow in bubbly and annular flow regimes
| DE93-004200 | p 2289 N93-22757
A study of the accuracy of neutrally buoyant bubbles used as flow tracers in air
| NASA-CR-191088 | p 2111 N93-23399
Effects of capillarity on microscopic flow in porous media
| DE93-007626 | p 2299 N93-24505
BUCKLING
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
BUDGETING
Columbus programme overview p 2155 N93-24337
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
BUFFETING
Attenuation of empennage buffet response through active control of damping using piezoelectric material
| NASA-TM-107736 | p 2110 N93-23034
BUMPERS
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
| DE93-006932 | p 2182 N93-22583
BUOYANCY
Space Station Freedom combustion research p 2190 N93-22643
Boiling under microgravity conditions p 2249 N93-22847
Surface tension and buoyancy driven Stokes flow in cavities p 2250 N93-22856
BUOYS
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
| PB93-142362 | p 2122 N93-23652
BURGER EQUATION
Incremental, quasistatic, uniaxial finite element analysis in the linear viscoelasticity theory, exemplarily demonstrated by the Burger material
| ETN-93-93422 | p 2324 N93-22680
An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
| ETN-93-93703 | p 2297 N93-23871
BURNING RATE
Modeling the heat release rate of aircraft cabin panels
| DOT/FAA/CT-92/3 | p 2118 N93-23222
BURNOUT
Spirit 2 vehicle: (A26.780). Post flight report
| AD-A259991 | p 2172 N93-24250
BUS CONDUCTORS
Investigation of the possibility of success of the Futurebus+ as a military and commercial standard in the current context, revision A
| CTN-93-60712 | p 2445 N93-22474
BYPASSES
A variable current bypass shunt for electromagnets
| DE93-004273 | p 2278 N93-22686

C

C BAND
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
| NASA-TM-106057 | p 2283 N93-23743
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
C-135 AIRCRAFT
Materials science on parabolic aircraft: The FY 1987-1989 KC-135 microgravity test program
| NASA-TM-4456 | p 2252 N93-23171
CADASTRAL MAPPING
Vineyard cadastre monitoring using remote sensed data in an integrated GIS p 2351 N93-23556
CADMIUM TELLURIDES
Polycrystalline thin films
| DE93-000070 | p 2500 N93-22336
CALCIUM FLUORIDES
Aspects of photoionization of impurities and electron transfer in ionic crystals
| DE93-008544 | p 2513 N93-24511
CALCIUM OXIDES
Growth of precipitates in Bi2Sr2CaCu2O8
| DE93-004443 | p 2502 N93-22725
Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
| DE93-004453 | p 2503 N93-22728
CALCIUM PHOSPHATES
Fabrication and properties of Si3N4 with rare earth apatite grain boundary phases
| DE93-005752 | p 2505 N93-23037
CALIBRATING
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models
| DE93-005114 | p 2402 N93-22408
Position calibration software for the form assessment of complex workpieces
| NPL-DITC-203/92 | p 2435 N93-22450
Preliminary OARE absolute acceleration measurements on STS-50
| NASA-TM-107724 | p 2182 N93-22587
Icing research tunnel rotating bar calibration measurement system
| NASA-TM-106010 | p 2303 N93-22598
Calibration, navigation, and registration of MAMS data for FIFE
| NASA-CR-108397 | p 2342 N93-22699
Investigation of hot wire anemometers at very low velocities under microgravity p 2251 N93-22858
SO2 on Venus: A final cross-calibration with Pioneer Venus
| NASA-CR-192273 | p 2554 N93-23096
NIST mesurement service for DC standard resistors
| PB93-139079 | p 2280 N93-23205
Photovoltaics Performance and Reliability Workshop
| DE93-000017 | p 2380 N93-23303
SUMS experiment flight results on STS-35
| NASA-TM-107738 | p 2201 N93-23407
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel
| NASA-TM-103920 | p 2134 N93-23420
Standardization work for the calibration of intensities of celestial objects
| NASA-CR-192831 | p 2543 N93-23502
Research in ultrasonic measurements at NIST: 1982-1992
| PB93-152064 | p 2476 N93-23682
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
Calibration of a standard transducer using a laser interferometer (TTCP calibration round-robin)
| NRC-34387 | p 2305 N93-24289
Journal of research of the National Institute of Standards and Technology, Nov. - Dec. 1992, volume 97, no. 6
| PB93-143923 | p 2571 N93-24570
CALIFORNIA
Small business profiles, 1992. Region 9: Arizona, California, Hawaii, and Nevada
| PB93-111003 | p 2521 N93-24160

CALORIMETERS
Pyroelectric anemometers and kinetic calorimeters
[PB93-141919] p 2303 N93-23230
CAMERAS
Electro-optic frame photography with pulsed ruby illumination
[DE93-005819] p 2306 N93-22327
Autonomus obstacle avoidance using visual fixation and looming
[PB93-146660] p 2459 N93-23442
Comparison of mapping with different satellite images p 2348 N93-23540
Microtopography of manganese crusts
[PB93-120830] p 2398 N93-23996
CANADA
An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
[ORAE-R107] p 2133 N93-23114
NTIA Terrain Data Base System Documentation (Program DUMPTERS, Extract and Terndi). Version 4.0, October 1992
[PB93-108330] p 2343 N93-23254
The Canadian mobile satellite system p 2275 N93-23515
Early results on the use of ERS-1 SAR data for real-time sea ice monitoring in Canadian waters p 2359 N93-23762
Activities of the Institute for Mechanical Engineering
[NRC-33578] p 2319 N93-24287
Activities of the Industrial Materials Institute
[NRC-34380] p 2207 N93-24288
CANADIAN SPACE PROGRAM
Canadian Space Agency Space Station Freedom utilization plans p 2185 N93-22617
Canadian Earth observation program p 2373 N93-23847
CANCELLATION CIRCUITS
A leakage canceller for a single antenna radar
[ETN-93-93495] p 2264 N93-23379
CANCER
The process of consensus on EMF: SAB review of the EPA draft document on EMF and cancer
[DE93-007183] p 2273 N93-24466
Digital mammography, cancer screening: Factors important for image compression p 2424 N93-24551
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590
CANONICAL FORMS
The canonical forms of a lattice rule
[DE93-005686] p 2466 N93-22759
CANOPIES (VEGETATION)
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
CANTILEVER BEAMS
The effects of delamination on the vibrational characteristics of composite structural elements p 2210 N93-23202
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
[AD-A260119] p 2329 N93-23700
CAPACITANCE
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
[NASA-TM-105978] p 2130 N93-23013
A capacitance-based proximity sensor for whole arm obstacle avoidance
[DE93-006773] p 2463 N93-24331
CAPACITANCE-VOLTAGE CHARACTERISTICS
Advanced dielectrics for passivation of InSb
[DE93-005353] p 2501 N93-22503
CAPACITORS
High-voltage failure mechanisms in liquid-filled, Fluorinert FC-40, capacitors
[DE93-006286] p 2282 N93-23677
Dielectric for the supercapacitors
[AD-A260124] p 2283 N93-24072
Processing of patterned ferroelectric capacitors
[AD-A259936] p 2284 N93-24131
A capacitance-based proximity sensor for whole arm obstacle avoidance
[DE93-006773] p 2463 N93-24331
CAPILLARY FLOW
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation p 2251 N93-22857
Thermocapillary instabilities in the presence of a homogeneous magnetic field p 2252 N93-22865
Stability and instability of thermocapillary convection in models of the float-zone crystal-growth process
[NASA-CR-192695] p 2252 N93-23122
Inexpensive capillary discharge x ray laser driver
[AD-A260388] p 2310 N93-24276
Effects of capillarity on microscopic flow in porous media
[DE93-007626] p 2299 N93-24505
CAPILLARY TUBES
First results of a Freon 12 capillary pumped loop p 2249 N93-22846
Design manual for two-phase components of spacecraft thermal management systems
[AD-A260027] p 2196 N93-24439
CARBOHYDRATES
Apparatus and method for cellulose processing using microwave pretreatment
[NASA-CASE-MSC-21936-1-SB] p 2216 N93-22036
CARBON
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
[NASA-CR-192704] p 2516 N93-22469
Optical and scratch resistant properties of diamondlike carbon films deposited with single and dual ion beams
[NASA-TM-105943] p 2206 N93-22586
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
[DE93-005061] p 2383 N93-22602
Lightweight solar concentrator structures, phase 2
[NASA-CR-191068] p 2203 N93-22674
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae p 2547 N93-23208
Carbon and biogeochemistry
[DE93-001368] p 2386 N93-23306
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates p 2395 N93-23493
Plasma treatment of glass surfaces
[AD-D015619] p 2241 N93-24229
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
[DE93-007392] p 2485 N93-24565
CARBON CYCLE
Carbon and biogeochemistry
[DE93-001368] p 2386 N93-23306
Iron fertilization of the austral ocean: A model assessment
[MPIM-84] p 2415 N93-23860
The climate induced variation of the continental biosphere: A model simulation of the last glacial maximum
[AERONAUTICA-ACTA-A-366] p 2389 N93-24089
CARBON DIOXIDE
A gas extraction system for the measurement of carbon dioxide and carbon isotopes in polar ice cores
[DE93-005289] p 2412 N93-22225
Combustion-related studies using weakly-bonded complexes
[DE93-005250] p 2217 N93-22415
Measurements of surface ocean carbon dioxide partial pressure during WOCE
[DE93-006890] p 2412 N93-22580
Oceanic CO measurements for the WOCE Hydrological Survey in the Pacific Ocean: Shipboard Alkalinity analyses during 1991 and 1992
[DE93-006900] p 2412 N93-22581
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
[DE93-005061] p 2383 N93-22602
Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852
Investigation and study scenarios to introduce CO2 fixation technologies in the energy sector
[DE93-761912] p 2378 N93-22958
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
[DE93-002347] p 2384 N93-22972
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
[DE93-004800] p 2220 N93-22989
The implications of concurrent increases in temperature and CO2 concentration for terrestrial C3 photosynthesis
[DE93-005590] p 2385 N93-23035
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
[DE93-006091] p 2386 N93-23301
On the cold start problem in transient simulations with coupled atmosphere-ocean models
[MPIM-83] p 2397 N93-23859
CARBON DIOXIDE CONCENTRATION
The implications of concurrent increases in temperature and CO2 concentration for terrestrial C3 photosynthesis
[DE93-005590] p 2385 N93-23035
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
[DE93-006091] p 2386 N93-23301
CARBON DIOXIDE LASERS
CO2 laser beam propagation with ZnSe optics
[DE93-002927] p 2308 N93-23307
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295
CARBON DIOXIDE REMOVAL
Iron fertilization of the austral ocean: A model assessment
[MPIM-84] p 2415 N93-23860
CARBON FIBER REINFORCED PLASTICS
Development and production of sandwich rods with load transmitting elements carrying high tension and compression loads
[DLR-FB-91-33] p 2208 N93-22657
Experimental investigation of consolidation of thermoplastic tape using laser energy p 2212 N93-23944
CARBON FIBERS
Finite element analysis of a composite artificial ankle p 2423 N93-22189
Gel time measurements on carbon fiber/epoxy resin prepregs
[ICAS-90-4-10-4] p 2210 N93-23400
The diffusion of lead toward the interface of a rapidly solidified carbon fiber reinforced aluminum-lead matrix composite p 2210 N93-23719
Mesomechanical model for fibre composites: The role of the interface
[AD-A260195] p 2215 N93-24468
CARBON MONOXIDE
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
[PB93-144350] p 2313 N93-22901
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
[PB93-144376] p 2313 N93-22902
The generation of carbon monoxide in compartment fires p 2117 N93-23093
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
CARBON STEELS
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
[DE93-007971] p 2234 N93-24566
CARBON 13
A gas extraction system for the measurement of carbon dioxide and carbon isotopes in polar ice cores
[DE93-005289] p 2412 N93-22225
CARBON 14
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
CARBON-CARBON COMPOSITES
Ceramic matrix composites (continuous fiber reinforced) thermal protection systems p 2177 N93-22112
CARBONATES
Non-proprietary stack research
[DE93-007523] p 2376 N93-22535
CARBONYL COMPOUNDS
Processable precursors to high performance liquid crystalline polymers
[AD-A260466] p 2240 N93-24116
CARCINOGENS
The process of consensus on EMF: SAB review of the EPA draft document on EMF and cancer
[DE93-007183] p 2273 N93-24466
CARDIOGRAPHY
Cardiovascular stress test with non-invasive techniques p 2165 N93-24399
CARDIOLOGY
Nonlinear dynamics research in the former Soviet Union
[PB93-146496] p 2333 N93-24571
CARDIOVASCULAR SYSTEM
Monitoring of cardiovascular parameters during the AustroMir space flight p 2160 N93-24367
CARGO
Autonomous rendezvous and docking operations of unmanned expendable cargo transfer vehicles (e.g. Centaur) with Space Station Freedom p 2140 N93-22252
On-board fault management for autonomous spacecraft p 2140 N93-22255
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
CARGO SPACECRAFT
Cargo vehicle architecture options p 2172 N93-22082
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236

Thruster configurations for maneuvering heavy payloads p 2150 N93-22313
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318

CARRIER FREQUENCIES
Structure and utility of blind speed intervals associated with Doppler measurements of range rate
|DOT/FAA/CT-TN92/27| p 2122 N93-23063
Irregular media effects on radiowave signals used in navigation and positioning systems p 2266 N93-23606

CARRIER TRANSPORT (SOLID STATE)
Basic studies of 3-5 high efficiency cell components
|DE92-010563| p 2382 N93-24432

CASCADE FLOW
Problems on numerical analysis relating to gas turbines
|DE93-753796| p 2130 N93-24002
Measurement and prediction of tip-clearance effects in a linear turbine cascade
|ISBN-0-315-68826-2| p 2130 N93-24176

CASSINI MISSION
Cassini/Huygens: A mission to Saturn and Titan p 2539 N93-23918
Data compression for the Cassini radio and plasma wave instrument p 2432 N93-24555

CASTING
Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
|AD-D015627| p 2241 N93-24221

CATACLYSMIC VARIABLES
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891

CATALOGS (PUBLICATIONS)
Department of Energy new technology
|DE92-041170| p 2522 N93-22058
COSMIC software catalog, 1993
|NASA-CR-191005| p 2434 N93-22205
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
|PB93-138469| p 2556 N93-23334
List of journals indexed in AGRICOLA, 1992
|PB93-152650| p 2528 N93-24204
Publications Office of Science and Technology: Catalog
|PB93-152577| p 2529 N93-24560
NASA scientific and technical publications: A catalog of special publications, reference publications, conference publications, and technical papers, 1991-1992
|NASA-SP-7063(06)| p 2529 N93-24654

CATALYSIS
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
|DE93-005917| p 2479 N93-22418
Chemistry of bimetallic and alloy surfaces
|DE93-006893| p 2230 N93-22981
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
|DE93-004800| p 2220 N93-22989
Design of gasifiers to optimize fuel cell systems
|DE93-000219| p 2379 N93-23049
Photopromoted and thermal decomposition of nitric oxide by metal oxides
|AD-A259766| p 2224 N93-24422
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
|ECL-91-21| p 2225 N93-24623

CATALYSTS
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
Correlations between surface structure and catalytic activity/selectivity
|DE93-005884| p 2217 N93-22423
Methane oxidation over dual redox catalysts
|DE92-012454| p 2217 N93-22431
Computer-aided design of molecular catalysts for alkane oxidation using dodeca-substituted iron porphyrins
|DE93-004046| p 2218 N93-22520
Biological production of hydrogen
|DE93-002604| p 2219 N93-22736
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
|DE93-004800| p 2220 N93-22989
Design of gasifiers to optimize fuel cell systems
|DE93-000219| p 2379 N93-23049
High octane ethers from synthesis gas-derived alcohols
|DE93-006476| p 2245 N93-24031
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
|AD-A259889| p 2242 N93-24321
Photopromoted and thermal decomposition of nitric oxide by metal oxides
|AD-A259766| p 2224 N93-24422
Direct catalytic decomposition of nitric oxide
|DE93-008107| p 2389 N93-24515
Design of a high activity and selectivity alcohol catalyst
|DE93-008100| p 2225 N93-24575
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
|ECL-91-21| p 2225 N93-24623
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
|PB93-141059| p 2320 N93-24628

CATALYTIC ACTIVITY
Design of gasifiers to optimize fuel cell systems
|DE93-000219| p 2379 N93-23049
Photopromoted and thermal decomposition of nitric oxide by metal oxides
|AD-A259766| p 2224 N93-24422

CATHODES
100-kW class applied-field MPD thruster component wear
|NASA-TM-106023| p 2203 N93-22482
Non-proprietary stack research
|DE93-007523| p 2376 N93-22535
Reversible potassium vanadium bronze cathodes (K(x)V6O(13+y)) with various potassium to vanadium ratios
|CTN-93-60709| p 2285 N93-24291

CATHODOLUMINESCENCE
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292

CAVITIES
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
|NASA-TM-105914| p 2125 N93-22588
Surface tension and buoyancy driven Stokes flow in cavities p 2250 N93-22856
Well-posedness of a model for structural acoustic coupling in a cavity enclosed by a thin cylindrical shell
|NASA-CR-191439| p 2473 N93-22878
Cavities in He-implanted Si: Internal surface science
|DE93-005340| p 2509 N93-24012

CAVITY FLOW
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
|NASA-TM-4436| p 2110 N93-22876

CCD STAR TRACKER
A Star Pattern Recognition Sensor (SPRS) of high accuracy: A contribution to new possibilities of autonomous attitude determination p 2201 N93-23532

CELESTIAL BODIES
Near-earth object interception workshop summary
|DE93-003793| p 2546 N93-22403
Standardization work for the calibration of intensities of celestial objects
|NASA-CR-192831| p 2543 N93-23502
Life in and from space p 2161 N93-24373

CELESTIAL MECHANICS
A mechanism for capture into resonance
|PB93-145761| p 2469 N93-23648

CELESTIAL SPHERE
Asteroid detection and monitoring using a satellite-borne visible scanner
|AD-A259797| p 2543 N93-23455

CELLS (BIOLOGY)
Computer based analysis and synthesis of retinal function
|AD-A260514| p 2423 N93-24420

CELLULOSE
Apparatus and method for cellulose processing using microwave pretreatment
|NASA-CASE-MSC-21936-1-SB| p 2216 N93-22036

CENSORED DATA (MATHEMATICS)
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
|AD-A260047| p 2472 N93-23711

CENTAUR LAUNCH VEHICLE
An overview of autonomous rendezvous and docking system technology development at General Dynamics p 2145 N93-22281
An integrated autonomous rendezvous and docking system architecture using Centaur modern avionics p 2147 N93-22293

CENTER OF GRAVITY
Thruster configurations for maneuvering heavy payloads p 2150 N93-22313
Preliminary OARE absolute acceleration measurements on STS-50
|NASA-TM-107724| p 2182 N93-22587

CENTER OF MASS
An automated method for determining mass properties
|AD-A259924| p 2428 N93-24441

CENTRAL NERVOUS SYSTEM
Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
|DLR-FB-92-14| p 2422 N93-24093
Theory of synaptic plasticity in visual cortex
|AD-A260322| p 2422 N93-24238

CENTRAL PROCESSING UNITS
Remotely piloted vehicle control and interface system
|AD-D015618| p 2132 N93-24228

CENTRIFUGES
Research opportunities with the Centrifuge Facility p 2187 N93-22627
Action of an acceleration field on premixed methane/air flames p 2226 N93-22838

CEPSTRAL ANALYSIS
A new passive SSL technique for HF radiolocation p 2267 N93-23609

CERAMIC COATINGS
Metallo-organic solution deposition of ferroelectric PZT films
|AD-A260127| p 2502 N93-22549
Development of fire protective coatings for GRP composites using plasma deposition technology, phase 2
|DREA-CR-91-453| p 2239 N93-23121
Textured coatings from colloidal suspensions of faceted oxide microcrystals
|DE93-006601| p 2240 N93-24033

CERAMIC FIBERS
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
|NASA-TM-105939| p 2206 N93-22590
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
|DE93-006420| p 2214 N93-24030

CERAMIC MATRIX COMPOSITES
Application of neutron diffraction technology to the determination of residual strain in engineering composites
|DE93-004249| p 2207 N93-22066
Ceramic matrix composites (continuous fiber reinforced) thermal protection systems p 2177 N93-22112
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
|DE93-005881| p 2207 N93-22410
Development of an interfacial test system for the determination of interfacial properties in fiber reinforced ceramic composites
|DE93-006743| p 2236 N93-22579
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
|DE93-005473| p 2210 N93-23246
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
|AD-A260129| p 2210 N93-23703
X-ray computed tomography for advanced materials and processes
|AD-A259828| p 2213 N93-23953
Thermally induced micromechanical stresses in ceramic/ceramic composites
|DE93-004860| p 2239 N93-23974
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
|DE93-006420| p 2214 N93-24030

CERAMICS
Rigid fibrous ceramics for entry systems p 2177 N93-22117
Nonintrusive temperature measurements on advanced turbomachinery components
|DE93-005478| p 2302 N93-22326
Evaluation of ceramic materials for an advanced steam-methane reformer
|DE93-005931| p 2235 N93-22329
A round-robin for particle electrophoresis standardization
|DE93-003018| p 2217 N93-22400
Overview of Advanced Turbine Systems Program
|DE93-003193| p 2311 N93-22413
Structure, stoichiometry and stability in magnetoplumbite and (beta)-alumina type ceramics
|DE93-007303| p 2236 N93-22528
Metallo-organic solution deposition of ferroelectric PZT films
|AD-A260127| p 2502 N93-22549
Factors influencing the thermal shock behavior of ceramics
|DE93-005762| p 2236 N93-22690
Influence of addition elements in copper or implanted in aluminum on the adhesion to the solid state of the copper/aluminum (Cu/Al2O3) system
|ECL-91-34| p 2228 N93-22698
Gas separation with glass membranes
|DE93-000217| p 2219 N93-22871

Microstructure of rapidly-solidified lithium powders
[DE93-004765] p 2229 N93-22880
Charge trapping centers in ferroelectric ceramics
[DE93-005359] p 2238 N93-22954
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
[NASA-TM-105978] p 2130 N93-23013
Statistical process control program at a ceramics vendor facility
[DE93-006043] p 2238 N93-23025
Patch testing of ceramic barrier filters
[DE93-005017] p 2315 N93-23294
High temperature filter materials
[DE93-005018] p 2315 N93-23295
High-pressure ceramic air heater for indirectly fired gas turbine applications
[DE93-005022] p 2315 N93-23296
Novel materials synthesis using an intense pulsed ion beam
[DE93-005470] p 2506 N93-23314
Boundary film for structural ceramic materials
[DE93-004871] p 2240 N93-23975
Silicon nitride containing rare earth silicate intergranular phases
[DE93-006624] p 2509 N93-24034
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
[DE93-004716] p 2330 N93-24051
Crystal chemistry of ceramic/mineral systems
[AD-A260440] p 2241 N93-24193
Application of microwave heating for fabrication of silicon nitride ceramics
[DE93-006741] p 2242 N93-24330
Organosilicon compounds and polymers and silicon ceramics
[AD-A260056] p 2242 N93-24408
Ion beam modification of ceramics: Mechanical properties and structure
[AD-A260504] p 2242 N93-24419
Obtaining high-resolution images of ceramic from 3-D x-ray microtomography by region-of-interest reconstruction
[DE93-006796] p 2243 N93-24461
Gas separations using ceramic membranes
[DE93-003204] p 2225 N93-24498

CEREBRAL CORTEX
Theory of synaptic plasticity in visual cortex
[AD-A260322] p 2422 N93-24238

CERIUM OXIDES
Pilot demonstration of cerium oxide coated anodes
[DE93-002507] p 2231 N93-23316

CERMETS
Pilot demonstration of cerium oxide coated anodes
[DE93-002507] p 2231 N93-23316

CERTIFICATION
Space assembled entry systems certification p 2176 N93-22106
Icing cloud simulator for use in helicopter engine induction system ice protection testing
[DOT/FAA/CT-TN92/43] p 2133 N93-23087
The role of fatigue testing in the design, development, and certification of the ATR 42/72
[ETN-93-93704] p 2127 N93-23969

CESIUM FLUORIDES
Aspects of photoionization of impurities and electron transfer in ionic crystals
[DE93-008544] p 2513 N93-24511

CESIUM 137
A new approach for helium backfilling and leak testing seal-welded capsules in a hot cell
[DE93-004519] p 2317 N93-24049
Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
[OEFZS-4632] p 2375 N93-24456

CHANGE DETECTION
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
NASA's upper atmosphere research satellite: A program to study global ozone change p 2357 N93-23750

CHANNEL FLOW
Tests of random flight and closure models in predicting turbulent scalar transport
[DE93-004123] p 2288 N93-22521
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
Bottom generated velocity fluctuations in one-dimensional open channel flow
[MEMO-1051] p 2297 N93-23865
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
[AD-A260556] p 2298 N93-24282
Determination and characteristics of the transition to two-phase slug flow in small channels
[DE93-004250] p 2299 N93-24434

CHANNELS (DATA TRANSMISSION)
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
[ACTA-POL-SCAND-EL-69] p 2264 N93-23367
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761

CHAOS
Topological organization of (low-dimensional) chaos
[DE93-003693] p 2514 N93-22753
Controlling chaos in spark-ignition engines
[DE93-005754] p 2312 N93-22761
Chaotic dynamics in accelerator physics
[DE93-004600] p 2515 N93-22766
Taming chaotic circuits
[AD-A259495] p 2439 N93-23449
Chaotic dynamics of the solar cycle
[AD-A260039] p 2557 N93-23644
Chaos theory and its application in the atmosphere p 2398 N93-24082
A global approach to parameter estimation of chaotic dynamical systems
[AD-A259932] p 2463 N93-24130
Spatial development of chaos in an open flow system p 2515 N93-24293
Stochastic inflation and inflationary density fluctuations p 2473 N93-24457

CHARACTER RECOGNITION
Effectiveness of feature and classifier algorithms in character recognition systems
[PB93-147197] p 2525 N93-23272
When networks disagree: Ensemble methods for hybrid neural networks
[AD-A260121] p 2460 N93-23701
Development of laser radar ATR algorithm. Phase 2: Military objects
[AD-A237544] p 2272 N93-24120
Editing images of text
[PB93-149896] p 2443 N93-24576
Machine-assisted human classification of segmented characters for optical character recognition testing and training
[PB93-152155] p 2529 N93-24631

CHARACTERIZATION
Comparison of anemometers for turbulence characterization
[DE93-004336] p 2302 N93-22338
Lunar science measurements and instruments for resource characterization
[DE93-005436] p 2553 N93-22905
Electrical characterization of conducting polymers and polymeric semiconductor devices
[ACTA-POL-SCAND-PH-178] p 2238 N93-23006

CHARGE CARRIERS
The study of polyether solvation mechanisms using UV/visible spectroscopy
[AD-A260355] p 2241 N93-24170

CHARGE COUPLED DEVICES
Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180
MOMS-02P: A modular optical system for Earth land cover observation in the multisensor environment of the Priroda/Mir mission p 2365 N93-23796
New images of the Earth in highest resolution: MOMS-02 on the second German Spacelab mission D2 p 2365 N93-23801
The detection and amplification processes in low light level cameras with CCD and image intensifier
[FFI-92/7017] p 2490 N93-24646

CHARGE DISTRIBUTION
Transport in amorphous semiconductors p 2506 N93-23101

CHARGE EXCHANGE
Negative ion detachment cross sections
[DE93-005679] p 2483 N93-23328

CHARGE TRANSFER
Joint services electronics program. Basic research in electronics (JSEP)
[AD-A259598] p 2283 N93-24068
Charge transfer processes on liquid/liquid interfaces: The first hundred years
[AD-A260421] p 2225 N93-24429

CHARGED PARTICLES
In-situ characterization of growth and interfaces in a-Si:H devices
[DE93-000051] p 2504 N93-22928
Motion of charged particles in pulsar magnetospheres p 2550 N93-24161
The role of the dipole-dipole interaction in the solvation of monoatomic monovalent ions on the basis of the mean spherical approximation
[AD-A260284] p 2483 N93-24234
Distribution of trapped electrons at interface states in ACTFEL devices
[AD-A260396] p 2484 N93-24427

CHARM (PARTICLE PHYSICS)
Charm physics at Fermilab E791
[DE93-006020] p 2480 N93-22543

CHARTS
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
[AD-A260363] p 2409 N93-24239

CHECKOUT
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
[NASA-CR-192656] p 2152 N93-23033
Process and event abstraction for debugging distributed programs
[ISBN-0-315-51884-7] p 2444 N93-24607

CHEMICAL ANALYSIS
An x ray scatter approach for non-destructive chemical analysis of low atomic numbered elements p 2485 N93-22184
Lunar science measurements and instruments for resource characterization
[DE93-005436] p 2553 N93-22905
Analysis of acid precipitation samples collected by state agencies
[PB93-144152] p 2386 N93-23276
Proceedings of the 15th Annual EPA Conference on Analysis of Pollutants in the Environment
[PB93-152601] p 2388 N93-23681
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
[AD-A258453] p 2233 N93-23982
High resolution digital thermometer
[PAT-APPL-7-831-603] p 2304 N93-24172

CHEMICAL BONDS
Local vibronic and electronic excitations of doping-induced states in the copper oxides
[DE93-003844] p 2501 N93-22429
Luminescence and picosecond photo-induced absorption of polyaniline
[AD-A260002] p 2242 N93-24436

CHEMICAL COMPOSITION
Predictive sensor method and apparatus p 2305 N93-22202
Metallization and insulization during impact
[DE93-004708] p 2500 N93-22420
Measurements of surface ocean carbon dioxide partial pressure during WOCE
[DE93-006890] p 2412 N93-22580
Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendocrine system of nonhuman primates
[DE93-007677] p 2417 N93-22913
Aerosol phase transformation in the atmosphere
[DE93-001903] p 2384 N93-22936
Thermal diffusivity measurement of diamond materials
[AD-A260431] p 2238 N93-22947
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949
Characterization of SAES St198 zirconium-iron-tin alloy
[DE93-005697] p 2230 N93-23036
Polybenzoxazoles via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 2207 N93-23077
Analysis of acid precipitation samples collected by state agencies
[PB93-144152] p 2386 N93-23276
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
[PB93-136117] p 2410 N93-24501

CHEMICAL COMPOUNDS
Medical subject headings: Supplementary chemical records, 1993
[PB93-115244] p 2525 N93-23279

CHEMICAL ELEMENTS
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949

CHEMICAL EQUILIBRIUM
Molecular control of liquid crystalline orientation of Poly (p-phenylene -2,6-benzobisoxazole) and Poly (p-phenylene -2,6-benzobisthiazole)
[AD-A259729] p 2508 N93-23471

CHEMICAL EVOLUTION
Workshop on chemical weathering on Mars, part 2
[NASA-CR-192261] p 2554 N93-23192

Exobiology and terrestrial life p 2166 N93-24405
Impact contribution of prebiotic reactants to Earth
| NASA-CR-192785 | p 2552 N93-24480

CHEMICAL LASERS
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
| AD-A260181 | p 2308 N93-23315
Selective reactivity, ultrafast energy transfer and the development of chemically pumped visible lasers
| AD-A260123 | p 2309 N93-24071
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
| ONERA-P-1992-3 | p 2309 N93-24137

CHEMICAL PROPERTIES
Molecular properties and fate of organic chemicals
| AD-A260090 | p 2207 N93-24412
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
| PB93-136117 | p 2410 N93-24501

CHEMICAL PROPULSION
A reactor-pumped laser as primary power for nuclear rocket engines
| DE93-005342 | p 2203 N93-22501
Space chemical propulsion test facilities at NASA Lewis Research Center
| NASA-TM-106050 | p 2204 N93-23405

CHEMICAL REACTIONS
Solar reforming applications study summary
| DE93-002286 | p 2244 N93-22424
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
| DE93-007013 | p 2218 N93-22515
Pressure-reaction synthesis of titanium composite materials
| PB93-135036 | p 2208 N93-22591
Atmospheric Sciences Program
| DE93-004891 | p 2383 N93-22767
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
| DE93-007258 | p 2219 N93-22824
Polybenzoxazoles via aromatic nucleophilic displacement
| NASA-CASE-LAR-14606-1-CU | p 2207 N93-23077
Chemical kinetics and photochemical data for use in stratospheric modeling
| NASA-CR-192795 | p 2392 N93-23124
Plasma edge diagnostics p 2495 N93-23261
Direct conversion of light hydrocarbon gases to liquid fuel
| DE93-004916 | p 2245 N93-23321
Comparison of different synthetic routes for sulfonation of polyaniline
| AD-A259662 | p 2222 N93-23658
Selective reactivity, ultrafast energy transfer and the development of chemically pumped visible lasers
| AD-A260123 | p 2309 N93-24071
Hypersonic shock/boundary-layer interaction database
| NASA-CR-177577 | p 2299 N93-24526
Simulation of the formation and transport of ozone in the atmospheric boundary layer
| ESA-TT-1243 | p 2402 N93-24615

CHEMICAL REACTORS
MHD seed recovery/regeneration, phase 2
| DE93-006008 | p 2493 N93-22769
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
| DE93-007258 | p 2219 N93-22824
Thermodynamic and stochastic theory of hydrodynamic and power-producing processes
| DE93-006891 | p 2515 N93-23028

CHEMICAL VAPOR INFILTRATION
Chemical vapor infiltration with microwave heating
| DE93-005458 | p 2243 N93-24445

CHEMISORPTION
Chemistry of bimetallic and alloy surfaces
| DE93-006893 | p 2230 N93-22981

CHESAPEAKE BAY (US)
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
| PB93-136927 | p 2387 N93-23438

CHILDREN
Space research as a tool to acquaint children and young people with science and technology p 2370 N93-23831

CHINA
Chinese research on shock physics
| PB93-134450 | p 2474 N93-22080
Chinese research on underwater acoustics
| PB93-134468 | p 2476 N93-23229

CHIPS
A three channel telemetry system p 2180 N93-22162

CHIPS (ELECTRONICS)
Driving a car with custom-designed fuzzy inferencing VLSI chips and boards p 2451 N93-22218
Design and qualification of the SEU/TD Radiation Monitor chip
| NASA-CR-192797 | p 2280 N93-23041
A review of optically controlled microwave devices and circuits
| AD-A259647 | p 2282 N93-23656
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259706 | p 2282 N93-23665
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133

CHIRP SIGNALS
Measurements of the direction of arrival of an oblique chirp sounder signal p 2268 N93-23616

CHLORINE OXIDES
Millimeter wave Atmospheric Sounder (MAS) p 2364 N93-23795

CHLOROFLUOROCARBONS
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
| DE93-002347 | p 2384 N93-22972
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products
| PB93-131449 | p 2385 N93-23267
Solubility, viscosity and density of refrigerant/lubricant mixtures
| DE93-007809 | p 2243 N93-24506

CHLOROPHYLLS
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
| DE93-006411 | p 2419 N93-24028

CHOLESKY FACTORIZATION
Partitioning a chordal graph into transitive subgraphs for parallel sparse triangular solution
| DE93-006614 | p 2446 N93-22512

CHROMIUM ALLOYS
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
| NASA-TM-105961 | p 2231 N93-23418

CHROMIUM STEELS
Postirradiation deformation behavior in ferritic Fe-Cr alloys
| DE93-004833 | p 2229 N93-22881
Nondestructive evaluation of electrodeposited chromium
| AD-A259884 | p 2321 N93-24020

CHROMOSPHERE
Stellar lyman alpha emission and the local interstellar medium
| NASA-CR-192635 | p 2541 N93-22381
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664

CHRONOLOGY
A direct mathematical approach to optimize the age-depth relation of deep-sea sediment cores
| MPIM-77 | p 2414 N93-23636

CIRCADIAN RHYTHMS
Study of SCN neurochemistry using in vivo microdialysis in the conscious brain: Correlation with circadian activity rhythms
| AD-A259803 | p 2421 N93-23459

CIRCUIT BOARDS
Study and development of a multiprocessor interface circuit (thesis annex), volume 2
| ECL-91-11-VOL-2 | p 2446 N93-22676

CIRCUITS
On-line process analysis innovation: DiComp (tm) shunting dielectric sensor technology p 2287 N93-22200
A sparse architecture low power gated integrator for use with germanium gamma ray spectrometers in remote geochemistry measurements
| DE93-004769 | p 2303 N93-22491
A variable current bypass shunt for electromagnets
| DE93-004273 | p 2278 N93-22686
Analysis and correction of noise on electronic circuits in an accelerator environment
| DE93-004816 | p 2280 N93-23319
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
| AD-A259829 | p 2281 N93-23433
Taming chaotic circuits
| AD-A259495 | p 2439 N93-23449
Asynchronous design for parallel processing architectures
| AD-A259776 | p 2448 N93-23453
Immunizing digital systems against electromagnetic interference
| DE93-005935 | p 2271 N93-24041
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259520 | p 2285 N93-24302
Infrared vacuum soldering process for thick-film hybrid microcircuits
| DE93-007483 | p 2285 N93-24451

CIRRUS CLOUDS
Shadow technique for improved inversion of lidar data to cirrus and contrail optical depth
| ESA-TT-1263 | p 2405 N93-23332
Modeling of cloud/radiation processes for tropical anvils
| AD-A260203 | p 2410 N93-24470

CISLUNAR SPACE
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
| NASA-CR-185171 | p 2205 N93-24536

CITIES
Analysis of operational, institutional and international limitations for alternative fuel vehicles and technologies: Means/methods for implementing changes
| DE93-005611 | p 2312 N93-22737
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903
Use of satellite data and GIS for evaluating urban environment p 2354 N93-23572

CIVIL AVIATION
An artificial intelligence-based structural health monitoring system for aging aircraft p 2465 N93-22185
Optimal recovery from microburst wind shear p 2107 N93-22574
Activities report of Lufthansa German Airlines
| ETN-93-93465 | p 2117 N93-23004
The atmospheric effects of stratospheric aircraft
| NASA-RP-1293 | p 2385 N93-23057
Safety study: Alcohol and other drug involvement in fatal general aviation accidents, 1983 through 1988
| PB92-917008 | p 2117 N93-23187
Aircraft accident report: United Airlines flight 585, Boeing 737-291, N999UA, uncontrolled collision with terrain for undetermined reasons, 4 miles south of Colorado Springs Municipal Airport, Colorado Springs, Colorado, 3 March 1991
| PB92-910407 | p 2117 N93-23191
The future role of satellite communications in an improved air traffic management p 2275 N93-23518
TCAS 2: Report on UK operational trial
| CAA-PAPER-92011 | p 2122 N93-24105
Aircraft fire protection system
| CA-PATENT-1-296-970 | p 2118 N93-24592

CLADDING
Transversely polarized source cladding for an optical fiber
| NASA-CASE-LAR-14652-1-SB | p 2486 N93-22039

CLASSIFICATIONS
On using scattering statistics for ultra wideband electromagnetic target classification and identification
| DE93-003809 | p 2260 N93-22433
Classification of TM data as a contribution to remote sensing for a hydrological run-off model p 2341 N93-22448
US Geological Survey library classification system
| PB93-129708 | p 2525 N93-23256
Neural network methods for analysis of remotely-sensed satellite data p 2353 N93-23566
Assessment of actual land use by means of an integrated LIS p 2353 N93-23568
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm p 2354 N93-23576
Time dependent classification of features with a nonlinear, dynamic network
| VTT-PUBS-83 | p 2448 N93-23868
Face recognition with neural networks
| AD-A259587 | p 2462 N93-24066
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
| DLR-FB-92-10 | p 2374 N93-24140
Distance metric between 3D models and 2D images for recognition and classification
| AD-A260069 | p 2463 N93-24313
A novel recursive partitioning criterion
| AD-A259921 | p 2464 N93-24564

CLASSIFIERS
Effectiveness of feature and classifier algorithms in character recognition systems
| PB93-147197 | p 2525 N93-23272
Pattern classifier for health monitoring of helicopter gearboxes
| NASA-TM-106099 | p 2316 N93-23741

CLATHRATES
Structure and dynamics in low dimensional guest-host solids
|DE93-006498| p 2504 N93-22887
CLAYS
High performance nanocomposite desiccation materials
|PB93-127025| p 2223 N93-24210
CLEAN FUELS
A comparative analysis of alternative fuels for the INEL vehicle fleet
|DE93-007224| p 2319 N93-24256
CLEANERS
Non-chromated surface pretreatments for aluminum
|AD-A260130| p 2232 N93-23704
CLEANING
Development of the nested fiber filter
|DE93-005015| p 2315 N93-23322
CLEANLINESS
Printed wiring assembly cleanliness
|DE93-006040| p 2277 N93-22524
CLEARANCES
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
|NASA-TM-105978| p 2130 N93-23013
Measurement and prediction of tip-clearance effects in a linear turbine cascade
|ISBN-0-315-68826-2| p 2130 N93-24176
CLIMATE
A prompt start: Implementing the framework convention on climate change
|DE93-005062| p 2383 N93-22716
A convective drag theory for surface fluxes
|DE93-004037| p 2403 N93-22722
CHAMMP
|AD-A260190| p 2403 N93-22765
Atmospheric Sciences Program
|DE93-004891| p 2383 N93-22767
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
|DE93-000690| p 2405 N93-23305
Carbon and biogeochemistry
|DE93-001368| p 2386 N93-23306
Climate variability in a coupled GCM. Part 1: The tropical pacific
|MPIM-73| p 2407 N93-23633
Methods for analyzing extreme events under climate change
|PB93-146827| p 2387 N93-23651
Programmes and strategy for the World Meteorological Organization with respect to Earth observation from space p 2372 N93-23842
General circulation model output for forest climate change research and applications
|PB93-124626| p 2388 N93-24015
Chaos theory and its application in the atmosphere p 2398 N93-24082
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
|AD-A260363| p 2409 N93-24239
Empirical determination of the effects of clouds on the Earth's Radiation Budget over the Pacific Ocean
|NASA-CR-192696| p 2401 N93-24485
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
|PB93-136117| p 2410 N93-24501
Aerosol measurements at the South Pole during 1987
|PB93-137016| p 2390 N93-24567
CLIMATE CHANGE
The Finnish research programme on climate change
|DE93-752870| p 2383 N93-22597
A prompt start: Implementing the framework convention on climate change
|DE93-005062| p 2383 N93-22716
Prognostic cloud water in the Los Alamos GCM
|DE93-000679| p 2404 N93-22772
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
|DE93-002347| p 2384 N93-22972
The implications of concurrent increases in temperature and CO2 concentration for terrestrial C3 photosynthesis
|DE93-005590| p 2385 N93-23035
Bibliography of global change, 1992
|NASA-SP-7102| p 2342 N93-23239
Water temperature characteristics of lakes subjected to climate change
|PB93-135648| p 2385 N93-23265
Global Climate Change Response Program: A mid-course evaluation
|PB93-146355| p 2387 N93-23427
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation p 2407 N93-23495
Methods for analyzing extreme events under climate change
|PB93-146827| p 2387 N93-23651
The Earth Observing System p 2356 N93-23749
Satellite-borne Earth observations in the framework of German global change research p 2357 N93-23755
Meteosat second generation enhanced visible-IR imager SEVIRI and its environmental monitoring potential p 2362 N93-23780
Broadband imaging spectrometer technology and its use potential for environmental change mission p 2364 N93-23791
NOAA participation in ISY Earth science and other activities p 2366 N93-23805
Innovative interactive Earth systems science courseware for middle and high school students p 2334 N93-23823
GEOSCOPE: An interactive global change encyclopedia p 2370 N93-23833
Integrated global environmental (global change) data activities support researchers and educators p 2370 N93-23834
New developments in the coordination of Earth observation from space activities: The role of the Committee on Earth Observations Satellites (CEOS) p 2372 N93-23844
NASDA's Earth observing programs and the contribution to resolving global environment programs p 2372 N93-23846
A snow cover model for global climatic simulations
|MPIM-85| p 2388 N93-23861
Effects of UV-B and global climate change on rice
|PB93-135622| p 2388 N93-23874
General circulation model output for forest climate change research and applications
|PB93-124626| p 2388 N93-24015
World Meteorological Organization
|WMO-774| p 2408 N93-24061
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
|PB93-146082| p 2389 N93-24334
Analysis and synthesis of models for effects of climate change on agricultural systems
|DE93-007949| p 2389 N93-24521
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
|PB93-146090| p 2390 N93-24645
CLIMATOLOGY
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
|PB93-123909| p 2412 N93-22067
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Calibration, navigation, and registration of MAMS data for FIFE
|NASA-CR-108397| p 2342 N93-22699
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
|NASA-CR-192772| p 2413 N93-22700
CHAMMP
|AD-A260190| p 2403 N93-22765
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
|NASA-CR-192805| p 2414 N93-23138
Global Climate Change Response Program: A mid-course evaluation
|PB93-146355| p 2387 N93-23427
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
Methods for analyzing extreme events under climate change
|PB93-146827| p 2387 N93-23651
Climatological probability of cloud-free line-of-sight
|AD-A260139| p 2407 N93-23706
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
|AD-A259922| p 2407 N93-23710
A snow cover model for global climatic simulations
|MPIM-85| p 2388 N93-23861
Effects of UV-B and global climate change on rice
|PB93-135622| p 2388 N93-23874
General circulation model output for forest climate change research and applications
|PB93-124626| p 2388 N93-24015
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
|AD-A260363| p 2409 N93-24239
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
|PB93-146082| p 2389 N93-24334
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
|PB93-136117| p 2410 N93-24501
Climatology of station storm rainfall in the continental United States: Parameters of the Bartlett-Lewis and Poisson rectangular pulses models
|NASA-CR-192968| p 2411 N93-24523
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
|AD-A260288| p 2411 N93-24568
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
|PB93-146090| p 2390 N93-24645
CLOSED CIRCUIT TELEVISION
Employing lighting techniques during on-orbit operations p 2151 N93-22319
CLOSED ECOLOGICAL SYSTEMS
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
Zero-G life support for Space Station Freedom p 2189 N93-22640
Ecosystems on Earth and in space (the possible utilization of artificial ecosystems for space life support systems) p 2167 N93-24406
CLOSURE LAW
Navier-Stokes computation of compressible turbulent flows with a second order closure, part 1
|NASA-CR-192287| p 2288 N93-22604
CLOUD COVER
Estimation of partial cloud cover within a pixel p 2335 N93-22127
Climatological probability of cloud-free line-of-sight
|AD-A260139| p 2407 N93-23706
The use of the Air Force cloud cover data to evaluate and improve cloud forecast and parameterization in mesoscale meteorology models
|AD-A260357| p 2409 N93-24171
Effects of cloud cover on satellite positioning
|AD-A260032| p 2409 N93-24252
Equatorial atmospheric weather regimes: Their structure and role p 2411 N93-24580
CLOUD PHYSICS
Local Lightning Early Warning System (LLEWS), phase 1
|DE93-006609| p 2403 N93-22595
Design and implementation of a computer based site operations log for the ARM Program
|DE93-002834| p 2400 N93-24255
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
|PB93-136117| p 2410 N93-24501
CLOUDS
Observations and modeling of the dust and gas in an isolated diffuse interstellar cloud p 2549 N93-23722
CLOUDS (METEOROLOGY)
Investigation of cloud/water vapor motion winds from geostationary satellite
|NASA-CR-192274| p 2403 N93-22653
Prognostic cloud water in the Los Alamos GCM
|DE93-000679| p 2404 N93-22772
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period p 2405 N93-23219
Climatological probability of cloud-free line-of-sight
|AD-A260139| p 2407 N93-23706
Meteo Disc: Satellite cloud motion presentation by interactively controlled video disc for research, teaching, and training p 2371 N93-23835
Empirical determination of the effects of clouds on the Earth's Radiation Budget over the Pacific Ocean
|NASA-CR-192696| p 2401 N93-24485
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
|PB93-136117| p 2410 N93-24501
CLUSTER ANALYSIS
Two generalizations of Kohonen clustering p 2449 N93-22207
Possibilistic clustering for shape recognition p 2450 N93-22208
Adaptive fuzzy system for 3-D vision p 2451 N93-22216

CLUSTERS
Implications of defect clusters formed in cascades on free defect generation and microstructural development
| DE93-005551 | p 2500 N93-22344
Peculiarities of structures and meltinglike transition in gold clusters
| DE93-004810 | p 2228 N93-22741

CLUTTER
Optimal three-dimensional matched filter processing for detection of point-like moving objects in clutter
| AD-A259727 | p 2487 N93-23469
Development of laser radar ATR algorithm. Phase 2: Military objects
| AD-A237544 | p 2272 N93-24120
Suppression of power line harmonic interference in HF surface-wave radar
| AD-A259917 | p 2273 N93-24563

CMOS
Low-voltage-swing CMOS transceivers
| DE93-006607 | p 2277 N93-22511
Design and qualification of the SEU/TD Radiation Monitor chip
| NASA-CR-192797 | p 2280 N93-23041
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259706 | p 2282 N93-23665
Processing of patterned ferroelectric capacitors
| AD-A259936 | p 2284 N93-24131
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259520 | p 2285 N93-24302
Microelectronic and micromechanical sensors and actuators in CMOS technology: A novel scheme toward s regularization and integration
| ISBN-0-315-60192-2 | p 2305 N93-24609
The SSIMT: A CMOS based magnetic sensor
| ISBN-0-315-60334-8 | p 2305 N93-24610
High-frequency BiCMOS transconductance integrators
| ISBN-0-315-60484-0 | p 2286 N93-24612

COAL
Design of gasifiers to optimize fuel cell systems
| DE93-000219 | p 2379 N93-23049
Test requirements for coal-tar mixtures on airport pavements
| DOT/FAA/RD-92-27 | p 2134 N93-23137

COAL DERIVED GASES
Heavy duty gas turbine combustion tests with simulated low BTU coal gas
| DE93-005078 | p 2315 N93-23297
High octane ethers from synthesis gas-derived alcohols
| DE93-006476 | p 2245 N93-24031

COAL GASIFICATION
Design of gasifiers to optimize fuel cell systems
| DE93-000219 | p 2379 N93-23049
High temperature filter materials
| DE93-005018 | p 2315 N93-23295
Heavy duty gas turbine combustion tests with simulated low BTU coal gas
| DE93-005078 | p 2315 N93-23297
Gas separations using ceramic membranes
| DE93-003204 | p 2225 N93-24498

COAL UTILIZATION
Patch testing of ceramic barrier filters
| DE93-005017 | p 2315 N93-23294
High-pressure ceramic air heater for indirectly fired gas turbine applications
| DE93-005022 | p 2315 N93-23296

COASTAL CURRENTS
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
Numerical simulation and prediction of coastal ocean circulation p 2416 N93-24178

COASTAL PLAINS
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24006

COASTAL WATER
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
| PB93-108090 | p 2404 N93-23090
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
| PB93-136927 | p 2387 N93-23438
ISY sea surface temperature validation test program in Mutsu Bay (Japan) p 2371 N93-23839
Numerical simulation and prediction of coastal ocean circulation p 2416 N93-24178

COASTAL ZONE COLOR SCANNER
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
| PB93-136604 | p 2343 N93-23278

COASTS
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
| PB93-136927 | p 2387 N93-23438
Ocean governance: A new vision
| PB93-136299 | p 2416 N93-24144

COATING
Rust transformation/rust compatible primers p 2244 N93-22182
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
| DE93-005533 | p 2237 N93-22909
Low-damage multilayer mirror for the soft x ray region
| AD-D015621 | p 2489 N93-24231
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
| DE93-007392 | p 2485 N93-24565

COATINGS
Conductive paints
| DE93-006511 | p 2236 N93-22713
Current performance and potential improvements in solar thermal industrial heat
| DE93-000048 | p 2377 N93-22927

COAXIAL CABLES
Traceability for radio frequency coaxial line standards
| NPL-DES-114 | p 2277 N93-22451

COBALT
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
| DE93-004203 | p 2502 N93-22523
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films p 2505 N93-23100
Microtopography of manganese crusts
| PB93-120830 | p 2398 N93-23996

COBALT OXIDES
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films p 2505 N93-23100

COCKPITS
User areas in aircraft cockpit, using methods of rapid prototype development
| MBB-FE-315-S-PUB-0493 | p 2426 N93-22389
Hazard evaluation and operational cockpit display of ground-measured windshear data
| AIAA PAPER 90-0566 | p 2105 N93-22564
Hazard alerting and situational awareness in advanced air transport cockpits p 2106 N93-22566
Aircraft accident report: Air Transport International, Inc., flight 805, Douglas DC-8-63, N794AL. Loss of control and crash, Swanton, Ohio, 15 February 1992
| PB92-910406 | p 2117 N93-23086

CODERS
A low-delay backward-adaptive CELP speech coder
| ISBN-0-315-60461-1 | p 2274 N93-24618

CODES
AGRICOLA subject category codes with scope notes (modified AGRIS)
| PB93-152643 | p 2528 N93-24202

CODING
Flexible high speed CODEC p 2287 N93-22178
The effects of display and response codes on information processing in an identification task
| AD-A259531 | p 2427 N93-23451
Delivery of information from Earth observation satellites p 2350 N93-23549

COEFFICIENTS
Application and development of wavelet analysis
| AD-A260389 | p 2489 N93-24240

COENZYMES
Biotechnical production and use of pyruvic acid with special reference to coenzyme regeneration
| VTT-PUBS-77 | p 2419 N93-23369

COGENERATION
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
| DE92-001290 | p 2378 N93-22934
Evaluation of diurnal thermal energy storage combined with cogeneration systems
| DE93-004798 | p 2378 N93-22966
The Westinghouse solid oxide fuel cell program: Clean, efficient energy for the future
| DE93-003487 | p 2380 N93-23287

COGNITION
Investigation of cognition acquisition using natural language conversational process
| MBB-FE-315-S-PUB-0498 | p 2435 N93-22391
The effects of display and response codes on information processing in an identification task
| AD-A259531 | p 2427 N93-23451
An ontology of knowledge graphs
| MEMO-1049 | p 2441 N93-24063
What makes a good feature?
| AD-A259962 | p 2463 N93-24249
CogiMir: A study of cognitive functions in microgravity p 2159 N93-24364

COGNITIVE PSYCHOLOGY
On the neural substrates leading to the emergence of mental operational structures p 2453 N93-22355
CogiMir: A study of cognitive functions in microgravity p 2159 N93-24364

COHERENT LIGHT
Application of 10 GeV electron driven x ray laser in gamma ray laser research
| DE93-003775 | p 2308 N93-22773

COHERENT RADAR
LADAR vision technology for automated rendezvous and capture p 2141 N93-22258
Structure and utility of blind speed intervals associated with Doppler measurements of range rate
| DOT/FAA/CT-TN92/27 | p 2122 N93-23063
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
| AD-A259834 | p 2343 N93-23461

COHERENT RADIATION
Experimental demonstration of high resolution three-dimensional x ray holography
| DE93-004178 | p 2302 N93-22072
Self-amplified spontaneous emission for short wavelength coherent radiation
| DE93-004724 | p 2307 N93-22490

COHESION
Role of interfaces on the ductile fracture process of discontinuous fiber reinforced composites
| DE93-004464 | p 2209 N93-22973

COLD FLOW TESTS
A full-scale STOVL ejector experiment
| NASA-TM-106019 | p 2129 N93-22480

COLD PLASMAS
The cold ionized shell around the old nova DQ Herculis p 2543 N93-23964

COLD TOLERANCE
Sustaining health and performance in the cold: A pocket guide to environmental medicine aspects of cold-weather operations
| AD-A259625 | p 2422 N93-24021

COLD WEATHER
Sustaining health and performance in the cold: A pocket guide to environmental medicine aspects of cold-weather operations
| AD-A259625 | p 2422 N93-24021

COLLECTION
Survey of aviation medical examiners: Information and attitudes about the pre-employment and pre-appointment drug testing program
| DOT/FAA/AM-92/15 | p 2422 N93-24088

COLLISION AVOIDANCE
Fuzzy logic path planning system for collision avoidance by an autonomous rover vehicle p 2451 N93-22217
An automated system for spacecraft proximity operations p 2136 N93-22230
Rendezvous strategy impacts on CTV avionics design, system reliability requirements, and available collision avoidance maneuvers p 2139 N93-22248
Collision avoidance for CTV: Requirements and capabilities p 2147 N93-22294
A berthing and fastening strategy for orbital replacement units p 2151 N93-22317
TCAS 2: Report on UK operational trial
| CAA-PAPER-92011 | p 2122 N93-24105
Off-shore platform identification signs
| CAA-PAPER-92006 | p 2123 N93-24124
Ground proximity warning system for use with aircraft having degraded performance
| CA-PATENT-1-295-716 | p 2118 N93-24200
A capacitance-based proximity sensor for whole arm obstacle avoidance
| DE93-006773 | p 2463 N93-24331

COLLISIONAL PLASMAS
Inexpensive capillary discharge x ray laser driver
| AD-A260388 | p 2310 N93-24276
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
| PB93-146215 | p 2499 N93-24606

COLLISIONS
Aircraft accident report: United Airlines flight 585, Boeing 737-291, N999UA, uncontrolled collision with terrain for undetermined reasons, 4 miles south of Colorado Springs Municipal Airport, Colorado Springs, Colorado, 3 March 1991
| PB92-910407 | p 2117 N93-23191
The two black hole problem in 3+1 general relativity: Analytical approximations and numerical solutions of the initial data p 2548 N93-23212
New analysis of KrF picosecond pulse experiment
| DE93-003805 | p 2308 N93-23290
The space debris environment for remote sensing satellites p 2199 N93-23809
Gamma ray bursts from extragalactic sources p 2535 N93-23893

On colliding plane gravitational waves coupled with fluid motions
|MATHS-REPT-A-161| p 2398 N93-24060
The collision of gravitational waves in a stiff perfect fluid
|MATHS-REPT-A-179| p 2398 N93-24080
Orbiting space debris: Dangers, measurement and mitigation
|AD-A260533| p 2196 N93-24279

COLLOCATION
Trajectory optimization based on differential inclusion
|NASA-CR-4501| p 2181 N93-22459

COLLOIDS
A round-robin for particle electrophoresis standardization
|DE93-003018| p 2217 N93-22400
The influence of gravity on the equilibrium and the growth of tenuous structures p 2249 N93-22851
Textured coatings from colloidal suspensions of faceted oxide microcrystals
|DE93-006601| p 2240 N93-24033

COLOR
Color sextet quarks and new high-energy interactions
|DE93-004187| p 2478 N93-22059
A vector signal processing approach to color
|AD-A259499| p 2487 N93-23465

COLOR PHOTOGRAPHY
High resolution stereo images from the Space Station Mir p 2365 N93-23800

COLOR TELEVISION
A study of video frame rate on the perception of moving imagery detail p 2431 N93-24552

COLOR VISION
A vector signal processing approach to color
|AD-A259499| p 2487 N93-23465
Apparent opacity affects perception of structure from motion
|AD-A260099| p 2488 N93-24054

COLORADO
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
|PB93-110997| p 2521 N93-24557

COLUMBUS SPACE STATION
European research plans p 2185 N93-22618
Activities report of the Norwegian Space Center
|ETN-93-93540| p 2570 N93-23107
Columbus program: Ground staff training simulation
|ETN-93-93694| p 2194 N93-23415
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
|ESA-ISY-4| p 2154 N93-24336
Columbus programme overview p 2155 N93-24337
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
JEM program status p 2155 N93-24339
Columbus precursor Spacelab missions p 2155 N93-24341
Payload operations for precursor mission E-1 p 2155 N93-24342
The role of the APM centre to support Columbus precursor flights p 2156 N93-24344
Selection of astronauts for European space missions p 2156 N93-24345
Training facilities at the Crew Training Complex p 2156 N93-24347
Microgravity Advanced Research and Support (MARS) Center update p 2161 N93-24375
Telescience opportunities in the precursor flights p 2161 N93-24376
COMPASS: A computerized payload operations support system for Columbus p 2161 N93-24377
The USO-concept applied to a biological model experiment p 2162 N93-24379
User support for the Columbus precursor missions p 2162 N93-24380
Definition of a European promotion concept p 2162 N93-24381
Training concept for crew, end user, and ground centre personnel in the Columbus utilisation programme p 2162 N93-24382
Information handling as task layer of Columbus user support p 2163 N93-24383
Fluid science users requirements p 2163 N93-24385
Columbus payload requirements in human physiology p 2163 N93-24386
The strategic role of automation and robotics for Columbus utilization p 2164 N93-24389
Columbus automation testbed: A tool for users p 2164 N93-24390
Italian payload development status for Columbus p 2164 N93-24392
CEBAS-Aquarack: An artificial aquatic animal plant ecosystem as a tool for basic research in the Columbus Space Station p 2166 N93-24401

COLUMNS (PROCESS ENGINEERING)
Response of a non-viscous liquid column with anchored liquid surface to axial excitation
|LRT-WE-9-FB-4-1991| p 2288 N93-22677
Marangoni convection in a spinning liquid column
|LRT-WE-9-FB-13-1991| p 2289 N93-22678

COMBAT
Trail maneuver generation and selection in the Paladin tactical decision generation system
|NASA-TM-107722| p 2131 N93-23088

COMBINATORIAL ANALYSIS
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
|AD-A259711| p 2440 N93-23638
Probability and statistics applied to the theory of algorithms
|AD-A259956| p 2473 N93-24248

COMBUSTIBLE FLOW
Simulation of a particle-laden combustion flow in an MHD second stage combustor
|DE93-004244| p 2491 N93-22065
Experimental and numerical investigation of hydrogen combustion in a supersonic flow p 2223 N93-24212

COMBUSTION
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
Combustion-related studies using weakly-bonded complexes
|DE93-005250| p 2217 N93-22415
The scientific microgravity fluid mechanics program of ZARM p 2247 N93-22832
Electrically driven convection p 2247 N93-22837
Practical problems related to flammability and combustion in space p 2226 N93-22839
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854
Sandia combustion research technical review, 1992
|DE93-006399| p 2220 N93-23027
Heavy duty gas turbine combustion tests with simulated low BTU coal gas
|DE93-005078| p 2315 N93-23297
Laser excitation and chemi-ionization of combustion species
|AD-A260120| p 2224 N93-24414

COMBUSTION CHAMBERS
Simulation of a particle-laden combustion flow in an MHD second stage combustor
|DE93-004244| p 2491 N93-22065
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
Contribution to the study of soot formation in combustion environments by optical methods based on light diffusion
|ECL-91-26| p 2218 N93-22697
Exhaust emissions from diesel engines
|DE93-752852| p 2384 N93-22805
Shock tunnel studies of scramjet phenomena, supplement 6
|NASA-CR-191428| p 2289 N93-22817
Sandia combustion research technical review, 1992
|DE93-006399| p 2220 N93-23027
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
|PB93-138915| p 2297 N93-24141

COMBUSTION CHEMISTRY
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
|DE93-007258| p 2219 N93-22824
Spectroscopy and kinetics of combustion gases at high temperatures
|DE93-006892| p 2221 N93-23340
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
|PB93-132702| p 2222 N93-23347
Reacting liquid monopropellant sprays: Experiments with high velocity full cone sprays in 33 MPa, 500 C nitrogen
|AD-A259799| p 2245 N93-23456

COMBUSTION EFFICIENCY
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
Experimental and numerical investigation of hydrogen combustion in a supersonic flow p 2223 N93-24212

COMBUSTION PHYSICS
Combustion-related studies using weakly-bonded complexes
|DE93-005250| p 2217 N93-22415
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642
Space Station Freedom combustion research p 2190 N93-22643
Controlling chaos in spark-ignition engines
|DE93-005754| p 2312 N93-22761
Analysis of upward flame spread
|DE93-752850| p 2257 N93-22770
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
|DE93-007258| p 2219 N93-22824
Fluids in Space
|ESA-SP-353| p 2246 N93-22830
Annual progress report, 1990-1991
|CTN-93-60695| p 2570 N93-23115
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
|PB93-132702| p 2222 N93-23347
High resolution measurements of mixing and reaction processes in turbulent flows
|AD-A259952| p 2298 N93-24246

COMBUSTION PRODUCTS
Contribution to the study of soot formation in combustion environments by optical methods based on light diffusion
|ECL-91-26| p 2218 N93-22697
Exhaust emissions from diesel engines
|DE93-752852| p 2384 N93-22805
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
|PB93-144350| p 2313 N93-22901
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
|PB93-144376| p 2313 N93-22902
The atmospheric effects of stratospheric aircraft
|NASA-RP-1293| p 2385 N93-23057
The generation of carbon monoxide in compartment fires p 2117 N93-23093
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
Formation and control of combustion pollutants from gasoline-fueled spark-ignition motor vehicle engines
|PB93-141042| p 2314 N93-23275
Taguchi methods applied to oxygen-enriched diesel engine experiments
|DE93-004873| p 2317 N93-23976

COMBUSTION STABILITY
Simulation of a particle-laden combustion flow in an MHD second stage combustor
|DE93-004244| p 2491 N93-22065
Combustion-related studies using weakly-bonded complexes
|DE93-005250| p 2217 N93-22415
Numerical studies for the RAM accelerator
|AD-A259949| p 2224 N93-24423

COMBUSTION TEMPERATURE
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073

COMETS
Near-earth object interception workshop summary
|DE93-003793| p 2546 N93-22403
Studies of extra-solar OORT clouds and the Kuiper disk
|NASA-CR-192759| p 2555 N93-22476
Reports of planetary astronomy - 1991
|NASA-TM-4459| p 2542 N93-23055
The German space science programme p 2536 N93-23903
Mini-satellite exploration of very near Earth space fuel objects
|DE93-005253| p 2195 N93-24057
Temporal and spatial inhomogeneities in comets p 2551 N93-24188
Impact contribution of prebiotic reactants to Earth
|NASA-CR-192785| p 2552 N93-24480

COMMAND AND CONTROL
A fault-tolerant intelligent robotic control system p 2465 N93-22159
The impact on organization structure on team decision making under stress and uncertainty
|AD-A259831| p 2519 N93-23434

Wrench for installing an electrical connector
| AD-D015625 | p 2318 N93-24220

COMMERCE
Introduction to Space Station Freedom

Personal communications satellite service system
p 2275 N93-23521
Global Earth observation using modern communications satellite techniques p 2276 N93-23527
Fleet management based on satellite positioning and communication p 2276 N93-23531
VideoMir: Satellite video conferencing during the AustroMir spaceflight p 2158 N93-24356

COMPANION STARS
GX301-2/WRA9777 revisited: Probing the stellar wind through x ray optical data p 2537 N93-23911

COMPARISON
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
| DE93-006041 | p 2230 N93-23024

COMPARTMENTS
The generation of carbon monoxide in compartment fires p 2117 N93-23093

COMPATIBILITY
Compatibility of refrigerants and lubricants with elastomers
| DE93-007808 | p 2237 N93-22729
Materials compatibility and lubricants research on CFC-refrigerant substitutes
| DE93-007806 | p 2237 N93-22915
Space biology initiative program definition review. Trade study 6: Space Station Freedom/spacelab modules compatibility
| EEI-89-236 | p 2418 N93-23081
ARTI refrigerant database
| DE93-006431 | p 2239 N93-23949
Use of block copolymer as polymer blend compatibilizer
| AD-A260435 | p 2242 N93-24417
Compatibility of refrigerants and lubricants with engineering plastics
| DE93-007826 | p 2243 N93-24507
User's guide to Flexible Membrane Liner Advisory Expert System, Flex version 3.0
| PB93-134872 | p 2259 N93-24559

COMPENSATORS
Synthesis of robust controllers p 2107 N93-22573

COMPETITION
The Eighth National Space Symposium
| ISBN-0-9616962-5-7 | p 2153 N93-23156
Industry perspectives p 2154 N93-23162

COMPILERS
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
| AD-A259711 | p 2440 N93-23638
CONVEX mini manual
| NASA-TM-107564-REV | p 2433 N93-24594

COMPLEX SYSTEMS
Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper)
p 2150 N93-22311
Aircraft engine reliability analysis using lower confidence limit estimate procedures
| AD-A260386 | p 2131 N93-24271
Analysis of complex systems using neural networks
| DE93-003541 | p 2464 N93-24514

COMPONENT RELIABILITY
Laser docking sensor engineering model
p 2139 N93-22247
Aircraft engine reliability analysis using lower confidence limit estimate procedures
| AD-A260386 | p 2131 N93-24271

COMPOSITE MATERIALS
Application of neutron diffraction technology to the determination of residual strain in engineering composites
| DE93-004249 | p 2207 N93-22066
Mars transfer vehicle studies p 2173 N93-22088
Entry Systems Panel deliberations
p 2176 N93-22105
Thermal protection systems for all-weather reusable launch vehicles p 2176 N93-22109
Coupled multi-disciplinary composites behavior simulation
| NASA-TM-106011 | p 2322 N93-22481
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043
Airframe materials
| ISBN-0-919086-32-2 | p 2211 N93-23935
An overview of materials testing in DND
p 2213 N93-23946
High performance nanocomposite desiccation materials
| PB93-127025 | p 2223 N93-24210
Ion beam modification of ceramics: Mechanical properties and structure
| AD-A260504 | p 2242 N93-24419
Chemical vapor infiltration with microwave heating
| DE93-005458 | p 2243 N93-24445
Crack deflection at bi-material interfaces
| DE93-003712 | p 2332 N93-24479

COMPOSITE STRUCTURES
Application of neutron diffraction technology to the determination of residual strain in engineering composites
| DE93-004249 | p 2207 N93-22066
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
Coupled multi-disciplinary composites behavior simulation
| NASA-TM-106011 | p 2322 N93-22481
Propagation of elastic waves through inhomogeneous, anisotropic materials
| DE93-006247 | p 2288 N93-22509
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
| NASA-TM-105267 | p 2325 N93-23015
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017
High Temperature Composite Analyzer (HITCAN) programmer's manual. Version 1.0
| NASA-TM-106004 | p 2326 N93-23056
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
Modeling the heat release rate of aircraft cabin panels
| DOT/FAA/CT-92/3 | p 2118 N93-23222
High Temperature Composite Analyzer (HITCAN) demonstration manual, version 1.0
| NASA-TM-106003 | p 2328 N93-23411
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
| NASA-CR-190783 | p 2210 N93-23429
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
| NASA-CR-191422 | p 2211 N93-23877
Automated manufacturing of continuous fibre composite structures for aerospace applications
p 2212 N93-23942
A review of design and manufacturing methodologies for stiffened composite panels used in aircraft
p 2128 N93-23943
Thick-section structural composites and composite structures
| AD-A260081 | p 2215 N93-24316
Ion beam modification of ceramics: Mechanical properties and structure
| AD-A260504 | p 2242 N93-24419
Large-amplitude forced response of dynamic systems
| AD-A260394 | p 2332 N93-24426

COMPRESSED GAS
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199

COMPRESSIBILITY
First European tri-service advanced materials workshop: Compressive strength in rigid-rod polymers
| AD-A259997 | p 2242 N93-24300

COMPRESSIBILITY EFFECTS
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
| NASA-CR-191087 | p 2111 N93-23431

COMPRESSIBLE BOUNDARY LAYER
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382

Navier-Stokes computation of compressible turbulent flows with a second order closure, part 1
[NASA-CR-192287] p 2288 N93-22604

COMPRESSIBLE FLOW

Interaction of externally-driven acoustic waves with compressible convection
[DE93-003800] p 2476 N93-22775

Development of iterative techniques for the solution of unsteady compressible viscous flows
[NASA-CR-192636] p 2296 N93-23724

A multiple-scale model for compressible turbulent flows
[NASA-TM-106072] p 2296 N93-23736

COMPRESSIBLE FLUIDS

Interaction of externally-driven acoustic waves with compressible convection
[DE93-003800] p 2476 N93-22775

Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852

COMPRESSING

Analysis of automated fatigue crack growth rate data
[DE93-752853] p 2324 N93-22771

COMPRESSION LOADS

Development and production of sandwich rods with load transmitting elements carrying high tension and compression loads
[DLR-FB-91-33] p 2208 N93-22657

Localized damage development in notched composite plates subjected to compressive loading
[CTN-93-60663] p 2209 N93-23113

Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
[AD-A260129] p 2210 N93-23703

High reliability residual compressive stress processes. State-of-the-art assessment
[PB93-127751] p 2331 N93-24207

COMPRESSIVE STRENGTH

Compression strength failure mechanisms in unidirectional composite laminates containing a hole
[NASA-CR-192813] p 2209 N93-23043

First European tri-service advanced materials workshop: Compressive strength in rigid-rod polymers
[AD-A259997] p 2242 N93-24300

COMPRESSOR ROTORS

Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
[NASA-TM-105986] p 2129 N93-22599

COMPRESSORS

Explosive pulse power for fusion applications
[DE93-003826] p 2491 N93-22076

Three-dimensional laser window formation for industrial application p 2310 N93-22197

Variable speed gas engine-driven air compressor system
[PB93-147353] p 2319 N93-24561

COMPUTATION

Visual autonomous automatic landing of airplanes
p 2121 N93-22791

Monte Carlo variance reduction approaches for non-Boltzmann tallies
[DE93-005665] p 2467 N93-22910

Review of quantum computation
[DE93-003735] p 2474 N93-22919

Natural Language Processing Systems Evaluation Workshop
[RL-TR-91-362] p 2437 N93-23091

The actor model
[AD-A260196] p 2442 N93-24469

COMPUTATIONAL CHEMISTRY

Peculiarities of structures and meltinglike transition in gold clusters
[DE93-004810] p 2228 N93-22741

COMPUTATIONAL FLUID DYNAMICS

Computational fluid dynamics: Research activities and services at NRC
[NRC-TTP-02-92] p 2288 N93-22456

A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
[NASA-TM-104765] p 2492 N93-22475

Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
[NASA-TM-107726] p 2108 N93-22552

Navier-Stokes computation of compressible turbulent flows with a second order closure, part 1
[NASA-CR-192287] p 2288 N93-22604

A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
[NASA-TM-106056] p 2466 N93-22664

Aerodynamic sensitivity analysis in the transonic regime p 2109 N93-22667

Search for exotic particles at CDF
[DE93-004421] p 2480 N93-22687

COMMIX-1AR/P: A three-dimensional transient single-phase computer program for thermal hydraulic analysis of single and multicomponent systems
[DE93-006044] p 2289 N93-22694

Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
[AD-A259923] p 2289 N93-22734

Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841

Automatic differentiation of advanced CFD codes for multidisciplinary design
[DE93-005685] p 2290 N93-22867

Finite element methods in heat transfer
[DE93-006451] p 2290 N93-22886

Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110

Annual progress report, 1990-1991
[CTN-93-60695] p 2570 N93-23115

On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178

Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method
p 2291 N93-23180

Operator splitting methods for the Navier-Stokes equations p 2292 N93-23226

Algorithm and code development for unsteady three-dimensional Navier-Stokes equations
[NASA-CR-192760] p 2292 N93-23234

A system for the numerical simulation of complex configuration internal aerodynamic fields for the aerospace industry
[ETN-93-93698] p 2110 N93-23364

Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations
p 2294 N93-23402

Vortex simulation of turbulent combustion
[AD-A259745] p 2222 N93-23481

Transient simulation of ram accelerator flowfields
[AD-A259767] p 2295 N93-23485

CFD-based approximation concepts for aerodynamic design optimization with application to a 2-D scramjet vehicle p 2126 N93-23505

Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592

Determining nodes and long-time approximations to the Navier-Stokes equations p 2296 N93-23593

A nonlinear dynamic spherical membrane model
[AD-A259633] p 2112 N93-23654

Development of iterative techniques for the solution of unsteady compressible viscous flows
[NASA-CR-192636] p 2296 N93-23724

A multiple-scale model for compressible turbulent flows
[NASA-TM-106072] p 2296 N93-23736

Spray combustion experiments and numerical predictions
[NASA-TM-106069] p 2296 N93-23744

An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
[ETN-93-93703] p 2297 N93-23871

Problems on numerical analysis relating to gas turbines
[DE93-753796] p 2130 N93-24002

Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
[NASA-CR-177611] p 2113 N93-24058

Restoring monotonicity of slowly-moving shocks computed with Godunov-type schemes
[CRANFIELD-AERO-9207] p 2297 N93-24075

Analysis of a high speed civil transport configuration at subsonic flow conditions using a Navier-Stokes solver
[NASA-CR-4490] p 2127 N93-24108

Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics
p 2113 N93-24136

An investigation of the fundamental cause of asymmetric separated flow
[AD-A260296] p 2114 N93-24263

Development of code evaluation criteria for assessing predictive capability and performance
[NASA-CR-192623] p 2442 N93-24473

Three-dimensional turbulent boundary layer flow over a spinning cylinder
[NASA-TM-102240] p 2300 N93-24533

An experimental investigation of a supercritical airfoil at transonic speeds
[NASA-TM-103933] p 2300 N93-24534

An experimental investigation of subsonic flow in a two-dimensional U-duct
[NASA-TM-103931] p 2128 N93-24535

Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
[NASA-TM-103909] p 2300 N93-24537

Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
[NASA-TM-103838] p 2300 N93-24542

Numerical modeling of fluidic flow meters
[PB93-124139] p 2301 N93-24577

COMPUTATIONAL GRIDS

Copper Mountain conference on iterative methods, volume 2
[DE93-004994] p 2466 N93-22405

Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
[NASA-TM-107726] p 2108 N93-22552

Improved deterministic calculational methods for irregularly shaped shields
[DE93-004955] p 2467 N93-22795

The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
[DE93-000796] p 2392 N93-22807

The p and h-p versions of the finite element method: Basic principles and properties
[AD-A260237] p 2468 N93-22930

Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
[PB93-108090] p 2404 N93-23090

Fully implicit solutions of the benchmark backward facing step problem using finite element discretization and inexact Newton's method
[DE93-005246] p 2293 N93-23299

A system for the numerical simulation of complex configuration internal aerodynamic fields for the aerospace industry
[ETN-93-93698] p 2110 N93-23364

Representation and recognition of free-form surfaces
[AD-A259883] p 2441 N93-24019

A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
[ETN-93-93701] p 2299 N93-24487

Boundary element method
[ETN-93-93699] p 2333 N93-24593

Flowfield computer graphics
[NASA-CR-193029] p 2444 N93-24655

COMPUTER AIDED DESIGN

An application protocol for CAD to CAD transfer of electronic information p 2530 N93-22154

Automated real-time software development
p 2445 N93-22168

Design of a portable powered seat lift
p 2429 N93-22190

Exploratory research for the development of a computer aided software design environment with the software technology program
[NASA-CR-192821] p 2434 N93-22385

Computer-aided design of molecular catalysts for alkane oxidation using dodeca-substituted iron porphyrins
[DE93-004046] p 2218 N93-22520

Investigation of air transportation technology at Princeton University, 1991-1992 p 2106 N93-22570

Computer Aided Control System Design (CACSD)
p 2107 N93-22572

Automatic differentiation of advanced CFD codes for multidisciplinary design
[DE93-005685] p 2290 N93-22867

AEROBA: A control blackboard approach for model formulation p 2524 N93-23183

Engineering data integration: Problems and solutions
[PNR-90999] p 2525 N93-23370

Bank-to-turn missiles and autopilot design
[ETN-93-93488] p 2131 N93-23373

Software design specification for the Manufacturing Optimization (MO) system
[AD-A259707] p 2440 N93-23666

Knowledge-based systems for computational control
[AD-A260409] p 2527 N93-24110

Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A260051] p 2442 N93-24407

AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
[PB93-100113] p 2443 N93-24587

COMPUTER AIDED MANUFACTURING

Integrated flexible manufacturing program for manufacturing automation and rapid prototyping
p 2259 N93-22174

Computer aided integrated production planning in unit production, as represented in aircraft construction
[MBB-FW-3-S-PUB-0439-A] p 2435 N93-22394

Software design specification for the Manufacturing Optimization (MO) system
[AD-A259707] p 2440 N93-23666

Automated manufacturing of continuous fibre composite structures for aerospace applications
p 2212 N93-23942

Activities of the Industrial Materials Institute
|NRC-34380| p 2207 N93-24288
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
|DE93-006722| p 2442 N93-24327

COMPUTER AIDED TOMOGRAPHY
High resolution computed tomography
|AD-A259728| p 2321 N93-23470
X ray computed tomography for whole system evaluation (small engines)
|AD-A259519| p 2130 N93-23669
X-ray computed tomography for advanced materials and processes
|AD-A259828| p 2213 N93-23953
Obtaining high-resolution images of ceramic from 3-D x-ray microtomography by region-of-interest reconstruction
|DE93-006796| p 2243 N93-24461

COMPUTER ASSISTED INSTRUCTION
The impact of computer instruction on the near transfer and far transfer of a general problem-solving strategy p 2527 N93-24094

COMPUTER GRAPHICS
Transportable Applications Environment (TAE) Plus: A NASA tool for building and managing graphical user interfaces p 2444 N93-22150
Advanced display object selection methods for enhancing user-computer productivity p 2444 N93-22151
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193
A synthetic environment for visualization and planning of orbital maneuvers p 2140 N93-22251
Virtual reality applications to automated rendezvous and capture p 2141 N93-22261
Video animation system operators manual
|DE93-007425| p 2435 N93-22533
A distributed visualization environment for engineering sciences
|DE93-006961| p 2257 N93-22600
Motif, the basics: An overview of the widget set
|DE93-005273| p 2436 N93-22720
Update of GRASP/Ada reverse engineering tools for Ada
|NASA-CR-192465| p 2436 N93-22798
High resolution three-dimensional solder joint measurement system evaluation
|DE93-005840| p 2437 N93-23000
VASGEN: A finite element model generation program for VAST. User's manual, version 4.0
|DREA-CR-91-447| p 2437 N93-23089
Realistic landscape visualization based on satellite images p 2355 N93-23583
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761
Remote sensing of the Earth: A pilot program in German schools p 2369 N93-23822
Innovative interactive Earth systems science courseware for middle and high school students p 2334 N93-23823
Meteo Disc: Satellite cloud motion presentation by interactively controlled video disc for research, teaching, and training p 2371 N93-23835
Scientific visualization of volumetric radar cross section data
|AD-A259586| p 2272 N93-24065
Space efficient 3D model indexing
|AD-A259571| p 2462 N93-24085
Visualization of gravity wave data by Iris Explorer (a computer program)
|FFI-92/7022| p 2399 N93-24090
Develop an x-windows tool to compute Gaussian beam synthetic seismograms
|AD-A260034| p 2400 N93-24253
A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
|ETN-93-93701| p 2299 N93-24487
Raster graphics: A tutorial and implementation guide
|PB93-145233| p 2443 N93-24562
Flowfield computer graphics
|NASA-CR-193029| p 2444 N93-24655

COMPUTER INFORMATION SECURITY
Assessing federal and commercial information security needs
|PB93-138956| p 2525 N93-23228
Automated tools for testing computer system vulnerability
|PB93-146025| p 2433 N93-23273
The ECA critical requirements model
|AD-A259682| p 2440 N93-23659

COMPUTER NETWORKS
NetView technical research
|NASA-CR-192822| p 2434 N93-22043
Video conferencing made easy p 2275 N93-22173
Experience with the UniTree mass storage system
|DE93-004717| p 2445 N93-22388
Computer facilities optimization studies
|NASA-CR-192702| p 2432 N93-22471
Evaluation of distributed computing tools
|DE93-007408| p 2446 N93-22531
Network storage service usage characteristics
|DE93-003998| p 2446 N93-22755
An electronic stroll through the global village
|DE93-005962| p 2446 N93-22763
High speed, wide area distributed computing for scientific imaging
|DE93-004727| p 2436 N93-22778
Automatic code generation for distributed robotic systems
|DE93-005779| p 2447 N93-22996
The QCD Teraflops Project
|DE93-006386| p 2447 N93-23026
Isomorphic routing on a toroidal mesh
|NASA-CR-191430| p 2437 N93-23058
Northeast Parallel Architectures Center (NPAC)
|AD-A259627| p 2448 N93-23653
The ECA critical requirements model
|AD-A259682| p 2440 N93-23659
Software design specification for the Manufacturing Optimization (MO) system
|AD-A259707| p 2440 N93-23666
NASDA's Earth observation satellite program p 2357 N93-23751
Archival and analysis of Hubble Space Telescope data p 2535 N93-23894
Universal channel network, or combining the best of token ring and slotted ring
|MEMO-INF-92-41| p 2449 N93-24630

COMPUTER PROGRAM INTEGRITY
PASCAL subroutines for standard test problems in unconstrained minimization
|MATHS-REPT-A-155| p 2441 N93-24076
Development of code evaluation criteria for assessing predictive capability and performance
|NASA-CR-192623| p 2442 N93-24473

COMPUTER PROGRAMMING
Advanced software development workstation. Knowledge base design: Design of knowledge base for flight planning application
|NASA-CR-192818| p 2434 N93-22040
Methods and means used in programming intelligent searches of technical documents p 2530 N93-22155
Automated real-time software development p 2445 N93-22168
COSMIC software catalog, 1993
|NASA-CR-191005| p 2434 N93-22205
Results of prototype software development for automation of shuttle proximity operations p 2142 N93-22264
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
|AD-A259293| p 2119 N93-22398
Data-parallel Langevin dynamics simulations
|DE93-003836| p 2445 N93-22434
Path planning for manipulators
|DE93-004050| p 2457 N93-22756
Update of GRASP/Ada reverse engineering tools for Ada
|NASA-CR-192465| p 2436 N93-22798
Automatic code generation for distributed robotic systems
|DE93-005779| p 2447 N93-22996
Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
|NASA-CR-192820| p 2523 N93-23031
Activities report 1990: Projects and services of the Research Department
|ETN-93-93692| p 2571 N93-23426
Northeast Parallel Architectures Center (NPAC)
|AD-A259627| p 2448 N93-23653
Support measurement and estimating for oracle database applications using Mark 2 function points
|AD-A259686| p 2440 N93-23661
Software design specification for the Manufacturing Optimization (MO) system
|AD-A259707| p 2440 N93-23666
The study of crew coordination and performance in hierarchical team decision making
|AD-A259514| p 2520 N93-23698
Soar-mode v5.0 user's manual for Soar release 5.2 and 6.0
|AD-A259914| p 2441 N93-23997
PASCAL subroutines for standard test problems in unconstrained minimization
|MATHS-REPT-A-155| p 2441 N93-24076
Deterministic methods in stochastic optimal control
|AD-A260478| p 2462 N93-24100
Academic legitimacy of the software engineering discipline
|AD-A260241| p 2441 N93-24223
Transformational planning of reactive behavior
|AD-A260350| p 2463 N93-24270
A version and configuration model for software evolution
|AD-A260557| p 2441 N93-24283
The actor model
|AD-A260196| p 2442 N93-24469
AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
|PB93-100113| p 2443 N93-24587

FESDIF: Finite Element Scalar Diffraction theory code
| DE93-007222 | p 2475 N93-24447
AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
| PB93-100113 | p 2443 N93-24587
A user's manual for software GPR92
| MATHS-REPT-A-175 | p 2444 N93-24642

COMPUTER STORAGE DEVICES
Network storage service usage characteristics
| DE93-003998 | p 2446 N93-22755
A computer simulation of a hyperbaric chamber environment
| AD-A260137 | p 2134 N93-23705
Assigning sites to redundant clusters in a distributed storage system
| AD-A260458 | p 2528 N93-24196

COMPUTER SYSTEMS DESIGN
Micro-video display with ocular tracking and interactive voice control p 2433 N93-22172
Computer facilities optimization studies
| NASA-CR-192702 | p 2432 N93-22471
High speed, wide area distributed computing for scientific imaging
| DE93-004727 | p 2436 N93-22778
Evaluating the potential of combining an expert system and simulation for LAN selection p 2524 N93-23127
Assessing federal and commercial information security needs
| PB93-138956 | p 2525 N93-23228
Precision geocoding demonstrator system p 2348 N93-23539
Protocol design and implementation using formal methods
| MEMO-INF-92-43 | p 2440 N93-23867
Distributed computer systems and logistics systems: What do they have in common besides distribution?
| MEMO-INF-92-44 | p 2448 N93-23872
DataMir: A PC-based computer system for application at Space Station Mir p 2158 N93-24358
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
| AD-A260051 | p 2442 N93-24407

COMPUTER SYSTEMS PERFORMANCE
A fault-tolerant intelligent robotic control system p 2465 N93-22159
Opportunities and challenges in avionics integration, INS/GPS: A case study p 2119 N93-22782
Parallel evaluation of deductive database queries p 2527 N93-23503
Validation of distributed systems by fault injection
| LAAS-92180 | p 2472 N93-23864
Implementation and performance evaluation of a parallel transitive closure algorithm on PRISMA/DB
| MEMO-INF-92-45 | p 2448 N93-23873
CONVEX mini manual
| NASA-TM-107564-REV | p 2433 N93-24594
Universal channel network, or combining the best of token ring and slotted ring
| MEMO-INF-92-41 | p 2449 N93-24630

COMPUTER SYSTEMS PROGRAMS
Operator Performance Support System (OPSS) p 2429 N93-22195
A new process for acquiring software architecture
| AD-A259487 | p 2439 N93-23463
Condition monitoring in an active deductive database p 2526 N93-23488
Progressive retry for software error recovery in distributed systems
| AD-A260075 | p 2442 N93-24315

COMPUTER SYSTEMS SIMULATION
Evaluating the potential of combining an expert system and simulation for LAN selection p 2524 N93-23127
Performance prediction of relational database management systems
| ISBN-0-315-69232-4 | p 2526 N93-23383

COMPUTER TECHNIQUES
Technology 2002: The Third National Technology Transfer Conference and Exposition, volume 2
| NASA-CP-3189-VOL-2 | p 2560 N93-22149
Advanced display object selection methods for enhancing user-computer productivity p 2444 N93-22151
Comparison of four-cursor buttons versus joystick to access computerized technical information from an integrated maintenance information system
| AD-A259967 | p 2526 N93-23462
Communication interference/jamming and propagation analysis system and its application to radio location p 2269 N93-23621
Northeast Parallel Architectures Center (NPAC)
| AD-A259627 | p 2448 N93-23653
Data analysis and archives in astronomy: A perspective view p 2535 N93-23896
Digital mammography, cancer screening: Factors important for image compression p 2424 N93-24551

COMPUTER VISION
Possibilistic clustering for shape recognition p 2450 N93-22208
A strongly goal-directed close-range vision system for spacecraft docking p 2136 N93-22232
Image based tracking approaches to AR/C at the Johnson Space Center p 2140 N93-22256
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
Robust algebraic image enhancement for intelligent control systems p 2454 N93-22361
Apparatus and method for computer vision measurements
| PB93-135077 | p 2432 N93-22536
Autonomus obstacle avoidance using visual fixation and looming
| PB93-146660 | p 2459 N93-23442
Knowledge-based vision techniques for the autonomous land vehicle program
| AD-A259801 | p 2459 N93-23457
3D pose from 3 corresponding points under weak-perspective projection
| AD-A259737 | p 2460 N93-23473
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
| AD-A259711 | p 2440 N93-23638
Water regions extraction from radar imagery using a neural network
| AD-A259517 | p 2356 N93-23668
Multidimensional signal coding in the visual system
| AD-A259836 | p 2488 N93-23696
Recognizing 3D objects for 2D images: An error analysis
| AD-A260150 | p 2469 N93-23707
Planning multiple observations for object recognition
| AD-A259879 | p 2440 N93-23959
Representation and recognition of free-form surfaces
| AD-A259883 | p 2441 N93-24019
Analytical representation of contours
| AD-A260151 | p 2471 N93-24415
Neural net architecture for computing structure from motion
| AD-A260526 | p 2463 N93-24421
Reliable vision-guided grasping
| NASA-CR-193197 | p 2464 N93-24603
Vision-guided gripping of a cylinder
| NASA-CR-193199 | p 2465 N93-24657

COMPUTERIZED SIMULATION
System evaluation of a fiber optic guided missile with a simple guidance addition to improve system effectiveness p 2255 N93-22025
Reconstruction of twist grain boundaries in gold
| DE93-004861 | p 2226 N93-22049
Reaction and diffusion in turbulent combustion
| DE93-006185 | p 2216 N93-22055
ROBOSIM: An intelligent simulator for robotic systems p 2465 N93-22161
Microcomputer based software for biodynamic simulation p 2429 N93-22191
Simple optics description of the plasma sheath and plasma electrode region
| DE93-004851 | p 2491 N93-22224
Demonstration of automated proximity and docking technology p 2135 N93-22227
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
Autonomous rendezvous and capture system design p 2138 N93-22244
IMP: A performance code p 2139 N93-22245
The development of an autonomous rendezvous and docking simulation using rapid integration and prototyping technology p 2148 N93-22302
Simulation models for autonomous rendezvous and capture p 2149 N93-22304
Electro-optical rendezvous and docking sensors p 2150 N93-22314
Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
| DE93-000041 | p 2376 N93-22334
Data-parallel Langevin dynamics simulations
| DE93-003836 | p 2445 N93-22434
Coupled multi-disciplinary composites behavior simulation
| NASA-TM-106011 | p 2322 N93-22481
Pyroshock simulation for satellite components using a tunable resonant fixture
| DE93-005338 | p 2322 N93-22500
Structure, stoichiometry and stability in magnetoplumbite and (beta)-alumina type ceramics
| DE93-007303 | p 2236 N93-22528
Video animation system operators manual
| DE93-007425 | p 2435 N93-22533
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
| DE93-006932 | p 2182 N93-22583
A distributed visualization environment for engineering sciences
| DE93-006961 | p 2257 N93-22600
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
| AD-A260211 | p 2129 N93-22735
A computational study of the time dependent crack growth process
| DE93-004397 | p 2324 N93-22751
Anomalous transport modelling of tokamak plasmas
| DE93-006160 | p 2493 N93-22764
Fusion plasma theory. Task 3: Auxiliary radiofrequency heating of tokamaks
| DE93-005129 | p 2493 N93-22796
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
| DE93-003825 | p 2325 N93-22872
Radiation magnetohydrodynamic modeling of x ray output from perturbed plasma implosions
| DE93-005454 | p 2494 N93-22907
Computer simulation of the anomalous elastic behavior of thin films and superlattices
| DE93-004154 | p 2504 N93-22939
Recent results of multimagnetical simulations of the Ising model
| DE93-005213 | p 2475 N93-22951
Monte Carlo modeling of solid-state photoswitches
| DE93-005829 | p 2280 N93-22999
Trail maneuver generation and selection in the Paladin tactical decision generation system
| NASA-TM-107722 | p 2131 N93-23088
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
A study of properties of dark galaxy halos in a CDM universe using N-body computer simulations p 2546 N93-23132
Modeling the heat release rate of aircraft cabin panels
| DOT/FAA/CT-92/3 | p 2118 N93-23222
Plasma edge diagnostics p 2495 N93-23261
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
| PB93-139087 | p 2258 N93-23280

A stochastic learning algorithm for layered neural networks
[DE93-003555] p 2458 N93-23288
Computer simulation of atomic collision processes in solids
[DE93-005106] p 2483 N93-23310
Development of test procedures for hybrid/electric vehicles
[DE93-005179] p 2316 N93-23336
Numerical simulation of flow through orifice meters
[PB93-124121] p 2293 N93-23349
Bank-to-turn missiles and autopilot design
[ETN-93-93488] p 2131 N93-23373
Simulation of TunneLadder traveling-wave tube cold-test characteristics: Implementation of the three-dimensional, electromagnetic circuit analysis code micro-SOS
[NASA-TP-3294] p 2281 N93-23394
Transient simulation of ram accelerator flowfields
[AD-A259767] p 2295 N93-23485
Bearing determination and bearing quality indication from a goniometric HF DF system p 2268 N93-23617
Multiple emitter direction finding from a circular array by single snapshot processing p 2270 N93-23627
A computer simulation of a hyperbaric chamber environment
[AD-A260137] p 2134 N93-23705
Time-reversible Maxwell's demon
[AD-A260170] p 2460 N93-23709
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
[DREO-CR-041LM] p 2271 N93-23729
Computational simulation for concurrent engineering of aerospace propulsion systems
[NASA-TM-106029] p 2330 N93-23746
Nuclear Engine System Simulation (NESS). Version 2.0: Program user's guide
[NASA-CR-191081] p 2204 N93-23875
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
[NASA-CR-191080] p 2204 N93-23876
Chaotic evolution of the solar system
[AD-A260055] p 2550 N93-23961
Development and application of procedures to evaluate air quality and visibility impacts of low-altitude flying operations
[AD-A259903] p 2408 N93-23990
A linear, time-varying simulation of the respiratory tract system
[DE93-004515] p 2421 N93-24009
A simulation of the Boeing B-747 aircraft
[CRANFIELD-AERO-9202] p 2127 N93-24074
Visualization of gravity wave data by Iris Explorer (a computer program)
[FFI-92/7022] p 2399 N93-24090
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
[NASA-CR-192697] p 2511 N93-24146
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 2
[NASA-CR-192698] p 2511 N93-24147
Organic electrolytes for sodium batteries
[AD-A260242] p 2284 N93-24164
Monte Carlo simulation of high-field electron transport in alternating-current thin-film electroluminescent devices
[AD-A260274] p 2284 N93-24166
Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
The theory behind the SOCRATES code
[AD-A259987] p 2196 N93-24298
Computation in mechanics of materials
[AD-A260060] p 2332 N93-24409
Telescience Testbed Program: A study of software for SIRTF instrument control
[NASA-CR-192764] p 2442 N93-24476
Penetration mechanics research in the former Soviet Union
[PB93-146488] p 2259 N93-24495
Advanced power conditioning for maglev systems
[PB93-150274] p 2320 N93-24586
Experimental and analytical study of a hybrid isolation system using friction controllable sliding bearings
[PB93-150282] p 2320 N93-24595
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
[PB93-146991] p 2259 N93-24635
Structural impact simulation using program KRASH
[CRANFIELD-AERO-9010] p 2333 N93-24639

COMPUTERS
Self-checking on-line testable static RAM
[NASA-CASE-NPO-17939-1-CU] p 2432 N93-22032
The Data Egg: A new solution to text entry barriers p 2530 N93-22192
Video animation system operators manual
[DE93-007425] p 2435 N93-22533
Design and analysis of scheduling policies for real-time computer systems
[AD-A259806] p 2448 N93-23641
Shiva Mark 2 hardware architecture, version 1
[AD-A259534] p 2449 N93-24039
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A260051] p 2442 N93-24407

CONCENTRATION (COMPOSITION)
Phase separation under a weak concentration gradient p 2226 N93-22853
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
Control of the concentration gradient during crystal growth from solution p 2165 N93-24395

CONCENTRATORS
Lightweight solar concentrator structures, phase 2
[NASA-CR-191068] p 2203 N93-22674
The Photovoltaic Manufacturing Technology Project, phase 1
[DE92-010597] p 2380 N93-23302

CONCURRENT PROCESSING
The design of scalable software libraries for distributed memory concurrent computers
[DE93-003612] p 2434 N93-22332

CONDENSATES
Acoustic determination of dewpoints in natural gas mixtures and retrograde condensates
[PB93-142917] p 2221 N93-23274

CONDENSATION NUCLEI
Generation of monodisperse droplets by spontaneous condensation of flow in nozzles
[NASA-CR-192356] p 2287 N93-22401
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
[DE93-000690] p 2405 N93-23305
Aerosol measurements at the South Pole during 1987
[PB93-137016] p 2390 N93-24567

CONDENSED MATTER PHYSICS
Investigation of cold nuclear fusion in condensed matter
[DE93-006083] p 2515 N93-23683

CONDENSERS (LIQUEFIERS)
Design manual for two-phase components of spacecraft thermal management systems
[AD-A260027] p 2196 N93-24439

CONDENSING
Forced convection boiling and condensation in microgravity: A critical appraisal of the literature p 2249 N93-22849

CONDUCTING FLUIDS
Charge transfer processes on liquid/liquid interfaces: The first hundred years
[AD-A260421] p 2225 N93-24429

CONDUCTING POLYMERS
Electronic and ionic transport in processable conducting polymers
[AD-A260223] p 2238 N93-22918
Electrical characterization of conducting polymers and polymeric semiconductor devices
[ACTA-POL-SCAND-PH-178] p 2238 N93-23006
A gel-permeation chromatography study of electrochemically synthesized Poly(3-alkylthiophenes)
[AD-A259864] p 2239 N93-23957

CONDUCTION BANDS
Distribution of trapped electrons at interface states in ACTFEL devices
[AD-A260396] p 2484 N93-24427

CONDUCTIVE HEAT TRANSFER
Optical properties of slags: Data for refractive indices and absorption coefficients
[NPL-DMM(A)-73] p 2486 N93-22453
Finite element methods in heat transfer
[DE93-006451] p 2290 N93-22886
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
[NASA-TM-106083] p 2294 N93-23404
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas) p 2264 N93-23504
Modeling the thermal properties and processing of composite materials p 2214 N93-24206

CONDUCTIVITY
Electron conducting adducts of water-soluble redox polyelectrolytes and enzymes
[AD-A259938] p 2241 N93-24154

CONDUCTORS
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
[DE93-004476] p 2508 N93-23691

CONFERENCES
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
Advanced software development workstation. OOPSLA 1992 Conference. Trip report
[NASA-CR-192811] p 2432 N93-22041
Video conferencing made easy p 2275 N93-22173
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 1
[NASA-CP-10111-VOL-1] p 2452 N93-22351
Near-earth object interception workshop summary
[DE93-003793] p 2546 N93-22403
Copper Mountain conference on iterative methods, volume 2
[DE93-004994] p 2466 N93-22405
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
[ESA-TT-1245] p 2339 N93-22436
Specifications, tolerances, and other technical requirements for weighing and measuring devices as adopted by the 77th National Conference on Weights and Measures, 1992
[PB93-130474] p 2257 N93-22895
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
[DE92-001290] p 2378 N93-22934
SeaWiFS Technical Report Series. Volume 8: Proceedings of the First SeaWiFS Science Team Meeting
[NASA-TM-104566] p 2413 N93-23010
Proceedings: DOD Software Technology Strategy public forum p 2437 N93-23092
First National Space Grant Conference report
[NASA-EP-275] p 2516 N93-23140
The Eighth National Space Symposium
[ISBN-0-9616962-5-7] p 2153 N93-23156
The 77th National Conference on Weights and Measures
[PB93-130466] p 2258 N93-23270
Photovoltaics Performance and Reliability Workshop
[DE93-000017] p 2380 N93-23303
Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
[ESA-ISY-2] p 2343 N93-23507
Radiolocation Techniques
[AGARD-CP-528] p 2265 N93-23598
Human Factors Issues in Aircraft Maintenance and Inspection. Science, technology, and management: A program review
[PB93-146975] p 2427 N93-23647
Proceedings of the 15th Annual EPA Conference on Analysis of Pollutants in the Environment
[PB93-152601] p 2388 N93-23681
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
[ESA-ISY-3] p 2533 N93-23878
Report of the Gordon Research Conference on Point Defects, Line Defects, and Interfaces in Semiconductors
[AD-A259546] p 2510 N93-24083
The 12th Symposium on Turbulence
[AD-A260353] p 2298 N93-24274
Interagency Advanced Power Group Steering Group meeting minutes
[DE93-005641] p 2382 N93-24324
Mechanical Working Group meeting minutes --- power generation and delivery systems
[DE93-004884] p 2571 N93-24435
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
[PB93-152031] p 2416 N93-24605

CONFIDENCE LIMITS
The meaning and utility of confidence
[AD-A259646] p 2472 N93-23655
Aircraft engine reliability analysis using lower confidence limit estimate procedures
[AD-A260386] p 2131 N93-24271
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
[AD-A260288] p 2411 N93-24568

CONFINEMENT
Test facilities for evaluating nuclear thermal propulsion systems
[DE93-002468] p 2202 N93-22411
The University of Wisconsin-Madison Torsatron/Stellarator Laboratory program
[DE93-005922] p 2492 N93-22419
Structure of confined laminar spray diffusion flames: Numerical investigation
[NASA-TM-106038] p 2288 N93-22596
Plasmas physics research in the MST toroidal confinement device
[DE93-006502] p 2493 N93-22711

CONFORMAL MAPPING
Mapping methods for computationally efficient and accurate structural reliability
| NASA-TM-105892 | p 2330 N93-23745

CONGESTION
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903

CONGRESSIONAL REPORTS
The role of university research in aviation safety and competitiveness: Testimony to the US Congress
| NIAR-92-3 | p 2116 N93-22379
Space programs: NASA's independent cost estimating capability needs improvement
| AD-A259263 | p 2531 N93-22404
NASA contract management
| GAO/HR-93-11 | p 2519 N93-23376
State of Small Business: A report of the President transmitted to the Congress
| PB93-137073 | p 2519 N93-23437
Publications of the Executive Office of the President, 20 Jan. 1989 - 20 Jan. 1993: Report to the Congress
| PB93-139764 | p 2529 N93-24307

CONICAL BODIES
Separated flow past smooth slender bodies
p 2298 N93-24213
An investigation of the fundamental cause of asymmetric separated flow
| AD-A260296 | p 2114 N93-24263

CONJUGATE GRADIENT METHOD
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
| DE93-006816 | p 2480 N93-22714
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
| PB93-142438 | p 2439 N93-23436
A new conjugate gradient method for optimal control
| MATHS-REPT-A-174 | p 2462 N93-24077
A user's manual for software GPR92
| MATHS-REPT-A-175 | p 2444 N93-24642

CONJUGATES
Complex principal oscillation pattern analysis
| MPIM-86 | p 2468 N93-23061

CONNECTION MACHINE
Efficiently modeling neural networks on massively parallel computers p 2453 N93-22353
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
| DE93-003825 | p 2325 N93-22872
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
| DE93-005461 | p 2447 N93-23245

CONSERVATION
Variable-Volume Flushing (V-VF) device for water conservation in toilets p 2429 N93-22167
Galileo's relativity principle, the concept of pressure, and complex characteristics, for the six-equation, one-pressure model
| DE93-005240 | p 2515 N93-22952

CONSERVATION EQUATIONS
Theoretical and pragmatic modelling of governing equations for a two-phase flow in bubbly and annular flow regimes
| DE93-004200 | p 2289 N93-22757

CONSOLIDATION
Heteroepitaxial diamond growth
| AD-A259623 | p 2510 N93-24127

CONSTITUTIVE EQUATIONS
Variational theory of deformations of curved, twisted, and extensible elastic rods
| AD-A260331 | p 2332 N93-24266

CONSTRAINTS
Constraint checking during error recovery
p 2445 N93-22169
Methods for modeling contact dynamics of capture mechanisms p 2151 N93-22320
On positive invariance and constrained control of linear multivariable systems
| LAAS-92223 | p 2462 N93-23862

CONSTRUCTION
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
Space Station Freedom as an engineering experiment station: An overview p 2187 N93-22631
Geogrid reinforced base courses for flexible pavements for light aircraft: Test section construction, behavior under traffic, laboratory tests, and design criteria
| DOT/FAA/RD-92/25 | p 2134 N93-23128
Center for shape optimization and material layout
| AD-A260087 | p 2471 N93-24411

CONSTRUCTION MATERIALS
Acoustic emission of structural materials exposed to open flames
| PB93-138980 | p 2477 N93-23951

CONTACT RESISTANCE
P+ contacts on GaAs for semiconductor lasers
| AD-A260207 | p 2309 N93-24003

CONTAINERLESS MELTS
Materials science research in microgravity
p 2191 N93-22645

CONTAMINANTS
Studies of the formation chemical reactivity and properties of small clusters application to an understanding of aerosol formation and heterogeneous chemistry
| DE93-005920 | p 2221 N93-23309
Arctic Contaminants Research Program: Research Plan
| PB93-135630 | p 2387 N93-23439
Proceedings of the 15th Annual EPA Conference on Analysis of Pollutants in the Environment
| PB93-152601 | p 2388 N93-23681
Use of high-energy radiation for degradation of environmental pollutants
| PB93-149995 | p 2390 N93-24636

CONTAMINATION
Swept wing attachment line contamination fence
| NASA-CASE-LAR-13400-1 | p 2107 N93-22015
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803
The determination of particulate contamination in miniature ball bearings
| DE93-006261 | p 2316 N93-23675
The theory behind the SOCRATES code
| AD-A259987 | p 2196 N93-24298

CONTINUOUS RADIATION
Irregular media effects on radiowave signals used in navigation and positioning systems
p 2266 N93-23606
Journal of research of the National Institute of Standards and Technology, Nov. - Dec. 1992, volume 97, no. 6
| PB93-143923 | p 2571 N93-24570

CONTINUOUS WAVE LASERS
Laser range camera data fusion
| DE93-005159 | p 2263 N93-23313

CONTINUOUS WAVE RADAR
A leakage canceller for a single antenna radar
| ETN-93-93495 | p 2264 N93-23379

CONTINUUM MECHANICS
Theories of elastoplasticity coupled with continuum damage mechanics
| DE93-007426 | p 2323 N93-22534
Incremental, quasistatic, uniaxial finite element analysis in the linear viscoelasticity theory, exemplarily demonstrated by the Burger material
| ETN-93-93422 | p 2324 N93-22680
X ray absorption fine structure strain determination in thin films p 2326 N93-23072

CONTINUUMS
Active microparticle media
| AD-A259722 | p 2487 N93-23639

CONTOURS
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
| NASA-CR-190782 | p 2327 N93-23125
Valency of different information categories and its importance for the effectiveness of image analysis by the visual system and automatic systems
p 2354 N93-23577
Analytical representation of contours
| AD-A260151 | p 2471 N93-24415
Climatology of station storm rainfall in the continental United States: Parameters of the Bartlett-Lewis and Poisson rectangular pulses models
| NASA-CR-192968 | p 2411 N93-24523

CONTRACT MANAGEMENT
NASA contract management
| GAO/HR-93-11 | p 2519 N93-23376

CONTRACTORS
Occurrence Reporting and Processing System (ORPS) lessons learned: Tools to improve workplace performance
| DE93-005241 | p 2522 N93-22498
The Photovoltaic Manufacturing Technology Project, phase 1
| DE92-010597 | p 2380 N93-23302

CONTRAILS
Shadow technique for improved inversion of lidar data to cirrus and contrail optical depth
| ESA-TT-1263 | p 2405 N93-23332

CONTROL BOARDS
Integrated and Multi-Function Navigation
| AGARD-CP-525 | p 2119 N93-22780

CONTROL EQUIPMENT
Sensor-based whole-arm obstacle avoidance utilizing ASIC technology
| DE93-003602 | p 2279 N93-22819

CONTROL MOMENT GYROSCOPES
Nonlinear attitude control of spacecraft and momentum management of control moment gyros
p 2195 N93-23506

CONTROL SIMULATION
Real-time simulations for automated rendezvous and capture p 2138 N93-22243

CONTROL STABILITY
An improved CAMRAD model for aeroelastic stability analysis of the XV-15 with advanced technology blades
| NASA-TM-4448 | p 2125 N93-22486
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723
On positive invariance and constrained control of linear multivariable systems
| LAAS-92223 | p 2462 N93-23862

CONTROL SURFACES
Swept wing attachment line contamination fence
| NASA-CASE-LAR-13400-1 | p 2107 N93-22015
Application of genetic algorithms to tuning fuzzy control systems p 2450 N93-22209

CONTROL SYSTEMS DESIGN
Advances in Guidance and Control of Precision Guided Weapons
| AGARD-CP-524 | p 2254 N93-22018
Application of genetic algorithms to tuning fuzzy control systems p 2450 N93-22209
Towards autonomous fuzzy control
p 2450 N93-22213
Synthesis of nonlinear control strategies from fuzzy logic control algorithms p 2452 N93-22222
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
A navigation and control system for an autonomous rescue vehicle in the space station environment
p 2146 N93-22289
The development of an autonomous rendezvous and docking simulation using rapid integration and prototyping technology p 2148 N93-22302
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 1
| NASA-CP-10111-VOL-1 | p 2452 N93-22351
Fuzzy logic controllers: A knowledge-based system perspective p 2453 N93-22352
Fuzzy control of small servo motors
p 2453 N93-22357
On structuring the rules of a fuzzy controller
p 2454 N93-22360
Design issues for a reinforcement-based self-learning fuzzy controller p 2454 N93-22362
Fuzzy efficiency optimization of AC induction motors
p 2454 N93-22363
Advanced telerobotic control using neural networks
p 2455 N93-22364
Fuzzy control of an unmanned helicopter
p 2455 N93-22366
A neural based intelligent flight control system for the NASA F-15 flight research aircraft p 2132 N93-22368
Structure identification in fuzzy inference using reinforcement learning p 2456 N93-22371
Adaptive process control using fuzzy logic and genetic algorithms p 2457 N93-22376
Design of fuzzy system by NNs and realization of adaptability p 2457 N93-22377
Improvement on fuzzy controller design techniques
p 2457 N93-22378
Robustness
| NASA-TP-3336 | p 2181 N93-22458
Investigation of air transportation technology at Princeton University, 1991-1992 p 2106 N93-22570
Computer Aided Control System Design (CACSD)
p 2107 N93-22572
Zero-G life support for Space Station Freedom
p 2189 N93-22640
Update of GRASP/Ada reverse engineering tools for Ada
| NASA-CR-192465 | p 2436 N93-22798
Multidisciplinary optimization of a controlled space structure using 150 design variables
| NASA-CR-4502 | p 2125 N93-22799
Control design variable linking for optimization of structural/control systems
| NASA-CR-4493 | p 2125 N93-22827
Operational evaluation of the converging runway display aid at Saint Louis
| MTR-92W0000217 | p 2133 N93-22874
Identification for robust control: What is the best approach?
| MEMT-16 | p 2458 N93-23060
Adaptive control of a flexible manipulator
p 2458 N93-23201

A passivity approach to controller-observer design for robots
[MEMO-1050] p 2459 N93-23355
Bank-to-turn missiles and autopilot design
[ETN-93-93488] p 2131 N93-23373
Autonomus obstacle avoidance using visual fixation and looming
[PB93-146660] p 2459 N93-23442
Automatic analysis and synthesis of controllers for dynamical systems based on phase-space knowledge
[AD-A259491] p 2459 N93-23448
Process toward a comprehensive control system for molecular beam epitaxy
[AD-A259724] p 2507 N93-23468
Maneuver and vibration control of flexible space structures by Lyapunov stability theory
p 2195 N93-23956
An introduction to multivariable flight control system design
[AD-A260408] p 2131 N93-24087
Knowledge-based systems for computational control
[AD-A260409] p 2527 N93-24110
High reliability residual compressive stress processes. State-of-the-art assessment
[PB93-127751] p 2331 N93-24207
Control of two- and three-dimensional wake instabilities from bluff-bodies
[AD-A260410] p 2299 N93-24428
Design manual for two-phase components of spacecraft thermal management systems
[AD-A260027] p 2196 N93-24439
Adaptive control of uncertain systems
[ISBN-0-315-54485-6] p 2464 N93-24622

CONTROL THEORY
Neighboring suboptimal control for vehicle guidance
p 2171 N93-22011
Synthesis of nonlinear control strategies from fuzzy logic control algorithms p 2452 N93-22222
Nonlinear rescaling of control values simplifies fuzzy control p 2456 N93-22373
Controlling chaos in spark-ignition engines
[DE93-005754] p 2312 N93-22761
Attenuation of empennage buffet response through active control of damping using piezoelectric material
[NASA-TM-107736] p 2110 N93-23034
Semi-active suspension for automotive application
[MEMT-17] p 2316 N93-23377
An algebra of discrete event processes
[NASA-TM-102848] p 2469 N93-23413
An introduction to multivariable flight control system design
[AD-A260408] p 2131 N93-24087

CONTROLLABILITY
Flight investigation of the effect of tail boom strakes on helicopter directional control
[NASA-TP-3278] p 2108 N93-22654
Trail maneuver generation and selection in the Paladin tactical decision generation system
[NASA-TM-107722] p 2131 N93-23088

CONTROLLED ATMOSPHERES
Sputter-deposition and characterization of molybdenum disulfide thin films
[DE93-004801] p 2235 N93-22048
Chlorotrifluoroethylene decay in the atmosphere: Controlled-environment chamber studies
[AD-A259902] p 2388 N93-23989
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
[AD-A259909] p 2427 N93-23995
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling
[AD-A260252] p 2389 N93-24165

CONTROLLED FUSION
Alpha effects on TAE modes and alpha transport
[DE93-004160] p 2494 N93-22940

CONTROLLERS
A fuzzy logic controller for an autonomous mobile robot p 2452 N93-22220
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
Fuzzy logic controllers: A knowledge-based system perspective p 2453 N93-22352
A fuzzy controller with nonlinear control rules is the sum of a global nonlinear controller and a local nonlinear PI-like controller p 2453 N93-22356
Fuzzy control of small servo motors
p 2453 N93-22357
On structuring the rules of a fuzzy controller
p 2454 N93-22360
Robust algebraic image enhancement for intelligent control systems p 2454 N93-22361
Design issues for a reinforcement-based self-learning fuzzy controller p 2454 N93-22362
Fuzzy efficiency optimization of AC induction motors
p 2454 N93-22363
Fuzzy control of an unmanned helicopter
p 2455 N93-22366
Evolving fuzzy rules in a learning classifier system
p 2457 N93-22375
Adaptive process control using fuzzy logic and genetic algorithms p 2457 N93-22376
Improvement on fuzzy controller design techniques
p 2457 N93-22378
Parallel processor for real-time structural control
[DE93-006284] p 2446 N93-22545
Synthesis of robust controllers p 2107 N93-22573
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
[DE93-002162] p 2312 N93-22891
Controller evaluation of initial terminal data link ATC services: Mini study 3
[DOT/FAA/CT-92/18] p 2262 N93-23046
A passivity approach to controller-observer design for robots
[MEMO-1050] p 2459 N93-23355
Automatic analysis and synthesis of controllers for dynamical systems based on phase-space knowledge
[AD-A259491] p 2459 N93-23448
A fuzzy logic controller system
[AD-A259723] p 2439 N93-23467
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656
Nonlinear adaptive control of electro-mechanical systems p 2461 N93-23716
Modeling and control of flexible manipulators
p 2318 N93-24182
Adaptive control of uncertain systems
[ISBN-0-315-54485-6] p 2464 N93-24622
Petri net controllers for distributed robotic systems
[NASA-CR-193196] p 2320 N93-24658

CONVECTION
A convective drag theory for surface fluxes
[DE93-004037] p 2403 N93-22722
Interaction of externally-driven acoustic waves with compressible convection
[DE93-003800] p 2476 N93-22775
Influence of gravity on polyedric flames
p 2226 N93-22840
Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
[NASA-CR-192349] p 2110 N93-23108
Stability and instability of thermocapillary convection in models of the float-zone crystal-growth process
[NASA-CR-192695] p 2252 N93-23122
The structure and energetics of Amazon squall lines
p 2404 N93-23166
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
[AD-A259659] p 2396 N93-23657
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
[AD-A260556] p 2298 N93-24282

CONVECTION CELLS
Southward burst mesoscale convective systems: An observational and modeling study p 2406 N93-23494

CONVECTION CURRENTS
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
[AD-A259659] p 2396 N93-23657

CONVECTIVE HEAT TRANSFER
Heat transfer on accreting ice surfaces
[AIAA PAPER 90-0200] p 2106 N93-22565
Finite element methods in heat transfer
[DE93-006451] p 2290 N93-22886
User's manual for the ALS base heating prediction code, volume 2
[NASA-CR-192457] p 2203 N93-22962
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
Water temperature characteristics of lakes subjected to climate change
[PB93-135648] p 2385 N93-23265
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-23106
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
[PB93-138915] p 2297 N93-24141
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
[AD-A260556] p 2298 N93-24282

CONVENTIONS
A prompt start: Implementing the framework convention on climate change
[DE93-005062] p 2383 N93-22716

CONVERGENCE
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
[NASA-TM-103900] p 2467 N93-22829
A comparative study of preconditioned Lanczos methods for nonsymmetric linear system
[DE93-006453] p 2436 N93-22979
Convergence rates of approximation by translates
[AD-A260100] p 2470 N93-24055
Experimental study of the separating confluent boundary-layer. Volume 2: Experimental data. Appendices A-E: Data supplement
[NASA-CR-166018-SUPPL] p 2299 N93-24531

COOLERS
Thermophysical properties
[DE93-007807] p 2220 N93-22916
Life cycle testing of desiccant core samples
[PB93-127058] p 2220 N93-23098

COOLING
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period
p 2405 N93-23219

COOLING SYSTEMS
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
[DE93-005795] p 2376 N93-22417
High performance microchannel heat exchanger for cooling high heat load x ray optical elements
[DE93-004245] p 2296 N93-23688
Variable pressure insulating jackets for high-temperature batteries
[DE93-006404] p 2283 N93-24027
High performance nanocomposite desiccation materials
[PB93-127025] p 2223 N93-24210

COORDINATE TRANSFORMATIONS
Position calibration software for the form assessment of complex workpieces
[NPL-DITC-203/92] p 2435 N93-22450
Improved deterministic calculational methods for irregularly shaped shields
[DE93-004955] p 2467 N93-22795

COORDINATES
Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290
Scene correlation for INS aiding in flight-test systems: Runway-referenced flight-tests with on-board sensors only p 2121 N93-22792
Integration of digital image matching and multi image shape from shading p 2354 N93-23575

COORDINATION
Structure of molten iron chloride
[DE93-004814] p 2219 N93-22742
The study of crew coordination and performance in hierarchical team decision making
[AD-A259514] p 2520 N93-23698
New developments in the coordination of Earth observation from space activities: The role of the Committee on Earth Observations Satellites (CEOS)
p 2372 N93-23844
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO
p 2540 N93-23929
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362

COPLANARITY
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
[NASA-TM-106057] p 2283 N93-23743
Projective structure from two uncalibrated images: Structure from motion and recognition
[AD-A260102] p 2470 N93-24056

COPOLYMERS
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062

COPPER
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
[DE93-004203] p 2502 N93-22523
Sequential deposition of copper on solid gold (111): A statistical model
[AD-A260269] p 2234 N93-24233
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
[AD-A260309] p 2234 N93-24237

COPPER ALLOYS
Influence of addition elements in copper or implanted in aluminum on the adhesion to the solid state of the copper/aluminum (Cu/Al2O3) system
|ECL-91-34| p 2228 N93-22698
Pilot demonstration of cerium oxide coated anodes
|DE93-002507| p 2231 N93-23316
Design of an ultra-high-strength weldable Al-Cu-Li alloy for space applications p 2211 N93-23936
The magnetism of metallic manganese alloys
|DE93-005153| p 2233 N93-24037

COPPER COMPOUNDS
Theoretical study of reactions at the electrode-electrolyte interface
|DE93-006899| p 2221 N93-23341

COPPER OXIDES
Local vibronic and electronic excitations of doping-induced states in the copper oxides
|DE93-003844| p 2501 N93-22429
Growth of precipitates in Bi2Sr2CaCu2O8
|DE93-004443| p 2502 N93-22725
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
|DE93-004445| p 2503 N93-22726
Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
|DE93-004453| p 2503 N93-22728

COPPER SELENIDES
Polycrystalline thin films
|DE93-000070| p 2500 N93-22336
Research on high efficiency, large-area CuInSe2-based thin-film modules
|DE93-000077| p 2513 N93-24433

COPYRIGHTS
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851

CORE SAMPLING
Life cycle testing of desiccant core samples
|PB93-127058| p 2220 N93-23098
Orbital tuning of marine sedimentary cores: An automatic procedure based on a general linear model
|MPIM-79| p 2415 N93-23856
A nitrate signal of solar flares in polar snow and ice
|AD-A260559| p 2558 N93-24284

CORE STORAGE
A nitrate signal of solar flares in polar snow and ice
|AD-A260559| p 2558 N93-24284

CORNER FLOW
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow p 2114 N93-24209

CORONAGRAPHS
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189

CORONAL HOLES
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
|PB93-138469| p 2556 N93-23334

CORONAS
Organic Optoelectronic Materials: A Topical Workshop
|AD-A259695| p 2488 N93-23662
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
Inward electrostatic precipitation of interplanetary particles
|NASA-CR-192786| p 2552 N93-24477

CORRELATION
Correlations between surface structure and catalytic activity/selectivity
|DE93-005884| p 2217 N93-22423
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
|NASA-TM-107729| p 2327 N93-23235
Effect of triplet correlations on the adsorption of a dense fluid onto a crystalline surface
|AD-A260306| p 2223 N93-24236

CORRELATION COEFFICIENTS
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933

CORRIDORS
High speed ground transportation study: Executive summary
|PB93-141091| p 2532 N93-22903
Smoke movement in a corridor-hybrid model, simple model, and comparison with experiments
|PB93-146678| p 2259 N93-23435

CORROSION
Excimer laser surface modification: Process and properties
|DE93-003726| p 2306 N93-22044
Rust transformation/rust compatible primers p 2244 N93-22182
Evaluation of ceramic materials for an advanced steam-methane reformer
|DE93-005931| p 2235 N93-22329
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
|NASA-CR-191065| p 2203 N93-22662
The role of passive surface films on corrosion fatigue crack initiation
|DE93-006512| p 2325 N93-22888
Heat pipe fatigue test specimen: Metallurgical evaluation
|NASA-CR-189120| p 2381 N93-23360
Microstructure and texture control of fatigue in hydrogen and marine environments
|AD-A259808| p 2231 N93-23642
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
|AD-A258453| p 2233 N93-23982
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
|DE93-007971| p 2234 N93-24566

CORROSION PREVENTION
Pilot demonstration of cerium oxide coated anodes
|DE93-002507| p 2231 N93-23316
Non-chromated surface pretreatments for aluminum
|AD-A260130| p 2232 N93-23704
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
|AD-A258453| p 2233 N93-23982

CORROSION RESISTANCE
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
|DE93-004104| p 2226 N93-22069
Strength optimization through powder modification
|DE93-005109| p 2237 N93-22718
Solid-particle erosion of in-situ reinforced Si3Ni4
|DE92-014868| p 2209 N93-22911
A new index for the crevice corrosion resistance of materials
|AD-A260437| p 2233 N93-24112

CORROSION TESTS
Evaluation of ceramic materials for an advanced steam-methane reformer
|DE93-005931| p 2235 N93-22329
A new index for the crevice corrosion resistance of materials
|AD-A260437| p 2233 N93-24112

COSMIC BACKGROUND EXPLORER SATELLITE
Systems aspects of COBE science data compression p 2431 N93-24553

COSMIC DUST
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
|NASA-CR-192704| p 2546 N93-22469
Studies of cosmic dusts using synchrotron radiation p 2549 N93-23390
Observations and modeling of the dust and gas in an isolated diffuse interstellar cloud p 2549 N93-23722
Analysis of the results of the first year of operation of the Munich Dust Counter p 2537 N93-23910
X raying the interstellar dust p 2540 N93-23925
Evidence for two types of sources creating Halley's coma p 2540 N93-23926
Nearby dwarf galaxies: Dust masses and their implications p 2540 N93-23928
Mid-infrared spectroscopy of solids in relation to the composition of interstellar and intergalactic dust p 2550 N93-24179
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue p 2164 N93-24394

COSMIC GASES
X raying the interstellar dust p 2540 N93-23925
Evidence for two types of sources creating Halley's coma p 2540 N93-23926

COSMIC RAYS
New approach to the interaction of cosmic rays with nuclei in spacecraft shielding and the human body
|DE93-006263| p 2559 N93-22544
Cosmic-ray-veto detector system
|DE93-004787| p 2559 N93-22707
An experimental study of the possible association of deep underground muons with astronomical point sources p 2549 N93-23596
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921

COSMIC X RAYS
ROSAT all sky survey observations of IRAS galaxies
|MPE-PREPRINT-220| p 2542 N93-22462

COSMOLOGY
Hamiltonian structure of the Vlasov-Einstein system and the problem of stability for spherical relativistic star clusters
|DE93-006180| p 2546 N93-22507
A bolometric radiometer for investigations in cosmology p 2303 N93-22684
Stochastic inflation and inflationary density fluctuations p 2473 N93-24457

COST ANALYSIS
Market penetration of new energy technologies
|DE92-016409| p 2375 N93-22323
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
|DE93-004659| p 2244 N93-22325
Space programs: NASA's independent cost estimating capability needs improvement
|AD-A259263| p 2531 N93-22404
Space Biology Initiative. Trade Studies, volume 1
|NASA-CR-190989| p 2417 N93-23068
Space biology initiative program definition review. Trade study 5: Modification of existing hardware (COTS) versus new hardware build cost analysis p 2417 N93-23069
Space biology initiative program definition review. Trade study 1: Automation costs versus crew utilization p 2417 N93-23070
Space biology initiative program definition review. Trade study 4: Design modularity and commonality p 2418 N93-23071
Space Biology Initiative. Trade Studies, volume 2
|NASA-CR-190990| p 2418 N93-23079
Space biology initiative program definition review. Trade study 3: Hardware miniaturization versus cost p 2418 N93-23080
Space biology initiative program definition review. Trade study 2: Prototype utilization in the development of space biology hardware p 2418 N93-23082
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
|NASA-CR-184472| p 2258 N93-23176
Solar pumping: An introduction and update on the technology, performance, costs, and economics
|WORLD BANK TP-168| p 2381 N93-23444
A comparative analysis of alternative fuels for the INEL vehicle fleet
|DE93-007224| p 2319 N93-24256
Megaprojects in the sciences
|PB93-140002| p 2475 N93-24308
An evaluation of schedule metrics used within aeronautical systems center
|AD-A260113| p 2521 N93-24413

COST EFFECTIVENESS
Battery compatibility with photovoltaic charge controllers
|DE93-005373| p 2377 N93-22537
A NASA-wide approach toward cost-effective, high-quality software through reuse
|NASA-CP-10115| p 2435 N93-22601
Space technology research plans p 2184 N93-22613
Consortium for materials development in space interaction with Space Station Freedom p 2192 N93-22650

COST ESTIMATES
Space programs: NASA's independent cost estimating capability needs improvement
|AD-A259263| p 2531 N93-22404
Space biology initiative program definition review. Trade study 5: Modification of existing hardware (COTS) versus new hardware build cost analysis p 2417 N93-23069
Space biology initiative program definition review. Trade study 1: Automation costs versus crew utilization p 2417 N93-23070
Space transportation: The content and uses of Shuttle cost estimates. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
|GAO/NSIAD-93-115| p 2531 N93-23097
Space Station Furnace Facility. Volume 3: Program cost estimate
|NASA-CR-192478| p 2200 N93-23237
Supply of geothermal power from hydrothermal sources: A study of the cost of power in 20 and 40 years
|DE93-004479| p 2382 N93-24036
Columbus programme overview p 2155 N93-24337

COST REDUCTION
National Launch System: Structures and materials p 2172 N93-22083
CSTI Earth-to-orbit propulsion research and technology program overview p 2174 N93-22090
Vehicle systems p 2174 N93-22095
Ceramic matrix composites (continuous fiber reinforced) thermal protection systems p 2177 N93-22112

Report to the Chairman, Subcommittee on Defense, Committee on Appropriations, House of Representatives. Intelligence programs: New RC-135 aircraft engines can reduce cost and improve performance
| AD-A259283 | p 2105 N93-22397
Statistical process control program at a ceramics vendor facility
| DE93-006043 | p 2238 N93-23025
The Photovoltaic Manufacturing Technology Project, phase 1
| DE92-010597 | p 2380 N93-23302

COSTS
Solid rocket motors p 2174 N93-22094
Entry Systems Panel p 2175 N93-22097
Reliability of solid rocket motor cases and nozzles p 2176 N93-22103
Reentry systems: Material technology needs p 2176 N93-22108
Analysis of operational, institutional and international limitations for alternative fuel vehicles and technologies: Means/methods for implementing changes
| DE93-005611 | p 2312 N93-22737
Future trends in power generation cost by power resource
| DE93-761825 | p 2378 N93-22957
Investigation and study scenarios to introduce CO2 fixation technologies in the energy sector
| DE93-761912 | p 2378 N93-22958
Summary document of tasks performed on the Shuttle-C/NLS contract
| NASA-CR-192483 | p 2179 N93-22995
The Westinghouse solid oxide fuel cell program: Clean, efficient energy for the future
| DE93-003487 | p 2380 N93-23287
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338

COUETTE FLOW
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178
An analytical study of some problems in partial differential equations with applications to fluid dynamics and wave propagation
| AD-A260351 | p 2470 N93-24169

COULOMB COLLISIONS
From simple to complex reactions: Nuclear collisions near the Coulomb barrier
| DE93-004197 | p 2478 N93-22063

COULOMETRY
Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
| AD-A260071 | p 2224 N93-24314

COUNTERMEASURES
Biomedical Monitoring and Countermeasures Facility p 2186 N93-22624

COUNTING
Electromagnetism from counting
| DE93-006930 | p 2261 N93-22582
An experimental search for gamma radiation associated with thunderstorm activity
| DE93-006939 | p 2403 N93-22584

COUPLING
Coupled multi-disciplinary composites behavior simulation
| NASA-TM-106011 | p 2322 N93-22481
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
| DE93-004203 | p 2502 N93-22523
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
| DE93-006411 | p 2419 N93-24028

COVALENT BONDS
Comparison of different synthetic routes for sulfonation of polyaniline
| AD-A259662 | p 2222 N93-23658

COVARIANCE
Generation of covariance data among values from a single set of experiments
| DE93-004192 | p 2522 N93-22435
Meteorological data assimilation by adaptive Bayesian optimization p 2409 N93-24272
Multiobjective optimization of aerospace structures
| AD-A260433 | p 2127 N93-24430

CRAB NEBULA
Very high energy gamma ray astrophysics
| DE93-007625 | p 2551 N93-24453

CRACK INITIATION
The role of passive surface films on corrosion fatigue crack initiation
| DE93-006512 | p 2325 N93-22888
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
| VTT-PUBS-103 | p 2326 N93-23120
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
| NASA-CR-190782 | p 2327 N93-23125
Elevated temperature fracture of advanced powder metallurgy aluminum alloy 8009 p 2231 N93-23588
Mesomechanical model for fibre composites: The role of the interface
| AD-A260195 | p 2215 N93-24468

CRACK OPENING DISPLACEMENT
surf3d: A 3-D finite-element program for the analysis of surface and corner cracks in solids subjected to mode-1 loadings
| NASA-TM-107710 | p 2329 N93-23735

CRACK PROPAGATION
A computational study of the time dependent crack growth process
| DE93-004397 | p 2324 N93-22751
Analysis of automated fatigue crack growth rate data
| DE93-752853 | p 2324 N93-22771
J-integral of circumferential crack in large diameter pipes
| DE93-003708 | p 2326 N93-23050
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
| VTT-PUBS-103 | p 2326 N93-23120
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
| NASA-CR-190782 | p 2327 N93-23125
An investigation into the multiaxial fatigue behavior of IMI 829 titanium alloy p 2327 N93-23182
Evaluation of tensile static, dynamic, and cyclic fatigue behavior for a HIPed silicon nitride at elevated temperatures
| DE93-005149 | p 2210 N93-23311
Consideration of history dependent damage in creep crack growth
| DE93-004398 | p 2328 N93-23317
Elevated temperature fracture of advanced powder metallurgy aluminum alloy 8009 p 2231 N93-23588
A fracture mechanics approach to failure load predictions of structural adhesive joints p 2212 N93-23940
Grain boundary chemistry effects on environment-induced crack growth of iron-based alloys
| DE93-005039 | p 2232 N93-23980
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
| DE93-004716 | p 2330 N93-24051
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials p 2214 N93-24181
Crack deflection at bi-material interfaces
| DE93-003712 | p 2332 N93-24479
Damage analysis and fundamental studies for fusion reactor materials development
| DE93-008283 | p 2499 N93-24516
Boundary element method
| ETN-93-93699 | p 2333 N93-24593

CRACK TIPS
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
| DE93-004104 | p 2226 N93-22069
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
| DE93-003100 | p 2322 N93-22412
An investigation into the multiaxial fatigue behavior of IMI 829 titanium alloy p 2327 N93-23182
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
Two-parameter fracture mechanics theory and applications
| AD-A259907 | p 2330 N93-23993

CRACKING (FRACTURING)
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
| VTT-PUBS-103 | p 2326 N93-23120

CRACKS
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
| DE93-005616 | p 2257 N93-22416
Analysis of automated fatigue crack growth rate data
| DE93-752853 | p 2324 N93-22771
Stability and stability degree of a cracked flexible rotor supported on journal bearings
| ILR-MITT-268(1991) | p 2313 N93-23020
J-integral of circumferential crack in large diameter pipes
| DE93-003708 | p 2326 N93-23050
Pilot demonstration of cerium oxide coated anodes
| DE93-002507 | p 2231 N93-23316
Consideration of history dependent damage in creep crack growth
| DE93-004398 | p 2328 N93-23317
Designing for damage tolerant composite repairs
| AD-A260094 | p 2214 N93-24053
A new index for the crevice corrosion resistance of materials
| AD-A260437 | p 2233 N93-24112

CRASHES
Aircraft accident report: Air Transport International, Inc., flight 805, Douglas DC-8-63, N794AL. Loss of control and crash, Swanton, Ohio, 15 February 1992
| PB92-910406 | p 2117 N93-23086
The annual probability of an aircraft crash on the US Department of Energy reservation in Oak Ridge, Tennessee
| DE93-005171 | p 2118 N93-23325
Structural impact simulation using program KRASH
| CRANFIELD-AERO-9010 | p 2333 N93-24639

CRATERS
Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts
| DE93-003845 | p 2323 N93-22516

CRAY COMPUTERS
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
| DE93-005461 | p 2447 N93-23245

CREEP PROPERTIES
CREEPSIM-2: A software package for numerical integration of 1st order differential equations
| NPL-DMM(A)-35 | p 2435 N93-22452
A computational study of the time dependent crack growth process
| DE93-004397 | p 2324 N93-22751
Fractography applied to polymeric materials. Part 9: Creep and rupture analysis
| DREA-CR-91-470 | p 2238 N93-23119
Evaluation of tensile static, dynamic, and cyclic fatigue behavior for a HIPed silicon nitride at elevated temperatures
| DE93-005149 | p 2210 N93-23311
Heat pipe fatigue test specimen: Metallurgical evaluation
| NASA-CR-189120 | p 2381 N93-23360
High temperature deformation characteristics of discontinuous fiber reinforced composites
| DE93-004466 | p 2214 N93-24047
Viscoelastic properties of 3-D braided PEEK/graphite composites p 2214 N93-24103

CRETACEOUS PERIOD
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578

CREW PROCEDURES (INFLIGHT)
Task Analysis of Shuttle Entry and Landing Activities
| NASA-TM-104761 | p 2178 N93-22702
Space biology initiative program definition review. Trade study 1: Automation costs versus crew utilization p 2417 N93-23070

CREW PROCEDURES (PREFLIGHT)
Mir 1992 operations and crew training p 2157 N93-24352

CRITERIA
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406
A novel recursive partitioning criterion
| AD-A259921 | p 2464 N93-24564

CRITICAL LOADING
Characterizing the uncertainty in holddown post load measurements
| NASA-TP-3332 | p 2304 N93-23731

CRITICAL POINT
Fluids in Space
| ESA-SP-353 | p 2246 N93-22830
Acoustic determination of dewpoints in natural gas mixtures and retrograde condensates
| PB93-142917 | p 2221 N93-23274
Effect of triplet correlations on the adsorption of a dense fluid onto a crystalline surface
| AD-A260306 | p 2223 N93-24236

CRITICAL TEMPERATURE
Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852
A theoretical analysis of the effect of uniaxial elastic strain on the critical temperature of cuprate superconductors
| DE93-005710 | p 2507 N93-23329

CROP GROWTH
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770

Effects of UV-B and global climate change on rice
[PB93-135622] p 2388 N93-23874

CROSS CORRELATION

Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
[DE93-000041] p 2376 N93-22334

Effect of code augmentation or truncation on the signals produced by a time-integrating correlator
[AD-A259802] p 2264 N93-23458

Extragalactic radio sources in the ROSAT survey
p 2536 N93-23899

CROSS FLOW

Chaotic vibrations of tubes with nonlinear supports in crossflow
[DE93-004247] p 2329 N93-23689

CROSSLINKING

Applications of fibrous substrates containing insolubilized phase change polymers
p 2320 N93-22181

Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
[AD-A260163] p 2240 N93-24073

CRUDE OIL

Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
[PB93-123909] p 2412 N93-22067

CRUISE MISSILES

Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
[NASA-TM-105267] p 2325 N93-23015

X ray computed tomography for whole system evaluation (small engines)
[AD-A259519] p 2130 N93-23669

CRUISING FLIGHT

New approaches for a second generation supersonic transport propulsion system
[DS-1934] p 2130 N93-23391

CRYOGENIC COOLING

A comparison of the Space Station version of ASTROMAG with two free-flyer versions
[DE93-004695] p 2193 N93-22777

CRYOGENIC EQUIPMENT

Vehicle systems p 2174 N93-22095

PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
[DE93-005616] p 2257 N93-22416

CRYOGENIC FLUID STORAGE

Vehicle Systems Panel deliberations
p 2175 N93-22098

Built-up Al-Li structures for cryogenic tank and dry bay applications p 2175 N93-22099

Thermodynamical behaviour of supercritical oxygen in the Hermes spaceplane environmental conditions
p 2249 N93-22850

Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
[NASA-CR-184472] p 2259 N93-23715

CRYOGENIC FLUIDS

Selected OAST/OSSA space experiment activities in support of Space Station Freedom p 2189 N93-22636

CRYOGENIC ROCKET PROPELLANTS

Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 2: Cryo/aerobrake vehicle
[NASA-CR-192490] p 2179 N93-23251

CRYOGENIC TEMPERATURE

Techniques for improving the accuracy of cyrogenic temperature measurement in ground test programs
[NASA-TM-105996] p 2302 N93-22484

CRYOGENIC WIND TUNNELS

Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
[NASA-TM-4436] p 2110 N93-22876

CRYPTOGRAPHY

The ECA critical requirements model
[AD-A259682] p 2440 N93-23659

CRYSTAL DEFECTS

Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180

Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344

Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
[DE93-005450] p 2503 N93-22748

Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE93-000050] p 2505 N93-22969

Influence of defects in HgCdTe grown by Molecular Beam Epitaxy (MBE) on electrical devices
[AD-A260457] p 2511 N93-24194

Heteroepitaxial growth of gallium nitride and native defect formation in III-V nitrides p 2512 N93-24216

Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
[PB93-152072] p 2514 N93-24647

CRYSTAL GROWTH

Space Station Furnace Facility Core. Requirements definition and conceptual design study. Volume 2: Technical report. Appendix 6: Technical summary reports
[NASA-CR-192477] p 2302 N93-22349

Data-parallel Langevin dynamics simulations
[DE93-003836] p 2445 N93-22434

Advanced dielectrics for passivation of InSb
[DE93-005353] p 2501 N93-22503

The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
[DE93-006279] p 2501 N93-22510

Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620

Materials science research in microgravity
p 2191 N93-22645

Heat transfer simulation with a conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 2251 N93-22863

Stability and instability of thermocapillary convection in models of the float-zone crystal-growth process
[NASA-CR-192695] p 2252 N93-23122

Space Station Furnace Facility. Experiment/Facility Requirements Document (E/FRD), volume 2, appendix 5
[NASA-CR-192476] p 2200 N93-23241

Growth and characterization of isotopically enriched Ge-70 and Ge-74 single crystals
[DE93-004697] p 2510 N93-24050

Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425

CRYSTAL LATTICES

The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
[DE93-006279] p 2501 N93-22510

A structural study of charge-density-wave perturbations in mixed-halide MX solids
[DE93-005449] p 2503 N93-22747

Substrate surface structure effects on microstructure of epitaxial films
[DE93-005562] p 2504 N93-22944

Neutron measurements of the vortex lattice in YBa2Cu3O7
[DE93-005417] p 2509 N93-24008

Effect of triplet correlations on the adsorption of a dense fluid onto a crystalline surface
[AD-A260306] p 2223 N93-24236

A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
[AD-A260309] p 2234 N93-24237

Quantum mechanics of electrons in crystals with graded composition
[AD-A260294] p 2512 N93-24262

CRYSTAL OPTICS

Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425

CRYSTAL STRUCTURE

Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
[DE93-004204] p 2499 N93-22064

Metallo-organic solution deposition of ferroelectric PZT films
[AD-A260127] p 2502 N93-22549

A structural study of charge-density-wave perturbations in mixed-halide MX solids
[DE93-005449] p 2503 N93-22747

Heat transfer simulation with a conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 2251 N93-22863

Substrate surface structure effects on microstructure of epitaxial films
[DE93-005562] p 2504 N93-22944

Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
[DE93-005350] p 2505 N93-22974

Physical and direct methods in crystallography
p 2393 N93-23249

Diamond homoepitaxy by chemical vapor deposition
[AD-A260551] p 2512 N93-24281

Phase stability and electronic structure of transition-metal aluminides
[DE93-003584] p 2234 N93-24499

CRYSTAL SURFACES

Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
[AD-A260043] p 2488 N93-23645

CRYSTALLINITY

Thin silicon solar cells
[DE93-007420] p 2376 N93-22532

Molecular control of liquid crystalline orientation of Poly (p-phenylene -2,6-benzobisoxazole) and Poly (p-phenylene -2,6-benzobisthiazole)
[AD-A259729] p 2508 N93-23471

Recrystallization of amorphous and nanocrystalline NdBa2Cu3O(7-x) and GdBa2Cu3O(7-x)
[DE93-004469] p 2508 N93-23950

Effect of triplet correlations on the adsorption of a dense fluid onto a crystalline surface
[AD-A260306] p 2223 N93-24236

CRYSTALLITES

Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
[DE93-004191] p 2499 N93-22062

CRYSTALLIZATION

Growth of precipitates in Bi2Sr2CaCu2O8
[DE93-004443] p 2502 N93-22725

Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
[DE93-004453] p 2503 N93-22728

Thermodynamically-consistent phase-field models for solidification
[PB93-139012] p 2515 N93-24005

CRYSTALLOGRAPHY

Commercial researcher perspective
p 2184 N93-22615

Physical and direct methods in crystallography
p 2393 N93-23249

Molecular control of liquid crystalline orientation of Poly (p-phenylene -2,6-benzobisoxazole) and Poly (p-phenylene -2,6-benzobisthiazole)
[AD-A259729] p 2508 N93-23471

Cavities in He-implanted Si: Internal surface science
[DE93-005340] p 2509 N93-24012

Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
[PB93-152072] p 2514 N93-24647

CRYSTALS

Crystal chemistry of ceramic/mineral systems
[AD-A260440] p 2241 N93-24193

CULTURE TECHNIQUES

Xylose fermentation to ethanol
[DE93-000067] p 2244 N93-22929

Biological conversion of synthesis gas
[DE93-006359] p 2245 N93-24044

CUMULUS CLOUDS

Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
[DE93-002164] p 2402 N93-22337

CURING

Applications of fibrous substrates containing insolubilized phase change polymers
p 2320 N93-22181

Gel time measurements on carbon fiber/epoxy resin prepregs
[ICAS-90-4-10-4] p 2210 N93-23400

Modeling the thermal properties and processing of composite materials p 2214 N93-24206

Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
[AD-D015627] p 2241 N93-24221

CURRENT CONVERTERS (AC TO DC)

AC/DC converter
[CA-PATENT-1-306-005] p 2205 N93-24205

CURRENT DENSITY

Processing and microstructural development of Ag-clad Bi-Sr-Ca-Cu-O tapes
[DE93-004201] p 2500 N93-22078

A high-power 95 GHz gyro-TWT amplifier
[DE93-002332] p 2277 N93-22425

Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
[DE93-003792] p 2504 N93-22808

Enhanced vortex pinning and critical current density in proton-irradiated YBa2Cu3O(7-delta) thin films
[DE93-005367] p 2507 N93-23326

Superconductivity devices: Commercial use of space
[NASA-CR-192841] p 2513 N93-24483

Studies of microstructure/critical current density relationships for grain boundaries in YBa2Cu3O(7-delta) bicrystals
[DE93-003000] p 2513 N93-24512

CURRENT DISTRIBUTION

Report of the Sea Ice Thickness Workshop
[AD-A259696] p 2414 N93-23663

CURRENT SHEETS

A high performance spectral code for nonlinear MHD stability
[DE93-004541] p 2494 N93-22984

CURVATURE

Representation and recognition of free-form surfaces
[AD-A259883] p 2441 N93-24019

Analytical representation of contours
[AD-A260151] p 2471 N93-24415

CURVE FITTING
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
| DE93-005607 | p 2279 N93-22945
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension
p 2318 N93-24184
Analytical representation of contours
| AD-A260151 | p 2471 N93-24415

CURVED PANELS
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704

CURVES (GEOMETRY)
Analytical representation of contours
| AD-A260151 | p 2471 N93-24415

CUSHIONS
Design of a portable powered seat lift
p 2429 N93-22190

CUTTING
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
| DE93-002162 | p 2312 N93-22891
Pipe crawler development for duct elbow removal
| DE93-002169 | p 2313 N93-22892

CYANOGEN
Laser spectroscopy of chemically reactive species
| DE93-006672 | p 2310 N93-24326

CYCLES
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
| DE93-005616 | p 2257 N93-22416

CYCLIC HYDROCARBONS
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
| DE93-005115 | p 2235 N93-22409

CYCLOGENESIS
An investigation of the ERICA IOP-5A cyclone
| AD-A260214 | p 2408 N93-24097

CYCLONES
Verification of effectiveness of MOS-1b data in disaster area
p 2337 N93-22137
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
| AD-A259922 | p 2407 N93-23710
An investigation of the ERICA IOP-5A cyclone
| AD-A260214 | p 2408 N93-24097

CYCLOTRON FREQUENCY
Analysis of non-thermal electron cyclotron emission during electron cyclotron current drive experiments on the D3-D tokamak
p 2498 N93-24187

CYCLOTRON RADIATION
Advanced dielectrics for passivation of InSb
| DE93-005353 | p 2501 N93-22503
Electron cyclotron emission measurements on the Texas Experimental Tokamak
p 2494 N93-23066
Analysis of non-thermal electron cyclotron emission during electron cyclotron current drive experiments on the D3-D tokamak
p 2498 N93-24187
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
| PB93-146215 | p 2499 N93-24606

CYCLOTRON RESONANCE
Advanced dielectrics for passivation of InSb
| DE93-005353 | p 2501 N93-22503
Electron Cyclotron Resonance Heating (ECRH)
p 2495 N93-23259

CYCLOTRON RESONANCE DEVICES
Electron Cyclotron Resonance Heating (ECRH)
p 2495 N93-23259

CYLINDRICAL BODIES
Current displacement in parabolic cylinder
| ETN-93-93423 | p 2278 N93-22681
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897
CO2 laser beam propagation with ZnSe optics
| DE93-002927 | p 2308 N93-23307
Numerical study of axial turbulent flow over long cylinders
p 2295 N93-23592
Studies in penetration mechanics
| AD-A260436 | p 2332 N93-24304
Control of two- and three-dimensional wake instabilities from bluff-bodies
| AD-A260410 | p 2299 N93-24428
Vision-guided gripping of a cylinder
| NASA-CR-193199 | p 2465 N93-24657

CYLINDRICAL CHAMBERS
Inward electrostatic precipitation of interplanetary particles
| NASA-CR-192786 | p 2552 N93-24477

CYLINDRICAL SHELLS
Well-posedness of a model for structural acoustic coupling in a cavity enclosed by a thin cylindrical shell
| NASA-CR-191439 | p 2473 N93-22878
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104

CYTOLOGY
Analysis and synthesis of adaptive neural elements and assemblies
| AD-A259954 | p 2422 N93-24247

D

DAMAGE
Theories of elastoplasticity coupled with continuum damage mechanics
| DE93-007426 | p 2323 N93-22534
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
| NASA-TM-107558 | p 2178 N93-22669
Consideration of history dependent damage in creep crack growth
| DE93-004398 | p 2328 N93-23317
Damage tolerance approach
| ETN-93-93700 | p 2332 N93-24486

DAMAGE ASSESSMENT
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
| AD-A260119 | p 2329 N93-23700
Orbiting space debris: Dangers, measurement and mitigation
| AD-A260533 | p 2196 N93-24279
Large-amplitude forced response of dynamic systems
| AD-A260394 | p 2332 N93-24426
Damage tolerance approach
| ETN-93-93700 | p 2332 N93-24486
Damage analysis and fundamental studies for fusion reactor materials development
| DE93-008283 | p 2499 N93-24516

DAMPING
The University of Wisconsin-Madison Torsatron/Stellarator Laboratory program
| DE93-005922 | p 2492 N93-22419
Oscillations of finite liquid columns
p 2250 N93-22855
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
| NASA-CR-190783 | p 2210 N93-23429
A mechanism for capture into resonance
| PB93-145761 | p 2469 N93-23648
Composite passive damping struts for large precision structures
| NASA-CASE-NPO-17914-1-CU | p 2333 N93-24596

DARK MATTER
A study of properties of dark galaxy halos in a CDM universe using N-body computer simulations
p 2546 N93-23132
X ray morphology and the mass of clusters of galaxies
p 2534 N93-23887

DARKENING
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
| AD-D015623 | p 2241 N93-24257

DATA ACQUISITION
Observation system for sea surface temperature validation test in Mutsu Bay
p 2334 N93-22123
Monitoring of Kuroshio current using the data of VTIR obtained by MOS-1 and MOS-1b
p 2334 N93-22124
Sea surface temperature: Observation in off-shore of Sanriku
p 2335 N93-22125
Observation in the East China Sea
p 2335 N93-22126
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data
p 2335 N93-22128
A three channel telemetry system
p 2180 N93-22162
MIRAGE: The data acquisition, analysis, and display system
p 2530 N93-22193
ROWS wave spectral data collected in SAXON-FPN, November 1990
| NASA-TM-104582 | p 2412 N93-22387
Vibration Pattern Imager (VPI): A control and data acquisition system for scanning laser vibrometers
| NASA-TM-107721 | p 2476 N93-22553
Icing research tunnel rotating bar calibration measurement system
| NASA-TM-106010 | p 2303 N93-22598
An on-orbit viewpoint of life sciences research
p 2187 N93-22629
Flight experience with lightweight, low-power miniaturized instrumentation systems
| NASA-TM-4463 | p 2128 N93-23102
Standardization work for the calibration of intensities of celestial objects
| NASA-CR-192831 | p 2543 N93-23502
Collection and Distribution of Ecological Data by Satellite: CDEDS
p 2344 N93-23511
Collection and distribution of ecological data by satellite pilot projects as demonstration of the concept
p 2344 N93-23512
Communications techniques supporting the data management
p 2276 N93-23543
Delivery of information from Earth observation satellites
p 2350 N93-23549
Multispectral intelligent fusion techniques
p 2352 N93-23564
Support measurement and estimating for oracle database applications using Mark 2 function points
| AD-A259686 | p 2440 N93-23661
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea
p 2359 N93-23761
Early results on the use of ERS-1 SAR data for real-time sea ice monitoring in Canadian waters
p 2359 N93-23762
The program of oceanological experiments within the Priroda project
p 2361 N93-23773
TCAS 2: Report on UK operational trial
| CAA-PAPER-92011 | p 2122 N93-24105
An experimental investigation of subsonic flow in a two-dimensional U-duct
| NASA-TM-103931 | p 2128 N93-24535
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
| PB93-144186 | p 2478 N93-24649

DATA BASE MANAGEMENT SYSTEMS
Universal Index System
p 2530 N93-22152
Searching the Occurrence Reporting and Processing Systems (ORPS) database
| DE93-005242 | p 2523 N93-22499
GROPE: A GENESIS/EXODUS database examination program
| DE93-006963 | p 2523 N93-22514
The ANL electric vehicle battery R/D program for DOE-EHP
| DE93-005689 | p 2278 N93-22688
Beyond interlibrary loan state-of-the-art article retrieval
| DE93-004425 | p 2523 N93-22723
GJOIN: A program for merging two or more GENESIS databases
| DE93-007709 | p 2523 N93-22914
An object-oriented database approach to the storage and use of medical data
p 2526 N93-23382
Performance prediction of relational database management systems
| ISBN-0-315-69232-4 | p 2526 N93-23383
LARCRIM user's guide, version 1.0
| NASA-CR-191416 | p 2439 N93-23432
Condition monitoring in an active deductive database
p 2526 N93-23488
Prototype for a regional data management system, a step towards a regional land use project
p 2353 N93-23571
Database management systems in engineering
| PB93-138964 | p 2527 N93-23869
Implementation and performance evaluation of a parallel transitive closure algorithm on PRISMA/DB
| MEMO-INF-92-45 | p 2448 N93-23873
Storage systems for national information assets: A collaborative research project
| DE93-007402 | p 2529 N93-24450
Treatment of human-computer interface in a decision support system
| DE93-002281 | p 2428 N93-24502

DATA BASES
Radar seeker based autonomous navigation update system using topography feature matching techniques
p 2256 N93-22030
Data sets for weather information services
p 2337 N93-22140
Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237
Object technology: A white paper
| DE93-006037 | p 2522 N93-22495
Searching the Occurrence Reporting and Processing Systems (ORPS) database
| DE93-005242 | p 2523 N93-22499
GROPE: A GENESIS/EXODUS database examination program
| DE93-006963 | p 2523 N93-22514
Conjunctive programming: An interactive approach to software system synthesis
| NASA-CR-192798 | p 2436 N93-22701
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
| DE93-007258 | p 2219 N93-22824

GJOIN: A program for merging two or more GENESIS databases
[DE93-007709] p 2523 N93-22914
Gridded state maps of wind electric potential
[DE93-004556] p 2379 N93-22988
National security and national competitiveness: Open source solutions NASA requirements and capabilities
[NASA-TM-4458] p 2523 N93-23030
Bibliography of global change, 1992
[NASA-SP-7102] p 2342 N93-23239
NTIA Terrain Data Base System Documentation (Program DUMPTERS, Extract and Ternd). Version 4.0, October 1992
[PB93-108330] p 2343 N93-23254
Common Carrier Earth Station Application
[PB93-111722] p 2263 N93-23268
Analysis of acid precipitation samples collected by state agencies
[PB93-144152] p 2386 N93-23276
Medical subject headings: Supplementary chemical records, 1993
[PB93-115244] p 2525 N93-23279
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
Engineering data integration: Problems and solutions
[PNR-90999] p 2525 N93-23370
An object-oriented database approach to the storage and use of medical data p 2526 N93-23382
Performance prediction of relational database management systems
[ISBN-0-315-69232-4] p 2526 N93-23383
Coordinating Council. First Meeting: NASA/RECON database
[NASA-TM-108766] p 2526 N93-23412
Parallel evaluation of deductive database queries p 2527 N93-23503
Support measurement and estimating for oracle database applications using Mark 2 function points
[AD-A259686] p 2440 N93-23661
Operational geocoding of ERS-1 SAR imagery p 2359 N93-23765
Remote sensing satellite and thematic applications in high schools and elementary schools in France p 2370 N93-23829
Integrated global environmental (global change) data activities support researchers and educators p 2370 N93-23834
Development of data sets for the ISY sea surface temperature: MOS-1/MOS-1b data sets p 2371 N93-23838
Database management systems in engineering
[PB93-138964] p 2527 N93-23869
ARTI refrigerant database
[DE93-006431] p 2239 N93-23949
Designing for damage tolerant composite repairs
[AD-A260094] p 2214 N93-24053
Intelligent information retrieval for a multimedia database using captions
[AD-A260438] p 2528 N93-24113
Modernization and unification: Strategic goals for NASA STI program
[NASA-TM-109186] p 2528 N93-24117
Architecture for human-computer design, management and coordination in a collaborative AEC environment p 2528 N93-24186
Assigning sites to redundant clusters in a distributed storage system
[AD-A260458] p 2528 N93-24196
AGRICOLA subject category codes with scope notes (modified AGRIS)
[PB93-152643] p 2528 N93-24202
List of journals indexed in AGRICOLA, 1992
[PB93-152650] p 2528 N93-24204
A version and configuration model for software evolution
[AD-A260557] p 2441 N93-24283
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
[PB93-146082] p 2389 N93-24334
Electric and hybrid vehicle program; Site Operator Program
[DE93-005239] p 2319 N93-24444
ANL's electric vehicle battery activities for USABC
[DE93-005691] p 2319 N93-24446
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
[NASA-TM-101641] p 2180 N93-24522
Hypersonic shock/boundary-layer interaction database
[NASA-CR-177577] p 2299 N93-24526
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
[PB93-146090] p 2390 N93-24645

DATA COMPRESSION

An investigative study of multispectral data compression for remotely-sensed images using vector quantization and difference-mapped shift-coding p 2445 N93-22157
Real-time transmission of digital video 'using variable-length coding
[NASA-TM-106092] p 2261 N93-22483
The 1993 Space and Earth Science Data Compression Workshop
[NASA-CP-3191] p 2430 N93-24544
Data compression opportunities in EOSDIS p 2430 N93-24545
Compression through decomposition into browse and residual images p 2430 N93-24546
Applications of wavelet-based compression to multidimensional Earth science data p 2430 N93-24547
Wavelet encoding and variable resolution progressive transmission p 2431 N93-24548
Fast image decompression for telebrowsing of images p 2431 N93-24549
A survey of quality measures for gray-scale image compression p 2431 N93-24550
Digital mammography, cancer screening: Factors important for image compression p 2424 N93-24551
A study of video frame rate on the perception of moving imagery detail p 2431 N93-24552
Systems aspects of COBE science data compression p 2431 N93-24553
Proposed data compression schemes for the Galileo S-band contingency mission p 2431 N93-24554
Data compression for the Cassini radio and plasma wave instrument p 2432 N93-24555

DATA FLOW ANALYSIS

Newly available technologies present expanding opportunities for scientific and technical information exchange
[NASA-CR-4494] p 2261 N93-22470
Coordinating Council. First Meeting: NASA/RECON database
[NASA-TM-108766] p 2526 N93-23412
Remotely piloted vehicle control and interface system
[AD-D015618] p 2132 N93-24228

DATA INTEGRATION

Laser range camera data fusion
[DE93-005159] p 2263 N93-23313
A fuzzy logic controller system
[AD-A259723] p 2439 N93-23467
Technical Digest. Detection systems and technology, September 1992
[AD-A259812] p 2271 N93-23670
Constant false probability data fusion system
[AD-D015624] p 2304 N93-24219
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
[PB93-146090] p 2390 N93-24645

DATA LINKS

Linear payout systems for dispensing fiber-optic data links from precision-guided munitions or high-performance aircraft/missles p 2255 N93-22026
Analysis of MMIC arrays for use in the ACTS Aero Experiment
[NASA-TM-106073] p 2180 N93-22589
Controller evaluation of initial terminal data link ATC services: Mini study 3
[DOT/FAA/CT-92/18] p 2262 N93-23046
Airline applications in air-/ground communication using advanced technologies p 2275 N93-23514
SkyFix: A better position through the use of INMARSAT and GPS p 2124 N93-23522

DATA MANAGEMENT

Environmental data sets in Canada p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
Environmental data sets at the University of Alaska p 2338 N93-22146
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
Intelligent systems technology infrastructure for integrated systems p 2145 N93-22285
The df: A proposed data format standard
[NASA-TM-4467] p 2430 N93-22810
Communications techniques supporting the data management p 2276 N93-23543
Database management systems in engineering
[PB93-138964] p 2527 N93-23869
Archival and analysis of Hubble Space Telescope data p 2535 N93-23894
Data analysis and archives in astronomy: A perspective view p 2535 N93-23896
Preparation for analysis of data from the langmuir probe instrument on the CRRES satellite
[AD-A260534] p 2201 N93-24280
Storage systems for national information assets: A collaborative research project
[DE93-007402] p 2529 N93-24450
Systems aspects of COBE science data compression p 2431 N93-24553

DATA PROCESSING

Searching the Occurrence Reporting and Processing Systems (ORPS) database
[DE93-005242] p 2523 N93-22499
Aprepro: An algebraic preprocessor for parameterizing finite element analyses
[DE93-006989] p 2466 N93-22527
Vibration Pattern Imager (VPI): A control and data acquisition system for scanning laser vibrometers
[NASA-TM-107721] p 2476 N93-22553
Beyond interlibrary loan state-of-the-art article retrieval
[DE93-004425] p 2523 N93-22723
Visual autonomous automatic landing of airplanes p 2121 N93-22791
Neural processing of gravity information
[NASA-CR-192766] p 2419 N93-23233
Mean levels in nonlinear analysis and identification
[RR-454] p 2525 N93-23378
Perception, scene reconstruction and world modeling for unmanned underwater vehicles
[PB93-146983] p 2459 N93-23443
The effects of display and response codes on information processing in an identification task
[AD-A259531] p 2427 N93-23451
Delivery of information from Earth observation satellites p 2350 N93-23549
Multispectral intelligent fusion techniques p 2352 N93-23564
The promise of raster data processing in digital terrain modelling p 2356 N93-23585
The influence of propagation on high frequency radiogoniometry and single station location p 2266 N93-23607
Archival and analysis of Hubble Space Telescope data p 2535 N93-23894
Data analysis and archives in astronomy: A perspective view p 2535 N93-23896
The ROSAT standard analysis software system p 2445 N93-23930
EXSAS: The interactive analysis system for ROSAT data p 2541 N93-23934
TCAS 2: Report on UK operational trial
[CAA-PAPER-92011] p 2122 N93-24105
Intelligent information retrieval for a multimedia database using captions
[AD-A260438] p 2528 N93-24113
What makes a good feature?
[AD-A259962] p 2463 N93-24249
Advanced information processing
[AD-A260245] p 2529 N93-24258
Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
Editing images of text
[PB93-149896] p 2443 N93-24576

DATA PROCESSING EQUIPMENT

Office of Space Flight standard spaceborne Global Positioning System user equipment project p 2148 N93-22301

DATA REDUCTION

NASA Marshall Space Flight Center Solar Observatory Report, July to December 1992
[NASA-TM-108396] p 2542 N93-22665
Archival and analysis of Hubble Space Telescope data p 2535 N93-23894
Data analysis and archives in astronomy: A perspective view p 2535 N93-23896
Scientific visualization of volumetric radar cross section data
[AD-A259586] p 2272 N93-24065
Visualization of gravity wave data by Iris Explorer (a computer program)
[FFI-92/7022] p 2399 N93-24090
Preparation for analysis of data from the langmuir probe instrument on the CRRES satellite
[AD-A260534] p 2201 N93-24280

DATA RETRIEVAL

A proposal of fuzzy connective with learning function and its application to fuzzy retrieval system p 2450 N93-22211
Experience with the UniTree mass storage system
[DE93-004717] p 2445 N93-22388
The ROSAT archive p 2538 N93-23915

Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286

DATA SAMPLING
Development of size-specific data from particulate control technology research reports
[PB93-131456] p 2384 N93-22922
Identification of systems from non-uniformly sampled data
[RR-452] p 2472 N93-23375
Precision geocoding demonstrator system p 2348 N93-23539
A wideband parallel sampling system
[ISBN-0-315-60463-8] p 2286 N93-24617

DATA STORAGE
Los Alamos HPDS: High-speed data transfer
[DE93-003804] p 2434 N93-22074
Experience with the UniTree mass storage system
[DE93-004717] p 2445 N93-22388
The df: A proposed data format standard
[NASA-TM-4467] p 2430 N93-22810
Remote sensing applied to mapping and other purposes: STADIS project, a practical example in Tunisia p 2352 N93-23561
Archival and analysis of Hubble Space Telescope data p 2535 N93-23894
The IUE archive(s) p 2535 N93-23895
Data analysis and archives in astronomy: A perspective view p 2535 N93-23896
The ROSAT archive p 2538 N93-23915
Assigning sites to redundant clusters in a distributed storage system
[AD-A260458] p 2528 N93-24196
Storage systems for national information assets: A collaborative research project
[DE93-007402] p 2529 N93-24450

DATA STRUCTURES
Adaptive meshing in solids
[DE93-003238] p 2287 N93-22331
Match and move: An approach to data parallel computing
[AD-A259915] p 2449 N93-23999
Raster graphics: A tutorial and implementation guide
[PB93-145233] p 2443 N93-24562

DATA SYSTEMS
Los Alamos HPDS: High-speed data transfer
[DE93-003804] p 2434 N93-22074
Data sets for weather information services p 2337 N93-22140
Environmental data sets in Canada p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
The df: A proposed data format standard
[NASA-TM-4467] p 2430 N93-22810
Controller evaluation of initial terminal data link ATC services: Mini study 3
[DOT/FAA/CT-92/18] p 2262 N93-23046
Mean levels in nonlinear analysis and identification
[RR-454] p 2525 N93-23378
Meteosat operational programme current missions and services p 2357 N93-23752
The ROSAT archive p 2538 N93-23915
Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
The 1993 Space and Earth Science Data Compression Workshop
[NASA-CP-3191] p 2430 N93-24544
Data compression opportunities in EOSDIS p 2430 N93-24545

DATA TRANSFER (COMPUTERS)
Los Alamos HPDS: High-speed data transfer
[DE93-003804] p 2434 N93-22074
Demonstration plan for real time receiving and processing of flight data from the space transportation system
[NASA-TM-107725] p 2152 N93-22468
Engineering data integration: Problems and solutions
[PNR-90999] p 2525 N93-23370
Coordinating Council. First Meeting: NASA/RECON database
[NASA-TM-108766] p 2526 N93-23412
Protocol design and implementation using formal methods
[MEMO-INF-92-43] p 2440 N93-23867

DATA TRANSMISSION
An application protocol for CAD to CAD transfer of electronic information p 2530 N93-22154
Wireless infrared communications for space and terrestrial applications p 2275 N93-22177
Fully automatic transmission of information via HF and comparison to satellite transmission p 2275 N93-23516
Communications techniques supporting the data management p 2276 N93-23543
Fast image decompression for telebrowsing of images p 2431 N93-24549

DEBONDING (MATERIALS)
Role of interfaces on the ductile fracture process of discontinuous fiber reinforced composites
[DE93-004464] p 2209 N93-22973

DEBRIS
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
[NASA-TM-105830] p 2312 N93-22826
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
[NASA-TM-107556] p 2179 N93-23085

DECAMETRIC WAVES
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603

DECAY RATES
Rigorous QCD predictions for decays of P-wave quarkonia
[DE93-004853] p 2481 N93-22744
Passive (self-powered) fiber-optic sensors
[DE93-005761] p 2486 N93-22762

DECELERATION
Soft-ground arresting system for commercial aircraft
[DOT/FAA/CT-TN93/4] p 2133 N93-22797

DECISION MAKING
Certain and possible rules for decision making using rough set theory extended to fuzzy sets p 2454 N93-22359
The ASLOTS concept: An interactive, adaptive decision support concept for Final Approach Spacing of Aircraft (FASA). FAA-NASA Joint University Program p 2105 N93-22563
Intelligent flight control systems p 2107 N93-22576
Framework for decision making: An EPA perspective
[PB93-134369] p 2518 N93-22904
Trail maneuver generation and selection in the Paladin tactical decision generation system
[NASA-TM-107722] p 2131 N93-23088
The impact on organization structure on team decision making under stress and uncertainty
[AD-A259831] p 2519 N93-23434
Advanced team decision making: A developmental method
[AD-A259512] p 2520 N93-23466
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
[PB93-142362] p 2122 N93-23652
The study of crew coordination and performance in hierarchical team decision making
[AD-A259514] p 2520 N93-23698
Quasi-binary decision making using light scattering
[AD-A260470] p 2489 N93-24197
Treatment of human-computer interface in a decision support system
[DE93-002281] p 2428 N93-24502

DECISION THEORY
Permissive planning: A machine-learning approach to planning in complex real-world domains
[AD-A260019] p 2521 N93-24303

DECODERS
Versatile Reed-Solomon decoders
[ISBN-0-315-64738-8] p 2274 N93-24626

DECODING
Suboptimum decoding of block codes
[NASA-CR-192342] p 2437 N93-23099
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
[DREO-CR-041LM] p 2271 N93-23729

DECOMPOSITION
Copper Mountain conference on iterative methods, volume 2
[DE93-004994] p 2466 N93-22405
Development of rate expressions for the thermal decomposition of RDX
[DE93-005345] p 2244 N93-22502
A comparison of deconvolution techniques
[DE93-007407] p 2391 N93-22530
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
[NASA-TM-106014] p 2236 N93-22560
Chemistry of bimetallic and alloy surfaces
[DE93-006893] p 2230 N93-22981
Photopromoted and thermal decomposition of nitric oxide by metal oxides
[AD-A259766] p 2224 N93-24422
Direct catalytic decomposition of nitric oxide
[DE93-008107] p 2389 N93-24515

DECOUPLING
Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
[DE93-004204] p 2499 N93-22064

DEEP SPACE NETWORK
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
The Goldstone solar system radar: A science instrument for planetary research
[NASA-CR-192793] p 2261 N93-22478

DEFECTS
Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
[DE93-005881] p 2207 N93-22410

DEFENSE PROGRAM
Ten-year space launch technology plan
[NASA-TM-108701] p 2135 N93-22204
Proceedings: DOD Software Technology Strategy public forum p 2437 N93-23092
Military space capabilities and requirements p 2154 N93-23161
An evaluation of schedule metrics used within aeronautical systems center
[AD-A260113] p 2521 N93-24413

DEFLECTION
Near-earth object interception workshop summary
[DE93-003793] p 2546 N93-22403
OTV bearing deflection investigation
[NASA-TM-106085] p 2303 N93-22994
Control and analysis of a single-link flexible beam with experimental verification
[DE93-003756] p 2314 N93-23289

DEFORESTATION
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation p 2407 N93-23495
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811

DEFORMATION
Improved techniques for thermomechanical testing in support of deformation modeling
[NASA-TM-105944] p 2323 N93-22555
Postirradiation deformation behavior in ferritic Fe-Cr alloys
[DE93-004833] p 2229 N93-22881
Role of interfaces on the ductile fracture process of discontinuous fiber reinforced composites
[DE93-004464] p 2209 N93-22973
Analysis of delamination related fracture processes in composites
[NASA-CR-192632] p 2209 N93-23073
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178
Application of the boundary element method to finite elasticity p 2327 N93-23200
Moire interferometry at high temperatures p 2328 N93-23380
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
High temperature deformation characteristics of discontinuous fiber reinforced composites
[DE93-004466] p 2214 N93-24047
Computation in mechanics of materials
[AD-A260060] p 2332 N93-24409

DEFORMETERS
Moire interferometry at high temperatures p 2328 N93-23380

DEGRADATION
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
[DE93-005533] p 2237 N93-22909
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products
[PB93-131449] p 2385 N93-23267
Analysis of human impact on degradation and desertification of the West African Sahel by means of multi-level remote sensing techniques p 2355 N93-23578
Molecular properties and fate of organic chemicals
[AD-A260090] p 2207 N93-24412
Use of high-energy radiation for degradation of environmental pollutants
[PB93-149995] p 2390 N93-24636

DEGREES OF FREEDOM
A macro-micro robot for precise force applications p 2465 N93-22158
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
The MSFC space station/space operations mechanism test bed p 2149 N93-22309
Thruster configurations for maneuvering heavy payloads p 2150 N93-22313

DEHUMIDIFICATION
Life cycle testing of desiccant core samples
| PB93-127058 | p 2220 N93-23098
High performance nanocomposite desiccation materials
| PB93-127025 | p 2223 N93-24210
DEHYDROGENATION
Chemistry of bimetallic and alloy surfaces
| DE93-006893 | p 2230 N93-22981
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
| DE93-004800 | p 2220 N93-22989
DEICING
Icing cloud simulator for use in helicopter engine induction system ice protection testing
| DOT/FAA/CT-TN92/43 | p 2133 N93-23087
DELAMINATING
Propagation of elastic waves through inhomogeneous, anisotropic materials
| DE93-006247 | p 2288 N93-22509
Analysis of delamination related fracture processes in composites
| NASA-CR-192632 | p 2209 N93-23073
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
The effects of delamination on the vibrational characteristics of composite structural elements
p 2210 N93-23202
DELAY LINES
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133
DELTA LAUNCH VEHICLE
GEOTAIL Spacecraft historical data report
| NASA-TM-108710 | p 2194 N93-23168
DELTA WINGS
Asymptotic analysis of: 1: Wave propagation in dispersive optical media with quadratic nonlinearity. 2: A hypersonic wing with three-dimensional self-similarity
p 2112 N93-23594
Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics
p 2113 N93-24136
DENSE PLASMAS
X ray absorption spectroscopy of dense, shock compressed, laser plasma p 2496 N93-23497
DENSIFICATION
Silicon nitride containing rare earth silicate intergranular phases
| DE93-006624 | p 2509 N93-24034
Chemical vapor infiltration with microwave heating
| DE93-005458 | p 2243 N93-24445
DENSITY MEASUREMENT
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 1: Effect of spray parameters on the performance of several lots of partially stabilized zirconia-yttria powder
| NASA-TP-3295 | p 2227 N93-22556
Fluid density and concentration measurement using noninvasive in situ ultrasonic resonance interferometry
| DE93-003741 | p 2220 N93-23051
DEPOSITION
Sputter-deposition and characterization of molybdenum disulfide thin films
| DE93-004801 | p 2235 N93-22048
The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
| DE93-006279 | p 2501 N93-22510
Conductive paints
| DE93-006511 | p 2236 N93-22713
Ion and electron beam processing of condensed molecular solids to form thin films
| DE93-007273 | p 2504 N93-22955
Plasma technology p 2496 N93-23263
Sequential deposition of copper on solid gold (111): A statistical model
| AD-A260269 | p 2234 N93-24233
Low-temperature deposition of ZrC thin films from a single source precursor
| DE93-007333 | p 2514 N93-24518
DEPOSITS
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
| PB93-129864 | p 2392 N93-22894
Microtopography of manganese crusts
| PB93-120830 | p 2398 N93-23996
Plasma treatment of glass surfaces
| AD-D015619 | p 2241 N93-24229
Impact contribution of prebiotic reactants to Earth
| NASA-CR-192785 | p 2552 N93-24480
DEPTH
A direct mathematical approach to optimize the age-depth relation of deep-sea sediment cores
| MPIM-77 | p 2414 N93-23636
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
| DE93-005038 | p 2415 N93-23979
DEPTH MEASUREMENT
Evaluation of the Bathyscan sweep survey system
| AD-A260162 | p 2415 N93-23708
DERIVATION
Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
| AD-A260071 | p 2224 N93-24314
DESERTIFICATION
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Analysis of human impact on degradation and desertification of the West African Sahel by means of multi-level remote sensing techniques
p 2355 N93-23578
Monitoring desertification in Patagonia/Argentina, using satellite data for sustainable environmental management
p 2367 N93-23813
Contribution of remote sensing and GIS for rangeland management in the region of Ouarzazate (Morocco)
p 2367 N93-23814
DESERTS
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
DESICCANTS
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
| DE93-005795 | p 2376 N93-22417
Life cycle testing of desiccant core samples
| PB93-127058 | p 2220 N93-23098
High performance nanocomposite desiccation materials
| PB93-127025 | p 2223 N93-24210
DESIGN ANALYSIS
MSFC Three Point Docking Mechanism design review
| NASA-CR-192462 | p 2181 N93-22013
Development of a miniature mass analyzer and associated instrumentation for improved capabilities in the analysis of low energy plasmas from a rocket or satellite platform
| NASA-CR-192453 | p 2202 N93-22014
System concept for an advanced stand-off weapon
p 2256 N93-22029
Reliability of solid rocket motor cases and nozzles
p 2176 N93-22103
Materials and structures technologies for hypersonics
p 2177 N93-22116
Rigid fibrous ceramics for entry systems
p 2177 N93-22117
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
Design of a portable powered seat lift
p 2429 N93-22190
ATTIRE (analytical tools for thermal infrared engineering): A sensor simulation and modeling package
p 2305 N93-22203
Robustness
| NASA-TP-3336 | p 2181 N93-22458
Computer Aided Control System Design (CACSD)
p 2107 N93-22572
Integrated and Multi-Function Navigation
| AGARD-CP-525 | p 2119 N93-22780
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784
Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841
Design of low-voltage bipolar operational amplifiers
| ISBN-90-9004571-6 | p 2280 N93-23021
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
| NASA-CR-184472 | p 2258 N93-23176
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study. Appendix 3: Environment analysis
| NASA-CR-192475 | p 2199 N93-23224
Towards computer-supported creative design based on Altshuller's theory of inventive problem solving
| MEMO-INF-92-49 | p 2438 N93-23358
A conceptual design analysis of an air launched anti-satellite missile system
| ETN-93-93487 | p 2126 N93-23372
The design of the ESA Multiband Imaging Microwave Radiometer MIMR p 2364 N93-23790
Protocol design and implementation using formal methods
| MEMO-INF-92-43 | p 2440 N93-23867
Distributed computer systems and logistics systems: What do they have in common besides distribution?
| MEMO-INF-92-44 | p 2448 N93-23872
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
| NASA-CR-191080 | p 2204 N93-23876
X-ray computed tomography for advanced materials and processes
| AD-A259828 | p 2213 N93-23953
Variable speed gas engine-driven air compressor system
| PB93-147353 | p 2319 N93-24561
TP protocol from specification to implementation
| MEMO-INF-92-42 | p 2443 N93-24582
DESORPTION
Investigation of the kinetics of surface-limited thin film growth of SiGe alloys
| DE93-005419 | p 2502 N93-22538
Sequential deposition of copper on solid gold (111): A statistical model
| AD-A260269 | p 2234 N93-24233
DESTRUCTIVE TESTS
Vulnerability assessment of aircraft: A review of the Department of Defense Live Fire Test and Evaluation Program
| PB93-149946 | p 2127 N93-23678
DETACHMENT
Negative ion detachment cross sections
| DE93-005679 | p 2483 N93-23328
DETECTION
Multi-window registration algorithm for automatic detection and tracking of moving targets
p 2255 N93-22022
TRAC based sensing for autonomous rendezvous
p 2140 N93-22253
Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290
On using scattering statistics for ultra wideband electromagnetic target classification and identification
| DE93-003809 | p 2260 N93-22433
Fault detection and isolation p 2106 N93-22568
Sensory sensitivities and discriminations and their roles in aviation
| AD-A259742 | p 2424 N93-23479
Technical Digest. Detection systems and technology, September 1992
| AD-A259812 | p 2271 N93-23670
DETONATION
Mathematical analysis of gasdynamic wave initiation
| AD-A260382 | p 2297 N93-24174
Numerical studies for the RAM accelerator
| AD-A259949 | p 2224 N93-24423
DEUTERIUM
Influence of alpha particle absorption on fundamental deuterium heating in a fusion plasma
| DE93-006824 | p 2492 N93-22513
DEVELOPING NATIONS
Use of remote sensing as part of the technical co-operation with developing countries
p 2339 N93-22438
CORECT: Committee On Renewable Energy Commerce and Trade, 1991
| DE92-016436 | p 2377 N93-22890
Remarks and proposals to adapt some Earth observations space programmes in the period of transition of the countries of central/eastern Europe; focused on Romania p 2362 N93-23778
Centres for space science and technology education: A United Nations initiative p 2369 N93-23826
DEW POINT
Acoustic determination of dewpoints in natural gas mixtures and retrograde condensates
| PB93-142917 | p 2221 N93-23274
Observed annual and interannual variations in tropospheric water
| PB93-123313 | p 2411 N93-24588
DIAGNOSIS
Reactive control and reasoning assistance for scientific laboratory instruments p 2465 N93-22186
High performance sapphire windows
p 2310 N93-22198
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
| AD-A260211 | p 2129 N93-22735
Stress resistance as a diagnostic category in air traffic controller selection
| DLR-FB-92-13 | p 2422 N93-24092
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion studies
| AD-A260253 | p 2224 N93-24333

DIAMAGNETISM
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
| DE93-003792 | p 2504 N93-22808
DIAMOND FILMS
Plasma technology p 2496 N93-23263
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
| AD-A259616 | p 2510 N93-24126
Heteroepitaxial diamond growth
| AD-A259623 | p 2510 N93-24127
DIAMONDS
Thermal diffusivity measurement of diamond materials
| AD-A260431 | p 2238 N93-22947
Heteroepitaxial diamond growth
| AD-A259623 | p 2510 N93-24127
Diamond homoepitaxy by chemical vapor deposition
| AD-A260551 | p 2512 N93-24281
DIATOMIC MOLECULES
Theory of the dissociation dynamics of small molecules on metal surfaces: Finite temperature studies
| DE93-005870 | p 2482 N93-23298
DICHROISM
High resolution studies of atoms and small molecules
| DE93-004340 | p 2481 N93-22758
DICTIONARIES
A comprehensive glossary of weather terms for storm spotters
| PB93-128940 | p 2407 N93-23649
DIELECTRIC PROPERTIES
Chemically prepared Pb(Zr,Ti)O3 thin films: The effects of orientation and stress
| DE93-004501 | p 2500 N93-22324
Dielectric and dynamic mechanical properties of ATBN-containing thermosets
| DREA-CR-91-444 | p 2239 N93-23725
Accurate evaluation of the real and imaginary material constants for a piezoelectric resonator in the radial mode
| DREA-CR-91-451 | p 2508 N93-23727
Dielectric for the supercapacitors
| AD-A260124 | p 2283 N93-24072
A simple model for the dielectric behaviour of polar solvents in the mean spherical approximation
| AD-A260283 | p 2483 N93-24261
DIELECTRICS
Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
On-line process analysis innovation: DiComp (tm) shunting dielectric sensor technology p 2287 N93-22200
Advanced dielectrics for passivation of InSb
| DE93-005353 | p 2501 N93-22503
Electromagnetic scattering cross sections from the bodies of revolution, volume 1
| DREV-CR-645 | p 2264 N93-23342
Dielectric for the supercapacitors
| AD-A260124 | p 2283 N93-24072
Millimeter-wave applications of semiconductor dielectric waveguides with plasma layers (surface or buried) generated from semiconductor lasers
| AD-A260484 | p 2510 N93-24134
A simple model for the dielectric behaviour of polar solvents in the mean spherical approximation
| AD-A260283 | p 2483 N93-24261
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295
DIELS-ALDER REACTIONS
Processable precursors to high performance liquid crystalline polymers
| AD-A260466 | p 2240 N93-24116
DIES
Continuous fiber thermoplastic prepreg
| NASA-CASE-LAR-14459-1 | p 2215 N93-24597
DIESEL ENGINES
Contribution to the study of soot formation in combustion environments by optical methods based on light diffusion
| ECL-91-26 | p 2218 N93-22697
Exhaust emissions from diesel engines
| DE93-752852 | p 2384 N93-22805
Taguchi methods applied to oxygen-enriched diesel engine experiments
| DE93-004873 | p 2317 N93-23976
DIESEL FUELS
Exhaust emissions from diesel engines
| DE93-752852 | p 2384 N93-22805
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
| PB93-139087 | p 2258 N93-23280
DIFFERENTIAL CALCULUS
IMP: A performance code p 2139 N93-22245
Extending compile-time reverse mode and exploiting partial separability in ADIFOR
| DE93-004668 | p 2467 N93-22776
Automatic differentiation of advanced CFD codes for multidisciplinary design
| DE93-005685 | p 2290 N93-22867
DIFFERENTIAL EQUATIONS
CREEPSIM-2: A software package for numerical integration of 1st order differential equations
| NPL-DMM(A)-35 | p 2435 N93-22452
Trajectory optimization based on differential inclusion
| NASA-CR-4501 | p 2181 N93-22459
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
| NASA-CR-4503 | p 2466 N93-22672
Large scale control and distributed computing systems under stochastic structural perturbations
| AD-A260501 | p 2447 N93-22933
Coverings and nonlocal symmetries
| MEMO-1057 | p 2470 N93-24109
A priori error estimates of finite element solutions of parametrized nonlinear equations
| AD-A260013 | p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
| AD-A260014 | p 2471 N93-24438
DIFFRACTION
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
| NASA-CR-190801 | p 2476 N93-22673
Calculation of 3-D free electron laser gain: Comparison with simulation and generalization to elliptical cross section
| DE93-004768 | p 2308 N93-22920
CO2 laser beam propagation with ZnSe optics
| DE93-002927 | p 2308 N93-23307
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
DIFFRACTION PATTERNS
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
| NASA-CR-190801 | p 2476 N93-22673
Control of the concentration gradient during crystal growth from solution p 2165 N93-24395
DIFFRACTION RADIATION
Laser diagnostics p 2311 N93-23260
DIFFUSION
Reaction and diffusion in turbulent combustion
| DE93-006185 | p 2216 N93-22055
Isotope tracer studies of diffusion in silicates and of geological transport processes using actinide elements
| DE93-006902 | p 2392 N93-23029
Kinetics of diffusional droplet growth in a liquid/liquid two-phase system
| NASA-CR-192624 | p 2292 N93-23220
Amorphous diffusion barriers for electronic device applications
| ETN-93-93476 | p 2281 N93-23366
Numerical simulations of the transport and diffusion during the 1991 Winter Validation Study along the front range in Colorado
| DE93-002684 | p 2396 N93-23674
The diffusion of lead toward the interface of a rapidly solidified carbon fiber reinforced aluminum-lead matrix composite p 2210 N93-23719
Gas separations using ceramic membranes
| DE93-003204 | p 2225 N93-24498
DIFFUSION COEFFICIENT
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
| NASA-TM-106079 | p 2207 N93-23014
Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
| AD-A260163 | p 2240 N93-24073
DIFFUSION FLAMES
Structure of confined laminar spray diffusion flames: Numerical investigation
| NASA-TM-106038 | p 2288 N93-22596
Mechanisms and enhancement of flame stabilization
| DE93-006467 | p 2219 N93-22709
Transient radiation properties of strongly radiating turbulent flames p 2221 N93-23181
DIFFUSIVITY
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
| NASA-TM-106079 | p 2207 N93-23014
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence
| NASA-CR-191421 | p 2295 N93-23421
DIGITAL COMPUTERS
Review of quantum computation
| DE93-003735 | p 2474 N93-22919
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133
DIGITAL DATA
Method and apparatus for filtering visual documents
| NASA-CASE-MSC-22093-1 | p 2522 N93-22017
ROWS wave spectral data collected in SAXON-FPN, November 1990
| NASA-TM-104582 | p 2412 N93-22387
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
| ACTA-POL-SCAND-EL-69 | p 2264 N93-23367
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133
DIGITAL FILTERS
Real-time signal processing systems
| AD-A259548 | p 2272 N93-24084
DIGITAL SIMULATION
A system for the numerical simulation of complex configuration internal aerodynamic fields for the aerospace industry
| ETN-93-93698 | p 2110 N93-23364
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Multisensor data applications for digital landscape models p 2350 N93-23550
Influence due to satellite attitude jitter on estimation of Digital Elevation Model (DEM) p 2350 N93-23551
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data p 2350 N93-23552
A Digital Landscape Model for Europe (DLME) p 2351 N93-23554
Estimation of runoff and erosion using GIS integrating DEM, LANDSAT data, and terrain hydrological data p 2351 N93-23558
Remote sensing landslide hazard mapping using GIS technology in Colombian Andes p 2351 N93-23559
Integration of digital image matching and multi image shape from shading p 2354 N93-23575
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm p 2354 N93-23576
The creation of a DEM from SPOT data p 2355 N93-23582
Realistic landscape visualization based on satellite images p 2355 N93-23583
The comparison of satellite radar altimeter derived heights with global digital terrain model heights p 2355 N93-23584
The promise of raster data processing in digital terrain modelling p 2356 N93-23585
Meteosat second generation: A look to the future p 2357 N93-23753
Operational geocoding of ERS-1 SAR imagery p 2359 N93-23765
Cartography of hazards from geological instabilities: Volcanic regions in Peru p 2368 N93-23815
Iron fertilization of the austral ocean: A model assessment
| MPIM-84 | p 2415 N93-23860
A snow cover model for global climatic simulations
| MPIM-85 | p 2368 N93-23861
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
| DLR-FB-92-10 | p 2374 N93-24140
DIGITAL SYSTEMS
Autonomous prealignment of a docking mechanism p 2137 N93-22238
Apparatus and method for computer vision measurements
| PB93-135077 | p 2432 N93-22536
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259706 | p 2282 N93-23665
Technical Digest. Detection systems and technology, September 1992
| AD-A259812 | p 2271 N93-23670
Immunizing digital systems against electromagnetic interference
| DE93-005935 | p 2271 N93-24041
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133
High resolution digital thermometer
| PAT-APPL-7-831-603 | p 2304 N93-24172
DIGITAL TECHNIQUES
Method and apparatus for filtering visual documents
| NASA-CASE-MSC-22093-1 | p 2522 N93-22017
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
Mapping from SPOT data p 2349 N93-23544

DIGITAL TELEVISION
Real-time transmission of digital video using variable-length coding
|NASA-TM-106092| p 2261 N93-22483
DIGITAL TO ANALOG CONVERTERS
Parallel processor for real-time structural control
|DE93-006284| p 2446 N93-22545
DIGITS
Effectiveness of feature and classifier algorithms in character recognition systems
|PB93-147197| p 2525 N93-23272
DIHEDRAL ANGLE
Low-speed wind tunnel study of the direct lift and direct side-force characteristics of a joined-wing airplane
|DE93-767971| p 2115 N93-24508
DIMENSIONAL ANALYSIS
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
|AD-A259829| p 2281 N93-23433
DIMENSIONAL MEASUREMENT
Traceability for radio frequency coaxial line standards
|NPL-DES-114| p 2277 N93-22451
Analysis of automated fatigue crack growth rate data
|DE93-752853| p 2324 N93-22771
DIMERS
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
|DE93-006411| p 2419 N93-24028
DIODES
Global Earth observation using modern communications satellite techniques p 2276 N93-23527
Gas source molecular beam epitaxial growth of GaN
|AD-A260524| p 2512 N93-24199
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292
DIPHENYL COMPOUNDS
Polybenzoxazoles via aromatic nucleophilic displacement
|NASA-CASE-LAR-14606-1-CU| p 2207 N93-23077
DIPOLE ANTENNAS
Radio location through high resolution eigenstructure processing techniques that yield accurate multipath AOA and differential time delay estimates p 2270 N93-23626
DIPOLE MOMENTS
Adaptive filters for monitoring localized brain activity from surface potential time series
|DE93-003795| p 2420 N93-22774
A comparison of the Space Station version of ASTROMAG with two free-flyer versions
|DE93-004695| p 2193 N93-22777
A simple model for the dielectric behaviour of polar solvents in the mean spherical approximation
|AD-A260283| p 2483 N93-24261
DIPOLES
The single-gap hollow spherical dipole in non-conducting media
|AD-A260017| p 2273 N93-24460
DIRAC EQUATION
A detailed study of nonperturbative solutions of two-body Dirac equations
|DE93-004794| p 2468 N93-22965
DIRECT CURRENT
Progresses in measuring electrostatic DC fields
|OEFZS-4627| p 2280 N93-23112
NIST mesurement service for DC standard resistors
|PB93-139079| p 2280 N93-23205
DIRECT POWER GENERATORS
Interagency Advanced Power Group Steering Group meeting minutes
|DE93-005641| p 2382 N93-24324
Mechanical Working Group meeting minutes --- power generation and delivery systems
|DE93-004884| p 2571 N93-24435
DIRECTION FINDING
Data selection for fast projection techniques: A comparative study of direction finding performance
|AD-A259916| p 2262 N93-22814
Radiolocation Techniques
|AGARD-CP-528| p 2265 N93-23598
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601
Propagation effects on HF direction finding p 2265 N93-23602
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603
A new passive SSL technique for HF radiolocation p 2267 N93-23609
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Measurements of the direction of arrival of an oblique chirp sounder signal p 2268 N93-23616
Communication interference/jamming and propagation analysis system and its application to radio location p 2269 N93-23621
Airborne system for detection and location of radio interference sources p 2269 N93-23622
Location of emissions by evasion of frequency and gusts by sequential analysis sensor in fast scanning p 2270 N93-23625
Radio location through high resolution eigenstructure processing techniques that yield accurate multipath AOA and differential time delay estimates p 2270 N93-23626
Multiple emitter direction finding from a circular array by single snapshot processing p 2270 N93-23627
Radiolocation in the lower ELF frequency band p 2270 N93-23630
DIRECTIONAL ANTENNAS
Emergency vehicle alert system, phase 2
|NASA-CR-192464| p 2260 N93-22455
DIRECTIONAL CONTROL
Flight investigation of the effect of tail boom strakes on helicopter directional control
|NASA-TP-3278| p 2108 N93-22654
DIRECTIONAL STABILITY
Subsonic aerodynamic characteristics of a proposed advanced manned launch system orbiter configuration
|NASA-TM-4439| p 2108 N93-22558
DISASTERS
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
DISCONNECT DEVICES
Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
|ETN-93-93421| p 2278 N93-22679
DISCONTINUITY
Propagation of elastic waves through inhomogeneous, anisotropic materials
|DE93-006247| p 2288 N93-22509
DISCRIMINATION
Sensory sensitivities and discriminations and their roles in aviation
|AD-A259742| p 2424 N93-23479
DISPENSERS
The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
DISPERSING
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows
|DE93-004122| p 2287 N93-22071
Tests of random flight and closure models in predicting turbulent scalar transport
|DE93-004123| p 2288 N93-22521
Self-focusing of broadband laser pulses in dispersive media
|DE93-007369| p 2307 N93-22529
DISPLACEMENT
Current displacement in parabolic cylinder
|ETN-93-93423| p 2278 N93-22681
OTV bearing deflection investigation
|NASA-TM-106085| p 2303 N93-22994
Polybenzoxazoles via aromatic nucleophilic displacement
|NASA-CASE-LAR-14606-1-CU| p 2207 N93-23077
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
Use of the conventional and tangent derivative boundary integral equations for the solution of problems in linear elasticity p 2331 N93-24121
DISPLACEMENT MEASUREMENT
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
|PB93-139004| p 2256 N93-22079
Calibration of a standard transducer using a laser interferometer (TTCP calibration round-robin)
|NRC-34387| p 2305 N93-24289
DISPLAY DEVICES
Advanced display object selection methods for enhancing user-computer productivity p 2444 N93-22151
An investigative study of multispectral data compression for remotely-sensed images using vector quantization and difference-mapped shift-coding p 2445 N93-22157
The Data Egg: A new solution to text entry barriers p 2530 N93-22192
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193
A synthetic environment for visualization and planning of orbital maneuvers p 2140 N93-22251
Hazard evaluation and operational cockpit display of ground-measured windshear data
|AIAA PAPER 90-0566| p 2105 N93-22564
Motif, the basics: An overview of the widget set
|DE93-005273| p 2436 N93-22720
Air traffic operational evaluation plan of the automated surface observing system (ASOS) displays
|DOT/FAA/CT-TN92/36| p 2121 N93-22801
Operational evaluation of the converging runway display aid at Saint Louis
|MTR-92W0000217| p 2133 N93-22874
Comparative evaluation of a monocular head mounted display device versus a flat screen display device in presenting aircraft maintenance technical data
|AD-A259684| p 2427 N93-23660
Apparent opacity affects perception of structure from motion
|AD-A260099| p 2488 N93-24054
DISSIPATION
Low-voltage-swing CMOS transceivers
|DE93-006607| p 2277 N93-22511
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
|NASA-CR-190801| p 2476 N93-22673
Dissipative trapped electron mode turbulence with ion Landau damping and FLR effects
|DE93-004524| p 2494 N93-22942
DISSOCIATION
Theory of the dissociation dynamics of small molecules on metal surfaces: Finite temperature studies
|DE93-005870| p 2482 N93-23298
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
|ONERA-P-1992-3| p 2309 N93-24137
DISTORTION
EXCPACK: A package of codes for electron impact excitation of ions by a distorted wave method
|DE93-006095| p 2479 N93-22525
DISTRIBUTED PARAMETER SYSTEMS
Distributed computer systems and logistics systems: What do they have in common besides distribution?
|MEMO-INF-92-44| p 2448 N93-23872
DISTRIBUTED PROCESSING
The design of scalable software libraries for distributed memory concurrent computers
|DE93-003612| p 2434 N93-22332
Evaluation of distributed computing tools
|DE93-007408| p 2446 N93-22531
High speed, wide area distributed computing for scientific imaging
|DE93-004727| p 2436 N93-22778
PMC: A shared short-cut to portable parallel power
|DE93-005815| p 2447 N93-22868
Large scale control and distributed computing systems under stochastic structural perturbations
|AD-A260501| p 2447 N93-22933
Automatic code generation for distributed robotic systems
|DE93-005779| p 2447 N93-22996
LOTOS specification style for OSI
|MEMO-INF-92-46| p 2448 N93-23357
Activities report 1990: Projects and services of the Research Department
|ETN-93-93692| p 2571 N93-23426
Validation of distributed systems by fault injection
|LAAS-92180| p 2472 N93-23864
Distributed computer systems and logistics systems: What do they have in common besides distribution?
|MEMO-INF-92-44| p 2448 N93-23872
Assigning sites to redundant clusters in a distributed storage system
|AD-A260458| p 2528 N93-24196
Progressive retry for software error recovery in distributed systems
|AD-A260075| p 2442 N93-24315
Process and event abstraction for debugging distributed programs
|ISBN-0-315-51884-7| p 2444 N93-24607
DISTRIBUTION (PROPERTY)
Analysis of the results of the first year of operation of the Munich Dust Counter p 2537 N93-23910
DISTRIBUTION FUNCTIONS
Biases in Monte Carlo eigenvalue calculations
|DE93-004189| p 2471 N93-22061
On the prior probabilities for two-stage Bayesian estimates
|DE93-006389| p 2472 N93-22593
Transformations of gaussian random fields and a test for independence of a survival time from a covariate
|AD-A260442| p 2472 N93-24114
DISTRICT OF COLUMBIA
Small business profiles, 1992. Region 3: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
|PB93-110948| p 2520 N93-24157
DISTURBANCES
The effects of three-dimensional imposed disturbances on bluff body near wake flows
|AD-A259501| p 2298 N93-24311

DIURNAL VARIATIONS
Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendocrine system of nonhuman primates
|DE93-007677| p 2417 N93-22913
Method of measuring nighttime U-values using the Mobile Window Thermal Test (MoWiTT) Facility
|DE93-004778| p 2404 N93-22964
Evaluation of diurnal thermal energy storage combined with cogeneration systems
|DE93-004798| p 2378 N93-22966
Study of SCN neurochemistry using in vivo microdialysis in the conscious brain: Correlation with circadian activity rhythms
|AD-A259803| p 2421 N93-23459
Irregular media effects on radiowave signals used in navigation and positioning systems
p 2266 N93-23606
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106
DIVERTERS
PISCES Program: Plasma-materials interactions and edge-plasma physics research
|DE93-005089| p 2491 N93-22406
Applications of divertor biasing to the next generation tokamaks
|DE93-005848| p 2494 N93-23023
Edge effects during DIII-D divertor biasing
|DE93-005847| p 2498 N93-24325
DIVING (UNDERWATER)
Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
|DLR-FB-92-14| p 2422 N93-24093
DMSP SATELLITES
Gamma ray burst results from DMSP satellites
|DE93-003823| p 2559 N93-23687
Drift scintillation meter for the defense meteorological satellite program
|AD-A259993| p 2410 N93-24299
Assessment of spaceborne lidar for meteorological analyses
|AD-A260026| p 2410 N93-24517
DOCUMENT STORAGE
Experience with the UniTree mass storage system
|DE93-004717| p 2445 N93-22388
DOCUMENTATION
Conjunctive programming: An interactive approach to software system synthesis
|NASA-CR-192798| p 2436 N93-22701
Writer's guide for technical procedures
|DE93-007746| p 2529 N93-24573
DOCUMENTS
Annual bibliography, 1989
|ISBN-951-22-0488-6| p 2526 N93-23424
List of journals indexed in AGRICOLA, 1992
|PB93-152650| p 2528 N93-24204
DOMAINS
Permissive planning: A machine-learning approach to planning in complex real-world domains
|AD-A260019| p 2521 N93-24303
DOPED CRYSTALS
A massive neutrino in nuclear beta decay?
|DE93-004718| p 2479 N93-22333
Local vibronic and electronic excitations of doping-induced states in the copper oxides
|DE93-003844| p 2501 N93-22429
Characterization of doped NiAl by atom probe field ion microscopy
|DE93-005932| p 2228 N93-22692
Electron-phonon driven spin frustration in multi-band Hubbard models: MX chains and oxide superconductors
|DE93-003697| p 2503 N93-22754
A massive neutrino in nuclear beta decay?
|DE93-004706| p 2482 N93-22950
Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
|AD-A260071| p 2224 N93-24314
Compositional superlattices based on PtCl/PtBr MX materials
|DE93-003700| p 2513 N93-24496
DOPPLER EFFECT
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933
DOPPLER RADAR
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture
p 2139 N93-22250
LADAR vision technology for automated rendezvous and capture p 2141 N93-22258
Plan for the evaluation of the prototype Terminal Doppler Weather Radar (TDWR) system
|DOT/FAA/CT-TN92/44| p 2404 N93-23045
Structure and utility of blind speed intervals associated with Doppler measurements of range rate
|DOT/FAA/CT-TN92/27| p 2122 N93-23063
Focused two-dimensional radar imaging using coherent time domain signals
|ESA-TT-1272| p 2263 N93-23331
A satellite-based Radar Wind Sounder (RAWS)
p 2406 N93-23384
Suppression of power line harmonic interference in HF surface-wave radar
|AD-A259917| p 2273 N93-24563
DOSAGE
High-temperature Au implantation into Ni-Be and Ni-Si alloys
|DE93-005555| p 2505 N93-23022
A linear, time-varying simulation of the respiratory tract system
|DE93-004515| p 2421 N93-24009
Ion beam mixing in multi-quantum well structures
|AD-A259772| p 2516 N93-24509
DOSIMETERS
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
|NASA-TM-106021| p 2206 N93-22605
DosiMir: Radiation measurements inside the Soviet Space Station Mir, first results p 2160 N93-24371
DOUBLE STARS
Status and early results of the Hipparcos astrometry project p 2533 N93-23879
DOWN-CONVERTERS
Test results of the advanced translator processing system p 2269 N93-23620
DOWNLINKING
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
|DREO-CR-041LM| p 2271 N93-23729
Proposed data compression schemes for the Galileo S-band contingency mission p 2431 N93-24554
DRAG
A convective drag theory for surface fluxes
|DE93-004037| p 2403 N93-22722
DRAG COEFFICIENTS
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
|DE93-005251| p 2293 N93-23300
DRAINAGE
Classification of TM data as a contribution to remote sensing for a hydrological run-off model
p 2341 N93-22448
Thematic Mapper land use classification as a remote sensing contribution for hydrologic runoff prediction model
|ESA-TT-1238| p 2342 N93-22461
DRIFT (INSTRUMENTATION)
Drift scintillation meter for the defense meteorological satellite program
|AD-A259993| p 2410 N93-24299
DRONE VEHICLES
Radar seeker based autonomous navigation update system using topography feature matching techniques
p 2256 N93-22030
DROP SIZE
Structure of confined laminar spray diffusion flames: Numerical investigation
|NASA-TM-106038| p 2288 N93-22596
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351
Determination and characteristics of the transition to two-phase slug flow in small channels
|DE93-004250| p 2299 N93-24434
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
|PB93-136117| p 2410 N93-24501
DROP TOWERS
The scientific microgravity fluid mechanics program of ZARM p 2247 N93-22832
Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841
Polyreactions in microgravity environment
p 2251 N93-22859
DROPS (LIQUIDS)
Liquid droplet radiator: Design concepts and development logic p 2247 N93-22834
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854
Experimental investigation of the influence of the temperature gradient on the thermocapillary convection in spherical drops under low-gravity
p 2251 N93-22862
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
Kinetics of diffusional droplet growth in a liquid/liquid two-phase system
|NASA-CR-192624| p 2292 N93-23220
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
|DE93-005251| p 2293 N93-23300
Computation of nonlinear optical scattering by droplets
|AD-A260333| p 2490 N93-24267
Size dependence of the chemical properties of cloud droplets: Exploratory studies by aircraft
|PB93-136117| p 2410 N93-24501
DRUGS
Safety study: Alcohol and other drug involvement in fatal general aviation accidents, 1983 through 1988
|PB92-917008| p 2117 N93-23187
Survey of aviation medical examiners: Information and attitudes about the pre-employment and pre-appointment drug testing program
|DOT/FAA/AM-92/15| p 2422 N93-24088
DUCTED FLOW
Experimental investigation of developing and fully developed flow in a curved duct of square cross section
|ISBN-0-315-70029-7| p 2291 N93-23177
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
|NASA-TM-106083| p 2294 N93-23404
An experimental investigation of subsonic flow in a two-dimensional U-duct
|NASA-TM-103931| p 2128 N93-24535
DUCTILITY
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
|DE93-004104| p 2226 N93-22069
Theories of elastoplasticity coupled with continuum damage mechanics
|DE93-007426| p 2323 N93-22534
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
|DE93-007670| p 2229 N93-22912
Role of interfaces on the ductile fracture process of discontinuous fiber reinforced composites
|DE93-004464| p 2209 N93-22973
Bend ductility of tungsten heavy alloys
|DE93-004839| p 2232 N93-23971
Effects of rolling on the ductility of 80 percent tungsten heavy alloy
|DE93-004840| p 2232 N93-23972
Acceptable aluminum additions for minimal environmental effect in iron-aluminum alloys
|DE93-006738| p 2234 N93-24329
DUCTS
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
|NASA-CR-190801| p 2476 N93-22673
Pipe crawler development for duct elbow removal
|DE93-002169| p 2313 N93-22892
The acoustical impedance at the junction of non-coaxial cylindrical ducts
|MATHS-REPT-A-157| p 2477 N93-24123
DURABILITY
Reentry systems: Material technology needs
p 2176 N93-22108
Thermal protection systems for space transportation vehicles p 2177 N93-22113
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
|NASA-TM-105939| p 2206 N93-22590
Development of a 100 kW class plasma torch for ash-melting plasma furnaces
|DE93-754079| p 2493 N93-22715
Life cycle testing of desiccant core samples
|PB93-127058| p 2220 N93-23098
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
|NASA-TM-104748| p 2243 N93-24474
DUST
Temporal and spatial inhomogeneities in comets
p 2551 N93-24188
DUST COLLECTORS
Development of the nested fiber filter
|DE93-005015| p 2315 N93-23322
DWARF GALAXIES
Nearby dwarf galaxies: Dust masses and their implications p 2540 N93-23928
DWARF NOVAE
Investigation of serendipitious WFC sources
|NASA-CR-192774| p 2544 N93-24458
DWARF STARS
Carlsberg meridian catalogue La Palma (Spain). Number 6: Observations of positions of stars and planets 1990
|ISBN-84-7469-052-8| p 2543 N93-24059

DYES
Organic Optoelectronic Materials: A Topical Workshop
|AD-A259695| p 2488 N93-23662
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
|AD-A260525| p 2241 N93-24201
DYNAMIC CHARACTERISTICS
A synthetic environment for visualization and planning of orbital maneuvers p 2140 N93-22251
Methods for modeling contact dynamics of capture mechanisms p 2151 N93-22320
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
|DE93-006679| p 2278 N93-22577
Dynamic and thermodynamic characteristics of a pre-frontal convective rainband in northern Taiwan determined form Tamex data p 2409 N93-24162
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
|AD-A260381| p 2484 N93-24275
Large-amplitude forced response of dynamic systems
|AD-A260394| p 2332 N93-24426
DYNAMIC CONTROL
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
Space time neural networks for tether operations in space p 2456 N93-22370
Space Station Freedom beta gimbal control via sensitivity models
|NASA-TM-106000| p 2182 N93-22551
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575
Vibration control experiments on a 12-meter cantilever truss structure
|AD-A259764| p 2328 N93-23484
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956
DYNAMIC LOADS
Dynamic analysis of Free-Piston Stirling Engine/Linear Alternator-load system-experimentally validated
|NASA-TM-106034| p 2473 N93-22559
Optimal bolt preload for dynamic loading
|DE92-017527| p 2313 N93-22923
DYNAMIC MODELS
The development of an autonomous rendezvous and docking simulation using rapid integration and prototyping technology p 2148 N93-22302
Methods for modeling contact dynamics of capture mechanisms p 2151 N93-22320
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
|DE93-005607| p 2279 N93-22945
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
|NASA-CR-192303| p 2126 N93-23186
Control and analysis of a single-link flexible beam with experimental verification
|DE93-003756| p 2314 N93-23289
A nonlinear dynamic spherical membrane model
|AD-A259633| p 2112 N93-23654
Understanding and modeling the behavior of a harmonic drive gear transmission
|AD-A259610| p 2317 N93-24152
Improved dynamic stiffness (system modeling), state-of-the-art review
|PB93-127744| p 2331 N93-24208
An extended supersonic combustion model for the dynamic analysis of hypersonic vehicles
|NASA-CR-192716| p 2225 N93-24472
DYNAMIC PRESSURE
Theoretical errors on airborne measurements of: Static pressure, impact temperature, air flow angle, air flow speed
|PB93-136406| p 2405 N93-23232
DYNAMIC PROGRAMMING
Autonomous vehicle motion control, approximate maps, and fuzzy logic p 2452 N93-22219
Deterministic methods in stochastic optimal control
|AD-A260478| p 2462 N93-24100
DYNAMIC RESPONSE
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575
Modal identification experiment p 2188 N93-22635
Structural dynamics division research and technology accomplishments for FY 1992 and plans for FY 1993
|NASA-TM-107713| p 2109 N93-22671
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
|DE93-005607| p 2279 N93-22945
Attenuation of empennage buffet response through active control of damping using piezoelectric material
|NASA-TM-107736| p 2110 N93-23034
Dynamic response characteristics of two transport models tested in the National Transonic Facility
|NASA-CR-191420| p 2125 N93-23047
Dynamic response and stability of semi-rigid frames p 2327 N93-23199
Dynamic stability of maglev systems
|DE93-004796| p 2315 N93-23335
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
|NASA-CR-190783| p 2210 N93-23429
Joint flexibility effects on the dynamic response of structures. Part 1: Deterministic analysis
|AD-A260487| p 2331 N93-24135
Understanding and modeling the behavior of a harmonic drive gear transmission
|AD-A259610| p 2317 N93-24152
Mathematical analysis of gasdynamic wave initiation
|AD-A260382| p 2297 N93-24174
DYNAMIC STABILITY
Dynamic analysis of Free-Piston Stirling Engine/Linear Alternator-load system-experimentally validated
|NASA-TM-106034| p 2473 N93-22559
Control design variable linking for optimization of structural/control systems
|NASA-CR-4493| p 2125 N93-22827
Dynamic stability of maglev systems
|DE93-004796| p 2315 N93-23335
DYNAMIC STRUCTURAL ANALYSIS
Coupled multi-disciplinary composites behavior simulation
|NASA-TM-106011| p 2322 N93-22481
A modal test of a space-truss for structural parameter identification
|DE93-004043| p 2323 N93-22518
System identification of the JPL micro-precision interferometer truss
|DE93-004044| p 2323 N93-22519
Structural dynamics division research and technology accomplishments for FY 1992 and plans for FY 1993
|NASA-TM-107713| p 2109 N93-22671
Temporal identification of linear and nonlinear structures
|ECL-90-33| p 2324 N93-22696
Control design variable linking for optimization of structural/control systems
|NASA-CR-4493| p 2125 N93-22827
Implementation of the block-Krylov boundary flexibility method of component synthesis
|NASA-TM-106065| p 2325 N93-23044
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198
Dynamic response and stability of semi-rigid frames p 2327 N93-23199
The effects of delamination on the vibrational characteristics of composite structural elements p 2210 N93-23202
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
|PB93-142438| p 2439 N93-23436
Joint flexibility effects on the dynamic response of structures. Part 1: Deterministic analysis
|AD-A260487| p 2331 N93-24135
Improved dynamic stiffness (system modeling), state-of-the-art review
|PB93-127744| p 2331 N93-24208
Large-amplitude forced response of dynamic systems
|AD-A260394| p 2332 N93-24426
Structural impact simulation using program KRASH
|CRANFIELD-AERO-9010| p 2333 N93-24639
DYNAMIC TESTS
Contact dynamics testing of automated three point docking mechanism p 2149 N93-22306
Emergency vehicle alert system, phase 2
|NASA-CR-192464| p 2260 N93-22455
Suspension device for low-frequency structures
|NASA-CASE-LAR-14272-1-CU| p 2169 N93-24598
DYNAMICAL SYSTEMS
Data-parallel Langevin dynamics simulations
|DE93-003836| p 2445 N93-22434
Temporal identification of linear and nonlinear structures
|ECL-90-33| p 2324 N93-22696
Topological organization of (low-dimensional) chaos
|DE93-003693| p 2514 N93-22753
Chaotic dynamics in accelerator physics
|DE93-004600| p 2515 N93-22766
Nonlinear dynamical modeling and prediction of the terrestrial magnetospheric activity p 2392 N93-23135
On wave force analysis using system identification
|RR-450| p 2293 N93-23361
A comparison of polynomial and rational NARMAX models for nonlinear system identification
|RR-444| p 2469 N93-23374
Automatic analysis and synthesis of controllers for dynamical systems based on phase-space knowledge
|AD-A259491| p 2459 N93-23448
Chaotic dynamics of the solar cycle
|AD-A260039| p 2557 N93-23644
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
|AD-A260047| p 2472 N93-23711
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
Time dependent classification of features with a nonlinear, dynamic network
|VTT-PUBS-83| p 2448 N93-23868
Learning optimal control using learning automata
|MATHS-REPT-A-176| p 2462 N93-24078
A global approach to parameter estimation of chaotic dynamical systems
|AD-A259932| p 2463 N93-24130
Improved dynamic stiffness (system modeling), state-of-the-art review
|PB93-127744| p 2331 N93-24208
DYSPROSIUM COMPOUNDS
High temperature rare earth and Si-Ge thermoelectric materials
|DE93-006913| p 2513 N93-24462

E

EAR
Micromotional studies of utricular and canal afferents
|NASA-CR-192703| p 2417 N93-22800
EARLY WARNING SYSTEMS
Local Lightning Early Warning System (LLEWS), phase 1
|DE93-006609| p 2403 N93-22595
EARTH (PLANET)
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
|ESA-ISY-1-VOL-3| p 2356 N93-23748
Satellite-borne Earth observations in the framework of German global change research p 2357 N93-23755
The first mission of the ESA Earth observation polar platform p 2362 N93-23783
EARTH ALBEDO
Multiple molecular scattering and albedo action on the solar spectral irradiance in the region of the UVB (less than or equal to 320 nm): A preliminary inventory
|AERONOMICA-ACTA-A-363-1991| p 2558 N93-24637
EARTH ATMOSPHERE
Earth's mysterious atmosphere. ATLAS 1: Teachers guide with activities
|NASA-EP-282| p 2396 N93-23733
GLOBE/ET/METOC: An alternative approach for a European Earth observation programme from the polar orbit p 2361 N93-23775
Global ozone monitoring experiment p 2364 N93-23793
World Meteorological Organization
|WMO-774| p 2408 N93-24061
Study of high spatial resolution narrow spectral band ultraviolet images of the earth's atmosphere
|AD-A260035| p 2400 N93-24254
Design and implementation of a computer based site operations log for the ARM Program
|DE93-002834| p 2400 N93-24255
The mysterious atmosphere of the Earth. ATLAS: Instruction guide with activities
|NASA-EP-290/03-93| p 2402 N93-24653
EARTH CRUST
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546
Microtopography of manganese crusts
|PB93-120830| p 2398 N93-23996
EARTH ENVIRONMENT
The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium
|JTN-93-80413| p 2334 N93-22119
Overview of ISY plan p 2334 N93-22120
Overview of Earth environment data set: MOS-1/MOS-1b data sets p 2334 N93-22121
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Observation system for sea surface temperature validation test in Mutsu Bay p 2334 N93-22123
Monitoring of Kuroshio current using the data of VTIR obtained by MOS-1 and MOS-1b p 2334 N93-22124
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Observation in the East China Sea p 2335 N93-22126
Estimation of partial cloud cover within a pixel p 2335 N93-22127
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128

Overview of activities of ISY PIE Committee
p 2335 N93-22129
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk
p 2336 N93-22131
Microwave remote sensing of ice
p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
Vegetation distribution of South East Asia
p 2336 N93-22134
Monitoring of growth environment of forest
p 2336 N93-22135
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
Upper-air circulation systems p 2337 N93-22138
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Data sets for weather information services
p 2337 N93-22140
Laser disc for Earth environment data set
p 2338 N93-22142
Environmental data sets in Canada
p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
Environmental data set in Thailand
p 2338 N93-22145
Environmental data sets at the University of Alaska
p 2338 N93-22146
Environmental data sets for International Space Year activities in Australia p 2338 N93-22147
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
[ESA-ISY-1-VOL-3] p 2356 N93-23748
Satellite-borne Earth observations in the framework of German global change research p 2357 N93-23755
Priroda project: Optical sensors for environment research p 2362 N93-23782
The International Space Year programme
p 2366 N93-23803
Space activities and environmental protection: Role of the United Nations p 2372 N93-23841
Earth observation programmes and plans of the Commission of the European Communities (CEC)
p 2372 N93-23843
Mission to Planet Earth p 2372 N93-23845
NASDA's Earth observing programs and the contribution to resolving global environment programs
p 2372 N93-23846
World Meteorological Organization
[WMO-774] p 2408 N93-24061

EARTH IONOSPHERE

Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere
p 2394 N93-23388
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
Irregular media effects on radiowave signals used in navigation and positioning systems
p 2266 N93-23606
Radiolocation of a satellite-borne LOVHF beacon
p 2268 N93-23613
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
[FFI-92/7016] p 2398 N93-24081

EARTH LIMB

MIPAS: Michelson Interferometer for Passive Atmospheric Sounding for POEM-1
p 2363 N93-23786

EARTH MAGNETOSPHERE

Report of the working group on magnetotail/plasma sheet structure
[DE93-003857] p 2391 N93-22077
Inner Magnetosphere Imager (IMI) instrument heritage
[NASA-CR-4498] p 2391 N93-22685
Nonlinear dynamical modeling and prediction of the terrestrial magnetospheric activity p 2392 N93-23135
Structure and dynamics of the magnetopause
p 2400 N93-24296

EARTH MANTLE

The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
[DE93-000796] p 2392 N93-22807

EARTH MOVEMENTS

Use of geodetic methods in detecting terrain movements with special reference to the Global Positioning System
[ISBN-0-315-69179-4] p 2393 N93-23190

EARTH OBSERVATIONS (FROM SPACE)

Earth sensing data service p 2339 N93-22439
Communications techniques supporting the data management p 2276 N93-23543
1993 Earth Observing System reference handbook
[NASA-NP-202] p 2356 N93-23737
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
[ESA-ISY-1-VOL-3] p 2356 N93-23748
The Earth Observing System p 2356 N93-23749
Italian Space Agency activities in Earth observation
p 2358 N93-23756
The scientific program of the Priroda project
p 2360 N93-23771
German participation within the international Earth observation mission Priroda p 2361 N93-23774
Observations of atmospheric chemistry on the first European polar platform p 2361 N93-23776
Remarks and proposals to adapt some Earth observations space programmes in the period of transition of the countries of central/eastern Europe; focused on Romania p 2362 N93-23778
Usage of small-sized aerospace plane in the infrastructure of space research of the Earth
p 2362 N93-23781
The first mission of the ESA Earth observation polar platform p 2362 N93-23783
The European polar platform and its Earth observation mission p 2363 N93-23784
Medium Resolution Imaging Spectrometer (MERIS)
p 2363 N93-23785
The radar altimeter instrument for POEM-1 mission
p 2363 N93-23788
The Advanced Synthetic Aperture Radar (ASAR) for POEM-1 p 2363 N93-23789
The design of the ESA Multiband Imaging Microwave Radiometer MIMR p 2364 N93-23790
Broadband imaging spectrometer technology and its use potential for environmental change mission
p 2364 N93-23791
MOMS-02P: A modular optical system for Earth land cover observation in the multisensor environment of the Priroda/Mir mission p 2365 N93-23796
New images of the Earth in highest resolution: MOMS-02 on the second German Spacelab mission D2
p 2365 N93-23801
Programmes and strategy for the World Meteorological Organization with respect to Earth observation from space p 2372 N93-23842
Earth observation programmes and plans of the Commission of the European Communities (CEC)
p 2372 N93-23843
New developments in the coordination of Earth observation from space activities: The role of the Committee on Earth Observations Satellites (CEOS)
p 2372 N93-23844
Mission to Planet Earth p 2372 N93-23845
NASDA's Earth observing programs and the contribution to resolving global environment programs
p 2372 N93-23846
Canadian Earth observation program
p 2373 N93-23847
United Kingdom Earth observation programme
p 2373 N93-23848
The contribution of the Italian Space Agency to the establishment of space services for the changing Earth
p 2373 N93-23849
US data policy for Earth observation from space
p 2373 N93-23852
Conditions of access to Earth observation data: Legal aspects p 2373 N93-23853
Satellite data protection from the point of view of a data user: Preparation for full utilization of remote sensing technology p 2374 N93-23854

EARTH OBSERVING SYSTEM (EOS)

1993 Earth Observing System reference handbook
[NASA-NP-202] p 2356 N93-23737
The Earth Observing System p 2356 N93-23749
X-EOS: A multi-mode X-band synthetic aperture radar for EOS SAR p 2365 N93-23797
The 1993 Space and Earth Science Data Compression Workshop
[NASA-CP-3191] p 2430 N93-24544
Data compression opportunities in EOSDIS
p 2430 N93-24545
Compression through decomposition into browse and residual images p 2430 N93-24546

EARTH ORBITAL ENVIRONMENTS

Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237
Employing lighting techniques during on-orbit operations p 2151 N93-22319
Preliminary OARE absolute acceleration measurements on STS-50
[NASA-TM-107724] p 2182 N93-22587
Spacecraft materials and coatings experiments
p 2189 N93-22637
Long Duration Space Materials Exposure (LDSE)
p 2189 N93-22638
Personal communications satellite service system
p 2275 N93-23521
The space debris environment for remote sensing satellites p 2199 N93-23809
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
[NASA-TM-104748] p 2243 N93-24474

EARTH ORBITAL RENDEZVOUS

Use of automated rendezvous trajectory planning to improve spacecraft operations efficiency
p 2146 N93-22292

EARTH ORBITS

Orbiting space debris: Dangers, measurement and mitigation
[AD-A260533] p 2196 N93-24279

EARTH RADIATION BUDGET

Empirical determination of the effects of clouds on the Earth's Radiation Budget over the Pacific Ocean
[NASA-CR-192696] p 2401 N93-24485
Anisotropic reflections in mountainous terrain to determine the absorption of solar radiation from satellite data
[ESA-TT-1262] p 2558 N93-24633

EARTH RESOURCES

The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium
[JTN-93-80413] p 2334 N93-22119
Overview of ISY plan p 2334 N93-22120
Review of EPA's Environmental Monitoring and Assessment Program (EMAP)
[PB93-146348] p 2387 N93-23441
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
[ESA-ISY-1-VOL-3] p 2356 N93-23748
Earth resources and ecological spacecraft
p 2361 N93-23777
GeoEnvironment Carpathes project
p 2368 N93-23816
Mission to Planet Earth p 2372 N93-23845
NASDA's Earth observing programs and the contribution to resolving global environment programs
p 2372 N93-23846

EARTH ROTATION

The influence of wind-driven ocean circulation on Earth rotation p 2412 N93-22668

EARTH SCIENCES

US Geological Survey library classification system
[PB93-129708] p 2525 N93-23256
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
[ESA-ISY-1-VOL-3] p 2356 N93-23748
The Earth Observing System p 2356 N93-23749
Innovative interactive Earth systems science courseware for middle and high school students
p 2334 N93-23823
The 1993 Space and Earth Science Data Compression Workshop
[NASA-CP-3191] p 2430 N93-24544
Applications of wavelet-based compression to multidimensional Earth science data
p 2430 N93-24547

EARTH SURFACE

Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
[DE93-002164] p 2402 N93-22337

EARTH TERMINALS

Analysis of MMIC arrays for use in the ACTS Aero Experiment
[NASA-TM-106073] p 2180 N93-22589

EARTH-MOON TRAJECTORIES

A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
[NASA-CR-185171] p 2205 N93-24536

EARTHQUAKES

Assessment of regional earthquake hazards and risk along the Wasatch Front, Utah
[PB93-115657] p 2400 N93-24214
Test and evaluation of neural network applications for seismic signal discrimination
[AD-A260030] p 2401 N93-24440

A semi-empirical analysis of strong-motion peaks in terms of seismic source, propagation path, and local site conditions
| PB93-150266 | p 2402 N93-24629

ECOLOGY
Collection and Distribution of Ecological Data by Satellite: CDEDS p 2344 N93-23511
Collection and distribution of ecological data by satellite pilot projects as demonstration of the concept p 2344 N93-23512
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
The scientific program of the Priroda project p 2360 N93-23771
Earth resources and ecological spacecraft p 2361 N93-23777
Monitoring desertification in Patagonia/Argentina, using satellite data for sustainable environmental management p 2367 N93-23813
Ocean governance: A new vision
| PB93-136299 | p 2416 N93-24144

ECONOMETRICS
Market penetration of new energy technologies
| DE92-016409 | p 2375 N93-22323

ECONOMIC ANALYSIS
Future trends in power generation cost by power resource
| DE93-761825 | p 2378 N93-22957
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
| PB93-110955 | p 2519 N93-23286
State of Small Business: A report of the President transmitted to the Congress
| PB93-137073 | p 2519 N93-23437
Solar pumping: An introduction and update on the technology, performance, costs, and economics
| WORLD BANK TP-168 | p 2381 N93-23444
Small business profiles, 1992. Region 3: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
| PB93-110948 | p 2520 N93-24157
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
| PB93-110963 | p 2520 N93-24158
Small business profiles, 1992. Region 6: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
| PB93-110971 | p 2520 N93-24159
Small business profiles, 1992. Region 9: Arizona, California, Hawaii, and Nevada
| PB93-111003 | p 2521 N93-24160
Small business profiles, 1992. Region 2: New Jersey and New York
| PB93-110930 | p 2521 N93-24177
Small business profiles, 1992: Region 7: Iowa, Kansas, Missouri, and Nebraska
| PB93-110989 | p 2521 N93-24285
Small business profiles, 1992. Region 10: Alaska, Idaho, Oregon, and Washington
| PB93-111011 | p 2521 N93-24305
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
| PB93-110997 | p 2521 N93-24557
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
| PB93-152031 | p 2416 N93-24605

ECONOMIC FACTORS
NASA reports p 2154 N93-23163
Public Congressional forum on space p 2154 N93-23165
Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
| PB93-132769 | p 2394 N93-23255
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee

Small business profiles, 1992. Region 3: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
| PB93-110948 | p 2520 N93-24157
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
| PB93-110963 | p 2520 N93-24158
Small business profiles, 1992. Region 6: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
| PB93-110971 | p 2520 N93-24159
Small business profiles, 1992. Region 9: Arizona, California, Hawaii, and Nevada
| PB93-111003 | p 2521 N93-24160
Small business profiles, 1992. Region 2: New Jersey and New York
| PB93-110930 | p 2521 N93-24177
Small business profiles, 1992: Region 7: Iowa, Kansas, Missouri, and Nebraska
| PB93-110989 | p 2521 N93-24285
Small business profiles, 1992. Region 10: Alaska, Idaho, Oregon, and Washington
| PB93-111011 | p 2521 N93-24305
Small business profiles, 1992: Region 1
| PB93-110922 | p 2521 N93-24556
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
| PB93-110997 | p 2521 N93-24557

ECOSYSTEMS
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
Atmospheric Sciences Program
| DE93-004891 | p 2383 N93-22767
Carbon and biogeochemistry
| DE93-001368 | p 2386 N93-23306
Computational modeling of the environment with applications to lake eutrophication
| TKK-1991/1 | p 2386 N93-23425
Arctic Contaminants Research Program: Research Plan
| PB93-135630 | p 2387 N93-23439
Measuring variation in ecosystem sensitivity to stress
| AD-A259521 | p 2387 N93-23450
A strategy for monitoring the tropical forest with ERS-1 SAR imagery p 2358 N93-23758
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
A microclimate model to investigate greenhouse warming of a sub-Alpine ecosystem
| DE93-005290 | p 2388 N93-24011
Chaos theory and its application in the atmosphere p 2398 N93-24082
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
| PB93-146082 | p 2389 N93-24334
CEBAS-Aquarack: An artificial aquatic animal plant ecosystem as a tool for basic research in the Columbus Space Station p 2166 N93-24401
Ecosystems on Earth and in space (the possible utilization of artificial ecosystems for space life support systems) p 2167 N93-24406
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
| PB93-146090 | p 2390 N93-24645

EDDY CURRENTS
Current displacement in parabolic cylinder
| ETN-93-93423 | p 2278 N93-22681
The sensitivity in eddy current testing of austenitic material
| VTT-JULK-758 | p 2231 N93-23368
Metallic ions and atoms in the upper atmosphere
| AD-A259741 | p 2394 N93-23478

EDDY VISCOSITY
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence
| NASA-CR-191421 | p 2295 N93-23421
A multiple-scale model for compressible turbulent flows
| NASA-TM-106072 | p 2296 N93-23736

EDGE DETECTION
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
| DLR-FB-91-32 | p 2262 N93-22656
The multi-scale veto model: A two-stage analog network for edge detection and image reconstruction
| AD-A259600 | p 2462 N93-24069

EDITING
Editing images of text
| PB93-149896 | p 2443 N93-24576

EDITING ROUTINES (COMPUTERS)
Soar-mode v5.0 user's manual for Soar release 5.2 and 6.0
| AD-A259914 | p 2441 N93-23997

EDUCATION
Laser disc for Earth environment data set p 2338 N93-22142
Development of interactive multimedia applications p 2530 N93-22171
University guide to NASA, 1993
| NASA-EP-287 | p 2152 N93-22383
Occurrence Reporting and Processing System (ORPS) lessons learned: Tools to improve workplace performance
| DE93-005241 | p 2522 N93-22498
Laser safety training programs for a large and diverse research and development laboratory
| DE93-006291 | p 2307 N93-22546
FY 1991 safety program status report

Use of fellowships p 2517 N93-23154
Pitfalls p 2517 N93-23155
Space support forum p 2153 N93-23160
NASA's strategic plan for education. A strategy for change, 1993-1998
| NASA-EP-289 | p 2517 N93-23174
NASA's Education Program Inventory FY 91
| NASA-EP-284 | p 2518 N93-23250
Columbus program: Ground staff training simulation
| ETN-93-93694 | p 2194 N93-23415
Advanced team decision making: A developmental method
| AD-A259512 | p 2520 N93-23466
COMLINE p 2276 N93-23530
Learning to meet the science and technology challenge
| PB93-139996 | p 2520 N93-23680
Training courses on application of remote sensing and geographic information systems in monitoring and managing tropical rainforests and natural environment p 2367 N93-23812
EUROAVIA Design Workshop 1991: Organization and lessons learned p 2199 N93-23821
Remote sensing of the Earth: A pilot program in German schools p 2369 N93-23822
Innovative interactive Earth systems science courseware for middle and high school students p 2334 N93-23823
Space technologies in French education p 2369 N93-23824
Computer-based lessons in satellite oceanography: An academic network for teachers and students p 2369 N93-23825
The role of planetariums in promoting space sciences p 2170 N93-23827
The tropical school for atmospheric and space sciences: An international project proposal p 2369 N93-23828
Remote sensing satellite and thematic applications in high schools and elementary schools in France p 2370 N93-23829
Satellite-images in secondary education in Baden-Wuerttemberg (Germany) p 2370 N93-23830
Space research as a tool to acquaint children and young people with science and technology p 2370 N93-23831
The impact of computer instruction on the near transfer and far transfer of a general problem-solving strategy p 2527 N93-24094

Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
[NASA-EP-285] p 2399 N93-24148
Training concept for crew, end user, and ground centre personnel in the Columbus utilisation programme p 2162 N93-24382
The mysterious atmosphere of the Earth. ATLAS: Instruction guide with activities
[NASA-EP-290/03-93] p 2402 N93-24653

EFFERENT NERVOUS SYSTEMS
The effect of microgravity on tremor (microvibration) p 2160 N93-24368

EIGENVALUES
Biases in Monte Carlo eigenvalue calculations
[DE93-004189] p 2471 N93-22061
Copper Mountain conference on iterative methods, volume 2
[DE93-004994] p 2466 N93-22405
Parallel-vector unsymmetric Eigen-Solver on high performance computers
[NASA-CR-191417] p 2433 N93-24491

EIGENVECTORS
Biases in Monte Carlo eigenvalue calculations
[DE93-004189] p 2471 N93-22061
Implementation of the block-Krylov boundary flexibility method of component synthesis
[NASA-TM-106065] p 2325 N93-23044

EINSTEIN EQUATIONS
Hamiltonian structure of the Vlasov-Einstein system and the problem of stability for spherical relativistic star clusters
[DE93-006180] p 2546 N93-22507

EJECTORS
A full-scale STOVL ejector experiment
[NASA-TM-106019] p 2129 N93-22480

EL NINO
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
On the space-time structure of ENSO
[MPIM-74] p 2407 N93-23634
Observed annual and interannual variations in tropospheric water
[PB93-123313] p 2411 N93-24588

ELASTIC BODIES
Application of the boundary element method to finite elasticity p 2327 N93-23200

ELASTIC DEFORMATION
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198

ELASTIC MEDIA
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988

ELASTIC PROPERTIES
Pretransformation strain modulations in proper ferroelastics
[DE93-005468] p 2226 N93-22340
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
Generalized melting criterion for amorphization
[DE93-005557] p 2226 N93-22345
Propagation of elastic waves through inhomogeneous, anisotropic materials
[DE93-006247] p 2288 N93-22509
Theories of elastoplasticity coupled with continuum damage mechanics
[DE93-007426] p 2323 N93-22534
Computer simulation of the anomalous elastic behavior of thin films and superlattices
[DE93-004154] p 2504 N93-22939
Application of the boundary element method to finite elasticity p 2327 N93-23200
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
[NASA-CR-190783] p 2210 N93-23429
Accurate evaluation of the real and imaginary material constants for a piezoelectric resonator in the radial mode
[DREA-CR-91-451] p 2508 N93-23727
Use of the conventional and tangent derivative boundary integral equations for the solution of problems in linear elasticity p 2331 N93-24121
Variational theory of deformations of curved, twisted, and extensible elastic rods
[AD-A260331] p 2332 N93-24266
On the regularity of elasticity problems with piecewise analytic data
[AD-A260346] p 2332 N93-24273
Studies in penetration mechanics
[AD-A260436] p 2332 N93-24304
Inelastic nonuniform torsion of steel I-beams
[PB93-118776] p 2333 N93-24589

ELASTIC SCATTERING
From simple to complex reactions: Nuclear collisions near the Coulomb barrier
[DE93-004197] p 2478 N93-22063
Electromagnetism from counting
[DE93-006930] p 2261 N93-22582
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
[DE93-006500] p 2228 N93-22710
Experimental studies of pion-nucleus interactions at intermediate energies
[DE93-005872] p 2482 N93-23308
Overview of spin physics
[DE93-006412] p 2483 N93-24029
Computation of nonlinear optical scattering by droplets
[AD-A260333] p 2490 N93-24267

ELASTIC WAVES
Propagation of elastic waves through inhomogeneous, anisotropic materials
[DE93-006247] p 2288 N93-22509

ELASTOMERS
Compatibility of refrigerants and lubricants with elastomers
[DE93-006429] p 2216 N93-22057
Compatibility of refrigerants and lubricants with elastomers
[DE93-007808] p 2237 N93-22729

ELASTOPLASTICITY
Theories of elastoplasticity coupled with continuum damage mechanics
[DE93-007426] p 2323 N93-22534

ELASTOSTATICS
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
Use of the conventional and tangent derivative boundary integral equations for the solution of problems in linear elasticity p 2331 N93-24121

ELECTRIC ARCS
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom
[NASA-CR-191106] p 2258 N93-23430

ELECTRIC BATTERIES
Utility Battery Storage Systems Program Report for FY 1992
[DE93-006459] p 2278 N93-22594
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-005689] p 2278 N93-22688
The ANL Electrochemical Program for DOE on electric vehicle R/D
[DE93-005690] p 2279 N93-22689
Safety and performance of a long life lithium-thionyl chloride battery
[DE93-005348] p 2279 N93-22821
30 KA, 5000 V solid-state opening switch for inductive energy storage
[AD-A259763] p 2281 N93-23483
Variable pressure insulating jackets for high-temperature batteries
[DE93-006404] p 2283 N93-24027
Organic electrolytes for sodium batteries
[AD-A260242] p 2284 N93-24164
ANL's electric vehicle battery activities for USABC
[DE93-005691] p 2319 N93-24446

ELECTRIC COILS
A solenoid with a low input power and a fast switching time
[DLR-FB-91-39] p 2278 N93-22661

ELECTRIC CONDUCTORS
Conductive paints
[DE93-006511] p 2236 N93-22713
Electromagnetic scattering cross sections from the bodies of revolution, volume 1
[DREV-CR-645] p 2264 N93-23342
The sensitivity in eddy current testing of austenitic material
[VTT-JULK-758] p 2231 N93-23368

ELECTRIC CONNECTORS
A berthing and fastening strategy for orbital replacement units p 2151 N93-22317
Applicability of superconducting interconnection technology for high speed IC's and systems
[AD-A259706] p 2282 N93-23665
Wrench for installing an electrical connector
[AD-D015625] p 2318 N93-24220
Radio frequency cable to optical fiber cable
[AD-D015620] p 2284 N93-24230
Applicability of superconducting interconnection technology for high speed IC's and systems
[AD-A259520] p 2285 N93-24302
Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425

ELECTRIC CONTACTS
Amorphous diffusion barriers for electronic device applications
[ETN-93-93476] p 2281 N93-23366
P+ contacts on GaAs for semiconductor lasers
[AD-A260207] p 2309 N93-24003

ELECTRIC CURRENT
Often overlooked electrical hazards common in many lasers
[DE93-003856] p 2307 N93-22430
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
[NASA-CR-192348] p 2263 N93-23215
A study into the effects of electric fields and currents on the aging and quench hardening of steels
[AD-A260228] p 2233 N93-24098

ELECTRIC DISCHARGES
Often overlooked electrical hazards common in many lasers
[DE93-003856] p 2307 N93-22430

ELECTRIC EQUIPMENT
Geomagnetic storm environments and effects on electrical systems
[DE92-041257] p 2262 N93-22980

ELECTRIC FIELD STRENGTH
Progresses in measuring electrostatic DC fields
[OEFZS-4627] p 2280 N93-23112

ELECTRIC FIELDS
Electrically driven convection p 2247 N93-22837
Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendocrine system of nonhuman primates
[DE93-007677] p 2417 N93-22913
Geomagnetic storm environments and effects on electrical systems
[DE92-041257] p 2262 N93-22980
Progresses in measuring electrostatic DC fields
[OEFZS-4627] p 2280 N93-23112
A study into the effects of electric fields and currents on the aging and quench hardening of steels
[AD-A260228] p 2233 N93-24098
Investigation of effects of 60-Hz electric and magnetic fields on operant and social behavior and on the neuroendocrine system of nonhuman primates
[DE93-007678] p 2419 N93-24455
The process of consensus on EMF: SAB review of the EPA draft document on EMF and cancer
[DE93-007183] p 2273 N93-24466
Inward electrostatic precipitation of interplanetary particles
[NASA-CR-192786] p 2552 N93-24477
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

ELECTRIC GENERATORS
The Westinghouse solid oxide fuel cell program: Clean, efficient energy for the future
[DE93-003487] p 2380 N93-23287
Supply of geothermal power from hydrothermal sources: A study of the cost of power in 20 and 40 years
[DE93-004479] p 2382 N93-24036
Recent progress in zirconia-based fuel cells for power generation
[DE93-003488] p 2383 N93-24513

ELECTRIC MOTOR VEHICLES
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-005689] p 2278 N93-22688
The ANL Electrochemical Program for DOE on electric vehicle R/D
[DE93-005690] p 2279 N93-22689
Development of test procedures for hybrid/electric vehicles
[DE93-005179] p 2316 N93-23336
Electric and hybrid vehicle program; Site Operator Program
[DE93-005239] p 2319 N93-24444
ANL's electric vehicle battery activities for USABC
[DE93-005691] p 2319 N93-24446

ELECTRIC MOTORS
Compatibility of refrigerants and lubricants with motor materials
[DE93-006428] p 2237 N93-22885

ELECTRIC NETWORKS
Advanced power conditioning for maglev systems
[PB93-150274] p 2320 N93-24586

ELECTRIC POTENTIAL
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
[DE93-000049] p 2377 N93-22750

Gridded state maps of wind electric potential
|DE93-004556| p 2379 N93-22988
Changes in impedance of Ni/Cd cells with voltage and cycle life
|NASA-TM-106105| p 2379 N93-23018
A gel-permeation chromatography study of electrochemically synthesized Poly(3-alkylthiophenes)
|AD-A259864| p 2239 N93-23957
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
|AD-A260184| p 2484 N93-24467

ELECTRIC POWER
An analysis of power beaming for the Moon and Mars
|NASA-CR-191072| p 2182 N93-22554
Electric and hybrid vehicle program; Site Operator Program
|DE93-005239| p 2319 N93-24444

ELECTRIC POWER PLANTS
Supply of geothermal power from hydrothermal sources: A study of the cost of power in 20 and 40 years
|DE93-004479| p 2382 N93-24036

ELECTRIC POWER SUPPLIES
Communications and control for electric power systems
|NASA-CR-192794| p 2261 N93-22477
Lunar electric power systems utilizing the SP-100 reactor coupled to dynamic conversion systems
|NASA-CR-191023| p 2377 N93-22879
Modelling a single phase voltage controlled rectifier using Laplace transforms
|NASA-TM-106005| p 2474 N93-23016

ELECTRIC PROPULSION
100-kW class applied-field MPD thruster component wear
|NASA-TM-106023| p 2203 N93-22482
An analysis of power beaming for the Moon and Mars
|NASA-CR-191072| p 2182 N93-22554
The ANL electric vehicle battery R/D program for DOE-EHP
|DE93-005689| p 2278 N93-22688
The ANL Electrochemical Program for DOE on electric vehicle R/D
|DE93-005690| p 2279 N93-22689

ELECTRIC ROCKET ENGINES
100-kW class applied-field MPD thruster component wear
|NASA-TM-106023| p 2203 N93-22482

ELECTRIC WIRE
Applicability of superconducting interconnection technology for high speed IC's and systems
|AD-A259706| p 2282 N93-23665
Potential human health effects associated with power frequency electric and magnetic fields
|PB93-132678| p 2423 N93-24590

ELECTRICAL ENGINEERING
Center for Space Microelectronics Technology
|NASA-CR-192799| p 2279 N93-22812
Ongoing research projects at VTT in 1991
|ISBN-951-38-3771-8| p 2570 N93-23423
Electronics and electrical engineering laboratory technical publication announcements covering laboratory programs, April,to June 1992, with 1992/1993 EEEL events calendar
|PB93-147163| p 2284 N93-24225

ELECTRICAL IMPEDANCE
Changes in impedance of Ni/Cd cells with voltage and cycle life
|NASA-TM-106105| p 2379 N93-23018
P+ contacts on GaAs for semiconductor lasers
|AD-A260207| p 2309 N93-24003
Antenna pattern control using impedance surfaces
|NASA-CR-192712| p 2273 N93-24471

ELECTRICAL INSULATION
Compatibility of refrigerants and lubricants with motor materials
|DE93-006428| p 2237 N93-22885

ELECTRICAL MEASUREMENT
Progresses in measuring electrostatic DC fields
|OEFZS-4627| p 2280 N93-23112
NIST mesurement service for DC standard resistors
|PB93-139079| p 2280 N93-23205
Electronics and electrical engineering laboratory technical publication announcements covering laboratory programs, April to June 1992, with 1992/1993 EEEL events calendar
|PB93-147163| p 2284 N93-24225

ELECTRICAL PROPERTIES
Charge trapping centers in ferroelectric ceramics
|DE93-005359| p 2238 N93-22954
Physical properties of ultrathin films of high-temperature superconductors p 2506 N93-23197
Magnetic anisotropy in the high transition temperature superconductor YBa2Cu3O(7-delta)
p 2509 N93-23985
Influence of defects in HgCdTe grown by Molecular Beam Epitaxy (MBE) on electrical devices
|AD-A260457| p 2511 N93-24194

ELECTRICAL RESISTANCE
Prediction of the quality of resistance welds by computer based color image analysis
|DE93-002402| p 2312 N93-22818
NIST mesurement service for DC standard resistors
|PB93-139079| p 2280 N93-23205

ELECTRICAL RESISTIVITY
Conductive paints
|DE93-006511| p 2236 N93-22713
Electrical characterization of conducting polymers and polymeric semiconductor devices
|ACTA-POL-SCAND-PH-178| p 2238 N93-23006
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
|NASA-TM-106057| p 2283 N93-23743
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
|DE93-005038| p 2415 N93-23979

ELECTRIFICATION
Local Lightning Early Warning System (LLEWS), phase 1
|DE93-006609| p 2403 N93-22595
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
|AD-A259834| p 2343 N93-23461

ELECTRO-OPTICS
Advances in automatic electro-optical tracking systems p 2254 N93-22020
Wireless infrared communications for space and terrestrial applications p 2275 N93-22177
Electro-optical rendezvous and docking sensors
p 2150 N93-22314
Electro-optic frame photography with pulsed ruby illumination
|DE93-005819| p 2306 N93-22327
Metallo-organic solution deposition of ferroelectric PZT films
|AD-A260127| p 2502 N93-22549
Pulse power requirements for large aperture optical switches based on plasma electrode Pockels cells
|DE93-005824| p 2279 N93-22997
Light-activated solid-state opening switch
|AD-A259770| p 2281 N93-23487
Organic Optoelectronic Materials: A Topical Workshop
|AD-A259695| p 2488 N93-23662
Solid state research
|AD-A259726| p 2509 N93-24024
Intelligent, integrated fiber optic networks
|AD-A260282| p 2490 N93-24260
Human visual limitations on suprathreshold contrast perception through ANVIS
|AD-A259970| p 2425 N93-24431

ELECTROCATALYSTS
Methane conversion by solid electrolyte membranes
|PB93-127041| p 2222 N93-23994

ELECTROCHEMISTRY
Theoretical study of reactions at the electrode-electrolyte interface
|DE93-006899| p 2221 N93-23341
Correlations between the ligand electrochemical parameter, E(sub L)(L) and the Hammett substituent parameter sigma
|AD-A260299| p 2223 N93-24264
Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
|AD-A260071| p 2224 N93-24314
Charge transfer processes on liquid/liquid interfaces: The first hundred years
|AD-A260421| p 2225 N93-24429

ELECTRODE MATERIALS
Electronic control of pH at sulfonated polyaniline electrodes
|AD-A260074| p 2222 N93-23963
Reversible potassium vanadium bronze cathodes (K(x)V6O(13+y)) with various potassium to vanadium ratios
|CTN-93-60709| p 2285 N93-24291

ELECTRODEPOSITION
Nondestructive evaluation of electrodeposited chromium
|AD-A259884| p 2321 N93-24020
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
|AD-A260309| p 2234 N93-24237

ELECTRODES
GTAW penetration based on electrode tip location versus weld joint center line
|DE93-004910| p 2311 N93-22494
Pulse power requirements for large aperture optical switches based on plasma electrode Pockels cells
|DE93-005824| p 2279 N93-22997
Electron conducting adducts of water-soluble redox polyelectrolytes and enzymes
|AD-A259938| p 2241 N93-24154
Sequential deposition of copper on solid gold (111): A statistical model
|AD-A260269| p 2234 N93-24233
Edge effects during DIII-D divertor biasing
|DE93-005847| p 2498 N93-24325

ELECTRODYNAMICS
Active microparticle media
|AD-A259722| p 2487 N93-23639

ELECTROENCEPHALOGRAPHY
Determining the number of hidden units in multi-layer perceptrons using F-ratios p 2451 N93-22214
Adaptive filters for monitoring localized brain activity from surface potential time series
|DE93-003795| p 2420 N93-22774

ELECTROKINETICS
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity
p 2247 N93-22836

ELECTROLUMINESCENCE
Monte Carlo simulation of high-field electron transport in alternating-current thin-film electroluminescent devices
|AD-A260274| p 2284 N93-24166
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292
Distribution of trapped electrons at interface states in ACTFEL devices
|AD-A260396| p 2484 N93-24427

ELECTROLYTES
Non-proprietary stack research
|DE93-007523| p 2376 N93-22535
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
|AD-A260043| p 2488 N93-23645
Organic electrolytes for sodium batteries
|AD-A260242| p 2284 N93-24164
The study of polyether solvation mechanisms using UV/visible spectroscopy
|AD-A260355| p 2241 N93-24170

ELECTROMAGNETIC ABSORPTION
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates
p 2395 N93-23493
Optical studies of laterally confined quantum well structures grown on ex-situ and in-situ patterned substrates
|AD-A260275| p 2511 N93-24167
Compositional superlattices based on PtCl/PtBr MX materials
|DE93-003700| p 2513 N93-24496

ELECTROMAGNETIC COMPATIBILITY
Immunizing digital systems against electromagnetic interference
|DE93-005935| p 2271 N93-24041

ELECTROMAGNETIC COUPLING
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
|NASA-CR-192697| p 2511 N93-24146

ELECTROMAGNETIC FIELDS
On using scattering statistics for ultra wideband electromagnetic target classification and identification
|DE93-003809| p 2260 N93-22433
Electromagnetism from counting
|DE93-006930| p 2261 N93-22582
Smart electromagnetic structures: The neural antenna
|AD-A260469| p 2262 N93-22931
Active microparticle media
|AD-A259722| p 2487 N93-23639
A figure of merit for Transit-Time-Limited time-derivative electromagnetic field sensors
|AD-A260016| p 2273 N93-24459
The single-gap hollow spherical dipole in non-conducting media
|AD-A260017| p 2273 N93-24460
The process of consensus on EMF: SAB review of the EPA draft document on EMF and cancer
|DE93-007183| p 2273 N93-24466
Analytical results for the electromagnetic response of a composite superconducting wire in parallel fields
|MEMO-1059| p 2287 N93-24625

ELECTROMAGNETIC INTERACTIONS
Color sextet quarks and new high-energy interactions
|DE93-004187| p 2478 N93-22059
High sensitivity tests of the standard model for electroweak interactions
|DE93-006186| p 2483 N93-23684
Study of electroweak interactions
|DE93-007261| p 2484 N93-24510

ELECTROMAGNETIC INTERFERENCE
Immunizing digital systems against electromagnetic interference
|DE93-005935| p 2271 N93-24041

ELECTROMAGNETIC NOISE
Study on the improved reliability and safety of lithium batteries by the use of electrochemical noise measurement, volume 1
[FL-D-22-VOL-1] p 2282 N93-23501
Radiolocation in the lower ELF frequency band
p 2270 N93-23630
Study on the improved reliability and safety of lithium batteries by the use of electrochemical noise measurement, volume 2
[FL-D-22-VOL-2] p 2282 N93-23728
Analysis of DGPS MSK receivers in a non-gausian noise environment
[PB93-152866] p 2123 N93-24310
ELECTROMAGNETIC PROPERTIES
Analytical results for the electromagnetic response of a composite superconducting wire in parallel fields
[MEMO-1059] p 2287 N93-24625
ELECTROMAGNETIC RADIATION
Electromagnetic radiating source elimination (ERASE) program p 2254 N93-22019
Experimental, theoretical and computational study of frequency upshift of electromagnetic radiation using plasma techniques
[DE93-005092] p 2260 N93-22407
On using scattering statistics for ultra wideband electromagnetic target classification and identification
[DE93-003809] p 2260 N93-22433
Plasma theory p 2496 N93-23262
The tropical school for atmospheric and space sciences: An international project proposal p 2369 N93-23828
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590
ELECTROMAGNETIC SCATTERING
A class of hybrid finite element methods for electromagnetics: A review
[NASA-CR-192631] p 2260 N93-22467
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[DLR-FB-91-32] p 2262 N93-22656
Laser diagnostics p 2311 N93-23260
Electromagnetic scattering cross sections from the bodies of revolution, volume 1
[DREV-CR-645] p 2264 N93-23342
ELECTROMAGNETIC WAVE TRANSMISSION
Angle of arrival characteristics of ionospheric skywave signals p 2268 N93-23618
Nonlinear optics and turbulence
[AD-A259950] p 2489 N93-24244
ELECTROMAGNETISM
Electromagnetism from counting
[DE93-006930] p 2261 N93-22582
Joint services electronics program. Basic research in electronics (JSEP)
[AD-A259598] p 2283 N93-24068
ELECTROMAGNETS
A variable current bypass shunt for electromagnets
[DE93-004273] p 2278 N93-22686
ELECTROMECHANICAL DEVICES
Nonlinear adaptive control of electro-mechanical systems p 2461 N93-23716
ELECTROMECHANICS
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
[DE93-005607] p 2279 N93-22945
ELECTRON ACCELERATION
On the dynamics of space plasma
[AD-A259898] p 2497 N93-23987
ELECTRON ACCELERATORS
An infrared free electron laser system for the proposed Chemical Dynamics Research Laboratory at LBL based on a 500 MHz superconducting linac
[DE93-004723] p 2307 N93-22346
ELECTRON BEAMS
An infrared free electron laser system for the proposed Chemical Dynamics Research Laboratory at LBL based on a 500 MHz superconducting linac
[DE93-004723] p 2307 N93-22346
Self-amplified spontaneous emission for short wavelength coherent radiation
[DE93-004724] p 2307 N93-22490
Electron-electron interactions in fast neutral-neutral collisions
[DE93-004841] p 2481 N93-22743
Calculation of 3-D free electron laser gain: Comparison with simulation and generalization to elliptical cross section
[DE93-004768] p 2308 N93-22920
Ion and electron beam processing of condensed molecular solids to form thin films
[DE93-007273] p 2504 N93-22955
Electron-beam rocket acceleration of hydrogen pellets
[DE93-002822] p 2171 N93-23685
Studies of the longitudinal instability with an electron beam
[DE93-006513] p 2282 N93-23695
Atom wave interferometer
[AD-A260082] p 2484 N93-24410
ELECTRON CAPTURE
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
ELECTRON CYCLOTRON HEATING
Electron cyclotron emission measurements on the Texas Experimental Tokamak p 2494 N93-23066
Electron Cyclotron Resonance Heating (ECRH)
p 2495 N93-23259
Analysis of non-thermal electron cyclotron emission during electron cyclotron current drive experiments on the D3-D tokamak p 2498 N93-24187
ELECTRON DENSITY (CONCENTRATION)
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
[FFI-92/7016] p 2398 N93-24081
ELECTRON DIFFUSION
Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
[AD-A260163] p 2240 N93-24073
ELECTRON DISTRIBUTION
Analysis of non-thermal electron cyclotron emission during electron cyclotron current drive experiments on the D3-D tokamak p 2498 N93-24187
Distribution of trapped electrons at interface states in ACTFEL devices
[AD-A260396] p 2484 N93-24427
ELECTRON EMISSION
Theory of electron ejection from surfaces by highly charged ion impact
[DE93-004109] p 2479 N93-22070
Design of a large-scale plasma source ion implantation experiment
[DE93-005438] p 2493 N93-22746
ELECTRON ENERGY
Theory of electron ejection from surfaces by highly charged ion impact
[DE93-004109] p 2479 N93-22070
Correlations between surface structure and catalytic activity/selectivity
[DE93-005884] p 2217 N93-22423
Electron cyclotron emission measurements on the Texas Experimental Tokamak p 2494 N93-23066
ELECTRON GAS
Focal plane arrays for submillimeter waves using two-dimensional electron gas elements: A grant under the Innovative Research Program
[NASA-CR-192271] p 2263 N93-23062
ELECTRON GUNS
Electron-beam rocket acceleration of hydrogen pellets
[DE93-002822] p 2171 N93-23685
Observation of a charge limit for photocathode electron guns
[DE93-006948] p 2485 N93-24464
ELECTRON IMPACT
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions
[DE93-003478] p 2478 N93-22031
EXCPACK: A package of codes for electron impact excitation of ions by a distorted wave method
[DE93-006095] p 2479 N93-22525
Journal of research of the National Institute of Standards and Technology, Nov. - Dec. 1992, volume 97, no. 6
[PB93-143923] p 2571 N93-24570
ELECTRON IRRADIATION
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
[DE93-005560] p 2230 N93-22943
Ion and electron beam processing of condensed molecular solids to form thin films
[DE93-007273] p 2504 N93-22955
ELECTRON MICROSCOPES
Tunneling magnetic force microscopy
p 2514 N93-22194
ELECTRON MICROSCOPY
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A259616] p 2510 N93-24126
ELECTRON PHONON INTERACTIONS
Local vibronic and electronic excitations of doping-induced states in the copper oxides
[DE93-003844] p 2501 N93-22429
Theoretical study of electron-phonon interaction in beta-phase NiTi and Ni-Al alloys
[DE93-004733] p 2228 N93-22738
A structural study of charge-density-wave perturbations in mixed-halide MX solids
[DE93-005449] p 2503 N93-22747
Electron-phonon driven spin frustration in multi-band Hubbard models: MX chains and oxide superconductors
[DE93-003697] p 2503 N93-22754
ELECTRON PRECIPITATION
Long period pulsation events in electron precipitation and magnetic fields at the South Pole
p 2394 N93-23387
Precipitating auroral electron flux characteristics based on UV data obtained by the AIRS experiment onboard the polar BEAR satellite
[AD-A260015] p 2401 N93-24301
ELECTRON PRESSURE
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
[DE93-005831] p 2493 N93-22869
ELECTRON SCATTERING
Theory of electron ejection from surfaces by highly charged ion impact
[DE93-004109] p 2479 N93-22070
Scattering in electron spectrometers, diagnosis, and avoidance. 1: Concentric hemispherical analysers
[NPL-DMM(A)-70] p 2218 N93-22463
Scattering in electron spectrometers, diagnosis, and avoidance. 2: Cylindrical mirror analysers
[NPL-DMM(A)-71] p 2218 N93-22464
Electron-electron interactions in fast neutral-neutral collisions
[DE93-004841] p 2481 N93-22743
Monte Carlo simulation of high-field electron transport in alternating-current thin-film electroluminescent devices
[AD-A260274] p 2284 N93-24166
ELECTRON SOURCES
A high-power 95 GHz gyro-TWT amplifier
[DE93-002332] p 2277 N93-22425
Studies of the longitudinal instability with an electron beam
[DE93-006513] p 2282 N93-23695
ELECTRON SPECTROSCOPY
Scattering in electron spectrometers, diagnosis, and avoidance. 1: Concentric hemispherical analysers
[NPL-DMM(A)-70] p 2218 N93-22463
Scattering in electron spectrometers, diagnosis, and avoidance. 2: Cylindrical mirror analysers
[NPL-DMM(A)-71] p 2218 N93-22464
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-105961] p 2231 N93-23418
ELECTRON STATES
Electron transfer, ionization, and excitation in atomic collisions
[DE93-005918] p 2478 N93-22050
Local vibronic and electronic excitations of doping-induced states in the copper oxides
[DE93-003844] p 2501 N93-22429
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
[AD-A260181] p 2308 N93-23315
The theory behind the SOCRATES code
[AD-A259987] p 2196 N93-24298
Distribution of trapped electrons at interface states in ACTFEL devices
[AD-A260396] p 2484 N93-24427
ELECTRON TRANSFER
Electron transfer, ionization, and excitation in atomic collisions
[DE93-005918] p 2478 N93-22050
Simulation of electronic transport in semiconductor heterolayer devices
[AD-A260122] p 2502 N93-22548
Photoinduced electron transfer in ordered polymers
[DE93-006784] p 2237 N93-22889
Theoretical study of reactions at the electrode-electrolyte interface
[DE93-006899] p 2221 N93-23341
Monte Carlo simulation of high-field electron transport in alternating-current thin-film electroluminescent devices
[AD-A260274] p 2284 N93-24166
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
[AD-A260184] p 2484 N93-24467
Aspects of photoionization of impurities and electron transfer in ionic crystals
[DE93-008544] p 2513 N93-24511
ELECTRON TRANSITIONS
Inexpensive capillary discharge x ray laser driver
[AD-A260388] p 2310 N93-24276
ELECTRON TUNNELING
Tunneling magnetic force microscopy
p 2514 N93-22194
ELECTRONIC CONTROL
Summary of the effects of engine throttle response on airplane formation-flying qualities
[NASA-TM-4465] p 2131 N93-23123
Electronic control of pH at sulfonated polyaniline electrodes
[AD-A260074] p 2222 N93-23963

ELECTRONIC COUNTERMEASURES
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
Electromagnetic radiating source elimination (ERASE) program p 2254 N93-22019
Versatile attack weapon p 2256 N93-22027
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682
ELECTRONIC EQUIPMENT
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Electronics and electrical engineering laboratory technical publication announcements covering laboratory programs, April to June 1992, with 1992/1993 EEEL events calendar
[PB93-147163] p 2284 N93-24225
ELECTRONIC EQUIPMENT TESTS
30 KA, 5000 V solid-state opening switch for inductive energy storage
[AD-A259763] p 2281 N93-23483
ELECTRONIC MAIL
Newly available technologies present expanding opportunities for scientific and technical information exchange
[NASA-CR-4494] p 2261 N93-22470
An electronic stroll through the global village
[DE93-005962] p 2446 N93-22763
ELECTRONIC TRANSDUCERS
Microelectronic and micromechanical sensors and actuators in CMOS technology: A novel scheme toward s regularization and integration
[ISBN-0-315-60192-2] p 2305 N93-24609
The SSIMT: A CMOS based magnetic sensor
[ISBN-0-315-60334-8] p 2305 N93-24610
ELECTRONIC WARFARE
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
Electromagnetic radiating source elimination (ERASE) program p 2254 N93-22019
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682
Radiolocation Techniques
[AGARD-CP-528] p 2265 N93-23598
Detection of active emitters using triangulation and trilateration techniques: Theory and practice p 2267 N93-23612
ELECTRONICS
Technology 2002: The Third National Technology Transfer Conference and Exposition, volume 2
[NASA-CP-3189-VOL-2] p 2560 N93-22149
Joint services electronics program: Appendix
[AD-A259503] p 2285 N93-24312
ELECTRONS
ESTAR, PSTAR, and ASTAR: Computer programs for calculating stopping-power and range tables for electrons, protons, and helium ions
[PB93-146033] p 2481 N93-22898
Dissipative trapped electron mode turbulence with ion Landau damping and FLR effects
[DE93-004524] p 2494 N93-22942
Distribution of trapped electrons at interface states in ACTFEL devices
[AD-A260396] p 2484 N93-24427
ELECTROPHORESIS
A round-robin for particle electrophoresis standardization
[DE93-003018] p 2217 N93-22400
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity p 2247 N93-22836
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
[AD-A258453] p 2233 N93-23982
ELECTROSTATIC PRECIPITATORS
Inward electrostatic precipitation of interplanetary particles
[NASA-CR-192786] p 2552 N93-24477
ELECTROSTATIC PROBES
The PNL high-transmission three-stage mass spectrometer
[DE93-006143] p 2486 N93-22506
Preparation for analysis of data from the langmuir probe instrument on the CRRES satellite
[AD-A260534] p 2201 N93-24280
ELECTROSTATICS
Electrostatic charging of spacecraft in geosynchronous orbit
[DRA-TM-SPACE-389] p 2181 N93-22489
A simple model for the dielectric behaviour of polar solvents in the mean spherical approximation
[AD-A260283] p 2483 N93-24261
ELEMENTARY EXCITATIONS
Magnetic response of certain curved graphitic geometries
[DE93-003694] p 2243 N93-24500
ELEMENTARY PARTICLE INTERACTIONS
Experimental studies of pion-nucleus interactions at intermediate energies
[DE93-005872] p 2482 N93-23308
ELEVATION ANGLE
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Influence due to satellite attitude jitter on estimation of Digital Elevation Model (DEM) p 2350 N93-23551
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data p 2350 N93-23552
Realistic landscape visualization based on satellite images p 2355 N93-23583
The comparison of satellite radar altimeter derived heights with global digital terrain model heights p 2355 N93-23584
ELIMINATION
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128
ELLIPSOMETRY
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
[AD-A260043] p 2488 N93-23645
Spectroscopic ellipsometry and interference reflectometry measurements of CVD silicon grown on oxidized silicon
[DE93-005767] p 2509 N93-24017
Metrologic support for the DARPA/NRL-XRL Mask Program: Ellipsometric analyses of SiC thin films on Si
[PB93-152098] p 2225 N93-24632
ELLIPTIC DIFFERENTIAL EQUATIONS
On the regularity of elasticity problems with piecewise analytic data
[AD-A260346] p 2332 N93-24273
ELLIPTICAL GALAXIES
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
EMBEDDED COMPUTER SYSTEMS
The ECA critical requirements model
[AD-A259682] p 2440 N93-23659
EMBEDDING
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
[DE93-005917] p 2479 N93-22418
EMBRITTLEMENT
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
[DE93-004104] p 2226 N93-22069
Mechanical properties of martensitic alloy AISI 422
[DE93-004834] p 2229 N93-22882
Acceptable aluminum additions for minimal environmental effect in iron-aluminum alloys
[DE93-006738] p 2234 N93-24329
EMERGENCIES
Emergency vehicle alert system, phase 2
[NASA-CR-192464] p 2260 N93-22455
EMISSION SPECTRA
ROWS wave spectral data collected in SAXON-FPN, November 1990
[NASA-TM-104582] p 2412 N93-22387
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models
[DE93-005114] p 2402 N93-22408
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
[NASA-CR-192704] p 2546 N93-22469
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE93-006504] p 2480 N93-22712
Passive (self-powered) fiber-optic sensors
[DE93-005761] p 2486 N93-22762
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae p 2547 N93-23208
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
[AD-A260181] p 2308 N93-23315
Active galactic nuclei: The view from space p 2534 N93-23886
X ray spectral structure of the Seyfert 2 galaxy NGC 5506 p 2536 N93-23898
Emission from relativistic jets in blazars p 2536 N93-23900
EUV spectral features of active binaries p 2536 N93-23904
SUMER: Solar Ultraviolet Measurements of Emitted Radiation p 2541 N93-23931
Dielectric for the supercapacitors
[AD-A260124] p 2283 N93-24072
Laser spectroscopy of chemically reactive species
[DE93-006672] p 2310 N93-24326
EMITTERS
Propagation effects on HF direction finding p 2265 N93-23602
The influence of propagation on high frequency radiogoniometry and single station location p 2266 N93-23607
A current assessment of single site locating technology p 2267 N93-23608
Detection of active emitters using triangulation and trilateration techniques: Theory and practice p 2267 N93-23612
Multiple emitter direction finding from a circular array by single snapshot processing p 2270 N93-23627
ENCAPSULATING
A new approach for helium backfilling and leak testing seal-welded capsules in a hot cell
[DE93-004519] p 2317 N93-24049
END EFFECTORS
Magnetic end effectors for space operations p 2146 N93-22291
Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper) p 2150 N93-22311
Force distribution formulation and analysis for multiple-contact power grasp p 2461 N93-23718
End effectors and grapple fixtures
[CA-PATENT-1-294-917] p 2316 N93-23966
Grapple fixture
[CA-PATENT-1-297-519] p 2317 N93-23967
Reliable vision-guided grasping
[NASA-CR-193197] p 2464 N93-24603
Vision-guided gripping of a cylinder
[NASA-CR-193199] p 2465 N93-24657
ENDOCRINE SYSTEMS
Investigation of effects of 60-Hz electric and magnetic fields on operant and social behavior and on the neuroendocrine system of nonhuman primates
[DE93-007678] p 2419 N93-24455
ENDOTHERMIC REACTIONS
Solar reforming applications study summary
[DE93-002286] p 2244 N93-22424
ENERGY BUDGETS
Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
[DE93-002164] p 2402 N93-22337
ENERGY CONSERVATION
CORECT: Committee On Renewable Energy Commerce and Trade, 1991
[DE92-016436] p 2377 N93-22890
Investigation and study scenarios to introduce CO2 fixation technologies in the energy sector
[DE93-761912] p 2378 N93-22958
Heat pump technology: Responding to new opportunities
[DE93-005939] p 2379 N93-22978
ENERGY CONVERSION
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 3: Space power and thermal management
[NASA-TM-108652] p 2519 N93-23109
ENERGY CONVERSION EFFICIENCY
Polycrystalline thin films
[DE93-000070] p 2500 N93-22336
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
[DE92-001290] p 2378 N93-22934
Basic studies of 3-5 high efficiency cell components
[DE92-010563] p 2382 N93-24432
Recent progress in zirconia-based fuel cells for power generation
[DE93-003488] p 2383 N93-24513
ENERGY DISSIPATION
Correlations between surface structure and catalytic activity/selectivity
[DE93-005884] p 2217 N93-22423
Energy dissipator
[NASA-CASE-MSC-21555-1] p 2314 N93-23075
ENERGY DISTRIBUTION
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
[DE93-004815] p 2230 N93-22991
ENERGY GAPS (SOLID STATE)
Active microparticle media
[AD-A259722] p 2487 N93-23639
ENERGY LEVELS
Physics opportunities with higher energy pion beams
[DE93-006678] p 2480 N93-22585

ENERGY METHODS
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426
ENERGY POLICY
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
| DE93-004659 | p 2244 N93-22325
An overview of DOE's wind turbine development programs
| DE93-000044 | p 2376 N93-22335
Overview of Advanced Turbine Systems Program
| DE93-003193 | p 2311 N93-22413
Utility Battery Storage Systems Program Report for FY 1992
| DE93-006459 | p 2278 N93-22594
Analysis of operational, institutional and international limitations for alternative fuel vehicles and technologies: Means/methods for implementing changes
| DE93-005611 | p 2312 N93-22737
CORECT: Committee On Renewable Energy Commerce and Trade, 1991
| DE92-016436 | p 2377 N93-22890
Biofuels program plan, FY 1992 - 1996
| DE93-000036 | p 2245 N93-23048
Status report on renewable energy in the States
| DE93-000032 | p 2381 N93-23671
ENERGY SOURCES
Department of Energy new technology
| DE92-041170 | p 2522 N93-22058
ENERGY SPECTRA
Magnetic response of certain curved graphitic geometries
| DE93-003694 | p 2243 N93-24500.
ENERGY STORAGE
Battery compatibility with photovoltaic charge controllers
| DE93-005373 | p 2377 N93-22537
30 KA, 5000 V solid-state opening switch for inductive energy storage
| AD-A259763 | p 2281 N93-23483
ENERGY TECHNOLOGY
Department of Energy new technology
| DE92-041170 | p 2522 N93-22058
Market penetration of new energy technologies
| DE92-016409 | p 2375 N93-22323
Capsule review of DOE research and development laboratories and field facilities
| DE93-003282 | p 2570 N93-22402
Analysis of operational, institutional and international limitations for alternative fuel vehicles and technologies: Means/methods for implementing changes
| DE93-005611 | p 2312 N93-22737
The collaborative program of research in engineering sciences
| DE93-005126 | p 2257 N93-22768
CORECT: Committee On Renewable Energy Commerce and Trade, 1991
| DE92-016436 | p 2377 N93-22890
Future trends in power generation cost by power resource
| DE93-761825 | p 2378 N93-22957
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 3: Space power and thermal management
| NASA-TM-108652 | p 2519 N93-23109
Status report on renewable energy in the States
| DE93-000032 | p 2381 N93-23671
ENERGY TRANSFER
Multi-heat addition turbine engine
| NASA-CASE-LEW-15094-1 | p 2129 N93-22034
Selective reactivity, ultrafast energy transfer and the development of chemically pumped visible lasers
| AD-A260123 | p 2309 N93-24071
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
| AD-A260525 | p 2241 N93-24201
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
| AD-A260184 | p 2484 N93-24467
ENGINE CONTROL
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123
ENGINE DESIGN
Development of CPG dish-Stirling systems for remote power applications
| DE93-003251 | p 2376 N93-22414
Conceptual design study of a variable cycle engine for a supersonic business jet
| ETN-93-93486 | p 2130 N93-23371
Spray combustion experiments and numerical predictions
| NASA-TM-106069 | p 2296 N93-23744
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
| NASA-CR-191080 | p 2204 N93-23876
ENGINE INLETS
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
| NASA-TP-3247 | p 2113 N93-24118
ENGINE PARTS
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
| NASA-TM-105914 | p 2125 N93-22588
Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
| DS-2024 | p 2208 N93-22603
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
| NASA-TM-105978 | p 2130 N93-23013
ENGINE TESTS
X ray computed tomography for whole system evaluation (small engines)
| AD-A259519 | p 2130 N93-23669
ENGINEERING
Research in stochastic processes and their applications
| AD-A260174 | p 2473 N93-24317
ENGINEERING MANAGEMENT
Computational simulation for concurrent engineering of aerospace propulsion systems
| NASA-TM-106029 | p 2330 N93-23746
ENGINEERS
Underrepresented groups p 2517 N93-23146
Pipeline issues p 2517 N93-23148
Focusing educational initiatives p 2517 N93-23150
Learning to meet the science and technology challenge
| PB93-139996 | p 2520 N93-23680
ENGLISH LANGUAGE
The development of a natural language interface to a geographical information system p 2530 N93-22153
ENTRAPMENT
Evaluation of hole sizes in structures requiring EVA services as a means to prevent gloved-hand finger entrapment
| NASA-TM-104767 | p 2426 N93-23129
ENTROPY
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426
Time-reversible Maxwell's demon
| AD-A260170 | p 2460 N93-23709
Thermodynamically-consistent phase-field models for solidification
| PB93-139012 | p 2515 N93-24005
ENVIRONMENT EFFECTS
The Finnish research programme on climate change
| DE93-752870 | p 2383 N93-22597
Atmospheric Sciences Program
| DE93-004891 | p 2383 N93-22767
New approaches for a second generation supersonic transport propulsion system
| DS-1934 | p 2130 N93-23391
Computational modeling of the environment with applications to lake eutrophication
| TKK-1991/1 | p 2386 N93-23425
Global Climate Change Response Program: A mid-course evaluation
| PB93-146355 | p 2387 N93-23427
GeoEnvironment Carpathes project p 2368 N93-23816
Chlorotrifluoroethylene decay in the atmosphere: Controlled-environment chamber studies
| AD-A259902 | p 2388 N93-23989
The 111th Meeting for Research of Safety Engineering
| DE93-753679 | p 2388 N93-24046
Analysis and synthesis of models for effects of climate change on agricultural systems
| DE93-007949 | p 2389 N93-24521
Aircraft overflight study: Effect of aircraft altitude upon sound levels at the ground
| PB93-144194 | p 2477 N93-24572
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
| PB93-144186 | p 2478 N93-24649
ENVIRONMENT MANAGEMENT
Investigation of the applicability of remote sensing techniques for ecological water quality evaluation
| BCRS-91-37 | p 2342 N93-23106
Computational modeling of the environment with applications to lake eutrophication
| TKK-1991/1 | p 2386 N93-23425
Environmental quality
| PB93-139814 | p 2387 N93-23440
Monitoring desertification in Patagonia/Argentina, using satellite data for sustainable environmental management p 2367 N93-23813
Treatment of human-computer interface in a decision support system
| DE93-002281 | p 2428 N93-24502
ENVIRONMENT MODELS
Water temperature characteristics of lakes subjected to climate change
| PB93-135648 | p 2385 N93-23265
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
Methods for analyzing extreme events under climate change
| PB93-146827 | p 2387 N93-23651
Development and application of procedures to evaluate air quality and visibility impacts of low-altitude flying operations
| AD-A259903 | p 2408 N93-23990
ENVIRONMENT POLLUTION
Automated technologies needed to prevent radioactive materials from reentering the atmosphere p 2137 N93-22237
The Finnish research programme on climate change
| DE93-752870 | p 2383 N93-22597
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
Analysis of acid precipitation samples collected by state agencies
| PB93-144152 | p 2386 N93-23276
Innovative treatment technologies
| PB93-133387 | p 2386 N93-23277
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
| PB93-136604 | p 2343 N93-23278
Arctic Contaminants Research Program: Research Plan
| PB93-135630 | p 2387 N93-23439
Environmental quality
| PB93-139814 | p 2387 N93-23440
Proceedings of the 15th Annual EPA Conference on Analysis of Pollutants in the Environment
| PB93-152601 | p 2388 N93-23681
The 111th Meeting for Research of Safety Engineering
| DE93-753679 | p 2388 N93-24046
Use of high-energy radiation for degradation of environmental pollutants
| PB93-149995 | p 2390 N93-24636
ENVIRONMENT PROTECTION
Framework for decision making: An EPA perspective
| PB93-134369 | p 2518 N93-22904
Summary of activities of the Life Cycle Costing Workshop conducted by the Environmental Restoration Program of Oak Ridge National Laboratory
| DE93-000823 | p 2531 N93-22935
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
Analysis of acid precipitation samples collected by state agencies
| PB93-144152 | p 2386 N93-23276
Innovative treatment technologies
| PB93-133387 | p 2386 N93-23277
New approaches for a second generation supersonic transport propulsion system
| DS-1934 | p 2130 N93-23391
Arctic Contaminants Research Program: Research Plan
| PB93-135630 | p 2387 N93-23439
Review of EPA's Environmental Monitoring and Assessment Program (EMAP)
| PB93-146348 | p 2387 N93-23441
Satellite navigation in agriculture p 2124 N93-23528
Methods for analyzing extreme events under climate change
| PB93-146827 | p 2387 N93-23651
Proceedings of the 15th Annual EPA Conference on Analysis of Pollutants in the Environment
| PB93-152601 | p 2388 N93-23681
Space activities and environmental protection: Role of the United Nations p 2372 N93-23841
Development and application of procedures to evaluate air quality and visibility impacts of low-altitude flying operations
| AD-A259903 | p 2408 N93-23990
Guidelines for estimating and applying rule effectiveness for ozone CO state implementation plan base year inventories
| PB93-131498 | p 2389 N93-24163
Orbiting space debris: Dangers, measurement and mitigation
| AD-A260533 | p 2196 N93-24279
AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
| PB93-100113 | p 2443 N93-24587

Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
[PB93-146090] p 2390 N93-24645

ENVIRONMENT SIMULATION
Icing cloud simulator for use in helicopter engine induction system ice protection testing
[DOT/FAA/CT-TN92/43] p 2133 N93-23087
Chlorotrifluoroethylene decay in the atmosphere: Controlled-environment chamber studies
[AD-A259902] p 2388 N93-23989

ENVIRONMENTAL CHEMISTRY
Measuring variation in ecosystem sensitivity to stress,
[AD-A259521] p 2387 N93-23450

ENVIRONMENTAL CONTROL
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
Zero-G life support for Space Station Freedom p 2189 N93-22640
A computer simulation of a hyperbaric chamber environment
[AD-A260137] p 2134 N93-23705

ENVIRONMENTAL ENGINEERING
A distributed visualization environment for engineering sciences
[DE93-006961] p 2257 N93-22600

ENVIRONMENTAL INDEX
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
[DE93-006091] p 2386 N93-23301

ENVIRONMENTAL MONITORING
The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium
[JTN-93-80413] p 2334 N93-22119
Laser disc for Earth environment data set p 2338 N93-22142
Environmental data sets in Canada p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
Environmental data set in Thailand p 2338 N93-22145
Environmental data sets at the University of Alaska p 2338 N93-22146
Environmental data sets for International Space Year activities in Australia p 2338 N93-22147
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
NRC Twin Otter operations in the 1991 California ozone deposition experiment
[NRC-LTR-FR-118] p 2383 N93-22472
Gas-Grain Simulation Facility (GGSF) p 2186 N93-22626
Crew health p 2187 N93-22630
Dual use of distributed remote sensing satellites
[DE93-005442] p 2193 N93-22906
Analysis of acid precipitation samples collected by state agencies
[PB93-144152] p 2386 N93-23276
Review of EPA's Environmental Monitoring and Assessment Program (EMAP)
[PB93-146348] p 2387 N93-23441
Collection and Distribution of Ecological Data by Satellite: CDEDS p 2344 N93-23511
Collection and distribution of ecological data by satellite pilot projects as demonstration of the concept p 2344 N93-23512
System design for ARTEMIS environmental monitoring p 2349 N93-23545
Image treatment and geographical information systems at the service of the Common Agricultural Policy p 2351 N93-23555
Vineyard cadastre monitoring using remote sensed data in an integrated GIS p 2351 N93-23556
Extraction of information from satellite imagery to a GIS for environmental monitoring of the mining areas in northeastern Estonia p 2352 N93-23560
Remote sensing applied to mapping and other purposes: STADIS project, a practical example in Tunisia p 2352 N93-23561
Integration of remote sensing and GIS data for a multiscale study of the Po river basin p 2353 N93-23570
Use of satellite data and GIS for evaluating urban environment p 2354 N93-23572
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
Analysis of human impact on degradation and desertification of the West African Sahel by means of multi-level remote sensing techniques p 2355 N93-23578
Microscale geomorphological analysis in middle Italy using airborne and satellite remote sensing techniques p 2355 N93-23581
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
[ESA-ISY-1-VOL-3] p 2356 N93-23748
A strategy for monitoring the tropical forest with ERS-1 SAR imagery p 2358 N93-23758
German participation within the international Earth observation mission Priroda p 2361 N93-23774
Meteosat second generation enhanced visible-IR imager SEVIRI and its environmental monitoring potential p 2362 N93-23780
Usage of small-sized aerospace plane in the infrastructure of space research of the Earth p 2362 N93-23781
Priroda project: Optical sensors for environment research p 2362 N93-23782
Broadband imaging spectrometer technology and its use potential for environmental change mission p 2364 N93-23791
The International Space Year programme p 2366 N93-23803
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811
Monitoring desertification in Patagonia/Argentina, using satellite data for sustainable environmental management p 2367 N93-23813
GeoEnvironment Carpathes project p 2368 N93-23816
Results of international meeting held in Tunis (Tunisia) p 2368 N93-23818
Study of the cultivated land losses around Tunis p 2368 N93-23819
GEOSCOPE: An interactive global change encyclopedia p 2370 N93-23833
Integrated global environmental (global change) data activities support researchers and educators p 2370 N93-23834
Space activities and environmental protection: Role of the United Nations p 2372 N93-23841
World Meteorological Organization
[WMO-774] p 2408 N93-24061
Ocean governance: A new vision
[PB93-136299] p 2416 N93-24144
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
[ESA-ISY-4] p 2154 N93-24336
Final report on the first step in distributed remote sensing
[DE93-007936] p 2375 N93-24520
Aerosol measurements at the South Pole during 1987
[PB93-137016] p 2390 N93-24567

ENVIRONMENTAL QUALITY
Chesapeake Bay Program: Wetlands workgroup
[PB93-136893] p 2385 N93-23266
Environmental quality
[PB93-139814] p 2387 N93-23440
Enabling document for regulations governing compliance extensions for early reductions of hazardous air pollutants
[PB93-147007] p 2390 N93-24584
Use of high-energy radiation for degradation of environmental pollutants
[PB93-149995] p 2390 N93-24636

ENVIRONMENTAL SURVEYS
Evaluation of the Bathyscan sweep survey system
[AD-A260162] p 2415 N93-23708

ENVIRONMENTAL TESTS
Pyroshock simulation for satellite components using a tunable resonant fixture
[DE93-005338] p 2322 N93-22500
Spacecraft materials and coatings experiments p 2189 N93-22637
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638

ENZYME ACTIVITY
Biological production of hydrogen
[DE93-002604] p 2219 N93-22736

ENZYMES
Apparatus and method for cellulose processing using microwave pretreatment
[NASA-CASE-MSC-21936-1-SB] p 2216 N93-22036
Biotechnical production and use of pyruvic acid with special reference to coenzyme regeneration
[VTT-PUBS-77] p 2419 N93-23369
Electron conducting adducts of water-soluble redox polyelectrolytes and enzymes
[AD-A259938] p 2241 N93-24154

EPHEMERIDES
On the navigation of polar orbiting meteorological satellites
[MPIM-75] p 2180 N93-23111

EPIDEMIOLOGY
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590

EPITAXY
Applications of TEM to interface in materials
[DE93-004776] p 2501 N93-22492
Experimental studies of critical behavior of systems with quenched disorder
[DE93-005090] p 2228 N93-22717
Substrate surface structure effects on microstructure of epitaxial films
[DE93-005562] p 2504 N93-22944
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
[DE93-005420] p 2505 N93-22976
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
[AD-A260043] p 2488 N93-23645
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A259616] p 2510 N93-24126
Heteroepitaxial diamond growth
[AD-A259623] p 2510 N93-24127
Diamond homoepitaxy by chemical vapor deposition
[AD-A260551] p 2512 N93-24281

EPOXY MATRIX COMPOSITES
Interlaminar mode-2 fracture toughness of a glass-fiber epoxy laminate
[VTT-PUBS-105] p 2208 N93-22815
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials p 2214 N93-24181

EPOXY RESINS
Gel time measurements on carbon fiber/epoxy resin prepregs
[ICAS-90-4-10-4] p 2210 N93-23400
Dielectric and dynamic mechanical properties of ATBN-containing thermosets
[DREA-CR-91-444] p 2239 N93-23725

EQUATIONS OF MOTION
IMP: A performance code p 2139 N93-22245
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
[PB93-142438] p 2439 N93-23436
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 1: Implementing exact mode superposition
[NASA-TM-106063] p 2329 N93-23739
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 2: Coupled versus uncoupled integration
[NASA-TM-106064] p 2330 N93-23740
Motion of charged particles in pulsar magnetospheres p 2550 N93-24161

EQUATIONS OF STATE
Model atmospheres for low temperature, helium-rich white dwarfs: Problems with the equation of state p 2546 N93-23065
Neutron stars, strange stars, and the nuclear equation of state
[DE93-004704] p 2550 N93-23952

EQUATORIAL ATMOSPHERE
On the hierarchy of processes contributing to equatorial spread F p 2395 N93-23595

EQUATORIAL REGIONS
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
[PB93-136422] p 2413 N93-22893
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605

EQUILIBRIUM
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864

EQUILIBRIUM EQUATIONS
A high performance spectral code for nonlinear MHD stability
[DE93-004541] p 2494 N93-22984
Variational theory of deformations of curved, twisted, and extensible elastic rods
[AD-A260331] p 2332 N93-24266

EQUIVALENT CIRCUITS
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
[DE93-000049] p 2377 N93-22750

ERBIUM
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723

ERGOMETERS
Development and implementation of the MotoMir experiment on the Mir Space Station
p 2159 N93-24363

EROSION
100-kW class applied-field MPD thruster component wear
|NASA-TM-106023| p 2203 N93-22482
Solid-particle erosion of in-situ reinforced Si3Ni4
|DE92-014868| p 2209 N93-22911
Microscale geomorphological analysis in middle Italy using airborne and satellite remote sensing techniques
p 2355 N93-23581

ERROR ANALYSIS
Self-checking on-line testable static RAM
|NASA-CASE-NPO-17939-1-CU| p 2432 N93-22032
Constraint checking during error recovery
p 2445 N93-22169
Generation of covariance data among values from a single set of experiments
|DE93-004192| p 2522 N93-22435
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
|NASA-CR-4503| p 2466 N93-22672
Damping measurements from an operating wind turbine: Preliminary results and procedures
|DE93-005357| p 2377 N93-22873
Theoretical errors on airborne measurements of: Static pressure, impact temperature, air flow angle, air flow speed
|PB93-136406| p 2405 N93-23232
The vertical profile of reflectivity and errors in radar estimates of rainfall p 2406 N93-23350
Recognizing 3D objects for 2D images: An error analysis
|AD-A260150| p 2469 N93-23707
Preliminary results from the analysis of wind component error, July data
|AD-A259654| p 2408 N93-24022
Bayesian prediction of mean square errors with covariates
|AD-A259585| p 2470 N93-24064
Adaptive hierarchic modeling of plates and shells with a-posteriori error estimation
|AD-A259941| p 2332 N93-24242
A priori error estimates of finite element solutions of parametrized nonlinear equations
|AD-A260013| p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
|AD-A260014| p 2471 N93-24438
AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
|PB93-100113| p 2443 N93-24587

ERROR CORRECTING CODES
Stellar lyman alpha emission and the local interstellar medium
|NASA-CR-192635| p 2541 N93-22381

ERROR SIGNALS
Self-checking on-line testable static RAM
|NASA-CASE-NPO-17939-1-CU| p 2432 N93-22032

ERRORS
Fault detection and isolation p 2106 N93-22568
GPS multipath errors in the precision landing environment p 2106 N93-22569
Propagation effects on HF direction finding
p 2265 N93-23602
Systematic bearing errors of HF signals observed over a North-South propagation path p 2268 N93-23614
Bayesian prediction of mean square errors with covariates
|AD-A259585| p 2470 N93-24064
Adaptive hierarchic modeling of plates and shells with a-posteriori error estimation
|AD-A259941| p 2332 N93-24242

ERS-1 (ESA SATELLITE)
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
|ESA-TT-1245| p 2339 N93-22436
The first European remote sensing satellite, ERS-1. A summary of useful load, mission, ground segment, standard products and user service
p 2339 N93-22437
ESA ERS 1 product specification
|ESA-SP-1149| p 2200 N93-23389
The ERS-1 radarmaps of Germany and the Antarctic Peninsula p 2352 N93-23562
Feature detection using ERS-1 SAR data
p 2356 N93-23586
ERS-1: The first European Earth observation system
p 2358 N93-23757
A strategy for monitoring the tropical forest with ERS-1 SAR imagery p 2358 N93-23758
ERS-1 SAR ice routing of l'Astrolabe through the Northeast passage p 2358 N93-23759
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761
Early results on the use of ERS-1 SAR data for real-time sea ice monitoring in Canadian waters
p 2359 N93-23762
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
Operational geocoding of ERS-1 SAR imagery
p 2359 N93-23765
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810
The Oden real time ice monitoring demonstration
p 2371 N93-23837

ESCHERICHIA
Xylose fermentation to ethanol
|DE93-000067| p 2244 N93-22929

ESSENTIALLY NON-OSCILLATORY SCHEMES
On essentially non-oscillatory schemes on unstructured meshes: Analysis and implementation
|NASA-CR-191415| p 2471 N93-24492

ESTERS
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
|AD-A259889| p 2242 N93-24321

ESTIMATES
When networks disagree: Ensemble methods for hybrid neural networks
|AD-A260121| p 2460 N93-23701
Comparison of total body water estimates from O-18 and bioelectrical response prediction equations
|NASA-TP-3299| p 2421 N93-23734
Supply of geothermal power from hydrothermal sources: A study of the cost of power in 20 and 40 years
|DE93-004479| p 2382 N93-24036
Adaptive hierarchic modeling of plates and shells with a-posteriori error estimation
|AD-A259941| p 2332 N93-24242
A priori error estimates of finite element solutions of parametrized nonlinear equations
|AD-A260013| p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
|AD-A260014| p 2471 N93-24438

ESTIMATING
Estimation of partial cloud cover within a pixel
p 2335 N93-22127
A comparison of deconvolution techniques
|DE93-007407| p 2391 N93-22530
A method for estimating future runway capacity of German airports for single runway systems
|DLR-FB-91-38| p 2132 N93-22666
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
|NASA-TM-106079| p 2207 N93-23014
When networks disagree: Ensemble methods for hybrid neural networks
|AD-A260121| p 2460 N93-23701
A global approach to parameter estimation of chaotic dynamical systems
|AD-A259932| p 2463 N93-24130
Guidelines for estimating and applying rule effectiveness for ozone CO state implementation plan base year inventories
|PB93-131498| p 2389 N93-24163
Molecular properties and fate of organic chemicals
|AD-A260090| p 2207 N93-24412

ESTUARIES
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
|PB93-136604| p 2343 N93-23278
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
|PB93-136927| p 2387 N93-23438

ETCHING
Ion and electron beam processing of condensed molecular solids to form thin films
|DE93-007273| p 2504 N93-22955

ETHERS
High octane ethers from synthesis gas-derived alcohols
|DE93-006476| p 2245 N93-24031

ETHYL ALCOHOL
Xylose fermentation to ethanol
|DE93-000067| p 2244 N93-22929
A comparative analysis of alternative fuels for the INEL vehicle fleet
|DE93-007224| p 2319 N93-24256

EUCLIDEAN GEOMETRY
Distance metric between 3D models and 2D images for recognition and classification
|AD-A260069| p 2463 N93-24313

EULER EQUATIONS OF MOTION
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
|NASA-TM-107732| p 2108 N93-22457
Upwind relaxation method for hypersonic flow simulation
|DLR-FB-91-36| p 2109 N93-22659
Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics
p 2113 N93-24138
A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
|ETN-93-93701| p 2299 N93-24487

EULER-LAGRANGE EQUATION
Transient radiation properties of strongly radiating turbulent flames p 2221 N93-23181

EURECA (ESA)
The Eureca concept and missions
p 2156 N93-24343

EUROPE
Vegetation index for Europe p 2340 N93-22443
Activities report of the European Southern Observatory
|ETN-93-93459| p 2542 N93-23118
European Telecommunications Standards Institute. Apreliminary analysis
|PB93-138824| p 2263 N93-23271
A European radionavigation plan?
p 2124 N93-23513
EUTELTRACS: The European land mobile satellite service p 2276 N93-23526
A Digital Landscape Model for Europe (DLME)
p 2351 N93-23554
Meteosat operational programme current missions and services p 2357 N93-23752
Earth observation programmes and plans of the Commission of the European Communities (CEC)
p 2372 N93-23843
Eumetsat practice for protection of its satellite data
p 2373 N93-23850
Conditions of access to Earth observation data: Legal aspects p 2373 N93-23853
International law perspective on establishing a European regulation with regard to the legal protection of the use of satellite remote sensing data p 2374 N93-23855

EUROPEAN SPACE AGENCY
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770
Selection of astronauts for European space missions
p 2156 N93-24345

EUROPEAN SPACE PROGRAMS
European research plans p 2185 N93-22618
Meteosat second generation: A look to the future
p 2357 N93-23753
GLOBSAT/METOC: An alternative approach for a European Earth observation programme from the polar orbit p 2361 N93-23775
Observations of atmospheric chemistry on the first European polar platform p 2361 N93-23776
The first mission of the ESA Earth observation polar platform p 2362 N93-23783
The European polar platform and its Earth observation mission p 2363 N93-23784
An advanced scatterometer for the European polar platform p 2363 N93-23787
The radar altimeter instrument for POEM-1 mission
p 2363 N93-23788
The Advanced Synthetic Aperture Radar (ASAR) for POEM-1 p 2363 N93-23789
IASI (Infrared Atmospheric Sounding Interferometer): Programme objectives and status p 2364 N93-23794
Ocean colour programmes for the European marine environment p 2366 N93-23808
United Kingdom Earth observation programme
p 2373 N93-23848
The contribution of the Italian Space Agency to the establishment of space services for the changing Earth
p 2373 N93-23849
Horizon 2000 and European national programmes
p 2534 N93-23885
FIRST: Far Infrared and Submillimeter Space Telescope p 2540 N93-23924

EVALUATION
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
[PB93-139004] p 2256 N93-22079
Evaluation of distributed computing tools
[DE93-007408] p 2446 N93-22531
Hazard evaluation and operational cockpit display of ground-measured windshear data
[AIAA PAPER 90-0566] p 2105 N93-22564
Polyreactions in microgravity environment
p 2251 N93-22859
High resolution three-dimensional solder joint measurement system evaluation
[DE93-005840] p 2437 N93-23000

EVAPORATION
Novel materials synthesis using an intense pulsed ion beam
[DE93-005470] p 2506 N93-23314

EVAPORATION RATE
Simulation of a particle-laden combustion flow in an MHD second stage combustor
[DE93-004244] p 2491 N93-22065

EVAPORATORS
Design manual for two-phase components of spacecraft thermal management systems
[AD-A260027] p 2196 N93-24439

EVOLUTION (DEVELOPMENT)
Life in and from space p 2161 N93-24373

EXCIMER LASERS
Excimer laser surface modification: Process and properties
[DE93-003726] p 2306 N93-22044
Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
[DE93-005474] p 2500 N93-22342
Ablation, melting, and smoothing of polycrystalline alumina by pulsed excimer laser radiation
[DE93-005148] p 2227 N93-22496
Studies of tunable, high power excimer lasers
p 2309 N93-23597

EXCITATION
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
[AD-A260181] p 2308 N93-23315
The ground and excited state electronic structures of ruthenium quinones and related species
[AD-A259940] p 2223 N93-24155
Laser excitation and chemi-ionization of combustion species
[AD-A260120] p 2224 N93-24414

EXCITONS
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
[DE93-005350] p 2505 N93-22974

EXERCISE PHYSIOLOGY
Two techniques for measuring locomotion impact forces during zero G
[NASA-TP-3305] p 2421 N93-23410
AFTERRISE: Deep body temperature following exercise
[AD-A259887] p 2421 N93-23984

EXHAUST EMISSION
Exhaust emissions from diesel engines
[DE93-752852] p 2384 N93-22805
Development of size-specific data from particulate control technology research reports
[PB93-131456] p 2384 N93-22922
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
[DE92-001290] p 2378 N93-22934
New approaches for a second generation supersonic transport propulsion system
[DS-1934] p 2130 N93-23391
Taguchi methods applied to oxygen-enriched diesel engine experiments
[DE93-004873] p 2317 N93-23976
Development and application of procedures to evaluate air quality and visibility impacts of low-altitude flying operations
[AD-A259903] p 2408 N93-23990
Enabling document for regulations governing compliance extensions for early reductions of hazardous air pollutants
[PB93-147007] p 2390 N93-24584
Simulation of the formation and transport of ozone in the atmospheric boundary layer
[ESA-TT-1243] p 2402 N93-24615

EXHAUST GASES
Exhaust emissions from diesel engines
[DE93-752852] p 2384 N93-22805
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
[PB93-144350] p 2313 N93-22901
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
[PB93-144376] p 2313 N93-22902
Use of new oxygenates as gasoline components
[DE93-752864] p 2244 N93-22968
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
[PB93-141059] p 2320 N93-24628

EXHAUST SYSTEMS
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
[PB93-141059] p 2320 N93-24628

EXOBIOLOGY
Space life sciences perspectives for Space Station Freedom p 2185 N93-22619
Life sciences utilization of Space Station Freedom
p 2185 N93-22622
Life sciences recruitment objectives
p 2186 N93-22623
Gravitational Biology Facility on Space Station: Meeting the needs of space biology p 2186 N93-22625
Gas-Grain Simulation Facility (GGSF)
p 2186 N93-22626
Research opportunities with the Centrifuge Facility
p 2187 N93-22627
Cytokines and immune surveillance in humans
[NASA-CR-192728] p 2447 N93-22828
Space Biology Initiative. Trade Studies, volume 1
[NASA-CR-190989] p 2417 N93-23068
Space biology initiative program definition review. Trade study 5: Modification of existing hardware (COTS) versus new hardware build cost analysis p 2417 N93-23069
Space biology initiative program definition review. Trade study 1: Automation costs versus crew utilization
p 2417 N93-23070
Space biology initiative program definition review. Trade study 4: Design modularity and commonality
p 2418 N93-23071
Space Biology Initiative. Trade Studies, volume 2
[NASA-CR-190990] p 2418 N93-23079
Space biology initiative program definition review. Trade study 3: Hardware miniaturization versus cost
p 2418 N93-23080
Space biology initiative program definition review. Trade study 6: Space Station Freedom/spacelab modules compatibility
[EEI-89-236] p 2418 N93-23081
Space biology initiative program definition review. Trade study 2: Prototype utilization in the development of space biology hardware p 2418 N93-23082
Atmospheric transmission of polar meteorites
[ESA-TT-1283] p 2547 N93-23206
Mir 1992: Scientific program and payload
p 2157 N93-24351
Life in and from space p 2161 N93-24373
Gravity and root morphogenesis p 2166 N93-24403
Development of Arabidopsis thaliana grown under microgravity conditions p 2166 N93-24404
Exobiology and terrestrial life p 2166 N93-24405

EXOTHERMIC REACTIONS
Solute binding at void surfaces in silicon and germanium
[DE93-004504] p 2233 N93-24048

EXPEDITIONS
Aerobraking technology studies p 2173 N93-22089

EXPERIMENT DESIGN
Integration and use of Microgravity Research Facility: Lessons learned by the crystals by vapor transport experiment and Space Experiments Facility programs
p 2193 N93-22652
Software engineering: What do experiments need?
[DE93-004767] p 2436 N93-22740
Polyreactions in microgravity environment
p 2251 N93-22859
Payload operations p 2163 N93-24384

EXPERIMENTATION
Chinese research on shock physics
[PB93-134450] p 2474 N93-22080
Software engineering: What do experiments need?
[DE93-004767] p 2436 N93-22740
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling
[AD-A260252] p 2389 N93-24165

EXPERT SYSTEMS
Advanced software development workstation. Knowledge base design: Design of knowledge base for flight planning application
[NASA-CR-192818] p 2434 N93-22040
An integrated information retrieval and document management system p 2530 N93-22156
A fault-tolerant intelligent robotic control system
p 2465 N93-22159
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping
p 2259 N93-22174
Knowledge From Pictures (KFP) p 2465 N93-22187
Onboard navigation rendezvous expert system
p 2144 N93-22280
Intelligent systems technology infrastructure for integrated systems p 2145 N93-22285
The role of smart systems in rendezvous, close proximity operations and docking maneuvers
p 2150 N93-22310
Investigation of cognition acquisition using natural language conversational process
[MBB-FE-315-S-PUB-0498] p 2435 N93-22391
An expert system for the diagnostic and maintenance of various aircraft components
[MBB-FE-363-S-PUB-0499] p 2105 N93-22392
Trail maneuver generation and selection in the Paladin tactical decision generation system
[NASA-TM-107722] p 2131 N93-23088
Evaluating the potential of combining an expert system and simulation for LAN selection p 2524 N93-23127
AEROBA: A control blackboard approach for model formulation p 2524 N93-23183
Image interpretation for landforms using expert systems and terrain analysis p 2342 N93-23213
Automatic analysis and synthesis of controllers for dynamical systems based on phase-space knowledge
[AD-A259491] p 2459 N93-23448
Technical Digest. Detection systems and technology, September 1992
[AD-A259812] p 2271 N93-23670
Knowledge-based systems for computational control
[AD-A260409] p 2527 N93-24110
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
[DE93-006722] p 2442 N93-24327
Activities of the Institute for Information Technology
[NRC-35023] p 2571 N93-24648

EXPLORATION
Mini-satellite exploration of very near Earth space fuel objects
[DE93-005253] p 2195 N93-24057

EXPLORER SATELLITES
On-orbit demonstration of automated closure and capture using ESA-developed proximity operations technologies and an existing, serviceable NASA Explorer Platform spacecraft p 2142 N93-22266

EXPLOSIONS
Pyroshock simulation for satellite components using a tunable resonant fixture
[DE93-005338] p 2322 N93-22500
Test and evaluation of neural network applications for seismic signal discrimination
[AD-A260030] p 2401 N93-24440

EXPLOSIVE DEVICES
Explosive pulse power for fusion applications
[DE93-003828] p 2491 N93-22076

EXPONENTIAL FUNCTIONS
Performance and state-space analyses of systems using Petri nets
[NASA-CR-193195] p 2443 N93-24604

EXPOSURE
Improved inhalation technology for setting safe exposure levels for workplace chemicals p 2423 N93-22164
Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendocrine system of nonhuman primates
[DE93-007677] p 2417 N93-22913
Compatibility of refrigerants and lubricants with engineering plastics
[DE93-007826] p 2243 N93-24507

EXTENSIONS
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
[PB93-139004] p 2256 N93-22079

EXTERNAL TANKS
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
[NASA-TM-107556] p 2179 N93-23085

EXTINCTION
Light extinction in the atmosphere
[DE93-005034] p 2397 N93-23978

EXTRACTION
Novel materials synthesis using an intense pulsed ion beam
[DE93-005470] p 2506 N93-23314

EXTRAGALACTIC RADIO SOURCES
Overview of first observations with the French telescope Sigma on board Granat p 2533 N93-23881

Observation of the extragalactic x ray background p 2535 N93-23892
Gamma ray bursts from extragalactic sources p 2535 N93-23893
IRAS galaxies in the ROSAT survey p 2536 N93-23897
Extragalactic radio sources in the ROSAT survey p 2536 N93-23899

EXTRAPOLATION
The PNL high-transmission three-stage mass spectrometer
| DE93-006143 | p 2486 N93-22506

EXTRATERRESTRIAL INTELLIGENCE
SETI in Europe p 2429 N93-23908

EXTRATERRESTRIAL LIFE
SETI in Europe p 2429 N93-23908
Life in and from space p 2161 N93-24373
Exobiology and terrestrial life p 2166 N93-24405

EXTRAVEHICULAR ACTIVITY
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
TALON and CRADLE: Systems for the rescue of tumbling spacecraft and astronauts p 2142 N93-22268
A navigation and control system for an autonomous rescue vehicle in the space station environment p 2146 N93-22289

EXTREME ULTRAVIOLET EXPLORER SATELLITE
EUV spectral features of active binaries p 2536 N93-23904

EXTREME ULTRAVIOLET RADIATION
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
EUV spectral features of active binaries p 2536 N93-23904
ORFEUS: Scientific targets and optical performance p 2537 N93-23905
SUMER: Solar Ultraviolet Measurements of Emitted Radiation p 2541 N93-23931

EXTREMELY LOW RADIO FREQUENCIES
Radiolocation in the lower ELF frequency band p 2270 N93-23630

EXTREMUM VALUES
Methods for analyzing extreme events under climate change
| PB93-146827 | p 2387 N93-23651

EXTRUDING
Performance study of the rheometrics melt flow monitor for real-time rheological characterization
| NRC-34372 | p 2241 N93-24290

EYE (ANATOMY)
Optical analysis of lenslet arrays
| AD-A260126 | p 2488 N93-23702

EYE MOVEMENTS
Eye movements and visual information processing
| AD-A259955 | p 2425 N93-24297
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362
Optovert: An AustroMir-1991 experiment. Orientational effects from optokinetic stimulation p 2160 N93-24366

EYE PROTECTION
Optical analysis of lenslet arrays
| AD-A260126 | p 2488 N93-23702

F

F REGION
On the hierarchy of processes contributing to equatorial spread F p 2395 N93-23595
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
| AD-A259943 | p 2401 N93-24322

F-104 AIRCRAFT
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123

F-15 AIRCRAFT
A neural based intelligent flight control system for the NASA F-15 flight research aircraft p 2132 N93-22368

F-16 AIRCRAFT
Numerical prediction of transition of the F-16 wing at supersonic speeds
| NASA-CR-192706 | p 2111 N93-23392
Attitude awareness enhancements for the F-16 head-up display
| AD-A260280 | p 2428 N93-24168

F-18 AIRCRAFT
System identification and model reduction using modulating function techniques
| NASA-CR-192807 | p 2438 N93-23248

FABRICATION
Development of a miniature mass analyzer and associated instrumentation for improved capabilities in the analysis of low energy plasmas from a rocket or satellite platform
| NASA-CR-192453 | p 2202 N93-22014
Application of neutron diffraction technology to the determination of residual strain in engineering composites
| DE93-004249 | p 2207 N93-22066
Ceramic matrix composites (continuous fiber reinforced) thermal protection systems p 2177 N93-22112
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware p 2141 N93-22260
Widebanding techniques for VHF antennas, 1
| AD-A259301 | p 2260 N93-22399
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
| NASA-CR-191089 | p 2277 N93-22479
Pyroshock simulation for satellite components using a tunable resonant fixture
| DE93-005338 | p 2322 N93-22500
High power diode pumped solid state lasers
| DE93-005818 | p 2307 N93-22691
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
| DE93-000049 | p 2377 N93-22750
Advanced reinforcement systems for intermetallic applications
| NASA-CR-4488 | p 2209 N93-22875
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017
Fabrication and properties of Si3N4 with rare earth apatite grain boundary phases
| DE93-005752 | p 2505 N93-23037
Focal plane arrays for submillimeter waves using two-dimensional electron gas elements: A grant under the Innovative Research Program
| NASA-CR-192271 | p 2263 N93-23062
The diffusion of lead toward the interface of a rapidly solidified carbon fiber reinforced aluminum-lead matrix composite p 2210 N93-23719
Computational simulation for concurrent engineering of aerospace propulsion systems
| NASA-TM-106029 | p 2330 N93-23746
Real-time signal processing systems
| AD-A259548 | p 2272 N93-24084
High temperature superconducting compounds
| AD-A259926 | p 2284 N93-24129
Processing of patterned ferroelectric capacitors
| AD-A259936 | p 2284 N93-24131
Gas source molecular beam epitaxial growth of GaN
| AD-A260524 | p 2512 N93-24199
Application of microwave heating for fabrication of silicon nitride ceramics
| DE93-006741 | p 2242 N93-24330
Atom wave interferometer
| AD-A260082 | p 2484 N93-24410
Technology transfer from NASA to targeted industries, volume 2
| NASA-CR-192758 | p 2533 N93-24484
Ion beam mixing in multi-quantum well structures
| AD-A259772 | p 2516 N93-24509
Recent progress in zirconia-based fuel cells for power generation
| DE93-003488 | p 2383 N93-24513
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
| PB93-146991 | p 2259 N93-24635

FABRICS
Applications of fibrous substrates containing insolubilized phase change polymers p 2320 N93-22181
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
| NASA-CR-191422 | p 2211 N93-23877
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
| NASA-TM-104748 | p 2243 N93-24474

FACE (ANATOMY)
Face recognition with neural networks
| AD-A259587 | p 2462 N93-24066

FACE CENTERED CUBIC LATTICES
Pretransformation strain modulations in proper ferroelastics
| DE93-005468 | p 2226 N93-22340

FACTORIZATION
Partitioning a chordal graph into transitive subgraphs for parallel sparse triangular solution
| DE93-006614 | p 2446 N93-22512
Predicting structure in nonsymmetric sparse matrix factorizations
| DE93-004119 | p 2468 N93-22938

FADDEEV EQUATIONS
Configuration space Faddeev calculations
| DE93-006080 | p 2475 N93-23337

FAILURE
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
| DE93-005616 | p 2257 N93-22416
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406
Condition based machinery maintenance (helicopter fault detection), phase 1
| AD-A259774 | p 2316 N93-23477

FAILURE ANALYSIS
Failure environment analysis tool applications p 2322 N93-22170
On-board fault management for autonomous spacecraft p 2140 N93-22255
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
| NASA-TM-105830 | p 2312 N93-22826
Sneak analysis applied to process systems
| DE93-752866 | p 2257 N93-22970
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104
Evaluation of tensile static, dynamic, and cyclic fatigue behavior for a HIPed silicon nitride at elevated temperatures
| DE93-005149 | p 2210 N93-23311
High resolution computed tomography
| AD-A259728 | p 2321 N93-23470
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
| AD-A260129 | p 2210 N93-23703
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
| AD-A260047 | p 2472 N93-23711
Pattern classifier for health monitoring of helicopter gearboxes
| NASA-TM-106099 | p 2316 N93-23741
The consequence of joint failures p 2212 N93-23941
Assigning sites to redundant clusters in a distributed storage system
| AD-A260458 | p 2528 N93-24196
Models and analysis for multivariate failure time data p 2322 N93-24198
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217

FAILURE MODES
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
| DE93-003825 | p 2325 N93-22872
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
High-voltage failure mechanisms in liquid-filled, Fluorinert FC-40, capacitors
| DE93-006286 | p 2282 N93-23677
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
| AD-A260129 | p 2210 N93-23703
Two-parameter fracture mechanics theory and applications
| AD-A259907 | p 2330 N93-23993
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217
Neural networks for the monitoring of rotating machinery
| DE93-003549 | p 2464 N93-24503

FAINT OBJECT CAMERA
Solar system observations with HST p 2534 N93-23889

FALSE ALARMS
Constant false probability data fusion system
|AD-D015624| p 2304 N93-24219
FAN BLADES
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
|NASA-TM-105267| p 2325 N93-23015
FAR FIELDS
Hexagonal ferrites for millimeter wave applications
|AD-A260483| p 2510 N93-24101
Antenna pattern control using impedance surfaces
|NASA-CR-192712| p 2273 N93-24471
FAR INFRARED RADIATION
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
|NASA-CR-192704| p 2546 N93-22469
Laser diagnostics p 2311 N93-23260
FIRST: Far Infrared and Submillimeter Space Telescope p 2540 N93-23924
FAR ULTRAVIOLET RADIATION
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
ORFEUS: Scientific targets and optical performance p 2537 N93-23905
FARM CROPS
A proposal to demonstrate production of salad crops in the Space Station Mockup Facility with particular attention to space, energy, and labor constraints
|NASA-CR-192815| p 2419 N93-23169
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770
Analysis and synthesis of models for effects of climate change on agricultural systems
|DE93-007949| p 2389 N93-24521
FAST FOURIER TRANSFORMATIONS
Application and development of wavelet analysis
|AD-A260389| p 2489 N93-24240
FASTENERS
Blind fastening apparatus
|NASA-CASE-LAR-14542-1| p 2311 N93-22384
FATIGUE (MATERIALS)
Analysis of automated fatigue crack growth rate data
|DE93-752853| p 2324 N93-22771
The role of passive surface films on corrosion fatigue crack initiation
|DE93-006512| p 2325 N93-22888
Fatigue and reliability analyses for wind turbines
|DE93-004497| p 2380 N93-23318
Review of aeronautical fatigue investigation activities developed in Aeritalia-GAT during the period May 1987 - April 1989
|ETN-93-93702| p 2126 N93-23401
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
|DE93-004716| p 2330 N93-24051
FATIGUE LIFE
Stress calculation for the Sandia 34-meter wind turbine using the local circulation method and turbulent wind
|DE93-004480| p 2375 N93-22045
Microstructure and texture control of fatigue in hydrogen and marine environments
|AD-A259808| p 2231 N93-23642
FATIGUE TESTS
Improved techniques for thermomechanical testing in support of deformation modeling
|NASA-TM-105944| p 2323 N93-22555
Heat pipe fatigue test specimen: Metallurgical evaluation
|NASA-CR-189120| p 2381 N93-23360
Review of aeronautical fatigue investigation activities developed in Aeritalia-GAT during the period May 1987 - April 1989
|ETN-93-93702| p 2126 N93-23401
The role of fatigue testing in the design, development, and certification of the ATR 42/72
|ETN-93-93704| p 2127 N93-23969
FAULT TOLERANCE
Self-checking on-line testable static RAM
|NASA-CASE-NPO-17939-1-CU| p 2432 N93-22032
A fault-tolerant intelligent robotic control system p 2465 N93-22159
Intelligent neuroprocessors for in-situ launch vehicle propulsion systems health management p 2452 N93-22221
On-board fault management for autonomous spacecraft p 2140 N93-22255
An hierarchic alliance of filters for fault tolerant navigation using two inertial systems with aiding sensors p 2121 N93-22793
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
|NASA-CR-192656| p 2152 N93-23033
Condition based machinery maintenance (helicopter fault detection), phase 1
|AD-A259774| p 2316 N93-23477
Design and analysis of scheduling policies for real-time computer systems
|AD-A259806| p 2448 N93-23641
The robustness of feed-forward neural networks: A preliminary investigation p 2461 N93-23717
Validation of distributed systems by fault injection
|LAAS-92180| p 2472 N93-23864
Assigning sites to redundant clusters in a distributed storage system
|AD-A260458| p 2528 N93-24196
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
|AD-A260051| p 2442 N93-24407
FAULT TREES
Constant false probability data fusion system
|AD-D015624| p 2304 N93-24219
FAULTS
Fault detection and isolation p 2106 N93-22568
FEASIBILITY
Pyroshock simulation for satellite components using a tunable resonant fixture
|DE93-005338| p 2322 N93-22500
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
|NASA-CR-189715| p 2476 N93-22813
FEASIBILITY ANALYSIS
An analysis of power beaming for the Moon and Mars
|NASA-CR-191072| p 2182 N93-22554
Improved techniques for thermomechanical testing in support of deformation modeling
|NASA-TM-105944| p 2323 N93-22555
Space biology initiative program definition review. Trade study 6: Space Station Freedom/spacelab modules compatibility
|EEI-89-236| p 2418 N93-23081
FEDERAL BUDGETS
Space programs: NASA's independent cost estimating capability needs improvement
|AD-A259263| p 2531 N93-22404
Public Congressional forum on space p 2154 N93-23165
FEEDBACK
A new approach for designing self-organizing systems and application to adaptive control p 2451 N93-22215
A fuzzy logic controller system
|AD-A259723| p 2439 N93-23467
Semiconductor laser with a self-pumped phase conjugate external cavity
|AD-A260028| p 2310 N93-24323
FEEDBACK CONTROL
Neighboring suboptimal control for vehicle guidance p 2171 N93-22011
Space Station Freedom beta gimbal control via sensitivity models
|NASA-TM-106000| p 2182 N93-22551
Precursor SSF utilization: The MODE experiments p 2188 N93-22633
Control design variable linking for optimization of structural/control systems
|NASA-CR-4493| p 2125 N93-22827
Identification for robust control: What is the best approach?
|MEMT-16| p 2458 N93-23060
A passivity approach to controller-observer design for robots
|MEMO-1050| p 2459 N93-23355
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956
Kinematics and dynamics of robotic systems with multiple closed loops p 2318 N93-24218
Sample positioning in microgravity
|NASA-CASE-NPO-18448-1-CU| p 2253 N93-24600
FEEDFORWARD CONTROL
Using recurrent networks for dimensionality reduction
|AD-A259497| p 2459 N93-23464
FEMALES
Underrepresented groups p 2517 N93-23146
Focusing educational initiatives p 2517 N93-23150
FEMUR
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
FERMENTATION
Biological production of hydrogen
|DE93-002604| p 2219 N93-22736
Xylose fermentation to ethanol
|DE93-000067| p 2244 N93-22929
FERMI LIQUIDS
Synchrotron studies of narrow band materials
|DE93-006981| p 2502 N93-22526
FERMI SURFACES
Theoretical study of electron-phonon interaction in beta-phase NiTi and Ni-Al alloys
|DE93-004733| p 2228 N93-22738
FERMIONS
Meson form-factors and wave-functions with Wilson fermions
|DE93-003859| p 2479 N93-22542
FERRITES
Hexagonal ferrites for millimeter wave applications
|AD-A260483| p 2510 N93-24101
FERRITIC STAINLESS STEELS
Damage analysis and fundamental studies for fusion reactor materials development
|DE93-008283| p 2499 N93-24516
FERROELECTRICITY
Chemically prepared Pb(Zr,Ti)O3 thin films: The effects of orientation and stress
|DE93-004501| p 2500 N93-22324
Metallo-organic solution deposition of ferroelectric PZT films
|AD-A260127| p 2502 N93-22549
Charge trapping centers in ferroelectric ceramics
|DE93-005359| p 2238 N93-22954
Processing of patterned ferroelectric capacitors
|AD-A259936| p 2284 N93-24131
FERROMAGNETIC FILMS
Hexagonal ferrites for millimeter wave applications
|AD-A260483| p 2510 N93-24101
FERROMAGNETIC MATERIALS
Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
|DE93-004204| p 2499 N93-22064
Pretransformation strain modulations in proper ferroelastics
|DE93-005468| p 2226 N93-22340
Micromagnetic surface studies of materials for nondestructive evaluation
|DE93-006303| p 2321 N93-22695
FERROMAGNETIC RESONANCE
Hexagonal ferrites for millimeter wave applications
|AD-A260483| p 2510 N93-24101
FERROMAGNETISM
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
|DE93-004203| p 2502 N93-22523
FERTILIZERS
Iron fertilization of the austral ocean: A model assessment
|MPIM-84| p 2415 N93-23860
FIBER COMPOSITES
Ceramic matrix composites (continuous fiber reinforced) thermal protection systems p 2177 N93-22112
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
Finite element analysis of a composite artificial ankle p 2423 N93-22189
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
|DE93-006742| p 2208 N93-22578
Development of an interfacial test system for the determination of interfacial properties in fiber reinforced ceramic composites
|DE93-006743| p 2236 N93-22579
Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
|DS-2024| p 2208 N93-22603
Role of interfaces on the ductile fracture process of discontinuous fiber reinforced composites
|DE93-004464| p 2209 N93-22973
High Temperature Composite Analyzer (HITCAN) demonstration manual, version 1.0
|NASA-TM-106003| p 2328 N93-23411
Residual stress measurements in continuous fiber titanium matrix composites
|DE93-003733| p 2232 N93-23686
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
|AD-A260129| p 2210 N93-23703
The diffusion of lead toward the interface of a rapidly solidified carbon fiber reinforced aluminum-lead matrix composite p 2210 N93-23719
Fiber-metal laminates: A solution to weight, strength, and fatigue problems p 2211 N93-23938
Automated manufacturing of continuous fibre composite structures for aerospace applications p 2212 N93-23942
A process model for control of resin volume fraction in filament wound composite laminates p 2213 N93-23948

High temperature deformation characteristics of discontinuous fiber reinforced composites
|DE93-004466| p 2214 N93-24047
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials p 2214 N93-24181
Modeling the thermal properties and processing of composite materials p 2214 N93-24206
Mesomechanical model for fibre composites: The role of the interface
|AD-A260195| p 2215 N93-24468

FIBER OPTICS
Advances in Guidance and Control of Precision Guided Weapons
|AGARD-CP-524| p 2254 N93-22018
System evaluation of a fiber optic guided missile with a simple guidance addition to improve system effectiveness p 2255 N93-22025
Linear payout systems for dispensing fiber-optic data links from precision-guided munitions or high-performance aircraft/missles p 2255 N93-22026
Passive (self-powered) fiber-optic sensors
|DE93-005761| p 2486 N93-22762
An overview of optical gyroscopes for navigation p 2119 N93-22783
Fiber optic gyros and systems p 2120 N93-22785
Stimulated Brillouin scattering switching in mid fibers
|AD-A260456| p 2487 N93-22948
OTV bearing deflection investigation
|NASA-TM-106085| p 2303 N93-22994
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
|NASA-TM-104002| p 2128 N93-23175
A review of optically controlled microwave devices and circuits
|AD-A259647| p 2282 N93-23656
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723
Fiber optic interferometer configuration with pump-induced phase carrier
|AD-D015617| p 2489 N93-24156
Radio frequency cable to optical fiber cable
|AD-D015620| p 2284 N93-24230
Intelligent, integrated fiber optic networks
|AD-A260282| p 2490 N93-24260
Fiber optic microphone having a pressure sensing reflective membrane and a voltage source for calibration purpose
|NASA-CASE-LAR-14402-2-CU| p 2478 N93-24602
Development of membrane film fiber optic based sensors for the remote monitoring of the quality of surface and groundwater
|PB93-150001| p 2375 N93-24638

FIBER STRENGTH
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
|DE93-006420| p 2214 N93-24030

FIBERS
Rigid fibrous ceramics for entry systems p 2177 N93-22117
Applications of fibrous substrates containing insolubilized phase change polymers p 2320 N93-22181

FIELD EFFECT TRANSISTORS
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
|DE93-006679| p 2278 N93-22577
Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
|ETN-93-93421| p 2278 N93-22679
Guided wave phenomena in millimeter wave integrated circuits and components
|AD-A260407| p 2262 N93-22946
Design and qualification of the SEU/TD Radiation Monitor chip
|NASA-CR-192797| p 2280 N93-23041
A review of optically controlled microwave devices and circuits
|AD-A259647| p 2282 N93-23656
Study of the compatibility of PIN detector circuits and field effect transistors. Extension to high mobility and one dimensional electron gas transitors
|LAAS-92242| p 2283 N93-23863
High temperature superconducting compounds
|AD-A259926| p 2284 N93-24129
GaAs-based optoelectronic neurons
|NASA-CASE-NPO-18497-1-CU| p 2464 N93-24599

FIELD INTENSITY METERS
Progresses in measuring electrostatic DC fields
|OEFZS-4627| p 2280 N93-23112

FIELD OF VIEW
In-flight field-of-view with ANVIS
|AD-A259905| p 2427 N93-23992
Investigation of serendipitious WFC sources
|NASA-CR-192774| p 2544 N93-24458

FIELD THEORY (ALGEBRA)
Versatile Reed-Solomon decoders
|ISBN-0-315-64738-8| p 2274 N93-24626

FIGHTER AIRCRAFT
Detectability of high power aircraft
|MBB-FE-S-PUB-0490| p 2262 N93-22682

FIGURE OF MERIT
A figure of merit for Transit-Time-Limited time-derivative electromagnetic field sensors
|AD-A260016| p 2273 N93-24459

FILAMENT WINDING
A process model for control of resin volume fraction in filament wound composite laminates p 2213 N93-23948

FILLETS
Automatic computation of wing-fuselage intersection lines and fillet inserts with fixed-area constraint
|NASA-TM-4406| p 2108 N93-22487

FILM BOILING
Boiling under microgravity conditions p 2249 N93-22847

FILM THICKNESS
Test requirements for coal-tar mixtures on airport pavements
|DOT/FAA/RD-92-27| p 2134 N93-23137
Spectroscopic ellipsometry and interference reflectometry measurements of CVD silicon grown on oxidized silicon
|DE93-005767| p 2509 N93-24017
Metrologic support for the DARPA/NRL-XRL Mask Program: Ellipsometric analyses of SiC thin films on Si
|PB93-152098| p 2225 N93-24632

FILTRATION
Patch testing of ceramic barrier filters
|DE93-005017| p 2315 N93-23294

FINANCE
Financial alternatives for global satellite navigation p 2124 N93-23519

FINANCIAL MANAGEMENT
Space programs: NASA's independent cost estimating capability needs improvement
|AD-A259263| p 2531 N93-22404
Executive summary of information systems plans: Fiscal years 1994 to 1998
|PB93-146330| p 2527 N93-23646

FINE STRUCTURE
X ray absorption fine structure strain determination in thin films p 2326 N93-23072

FINGERS
Evaluation of hole sizes in structures requiring EVA services as a means to prevent gloved-hand finger entrapment
|NASA-TM-104767| p 2426 N93-23129

FINITE DIFFERENCE THEORY
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
|NASA-TM-106056| p 2466 N93-22664
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
|DE93-006816| p 2480 N93-22714
Controlling chaos in spark-ignition engines
|DE93-005754| p 2312 N93-22761
Time-stable boundary conditions for finite-difference schemes solving hyperbolic systems: Methodology and application to high-order compact schemes
|NASA-CR-191436| p 2468 N93-23126
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
|AD-A259829| p 2281 N93-23433
Low altitude acoustic propagation analysis by use of a three-dimensional parabolic wave equation
|ONERA-P-1992-1| p 2477 N93-24190

FINITE ELEMENT METHOD
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
Finite element analysis of a composite artificial ankle p 2423 N93-22189
Adaptive meshing in solids
|DE93-003238| p 2287 N93-22331
A class of hybrid finite element methods for electromagnetics: A review
|NASA-CR-192631| p 2260 N93-22467
Coupled multi-disciplinary composites behavior simulation
|NASA-TM-106011| p 2322 N93-22481
GROPE: A GENESIS/EXODUS database examination program
|DE93-006963| p 2523 N93-22514
Aprepro: An algebraic preprocessor for parameterizing finite element analyses
|DE93-006989| p 2466 N93-22527
The h, p and h-p version of the finite element method basic theory and applications
|AD-A260197| p 2323 N93-22550
Incremental, quasistatic, uniaxial finite element analysis in the linear viscoelasticity theory, exemplarily demonstrated by the Burger material
|ETN-93-93422| p 2324 N93-22680
Multidisciplinary optimization of a controlled space structure using 150 design variables
|NASA-CR-4502| p 2125 N93-22799
The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
|DE93-000796| p 2392 N93-22807
Large-scale computation of incompressible viscous flow by least-squares finite element method
|NASA-TM-105904| p 2467 N93-22825
Finite element methods in heat transfer
|DE93-006451| p 2290 N93-22886
The p and h-p versions of the finite element method: Basic principles and properties
|AD-A260237| p 2468 N93-22930
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
|NASA-TM-105978| p 2130 N93-23013
Probabilistic finite elements for fatigue and fracture analysis
|NASA-CR-191098| p 2326 N93-23053
High Temperature Composite Analyzer (HITCAN) programmer's manual. Version 1.0
|NASA-TM-106004| p 2326 N93-23056
Analysis of delamination related fracture processes in composites
|NASA-CR-192632| p 2209 N93-23073
VASGEN: A finite element model generation program for VAST. User's manual, version 4.0
|DREA-CR-91-447| p 2437 N93-23089
Localized damage development in notched composite plates subjected to compressive loading
|CTN-93-60663| p 2209 N93-23113
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
|VTT-PUBS-103| p 2326 N93-23120
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
|NASA-CR-190782| p 2327 N93-23125
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
|NASA-CR-192348| p 2263 N93-23215
Fully implicit solutions of the benchmark backward facing step problem using finite element discretization and inexact Newton's method
|DE93-005246| p 2293 N93-23299
Consideration of history dependent damage in creep crack growth
|DE93-004398| p 2328 N93-23317
SPRING2: Helical compression spring geometry generator program manual
|DREA-TC-92-314| p 2438 N93-23345
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
|PB93-142438| p 2439 N93-23436
Numerical treatment of vertex singularities and intensity factors for mixed boundary value problems for the Laplace equation in R3
|AD-A260107| p 2469 N93-23713
surf3d: A 3-D finite-element program for the analysis of surface and corner cracks in solids subjected to mode-1 loadings
|NASA-TM-107710| p 2329 N93-23735
Mapping methods for computationally efficient and accurate structural reliability
|NASA-TM-105892| p 2330 N93-23745
Bend ductility of tungsten heavy alloys
|DE93-004839| p 2232 N93-23971
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
|NASA-CR-192697| p 2511 N93-24146
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 2
|NASA-CR-192698| p 2511 N93-24147
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217
On the regularity of elasticity problems with piecewise analytic data
|AD-A260346| p 2332 N93-24273
Studies in penetration mechanics
|AD-A260436| p 2332 N93-24304
Multiobjective optimization of aerospace structures
|AD-A260433| p 2127 N93-24430

A priori error estimates of finite element solutions of parametrized nonlinear equations
| AD-A260013 | p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
| AD-A260014 | p 2471 N93-24438
New Micro- and macroscopic models of contact and friction
| AD-A259925 | p 2319 N93-24442
FESDIF: Finite Element Scalar Diffraction theory code
| DE93-007222 | p 2475 N93-24447
Use of system identification techniques for improving airframe finite element models using test data
| NASA-CR-192699 | p 2128 N93-24481
Inelastic nonuniform torsion of steel I-beams
| PB93-118776 | p 2333 N93-24589

FINLAND
The Finnish research programme on climate change
| DE93-752870 | p 2383 N93-22597
Wind power plants in the weather conditions of Northern Finland
| DE93-752927 | p 2379 N93-22971

FIRE DAMAGE
TM-SPOT multitemporal analysis on areas devasted by fire p 2355 N93-23580

FIRE FIGHTING
Aircraft fire protection system
| CA-PATENT-1-296-970 | p 2118 N93-24592

FIRES
Analysis of upward flame spread
| DE93-752850 | p 2257 N93-22770
The generation of carbon monoxide in compartment fires p 2117 N93-23093
Modeling the heat release rate of aircraft cabin panels
| DOT/FAA/CT-92/3 | p 2118 N93-23222
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
| PB93-139087 | p 2258 N93-23280
Acoustic emission of structural materials exposed to open flames
| PB93-138980 | p 2477 N93-23951

FISHERIES
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR p 2337 N93-22141
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries
| PB93-149409 | p 2374 N93-24309

FISHES
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR p 2337 N93-22141

FISHING
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries
| PB93-149409 | p 2374 N93-24309

FISSION
Theoretical models of neutron emission in fission
| DE93-005482 | p 2485 N93-22343

FITTING
Least squares surface approximation to scattered data using multiquadric functions
| AD-A259804 | p 2469 N93-23640

FIXTURES
Blind fastening apparatus
| NASA-CASE-LAR-14542-1 | p 2311 N93-22384
Pyroshock simulation for satellite components using a tunable resonant fixture
| DE93-005338 | p 2322 N93-22500
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
| DE93-005382 | p 2325 N93-22975
End effectors and grapple fixtures
| CA-PATENT-1-294-917 | p 2316 N93-23966
Grapple fixture
| CA-PATENT-1-297-519 | p 2317 N93-23967

FLAME HOLDERS
Influence of gravity on polyedric flames p 2226 N93-22840

FLAME PROPAGATION
Analysis of upward flame spread
| DE93-752850 | p 2257 N93-22770
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
| DE93-007258 | p 2219 N93-22824
Influence of gravity on polyedric flames p 2226 N93-22840
Reacting liquid monopropellant sprays: Experiments with high velocity full cone sprays in 33 MPa, 500 C nitrogen
| AD-A259799 | p 2245 N93-23456

FLAME STABILITY
Influence of gravity on polyedric flames p 2226 N93-22840

FLAME TEMPERATURE
Structure of confined laminar spray diffusion flames: Numerical investigation
| NASA-TM-106038 | p 2288 N93-22596

FLAMES
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854
Acoustic emission of structural materials exposed to open flames
| PB93-138980 | p 2477 N93-23951
Role of acoustics in flame/vortex interactions
| NASA-CR-191429 | p 2299 N93-24494

FLAMMABILITY
Analysis of upward flame spread
| DE93-752850 | p 2257 N93-22770
Practical problems related to flammability and combustion in space p 2226 N93-22839

FLAMMABLE GASES
Catalytic combustion of hydrogen
| DE93-752854 | p 2217 N93-22073

FLANGES
Inelastic nonuniform torsion of steel I-beams
| PB93-118776 | p 2333 N93-24589

FLAPPING
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
| DE93-003253 | p 2324 N93-22721

FLASHOVER
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom
| NASA-CR-191106 | p 2258 N93-23430

FLASKS
NOAA/CMDL atmospheric methane data from shipboard flask sampling
| PB93-136489 | p 2389 N93-24226

FLAT PLATES
Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
| AD-A259923 | p 2289 N93-22734
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402

FLEXIBILITY
System concept for an advanced stand-off weapon p 2256 N93-22029
The role of smart systems in rendezvous, close proximity operations and docking maneuvers p 2150 N93-22310
Motif, the basics: An overview of the widget set
| DE93-005273 | p 2436 N93-22720
Field programmable gate arrays: Evaluation report for space-flight application
| NASA-CR-192796 | p 2432 N93-23042
Implementation of the block-Krylov boundary flexibility method of component synthesis
| NASA-TM-106065 | p 2325 N93-23044

FLEXIBLE BODIES
Geogrid reinforced base courses for flexible pavements for light aircraft: Test section construction, behavior under traffic, laboratory tests, and design criteria
| DOT/FAA/RD-92/25 | p 2134 N93-23128
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198
Joint flexibility effects on the dynamic response of structures. Part 1: Deterministic analysis
| AD-A260487 | p 2331 N93-24135

FLEXIBLE SPACECRAFT
Vibration control experiments on a 12-meter cantilever truss structure
| AD-A259764 | p 2328 N93-23484
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956

FLEXIBLE WINGS
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
| NASA-TM-107732 | p 2108 N93-22457

FLEXING
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
| DE93-005881 | p 2207 N93-22410

FLIGHT ALTITUDE
Development and application of procedures to evaluate air quality and visibility impacts of low-altitude flying operations
| AD-A259903 | p 2408 N93-23990
Aircraft overflight study: Effect of aircraft altitude upon sound levels at the ground
| PB93-144194 | p 2477 N93-24572

FLIGHT CHARACTERISTICS
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123

FLIGHT CONDITIONS
Air traffic operational evaluation plan for the prototype Airport Surveillance Radar Wind Shear Processor (ASR-WSP) at Orlando International Airport
| DOT/FAA/CT-TN92/45 | p 2404 N93-23064

FLIGHT CONTROL
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
Fuzzy control of an unmanned helicopter p 2455 N93-22366
Fuzzy logic mode switching in helicopters p 2455 N93-22367
A neural based intelligent flight control system for the NASA F-15 flight research aircraft p 2132 N93-22368
Investigation of air transportation technology at Princeton University, 1991-1992 p 2106 N93-22570
Computer Aided Control System Design (CACSD) p 2107 N93-22572
Intelligent flight control systems p 2107 N93-22576
Risk management in fly-by-wire systems
| NASA-TM-104757 | p 2180 N93-22703
Aircraft accident report: United Airlines flight 585, Boeing 737-291, N999UA, uncontrolled collision with terrain for undetermined reasons, 4 miles south of Colorado Springs Municipal Airport, Colorado Springs, Colorado, 3 March 1991
| PB92-910407 | p 2117 N93-23191
A simulation of the Boeing B-747 aircraft
| CRANFIELD-AERO-9202 | p 2127 N93-24074
An introduction to multivariable flight control system design
| AD-A260408 | p 2131 N93-24087
Variable control system limits on Black Hawk and Seahawk helicopters
| AD-A259624 | p 2132 N93-24153
An integrated Rotorcraft Avionics/Controls Architecture to support advanced controls and low-altitude guidance flight research
| NASA-TM-103983 | p 2134 N93-24493

FLIGHT CREWS
Aircraft accident report: Air Transport International, Inc., flight 805, Douglas DC-8-63, N794AL. Loss of control and crash, Swanton, Ohio, 15 February 1992
| PB92-910406 | p 2117 N93-23086

FLIGHT HAZARDS
Hazard evaluation and operational cockpit display of ground-measured windshear data
| AIAA PAPER 90-0566 | p 2105 N93-22564
Hazard alerting and situational awareness in advanced air transport cockpits p 2106 N93-22566
Investigation of air transportation technology at Princeton University, 1991-1992 p 2106 N93-22570
Optimal recovery from microburst wind shear p 2107 N93-22574
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575

FLIGHT INSTRUMENTS
Hazard evaluation and operational cockpit display of ground-measured windshear data
| AIAA PAPER 90-0566 | p 2105 N93-22564
Flight project data book
| NASA-TM-108657 | p 2152 N93-22870

FLIGHT MANAGEMENT SYSTEMS
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
| NASA-CR-184472 | p 2258 N93-23176

FLIGHT MECHANICS
Annual progress report, 1990-1991
| CTN-93-60695 | p 2570 N93-23115

FLIGHT OPTIMIZATION
Optimization of flight trajectories in a 3D model of windshear flow field p 2110 N93-23203

FLIGHT PATHS
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
| AD-A259293 | p 2119 N93-22398
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
| NASA-TM-103883 | p 2122 N93-23419
Testing of a GPS receiver GLOBUS AN 2000 of SEL: A study of selective availability
| DLR-MITT-92-07 | p 2123 N93-24138
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
| PB93-144186 | p 2478 N93-24649

FLIGHT SAFETY
The role of university research in aviation safety and competitiveness: Testimony to the US Congress
| NIAR-92-3 | p 2116 N93-22379

Terrain Referenced Information and Guidance Systems (TRIGS)
| MBB-FE-315-S-PUB-0494 | p 2119 N93-22390
Advanced air traffic management
p 2107 N93-22571
Optimal recovery from microburst wind shear
p 2107 N93-22574
Operational evaluation of the converging runway display aid at Saint Louis
| MTR-92W0000217 | p 2133 N93-22874
Air traffic operational evaluation plan for the prototype Airport Surveillance Radar Wind Shear Processor (ASR-WSP) at Orlando International Airport
| DOT/FAA/CT-TN92/45 | p 2404 N93-23064
Safety study: Alcohol and other drug involvement in fatal general aviation accidents, 1983 through 1988
| PB92-917008 | p 2117 N93-23187
Off-shore platform identification signs
| CAA-PAPER-92006 | p 2123 N93-24124

FLIGHT SIMULATION

Six degree of freedom simulation system for evaluating automated rendezvous and docking spacecraft
p 2148 N93-22299
Automatic rendezvous system testing at the Flight Robotics Laboratory p 2150 N93-22312
Mission requirements and applications of integrated and multi-function navigation systems p 2119 N93-22781
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
| DE93-005382 | p 2325 N93-22975
Trail maneuver generation and selection in the Paladin tactical decision generation system
| NASA-TM-107722 | p 2131 N93-23088
Concepts for conformal and body-axis attitude information for spatial awareness presented in a helmet-mounted display
| NASA-TM-4438 | p 2129 N93-23408
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
| NASA-TM-103883 | p 2122 N93-23419
An introduction to multivariable flight control system design
| AD-A260408 | p 2131 N93-24087
Attitude awareness enhancements for the F-16 head-up display
| AD-A260280 | p 2428 N93-24168

FLIGHT SIMULATORS

Applicability of relative GPS to automated rendezvous between the space shuttle and space station
p 2138 N93-22241
Six degree of freedom simulation system for evaluating automated rendezvous and docking spacecraft
p 2148 N93-22299
Fuzzy logic mode switching in helicopters
p 2455 N93-22367
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
| AD-A259909 | p 2427 N93-23995
International application of the DLR test-system: Continuation of the cooperation with Iberia in pilot selection
| DLR-FB-92-12 | p 2425 N93-24104
A demonstration of motion base design alternatives for the National Advanced Driving Simulator
| NASA-TM-103881 | p 2428 N93-24490

FLIGHT TESTS

The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
Radar seeker based autonomous navigation update system using topography feature matching techniques
p 2256 N93-22030
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
On-orbit demonstration of automated closure and capture using ESA-developed proximity operations technologies and an existing, serviceable NASA Explorer Platform spacecraft p 2142 N93-22266
Simulation models for autonomous rendezvous and capture p 2149 N93-22304
Automatic rendezvous system testing at the Flight Robotics Laboratory p 2150 N93-22312
A teleoperated unmanned rotorcraft flight test technique p 2132 N93-22369
Mission requirements and applications of integrated and multi-function navigation systems p 2119 N93-22781
Optimization of the integration of inertia and GPS
p 2120 N93-22787
Integrated precision navigation system
p 2120 N93-22789
Flight evaluation of differential GPS aided inertial navigation systems p 2120 N93-22790
Visual autonomous automatic landing of airplanes
p 2121 N93-22791
Scene correlation for INS aiding in flight-test systems: Runway-referenced flight-tests with on-board sensors only p 2121 N93-22792
Influence of gravity on polyedric flames
p 2226 N93-22840
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123
Variable control system limits on Black Hawk and Seahawk helicopters
| AD-A259624 | p 2132 N93-24153
Spirit 2 vehicle: (A26.780). Post flight report
| AD-A259991 | p 2172 N93-24250
Operator interface assessment for the sensor fusion flight demonstration program
| AD-A260235 | p 2129 N93-24416

FLIR DETECTORS

Operator interface assessment for the sensor fusion flight demonstration program
| AD-A260235 | p 2129 N93-24416

FLOAT ZONES

Stability and instability of thermocapillary convection in models of the float-zone crystal-growth process
| NASA-CR-192695 | p 2252 N93-23122

FLOQUET THEOREM

Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897

FLORIDA

Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
| PB93-110955 | p 2519 N93-23286

FLOW CHARACTERISTICS

Generation of monodisperse droplets by spontaneous condensation of flow in nozzles
| NASA-CR-192356 | p 2287 N93-22401
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
| NASA-TM-107732 | p 2108 N93-22457
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel
| NASA-TM-103920 | p 2134 N93-23420
Optical diagnostics in supersonic plasma flows: Purging fluid effects
| DE93-006243 | p 2497 N93-24042

FLOW DISTRIBUTION

Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382
Heat transfer on accreting ice surfaces
| AIAA PAPER 90-0200 | p 2106 N93-22565
Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
| NASA-TM-105986 | p 2129 N93-22599
Improved two-equation k-omega turbulence models for aerodynamic flows
| NASA-TM-103975 | p 2289 N93-22809
Electrically driven convection p 2247 N93-22837
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Experimental investigation of the influence of the temperature gradient on the thermocapillary convection in spherical drops under low-gravity
p 2251 N93-22862
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
| NASA-TM-4436 | p 2110 N93-22876
Optimization of flight trajectories in a 3D model of windshear flow field p 2110 N93-23203
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
| DE93-005251 | p 2293 N93-23300
A system for the numerical simulation of complex configuration internal aerodynamic fields for the aerospace industry
| ETN-93-93698 | p 2110 N93-23364
A study of the accuracy of neutrally buoyant bubbles used as flow tracers in air
| NASA-CR-191088 | p 2111 N93-23399
Transient simulation of ram accelerator flowfields
| AD-A259767 | p 2295 N93-23485
Tip-vortex/airframe interactions p 2111 N93-23489
Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592
Restoring monotonicity of slowly-moving shocks computed with Godunov-type schemes
| CRANFIELD-AERO-9207 | p 2297 N93-24075
Slotted-wall flow-field measurements in a transonic wind tunnel
| NASA-TM-4280 | p 2113 N93-24111
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
| AD-A260149 | p 2297 N93-24132
Measurement and prediction of tip-clearance effects in a linear turbine cascade
| ISBN-0-315-68826-2 | p 2130 N93-24176
The 12th Symposium on Turbulence
| AD-A260353 | p 2298 N93-24274
Determination and characteristics of the transition to two-phase slug flow in small channels
| DE93-004250 | p 2299 N93-24434
Investigation of aerothermodynamics and optical radiation in the AFE hypersonic flow field
| NASA-CR-192844 | p 2114 N93-24475
An experimental investigation of a supercritical airfoil at transonic speeds
| NASA-TM-103933 | p 2300 N93-24534
Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
| NASA-TM-103909 | p 2300 N93-24537
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
| NASA-TM-103838 | p 2300 N93-24542
Numerical modeling of fluidic flow meters
| PB93-124139 | p 2301 N93-24577
Flowfield computer graphics
| NASA-CR-193029 | p 2444 N93-24655

FLOW EQUATIONS

Simulation of a particle-laden combustion flow in an MHD second stage combustor
| DE93-004244 | p 2491 N93-22065
An analytical study of some problems in partial differential equations with applications to fluid dynamics and wave propagation
| AD-A260351 | p 2470 N93-24169
Numerical modeling of fluidic flow meters
| PB93-124139 | p 2301 N93-24577

FLOW GEOMETRY

Perception/action: An holistic approach
| AD-A259597 | p 2428 N93-24067

FLOW MEASUREMENT

Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
Application of a SAW device for measuring rate of gas flow
| PB93-124931 | p 2292 N93-23253
Development of optical three-dimensional measurement techniques for fluid dynamics p 2294 N93-23398
A thermal type probe for low velocity measurements
p 2165 N93-24397
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
| NASA-TM-102643 | p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
| NASA-TM-101598 | p 2116 N93-24540

FLOW STABILITY

On the nonlinear interfacial instability of rotating core-annular flow
| NASA-CR-191432 | p 2289 N93-22811
Thermocapillary instabilities in the presence of a homogeneous magnetic field p 2252 N93-22865
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897
Stability and heat transfer in time-modulated flows
| DE93-006423 | p 2293 N93-23339
Direct numerical simulations and hydrodynamic stability problems in the upper oceanic mixed layer
p 2414 N93-23490
Bottom generated velocity fluctuations in one-dimensional open channel flow
| MEMO-1051 | p 2297 N93-23865
Spatial development of chaos in an open flow system
p 2515 N93-24293
Control of two- and three-dimensional wake instabilities from bluff-bodies
| AD-A260410 | p 2299 N93-24428

Effects of capillarity on microscopic flow in porous media
|DE93-007626| p 2299 N93-24505

FLOW VELOCITY
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
Application of a SAW device for measuring rate of gas flow
|PB93-124931| p 2292 N93-23253
On wave force analysis using system identification
|RR-450| p 2293 N93-23361
Development of optical three-dimensional measurement techniques for fluid dynamics p 2294 N93-23398
An investigation of particle turbulence quantities in a dense two-phase pipe flow, using laser Doppler velocimetry p 2295 N93-23496
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
|AD-A260118| p 2113 N93-23714
Bottom generated velocity fluctuations in one-dimensional open channel flow
|MEMO-1051| p 2297 N93-23865
Numerical modeling of fluidic flow meters
|PB93-124139| p 2301 N93-24577

FLOW VISUALIZATION
Off-surface infrared flow visualization
|NASA-CASE-LAR-14568-1| p 2486 N93-22037
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
A study of the accuracy of neutrally buoyant bubbles used as flow tracers in air
|NASA-CR-191088| p 2111 N93-23399
A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
|ETN-93-93701| p 2299 N93-24487
Experimental study of the separating confluent boundary-layer. Volume 2: Experimental data. Appendices A-E: Data supplement
|NASA-CR-166018-SUPPL| p 2299 N93-24531
Numerical modeling of fluidic flow meters
|PB93-124139| p 2301 N93-24577
Flowfield computer graphics
|NASA-CR-193029| p 2444 N93-24655

FLOWMETERS
Application of a SAW device for measuring rate of gas flow
|PB93-124931| p 2292 N93-23253
Evaluation of nozzle shapes for an optical flow meter
|PB93-124147| p 2292 N93-23281
Numerical simulation of flow through orifice meters
|PB93-124121| p 2293 N93-23349
Numerical modeling of fluidic flow meters
|PB93-124139| p 2301 N93-24577

FLUE GASES
Direct catalytic decomposition of nitric oxide
|DE93-008107| p 2389 N93-24515

FLUENCE
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
|NASA-TM-106021| p 2206 N93-22605

FLUID BOUNDARIES
Fluids in Space
|ESA-SP-353| p 2246 N93-22830

FLUID DYNAMICS
Selected OAST/OSSA space experiment activities in support of Space Station Freedom p 2189 N93-22636
Potential pressurized payloads: Fluid and thermal experiments p 2189 N93-22639
Microgravity fluid physics research in the Space Station Freedom era p 2191 N93-22644
Fluids in Space
|ESA-SP-353| p 2246 N93-22830
Microgravity science and applications: Program tasks and bibliography for FY 1992
|NASA-TM-4469| p 2253 N93-23428
Chaotic dynamics of the solar cycle
|AD-A260039| p 2557 N93-23644
On colliding plane gravitational waves coupled with fluid motions
|MATHS-REPT-A-161| p 2398 N93-24060
An analytical study of some problems in partial differential equations with applications to fluid dynamics and wave propagation
|AD-A260351| p 2470 N93-24169
The 12th Symposium on Turbulence
|AD-A260353| p 2298 N93-24274
Nonlinear dynamics research in the former Soviet Union
|PB93-146496| p 2333 N93-24571

FLUID FILMS
On the nonlinear interfacial instability of rotating core-annular flow
|NASA-CR-191432| p 2289 N93-22811
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864

FLUID FILTERS
Patch testing of ceramic barrier filters
|DE93-005017| p 2315 N93-23294
High temperature filter materials
|DE93-005018| p 2315 N93-23295
Development of the nested fiber filter
|DE93-005015| p 2315 N93-23322

FLUID FLOW
Off-surface infrared flow visualization
|NASA-CASE-LAR-14568-1| p 2486 N93-22037
A distributed visualization environment for engineering sciences
|DE93-006961| p 2257 N93-22600
Heat and mass transfer in polyphase flows p 2248 N93-22844
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178

FLUID MANAGEMENT
Potential pressurized payloads: Fluid and thermal experiments p 2189 N93-22639
Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
|NASA-CR-184472| p 2259 N93-23715

FLUID MECHANICS
A distributed visualization environment for engineering sciences
|DE93-006961| p 2257 N93-22600
The scientific microgravity fluid mechanics program of ZARM p 2247 N93-22832
Nonlinear optics and turbulence
|AD-A259950| p 2489 N93-24244
Fluid science users requirements p 2163 N93-24385

FLUID SWITCHING ELEMENTS
Design and characterization of the Pegasus 1 plasma flow switch
|DE93-003812| p 2276 N93-22322

FLUIDICS
Numerical modeling of fluidic flow meters
|PB93-124139| p 2301 N93-24577

FLUIDIZED BED PROCESSORS
Determination of the optical properties of particles for solar heated fluidized beds
|DLR-FB-92-15| p 2490 N93-24641

FLUORESCENCE
Passive (self-powered) fiber-optic sensors
|DE93-005761| p 2486 N93-22762
Photoabsorption and photodissociation of molecules important in the interstellar medium
|NASA-CR-192829| p 2552 N93-24488

FLUOROHYDROCARBONS
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products
|PB93-131449| p 2385 N93-23267

FLUOROPOLYMERS
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
|NASA-TM-106014| p 2236 N93-22560

FLUSHING
Variable-Volume Flushing (V-VF) device for water conservation in toilets p 2429 N93-22167

FLUTTER
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
|NASA-TM-107732| p 2108 N93-22457

FLUTTER ANALYSIS
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
|NASA-TM-107732| p 2108 N93-22457

FLUX DENSITY
Explosive pulse power for fusion applications
|DE93-003828| p 2491 N93-22076
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
|NASA-CR-192772| p 2413 N93-22700
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
|DE93-003792| p 2504 N93-22808
Scattering centre analysis of simple metallic objects
|ESA-TT-1250| p 2274 N93-24619

FLUX PINNING
Flux pinning structures in melt-processed YBa2Cu3O(7-x)
|DE93-005151| p 2501 N93-22497
Superconductivity and flux pinning in Nd(1 + x)Ba(2-x)Cu(3)O(7 + delta)
|DE93-004444| p 2505 N93-23052
Magnetic anisotropy in the high transition temperature superconductor YBa2Cu3O(7-delta)
p 2509 N93-23985

FLUX VECTOR SPLITTING
Restoring monotonicity of slowly-moving shocks computed with Godunov-type schemes
|CRANFIELD-AERO-9207| p 2297 N93-24075

FLY ASH
Development of the nested fiber filter
|DE93-005015| p 2315 N93-23322

FLY BY WIRE CONTROL
Risk management in fly-by-wire systems
|NASA-TM-104757| p 2180 N93-22703

FLYING PERSONNEL
The five-factor personality model and naval aviation candidates
|AD-A260227| p 2425 N93-24319

FOAMS
Lightweight solar concentrator structures, phase 2
|NASA-CR-191068| p 2203 N93-22674
Measurement of the radiative transport properties of reticulated alumina foams
|DE93-000047| p 2231 N93-23672
Effects of capillarity on microscopic flow in porous media
|DE93-007626| p 2299 N93-24505

FOCAL PLANE DEVICES
Focal plane arrays for submillimeter waves using two-dimensional electron gas elements: A grant under the Innovative Research Program
|NASA-CR-192271| p 2263 N93-23062

FOCUSING
Focused two-dimensional radar imaging using coherent time domain signals
|ESA-TT-1272| p 2263 N93-23331

FOILS (MATERIALS)
A solenoid with a low input power and a fast switching time
|DLR-FB-91-39| p 2278 N93-22661
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
|DE93-005560| p 2230 N93-22943

FOKKER-PLANCK EQUATION
The kinematics of stars and gas in the galactic disk p 2550 N93-23991

FOOD CHAIN
Arctic Contaminants Research Program: Research Plan
|PB93-135630| p 2387 N93-23439

FORBIDDEN TRANSITIONS
Aspects of photoionization of impurities and electron transfer in ionic crystals
|DE93-008544| p 2513 N93-24511

FORCE DISTRIBUTION
An approximate method for estimating the lifting characteristics of thin bodies of non-circular cross-section
|CRANFIELD-AERO-9006| p 2108 N93-22395
On wave force analysis using system identification
|RR-450| p 2293 N93-23361
Force distribution formulation and analysis for multiple-contact power grasp p 2461 N93-23718

FORCED CONVECTION
Electrically driven convection p 2247 N93-22837
Forced convection boiling and condensation in microgravity: A critical appraisal of the literature p 2249 N93-22849
Investigation of hot wire anemometers at very low velocities under microgravity p 2251 N93-22858
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
|AD-A260556| p 2298 N93-24282
A thermal type probe for low velocity measurements p 2165 N93-24397

FORECASTING
Market penetration of new energy technologies
|DE92-016409| p 2375 N93-22323

FOREST MANAGEMENT
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
The Swedish ISY projects: A joint national contribution p 2366 N93-23807
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811
Training courses on application of remote sensing and geographic information systems in monitoring and managing tropical rainforests and natural environment p 2367 N93-23812

FORESTS
Monitoring of growth environment of forest p 2336 N93-22135
Assessment and correction of the impact of topography and atmosphere on remote sensing forest mapping of alpine regions p 2370 N93-23832
On regional surface fluxes over partly forested areas
|MPIM-82| p 2397 N93-23858
Correlation and prediction of snow water equivalent from snow sensors
|PB93-127413| p 2374 N93-23870

General circulation model output for forest climate change research and applications
| PB93-124626 | p 2388 N93-24015
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
| DLR-FB-92-10 | p 2374 N93-24140

FORM FACTORS
Meson form-factors and wave-functions with Wilson fermions
| DE93-003859 | p 2479 N93-22542

FORMALISM
A detailed study of nonperturbative solutions of two-body Dirac equations
| DE93-004794 | p 2468 N93-22965

FORMAT
The dt: A proposed data format standard
| NASA-TM-4467 | p 2430 N93-22810

FORMATES
MHD seed recovery/regeneration, phase 2
| DE93-006008 | p 2493 N93-22769

FOUR-WAVE MIXING
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
| DE93-006411 | p 2419 N93-24028

FOURIER ANALYSIS
Application and development of wavelet analysis
| AD-A260389 | p 2489 N93-24240

FOURIER TRANSFORMATION
MIPAS: Michelson Interferometer for Passive Atmospheric Sounding for POEM-1
p 2363 N93-23786
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
| AD-A259944 | p 2273 N93-24243

FRACTALS
Fractal theory for large lacunar antenna arrays
p 2269 N93-23624
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
Modeling the thermal properties and processing of composite materials p 2214 N93-24206

FRACTOGRAPHY
Fracture properties of 7010 and 7050 aluminium alloys under inert and aggressive environmental conditions
| DLR-FB-91-35 | p 2228 N93-22658

FRACTURE MECHANICS
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
| DE93-003100 | p 2322 N93-22412
CREEPSIM-2: A software package for numerical integration of 1st order differential equations
| NPL-DMM(A)-35 | p 2435 N93-22452
The collaborative program of research in engineering sciences
| DE93-005126 | p 2257 N93-22768
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
| DE93-007670 | p 2229 N93-22912
J-integral of circumferential crack in large diameter pipes
| DE93-003708 | p 2326 N93-23050
Probabilistic finite elements for fatigue and fracture analysis
| NASA-CR-191098 | p 2326 N93-23053
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
| NASA-CR-190782 | p 2327 N93-23125
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
| AD-A260129 | p 2210 N93-23703
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
Two-parameter fracture mechanics theory and applications
| AD-A259907 | p 2330 N93-23993
Damage tolerance approach
| ETN-93-93700 | p 2332 N93-24486
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
| DE93-007971 | p 2234 N93-24566
Boundary element method
| ETN-93-93699 | p 2333 N93-24593

FRACTURE STRENGTH
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
| DE93-005881 | p 2207 N93-22410
Factors influencing the thermal shock behavior of ceramics
| DE93-005762 | p 2236 N93-22690
Interlaminar mode-2 fracture toughness of a glass-fiber epoxy laminate
| VTT-PUBS-105 | p 2208 N93-22815
Synthesis, processing, and properties of Ti5Si3
| DE93-004465 | p 2229 N93-22820
Mechanical properties of martensitic alloy AISI 422
| DE93-004834 | p 2229 N93-22882
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
| DE93-006745 | p 2325 N93-22896
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
| DE93-007670 | p 2229 N93-22912
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
| DE93-005473 | p 2210 N93-23246
Elevated temperature fracture of advanced powder metallurgy aluminum alloy 8009 p 2231 N93-23588
Two-parameter fracture mechanics theory and applications
| AD-A259907 | p 2330 N93-23993

FRACTURES (MATERIALS)
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
| DE93-007971 | p 2234 N93-24566

FRACTURING
A computational study of the time dependent crack growth process
| DE93-004397 | p 2324 N93-22751
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
| DE93-006745 | p 2325 N93-22896
Role of interfaces on the ductile fracture process of discontinuous fiber reinforced composites
| DE93-004464 | p 2209 N93-22973
J-integral of circumferential crack in large diameter pipes
| DE93-003708 | p 2326 N93-23050
Analysis of delamination related fracture processes in composites
| NASA-CR-192632 | p 2209 N93-23073
An investigation into the multiaxial fatigue behavior of IMI 829 titanium alloy p 2327 N93-23182
Consideration of history dependent damage in creep crack growth
| DE93-004398 | p 2328 N93-23317
Elevated temperature fracture of advanced powder metallurgy aluminum alloy 8009 p 2231 N93-23588
Grain boundary chemistry effects on environment-induced crack growth of iron-based alloys
| DE93-005039 | p 2232 N93-23980
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials
p 2214 N93-24181

FRAME PHOTOGRAPHY
Electro-optic frame photography with pulsed ruby illumination
| DE93-005819 | p 2306 N93-22327

FRAMES
Dynamic response and stability of semi-rigid frames
p 2327 N93-23199

FREDHOLM EQUATIONS
A priori error estimates of finite element solutions of parametrized nonlinear equations
| AD-A260013 | p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
| AD-A260014 | p 2471 N93-24438

FREE BOUNDARIES
Thermodynamically-consistent phase-field models for solidification
| PB93-139012 | p 2515 N93-24005
Analytical results for the electromagnetic response of a composite superconducting wire in parallel fields
| MEMO-1059 | p 2287 N93-24625

FREE CONVECTION
Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
| DE93-002164 | p 2402 N93-22337
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating
p 2247 N93-22835
Investigation of hot wire anemometers at very low velocities under microgravity p 2251 N93-22858
Thermal convection in rotating systems and the band structure of the major planets p 2164 N93-24393
A thermal type probe for low velocity measurements
p 2165 N93-24397

FREE ELECTRON LASERS
An infrared free electron laser system for the proposed Chemical Dynamics Research Laboratory at LBL based on a 500 MHz superconducting linac
| DE93-004723 | p 2307 N93-22346
Design and manufacture of optical system for use in UV lithography with the free electron laser
| DE93-005440 | p 2307 N93-22539
Chaotic dynamics in accelerator physics
| DE93-004600 | p 2515 N93-22766
Calculation of 3-D free electron laser gain: Comparison with simulation and generalization to elliptical cross section
| DE93-004768 | p 2308 N93-22920
Field profile and loading measurements on higher order modes in a two cell 500 MHz superconducting structure
| DE93-004771 | p 2308 N93-22921
High-resolution free-electron laser spectroscopy
p 2309 N93-24191

FREE ENERGY
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426

FREE FLOW
Improved two-equation k-omega turbulence models for aerodynamic flows
| NASA-TM-103975 | p 2289 N93-22809
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
| NASA-TM-106083 | p 2294 N93-23404

FREE JETS
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
| AD-A260381 | p 2484 N93-24275

FREE RADICALS
Combustion-related studies using weakly-bonded complexes
| DE93-005250 | p 2217 N93-22415
Laser spectroscopy of chemically reactive species
| DE93-006672 | p 2310 N93-24326

FRENCH SPACE PROGRAM
The SPOT program p 2360 N93-23766
The SPOT 4 satellite and beyond
p 2360 N93-23767
The SPOT system development program: SPOT AVAL
p 2360 N93-23769
French Mir missions p 2156 N93-24348

FRENKEL DEFECTS
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
| DE93-005558 | p 2230 N93-22977

FREON
First results of a Freon 12 capillary pumped loop
p 2249 N93-22846

FREQUENCIES
Advanced air traffic management
p 2107 N93-22571
Irregular media effects on radiowave signals used in navigation and positioning systems
p 2266 N93-23606

FREQUENCY ASSIGNMENT
Airborne system for detection and location of radio interference sources p 2269 N93-23622

FREQUENCY DISTRIBUTION
Climatological probability of cloud-free line-of-sight
| AD-A260139 | p 2407 N93-23706

FREQUENCY HOPPING
Frequency stability characterization of hopping sources and microprocessor-controlled frequency synthesis
| ISBN-0-315-60447-6 | p 2286 N93-24616

FREQUENCY MODULATION
A hybrid voice/data modulation for the VHF aeronautical channels p 2106 N93-22567
A leakage canceller for a single antenna radar
| ETN-93-93495 | p 2264 N93-23379
A current assessment of single site locating technology p 2267 N93-23608

FREQUENCY RANGES
Propagation characteristics of the ionospheric transmission window relating to long wave radio location issues p 2265 N93-23600

FREQUENCY RESPONSE
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
| AD-A260525 | p 2241 N93-24201

FREQUENCY SHIFT
Laser diagnostics p 2311 N93-23260

FREQUENCY SHIFT KEYING
Analysis of DGPS MSK receivers in a non-gausian noise environment
| PB93-152866 | p 2123 N93-24310
Simulation of a NC-FSK maximum likelihood receiver for fast Rayleigh fading
| ISBN-0-315-59024-6 | p 2274 N93-24627

FREQUENCY STABILITY
Digital processing for positioning with one satellite
p 2270 N93-23629
Frequency stability characterization of hopping sources and microprocessor-controlled frequency synthesis
| ISBN-0-315-60447-6 | p 2286 N93-24616

FREQUENCY STANDARDS
Traceability for radio frequency coaxial line standards
| NPL-DES-114 | p 2277 N93-22451

FREQUENCY SYNTHESIZERS
Frequency stability characterization of hopping sources and microprocessor-controlled frequency synthesis
|ISBN-0-315-60447-6| p 2286 N93-24616
FRICTION
Energy dissipator
|NASA-CASE-MSC-21555-1| p 2314 N93-23075
Crystal chemistry of ceramic/mineral systems
|AD-A260440| p 2241 N93-24193
Ion beam modification of ceramics: Mechanical properties and structure
|AD-A260504| p 2242 N93-24419
New Micro- and macroscopic models of contact and friction
|AD-A259925| p 2319 N93-24442
FRICTION FACTOR
Space Station Freedom beta gimbal control via sensitivity models
|NASA-TM-106000| p 2182 N93-22551
Friction microprobe investigation of particle layer effects on sliding friction
|DE92-018868| p 2313 N93-22925
Studies in penetration mechanics
|AD-A260436| p 2332 N93-24304
FROGS
Micromotional studies of utricular and canal afferents
|NASA-CR-192703| p 2417 N93-22800
Japanese treefrog experiment onboard the Space Station Mir p 2166 N93-24402
FRONTAL WAVES
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
FRONTS (METEOROLOGY)
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
Dynamic and thermodynamic characteristics of a pre-frontal convective rainband in northern Taiwan determined form Tamex data p 2409 N93-24162
Turbulent microfronts
|AD-A260300| p 2409 N93-24265
FUEL CELLS
Non-proprietary stack research
|DE93-007523| p 2376 N93-22535
The ANL electric vehicle battery R/D program for DOE-EHP
|DE93-005689| p 2278 N93-22688
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
|DE92-001290| p 2378 N93-22934
Design of gasifiers to optimize fuel cell systems
|DE93-000219| p 2379 N93-23049
The Westinghouse solid oxide fuel cell program: Clean, efficient energy for the future
|DE93-003487| p 2380 N93-23287
Methane conversion by solid electrolyte membranes
|PB93-127041| p 2222 N93-23994
Recent progress in zirconia-based fuel cells for power generation
|DE93-003488| p 2383 N93-24513
FUEL COMBUSTION
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
|AD-A260211| p 2129 N93-22735
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
Formation and control of combustion pollutants from gasoline-fueled spark-ignition motor vehicle engines
|PB93-141042| p 2314 N93-23275
Spray combustion experiments and numerical predictions
|NASA-TM-106069| p 2296 N93-23744
FUEL CONTROL
Summary of the effects of engine throttle response on airplane formation-flying qualities
|NASA-TM-4465| p 2131 N93-23123
FUEL INJECTION
Exhaust emissions from diesel engines
|DE93-752852| p 2384 N93-22805
Shock tunnel studies of scramjet phenomena, supplement 6
|NASA-CR-191428| p 2289 N93-22817
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
|PB93-144350| p 2313 N93-22901
FUEL PRODUCTION
Solar reforming applications study summary
|DE93-002286| p 2244 N93-22424
High octane ethers from synthesis gas-derived alcohols
|DE93-006476| p 2245 N93-24031
Biological conversion of synthesis gas
|DE93-006359| p 2245 N93-24044
FUEL SPRAYS
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
FUEL SYSTEMS
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
|PB93-144376| p 2313 N93-22902
FUEL TANK PRESSURIZATION
Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
|NASA-CR-184472| p 2259 N93-23715
FUEL TANKS
Non-chromated surface pretreatments for aluminum
|AD-A260130| p 2232 N93-23704
FUEL TESTS
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
|PB93-139087| p 2258 N93-23280
FULL SCALE TESTS
A full-scale STOVL ejector experiment
|NASA-TM-106019| p 2129 N93-22480
Soft-ground arresting system for commercial aircraft
|DOT/FAA/CT-TN93/4| p 2133 N93-22797
Dynamic response characteristics of two transport models tested in the National Transonic Facility
|NASA-CR-191420| p 2125 N93-23047
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
|PB93-139087| p 2258 N93-23280
FULLERENES
Structure and dynamics in low dimensional guest-host solids
|DE93-006498| p 2504 N93-22887
Magnetic response of certain curved graphitic geometries
|DE93-003694| p 2243 N93-24500
FUNCTION SPACE
Convergence rates of approximation by translates
|AD-A260100| p 2470 N93-24055
FUNCTIONAL ANALYSIS
Change PP plot and continuous sample quantile function
|AD-A259833| p 2472 N93-23460
Observed annual and interannual variations in tropospheric water
|PB93-123313| p 2411 N93-24588
FUNCTIONAL DESIGN SPECIFICATIONS
National Launch System: Structures and materials p 2172 N93-22083
Advanced Manned Launch System p 2172 N93-22084
Automated real-time software development p 2445 N93-22168
Space Biology Initiative. Trade Studies, volume 1
|NASA-CR-190989| p 2417 N93-23068
Space Biology Initiative. Trade Studies, volume 2
|NASA-CR-190990| p 2418 N93-23079
Analysis of DGPS MSK receivers in a non-gausian noise environment
|PB93-152866| p 2123 N93-24310
FUNCTIONS (MATHEMATICS)
Least squares surface approximation to scattered data using multiquadric functions
|AD-A259804| p 2469 N93-23640
FURNACES
Space Station Furnace Facility preliminary Project Implementation Plan (PIP). Volume 2, appendix 2
|NASA-CR-192474| p 2302 N93-22347
Space Station Furnace Facility Core. Requirements definition and conceptual design study. Volume 2: Technical report. Appendix 6: Technical summary reports
|NASA-CR-192477| p 2302 N93-22349
Development of a 100 kW class plasma torch for ash-melting plasma furnaces
|DE93-754079| p 2493 N93-22715
Space Station Furnace Facility. Volume 2: Appendix 1: Contract End Item specification (CEI), part 1
|NASA-CR-192473| p 2303 N93-23083
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study. Appendix 3: Environment analysis
|NASA-CR-192475| p 2199 N93-23224
Space Station Furnace Facility. Volume 1: Requirements definition and conceptual design study, executive summary
|NASA-CR-192471| p 2199 N93-23225
Space Station Furnace Facility. Volume 3: Program cost estimate
|NASA-CR-192478| p 2200 N93-23237
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study
|NASA-CR-192472| p 2200 N93-23238
Space Station Furnace Facility. Experiment/Facility Requirements Document (E/FRD), volume 2, appendix 5
|NASA-CR-192476| p 2200 N93-23241
FUSELAGES
Automatic computation of wing-fuselage intersection lines and fillet inserts with fixed-area constraint
|NASA-TM-4406| p 2108 N93-22487
Flight investigation of the effect of tail boom strakes on helicopter directional control
|NASA-TP-3278| p 2108 N93-22654
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
|NASA-CR-192303| p 2126 N93-23186
An overview of aeroelasticity studies for the National Aerospace Plane
|NASA-TM-107728| p 2111 N93-23422
Designing for damage tolerant composite repairs
|AD-A260094| p 2214 N93-24053
FUSION REACTORS
Plasma edge diagnostics p 2495 N93-23261
Recent D3-D results --- tokamak reactor
|DE93-004468| p 2496 N93-23690
Tritium permeation model for plasma facing components
|DE93-007044| p 2499 N93-24465
Damage analysis and fundamental studies for fusion reactor materials development
|DE93-008283| p 2499 N93-24516
FUZZY SETS
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 2
|NASA-CP-10111-VOL-2| p 2449 N93-22206
Two generalizations of Kohonen clustering p 2449 N93-22207
The 3-D image recognition based on fuzzy neural network technology p 2450 N93-22210
A proposal of fuzzy connective with learning function and its application to fuzzy retrieval system p 2450 N93-22211
Application of fuzzy set and Dempster-Shafer theory to organic geochemistry interpretation p 2450 N93-22212
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
Learning fuzzy information in a hybrid connectionist, symbolic model p 2453 N93-22354
Certain and possible rules for decision making using rough set theory extended to fuzzy sets p 2454 N93-22359
Robust algebraic image enhancement for intelligent control systems p 2454 N93-22361
Multi-layered reasoning by means of conceptual fuzzy sets p 2455 N93-22365
FUZZY SYSTEMS
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 2
|NASA-CP-10111-VOL-2| p 2449 N93-22206
A proposal of fuzzy connective with learning function and its application to fuzzy retrieval system p 2450 N93-22211
Towards autonomous fuzzy control p 2450 N93-22213
A new approach for designing self-organizing systems and application to adaptive control p 2451 N93-22215
Adaptive fuzzy system for 3-D vision p 2451 N93-22216
Fuzzy logic path planning system for collision avoidance by an autonomous rover vehicle p 2451 N93-22217
Driving a car with custom-designed fuzzy inferencing VLSI chips and boards p 2451 N93-22218
Autonomous vehicle motion control, approximate maps, and fuzzy logic p 2452 N93-22219
A fuzzy logic controller for an autonomous mobile robot p 2452 N93-22220
Synthesis of nonlinear control strategies from fuzzy logic control algorithms p 2452 N93-22222
Truth-Valued-Flow Inference (TVFI) and its applications in approximate reasoning p 2452 N93-22223
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
Autonomous rendezvous and capture system design p 2138 N93-22244
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 1
|NASA-CP-10111-VOL-1| p 2452 N93-22351
Fuzzy logic controllers: A knowledge-based system perspective p 2453 N93-22352
A fuzzy controller with nonlinear control rules is the sum of a global nonlinear controller and a local nonlinear PI-like controller p 2453 N93-22356
Fuzzy control of small servo motors p 2453 N93-22357

A hierarchical structure for representing and learning fuzzy rules p 2454 N93-22358
On structuring the rules of a fuzzy controller p 2454 N93-22360
Design issues for a reinforcement-based self-learning fuzzy controller p 2454 N93-22362
Fuzzy efficiency optimization of AC induction motors p 2454 N93-22363
Fuzzy control of an unmanned helicopter p 2455 N93-22366
Fuzzy logic mode switching in helicopters p 2455 N93-22367
Structure identification in fuzzy inference using reinforcement learning p 2456 N93-22371
Approximation paper, part 1 --- neural networks, fuzzy systems p 2456 N93-22372
Nonlinear rescaling of control values simplifies fuzzy control p 2456 N93-22373
Genetic learning in rule-based and neural systems p 2456 N93-22374
Evolving fuzzy rules in a learning classifier system p 2457 N93-22375
Adaptive process control using fuzzy logic and genetic algorithms p 2457 N93-22376
Design of fuzzy system by NNs and realization of adaptability p 2457 N93-22377
Improvement on fuzzy controller design techniques p 2457 N93-22378
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Translational controller results
|NASA-CR-192320| p 2457 N93-22396
A fuzzy logic controller system
|AD-A259723| p 2439 N93-23467

G

GADOLINIUM
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
|DE93-004432| p 2228 N93-22724
GAIA HYPOTHESIS
Chaos theory and its application in the atmosphere p 2398 N93-24082
GALACTIC CLUSTERS
The stellar populations of early-type galaxies in groups and clusters p 2549 N93-23491
X ray morphology and the mass of clusters of galaxies p 2534 N93-23887
A2163: An exceptionally hot cluster of galaxies p 2538 N93-23913
GALACTIC COSMIC RAYS
Green's function methods in heavy ion shielding
|NASA-TP-3311| p 2485 N93-22488
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
|NASA-TM-4443| p 2559 N93-23396
GALACTIC EVOLUTION
The stellar populations of early-type galaxies in groups and clusters p 2549 N93-23491
GALACTIC HALOS
The formation of enhanced, low-ionization emission in galactic halos p 2551 N93-24180
GALACTIC MASS
X ray morphology and the mass of clusters of galaxies p 2534 N93-23887
GALACTIC NUCLEI
Neutral gas in the central 2 parsecs of the galaxy
|NASA-CR-192801| p 2546 N93-23095
GALACTIC RADIATION
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
|NASA-CR-192704| p 2546 N93-22469
A bolometric radiometer for investigations in cosmology p 2303 N93-22684
The formation of enhanced, low-ionization emission in galactic halos p 2551 N93-24180
GALAXIES
ROSAT all sky survey observations of IRAS galaxies
|MPE-PREPRINT-220| p 2542 N93-22462
Mapping the Universe: Statistical measures of the galaxy distribution
|ETN-93-93456| p 2542 N93-23116
A study of properties of dark galaxy halos in a CDM universe using N-body computer simulations p 2546 N93-23132
IRAS galaxies in the ROSAT survey p 2536 N93-23897
GALERKIN METHOD
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
|DE93-005251| p 2293 N93-23300
Solution of a class of Sturm-Liouville problems using the Galerkin method with global basis functions
|DE93-005156| p 2474 N93-23692
GALILEO PROJECT
Proposed data compression schemes for the Galileo S-band contingency mission p 2431 N93-24554
GALILEO SPACECRAFT
Proposed data compression schemes for the Galileo S-band contingency mission p 2431 N93-24554
GALLIUM ARSENIDES
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
|DE93-005350| p 2505 N93-22974
Monte Carlo modeling of solid-state photoswitches
|DE93-005829| p 2280 N93-22999
Monolithic, series connected GaAs photovoltaic power converters for optoelectronic component applications
|DE93-004385| p 2380 N93-23293
Process toward a comprehensive control system for molecular beam epitaxy
|AD-A259724| p 2507 N93-23468
A review of optically controlled microwave devices and circuits
|AD-A259647| p 2282 N93-23656
New 3-5 cell design approaches for very high efficiency
|DE92-010558| p 2381 N93-23697
Study of the compatibility of PIN detector circuits and field effect transistors. Extension to high mobility and one dimensional electron gas transitors
|LAAS-92242| p 2283 N93-23863
Basic studies of 3-5 high efficiency cell components
|DE92-010563| p 2382 N93-24432
Observation of a charge limit for photocathode electron guns
|DE93-006948| p 2485 N93-24464
GaAs-based optoelectronic neurons
|NASA-CASE-NPO-18497-1-CU| p 2464 N93-24599
GALLIUM NITRIDES
Gas source molecular beam epitaxial growth of GaN
|AD-A260524| p 2512 N93-24199
Heteroepitaxial growth of gallium nitride and native defect formation in III-V nitrides p 2512 N93-24216
GAME THEORY
Relationships between bankruptcy games and minimum cost spanning tree games
|MEMO-1058| p 2469 N93-23356
GAMMA RAY ASTRONOMY
Gamma ray pulsars and Geminga
|DE93-005452| p 2559 N93-22749
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
|ESA-ISY-3| p 2533 N93-23878
Overview of first observations with the French telescope Sigma on board Granat p 2533 N93-23881
Spectral evolution during a complex gamma ray burst observed with BATSE p 2537 N93-23906
Ground-based optical support for gamma ray satellite activities p 2170 N93-23909
Very high energy gamma ray astrophysics
|DE93-007625| p 2551 N93-24453
GAMMA RAY BURSTS
An experimental search for gamma radiation associated with thunderstorm activity
|DE93-006939| p 2403 N93-22584
Gamma ray burst results from DMSP satellites
|DE93-003823| p 2559 N93-23687
Gamma ray bursts from extragalactic sources p 2535 N93-23893
Spectral evolution during a complex gamma ray burst observed with BATSE p 2537 N93-23906
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO p 2540 N93-23929
GAMMA RAY LASERS
Application of 10 GeV electron driven x ray laser in gamma ray laser research
|DE93-003775| p 2308 N93-22773
GAMMA RAY OBSERVATORY
Spectral evolution during a complex gamma ray burst observed with BATSE p 2537 N93-23906
Ground-based optical support for gamma ray satellite activities p 2170 N93-23909
GAMMA RAY SPECTROMETERS
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
|DE93-004585| p 2217 N93-22339
A sparse architecture low power gated integrator for use with germanium gamma ray spectrometers in remote geochemistry measurements
|DE93-004769| p 2303 N93-22491
GAMMA RAY TELESCOPES
Overview of first observations with the French telescope Sigma on board Granat p 2533 N93-23881
Very high energy gamma ray astrophysics
|DE93-007625| p 2551 N93-24453
GAMMA RAYS
An experimental search for gamma radiation associated with thunderstorm activity
|DE93-006939| p 2403 N93-22584
Gamma ray pulsars and Geminga
|DE93-005452| p 2559 N93-22749
Application of 10 GeV electron driven x ray laser in gamma ray laser research
|DE93-003775| p 2308 N93-22773
INTEGRAL: International Gamma Ray Astrophysics Laboratory p 2170 N93-23932
GAS ATOMIZATION
Microstructure of rapidly-solidified lithium powders
|DE93-004765| p 2229 N93-22880
GAS BEARINGS
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
GAS CHROMATOGRAPHY
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
|DE93-004585| p 2217 N93-22339
GAS DENSITY
H(-) beam neutralization measurements in a solenoidal beam transport system
|DE93-005460| p 2481 N93-22908
Experimental and theoretical studies of reverse micelles in dense gases
|PB93-141901| p 2222 N93-24143
GAS DETECTORS
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
Predictive sensor method and apparatus p 2305 N93-22202
GAS DYNAMICS
The radiation gasdynamics of planetary nebulae p 2547 N93-23133
Restoring monotonicity of slowly-moving shocks computed with Godunov-type schemes
|CRANFIELD-AERO-9207| p 2297 N93-24075
Mathematical analysis of gasdynamic wave initiation
|AD-A260382| p 2297 N93-24174
Effects of capillarity on microscopic flow in porous media
|DE93-007626| p 2299 N93-24505
Hypersonic shock/boundary-layer interaction database
|NASA-CR-177577| p 2299 N93-24526
GAS EXCHANGE
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
|DE93-006091| p 2386 N93-23301
GAS EXPANSION
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
|AD-A260381| p 2484 N93-24275
GAS EXPLOSIONS
Mathematical analysis of gasdynamic wave initiation
|AD-A260382| p 2297 N93-24174
GAS FLOW
Pyroelectric anemometers and kinetic calorimeters
|PB93-141919| p 2303 N93-23230
Application of a SAW device for measuring rate of gas flow
|PB93-124931| p 2292 N93-23253
Development of a laser-induced fluorescence system for application to rocket plumes
|AD-A259760| p 2205 N93-24025
Reaction/separation process for enhanced methane conversion
|PB93-150985| p 2246 N93-24634
GAS GIANT PLANETS
Space exploration of planetary and satellite atmospheres p 2535 N93-23890
GAS IONIZATION
Experimental, theoretical and computational study of frequency upshift of electromagnetic radiation using plasma techniques
|DE93-005092| p 2260 N93-22407
GAS LASERS
FALCON remote laser alignment system
|DE93-006448| p 2309 N93-23693
GAS METERS
Application of a SAW device for measuring rate of gas flow
|PB93-124931| p 2292 N93-23253
GAS MIXTURES
Gas separation with glass membranes
|DE93-000217| p 2219 N93-22871
Acoustic determination of dewpoints in natural gas mixtures and retrograde condensates
|PB93-142917| p 2221 N93-23274
GAS PRESSURE
SUMS experiment flight results on STS-35
|NASA-TM-107738| p 2201 N93-23407

GAS TEMPERATURE
A full-scale STOVL ejector experiment
|NASA-TM-106019| p 2129 N93-22480
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
|PB93-138915| p 2297 N93-24141
GAS TUNGSTEN ARC WELDING
GTAW penetration based on electrode tip location versus weld joint center line
|DE93-004910| p 2311 N93-22494
GAS TURBINE ENGINES
Summary of experimental heat-transfer results from the turbine hot section facility
|NASA-TP-3250| p 2290 N93-23059
Spray combustion experiments and numerical predictions
|NASA-TM-106069| p 2296 N93-23744
Variable speed gas engine-driven air compressor system
|PB93-147353| p 2319 N93-24561
GAS TURBINES
Multi-heat addition turbine engine
|NASA-CASE-LEW-15094-1| p 2129 N93-22034
Overview of Advanced Turbine Systems Program
|DE93-003193| p 2311 N93-22413
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
|AD-A260211| p 2129 N93-22735
Evaluation of diurnal thermal energy storage combined with cogeneration systems
|DE93-004798| p 2378 N93-22966
High-pressure ceramic air heater for indirectly fired gas turbine applications
|DE93-005022| p 2315 N93-23296
Heavy duty gas turbine combustion tests with simulated low BTU coal gas
|DE93-005078| p 2315 N93-23297
Problems on numerical analysis relating to gas turbines
|DE93-753796| p 2130 N93-24002
Advanced Turbine Design Program
|DE93-005077| p 2317 N93-24007
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion studies
|AD-A260253| p 2224 N93-24333
GASEOUS DIFFUSION
Simulation of the formation and transport of ozone in the atmospheric boundary layer
|ESA-TT-1243| p 2402 N93-24615
GASEOUS FUELS
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
|PB93-144376| p 2313 N93-22902
Direct conversion of light hydrocarbon gases to liquid fuel
|DE93-004916| p 2245 N93-23321
Transverse injection of liquid and gaseous fuels into subsonic/supersonic flow
|AD-A259771| p 2111 N93-23476
GASIFICATION
Solar reforming applications study summary
|DE93-002286| p 2244 N93-22424
GASOLINE
Use of new oxygenates as gasoline components
|DE93-752864| p 2244 N93-22968
Formation and control of combustion pollutants from gasoline-fueled spark-ignition motor vehicle engines
|PB93-141042| p 2314 N93-23275
A comparative analysis of alternative fuels for the INEL vehicle fleet
|DE93-007224| p 2319 N93-24256
GATES (CIRCUITS)
Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
|ETN-93-93421| p 2278 N93-22679
Field programmable gate arrays: Evaluation report for space-flight application
|NASA-CR-192796| p 2432 N93-23042
Asynchronous design for parallel processing architectures
|AD-A259776| p 2448 N93-23453
GAUGE THEORY
The QCD Teraflops Project
|DE93-006386| p 2447 N93-23026
Investigations in dynamics of gauge theories in theoretical particle physics
|DE93-007260| p 2484 N93-24448
GAW-1 AIRFOIL
Experimental study of the separating confluent boundary-layer. Volume 2: Experimental data. Appendices A-E: Data supplement
|NASA-CR-166018-SUPPL| p 2299 N93-24531
GEAR TEETH
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
|NASA-TM-106080| p 2313 N93-23019
GEARS
Advanced Rotorcraft Transmission (ART) program
|NASA-CR-191057| p 2311 N93-22466
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
|NASA-TM-105830| p 2312 N93-22826
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
|NASA-TM-106080| p 2313 N93-23019
Planetary gear train ring gear and support structure investigation p 2314 N93-23188
Pattern classifier for health monitoring of helicopter gearboxes
|NASA-TM-106099| p 2316 N93-23741
GELS
The influence of gravity on the equilibrium and the growth of tenuous structures p 2249 N93-22851
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
|AD-A258453| p 2233 N93-23982
Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
|AD-A260163| p 2240 N93-24073
High performance nanocomposite desiccation materials
|PB93-127025| p 2223 N93-24210
GENERAL AVIATION AIRCRAFT
Safety study: Alcohol and other drug involvement in fatal general aviation accidents, 1983 through 1988
|PB92-917008| p 2117 N93-23187
GENETIC ALGORITHMS
Application of genetic algorithms to tuning fuzzy control systems p 2450 N93-22209
Genetic learning in rule-based and neural systems p 2456 N93-22374
Adaptive process control using fuzzy logic and genetic algorithms p 2457 N93-22376
GENETIC ENGINEERING
Xylose fermentation to ethanol
|DE93-000067| p 2244 N93-22929
GEOCHEMISTRY
Isotope tracer studies of diffusion in silicates and of geological transport processes using actinide elements
|DE93-006902| p 2392 N93-23029
Geochemical mapping of the lunar surface using laser-induced ion mass spectrometry from landers and rovers
|DE93-003849| p 2554 N93-23292
GEOCORONAL EMISSIONS
Inner Magnetosphere Imager (IMI) instrument heritage
|NASA-CR-4498| p 2391 N93-22685
GEODESY
Use of geodetic methods in detecting terrain movements with special reference to the Global Positioning System
|ISBN-0-315-69179-4| p 2393 N93-23190
Expanded geodetic control along the primary road system by use of satellite surveying technology
|PB93-127090| p 2343 N93-23257
GEODETIC SATELLITES
Expanded geodetic control along the primary road system by use of satellite surveying technology
|PB93-127090| p 2343 N93-23257
GEODETIC SURVEYS
Expanded geodetic control along the primary road system by use of satellite surveying technology
|PB93-127090| p 2343 N93-23257
GEOGRAPHIC INFORMATION SYSTEMS
The development of a natural language interface to a geographical information system p 2530 N93-22153
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Data for map algebra p 2350 N93-23553
A Digital Landscape Model for Europe (DLME) p 2351 N93-23554
Image treatment and geographical information systems at the service of the Common Agricultural Policy p 2351 N93-23555
Vineyard cadastre monitoring using remote sensed data in an integrated GIS p 2351 N93-23556
The influence of geology and geomorphology on landslide hazards in an area in the Colombian Andes: The GIS approach p 2351 N93-23557
Estimation of runoff and erosion using GIS integrating DEM, LANDSAT data, and terrain hydrological data p 2351 N93-23558
Remote sensing landslide hazard mapping using GIS technology in Colombian Andes p 2351 N93-23559
Extraction of information from satellite imagery to a GIS for environmental monitoring of the mining areas in northeastern Estonia p 2352 N93-23560
The ERS-1 radarmaps of Germany and the Antarctic Peninsula p 2352 N93-23562
Remote sensing and land use in the region of Tuscany (Italy). A new methodology for the integration of very heterogeneous data p 2353 N93-23567
Assessment of actual land use by means of an integrated LIS p 2353 N93-23568
Application of remote sensing and GIS. Technology to natural resources management: Selecting rice fields in Vietnam p 2353 N93-23569
Integration of remote sensing and GIS data for a multiscale study of the Po river basin p 2353 N93-23570
Use of satellite data and GIS for evaluating urban environment p 2354 N93-23572
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
|PB93-142362| p 2122 N93-23652
Training courses on application of remote sensing and geographic information systems in monitoring and managing tropical rainforests and natural environment p 2367 N93-23812
Results of international meeting held in Tunis (Tunisia) p 2368 N93-23818
GEOSCOPE: An interactive global change encyclopedia p 2370 N93-23833
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries
|PB93-149409| p 2374 N93-24309
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
|PB93-146082| p 2389 N93-24334
GEOGRAPHY
Knowledge-based vision techniques for the autonomous land vehicle program
|AD-A259801| p 2459 N93-23457
Delivery of information from Earth observation satellites p 2350 N93-23549
GEOLOGICAL FAULTS
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546
Assessment of regional earthquake hazards and risk along the Wasatch Front, Utah
|PB93-115657| p 2400 N93-24214
GEOLOGICAL SURVEYS
Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
|PB93-132769| p 2394 N93-23255
US Geological Survey library classification system
|PB93-129708| p 2525 N93-23256
GEOLOGY
Isotope tracer studies of diffusion in silicates and of geological transport processes using actinide elements
|DE93-006902| p 2392 N93-23029
Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
|PB93-132769| p 2394 N93-23255
The influence of geology and geomorphology on landslide hazards in an area in the Colombian Andes: The GIS approach p 2351 N93-23557
GeoEnvironment Carpathes project p 2368 N93-23816
Assessment of regional earthquake hazards and risk along the Wasatch Front, Utah
|PB93-115657| p 2400 N93-24214
GEOMAGNETIC PULSATIONS
Long period pulsation events in electron precipitation and magnetic fields at the South Pole p 2394 N93-23387
GEOMAGNETIC TAIL
The formation, structure, and evolution of plasmoids p 2547 N93-23210
A proposed neutral line signature
|NASA-CR-192335| p 2393 N93-23211
GEOMAGNETISM
Electrostatic charging of spacecraft in geosynchronous orbit
|DRA-TM-SPACE-389| p 2181 N93-22489
Geomagnetic storm environments and effects on electrical systems
|DE92-041257| p 2262 N93-22980

World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
[PB93-138469] p 2556 N93-23334
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere
p 2394 N93-23388
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
[PB93-141703] p 2558 N93-24175
Solar-geophysical data number 580, December 1992. Part 1: (Prompt reports). Data for November, October 1992, and late data
[PB93-150332] p 2558 N93-24335

GEOMETRIC RECTIFICATION (IMAGERY)
Precision geocoding demonstrator system
p 2348 N93-23539
The ERS-1 radarmaps of Germany and the Antarctic Peninsula p 2352 N93-23562
Realistic landscape visualization based on satellite images p 2355 N93-23583
Operational geocoding of ERS-1 SAR imagery
p 2359 N93-23765
Assessment and correction of the impact of topography and atmosphere on remote sensing forest mapping of alpine regions p 2370 N93-23832
Remote sensing experiment FEM: A multisensoral dataset for radiometric and geometric analysis
p 2158 N93-24361

GEOMETRICAL OPTICS
Plasma theory p 2496 N93-23262

GEOMETRICAL THEORY OF DIFFRACTION
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[DLR-FB-91-32] p 2262 N93-22656
Scattering centre analysis of simple metallic objects
[ESA-TT-1250] p 2274 N93-24619

GEOMORPHOLOGY
The influence of geology and geomorphology on landslide hazards in an area in the Colombian Andes: The GIS approach p 2351 N93-23557
Microscale geomorphological analysis in middle Italy using airborne and satellite remote sensing techniques
p 2355 N93-23581
The promise of raster data processing in digital terrain modelling p 2356 N93-23585

GEOPHYSICS
Solar-geophysical data number 578, October 1992. Part 1: (Prompt reports). Data for September, August 1992 and late data
[PB93-134013] p 2556 N93-23227
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
[PB93-134021] p 2556 N93-23243
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
[PB93-138469] p 2556 N93-23334
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
[PB93-141711] p 2558 N93-24150
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
[PB93-141703] p 2558 N93-24175
Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
[PB93-146082] p 2389 N93-24334
Solar-geophysical data number 580, December 1992. Part 1: (Prompt reports). Data for November, October 1992, and late data
[PB93-150332] p 2558 N93-24335
Solar-geophysical data number 580, December 1992. Part 2: (Comprehensive reports). Data for June 1992, and miscellaneous
[PB93-150340] p 2558 N93-24558
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
[PB93-146090] p 2390 N93-24645

GEOPOTENTIAL
Studies of baroclinic flow
[AD-A259739] p 2414 N93-23475

GEOPOTENTIAL HEIGHT
Scenario development for the northeast United States 500 millibar height field p 2408 N93-23968

GEORGIA
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
[PB93-110955] p 2519 N93-23286

GEOSYNCHRONOUS ORBITS
Electrostatic charging of spacecraft in geosynchronous orbit
[DRA-TM-SPACE-389] p 2181 N93-22489
Investigation of cloud/water vapor motion winds from geostationary satellite
[NASA-CR-192274] p 2403 N93-22653
Orbiting space debris: Dangers, measurement and mitigation
[AD-A260533] p 2196 N93-24279

GEOTHERMAL ENERGY CONVERSION
Survey of the Hokkaido development project
[DE93-761804] p 2382 N93-24013

GEOTHERMAL ENERGY UTILIZATION
Survey of the Hokkaido development project
[DE93-761804] p 2382 N93-24013

GEOTHERMAL RESOURCES
Survey of the Hokkaido development project
[DE93-761804] p 2382 N93-24013

GERMAN SPACE PROGRAM
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798
German contributions to the International Space Year ISY 1992 p 2366 N93-23806
Mir '92 project p 2157 N93-24350

GERMANIUM
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
A sparse architecture low power gated integrator for use with germanium gamma ray spectrometers in remote geochemistry measurements
[DE93-004769] p 2303 N93-22491
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
Solute binding at void surfaces in silicon and germanium
[DE93-004504] p 2233 N93-24048

GERMANIUM ALLOYS
Investigation of the kinetics of surface-limited thin film growth of SiGe alloys
[DE93-005419] p 2502 N93-22538
Time-resolved reflectivity study of solid-phase epitaxial regrowth in relaxed and strained Si(1-x)Ge(x)
[DE93-005154] p 2506 N93-23312
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
[DE93-004476] p 2508 N93-23691
High temperature rare earth and Si-Ge thermoelectric materials
[DE93-006913] p 2513 N93-24462

GERMANIUM ISOTOPES
Growth and characterization of isotopically enriched Ge-70 and Ge-74 single crystals
[DE93-004697] p 2510 N93-24050

GERMANY
Satellite-borne Earth observations in the framework of German global change research p 2357 N93-23755
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
[DLR-FB-92-10] p 2374 N93-24140

GETTERS
Characterization of SAES St198 zirconium-iron-tin alloy
[DE93-005697] p 2230 N93-23036
Variable pressure insulating jackets for high-temperature batteries
[DE93-006404] p 2283 N93-24027

GIACOBINI-ZINNER COMET
Analysis of IUE observations of hydrogen in comets
[NASA-CR-192693] p 2548 N93-23231

GIMBALS
Apparatus for simulating an exoatmospheric structure
[NASA-CASE-MSC-21975-1] p 2169 N93-22016
Space Station Freedom beta gimbal control via sensitivity models
[NASA-TM-106000] p 2182 N93-22551
Quick acting gimbal joint
[NASA-CASE-MSC-21918-1] p 2314 N93-23076

GLACIOLOGY
The climate induced variation of the continental biosphere: A model simulation of the last glacial maximum
[AERONAUTICA-ACTA-A-366] p 2389 N93-24089
Application of ocean models for the interpretation of AGCM experiments on the climate of the last glacial maximum
[MPIM-80] p 2416 N93-24581

GLASS
Optical properties of slags: Data for refractive indices and absorption coefficients
[NPL-DMM(A)-73] p 2486 N93-22453
Witness plate shock velocity study
[DE93-005742] p 2474 N93-22760
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
[AD-A260525] p 2241 N93-24201
Plasma treatment of glass surfaces
[AD-D015619] p 2241 N93-24229
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
[AD-D015623] p 2241 N93-24257

GLASS FIBER REINFORCED PLASTICS
Interlaminar mode-2 fracture toughness of a glass-fiber epoxy laminate
[VTT-PUBS-105] p 2208 N93-22815
Development of fire protective coatings for GRP composites using plasma deposition technology, phase 2
[DREA-CR-91-453] p 2239 N93-23121
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials
p 2214 N93-24181

GLASS FIBERS
Gas separation with glass membranes
[DE93-000217] p 2219 N93-22871
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723

GLAZES
Heat transfer on accreting ice surfaces
[AIAA PAPER 90-0200] p 2106 N93-22565

GLIDE PATHS
Scene correlation for INS aiding in flight-test systems: Runway-referenced flight-tests with on-board sensors only p 2121 N93-22792

GLOBAL POSITIONING SYSTEM
The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
Applicability of relative GPS to automated rendezvous between the space shuttle and space station
p 2138 N93-22241
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation
p 2138 N93-22242
DGPS for space and return p 2146 N93-22286
An integrated autonomous rendezvous and docking system architecture using Centaur modern avionics
p 2147 N93-22293
Office of Space Flight standard spaceborne Global Positioning System user equipment project
p 2148 N93-22301
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking
p 2151 N93-22316
GPS multipath errors in the precision landing environment p 2106 N93-22569
Optimization of the integration of inertia and GPS
p 2120 N93-22787
Retrofitting of GPS into existing navigation suites
p 2120 N93-22788
Flight evaluation of differential GPS aided inertial navigation systems p 2120 N93-22790
Toward achieving global sole means radionavigation systems p 2121 N93-22794
Use of geodetic methods in detecting terrain movements with special reference to the Global Positioning System
[ISBN-0-315-69179-4] p 2393 N93-23190
Expanded geodetic control along the primary road system by use of satellite surveying technology
[PB93-127090] p 2343 N93-23257
Maritime satellite communication and navigation
p 2275 N93-23508
The role of GPS in a future radionavigation mix: Trends in the 1992 US Federal Radionavigation Plan
p 2124 N93-23509
Financial alternatives for global satellite navigation
p 2124 N93-23519
SkyFix: A better position through the use of INMARSAT and GPS p 2124 N93-23522
Precise flight navigation by integration of global positioning system and inertial measurement units
p 2124 N93-23523
A permanent near-online High Precision Positioning Service (HPPS) with GPS p 2124 N93-23524
Satellite navigation in agriculture
p 2124 N93-23528
Towards global satellite navigation
p 2124 N93-23529
Fleet management based on satellite positioning and communication p 2276 N93-23531

An integrated car navigation system using a single processor for GPS signal processing, positioning, map display, and reporting p 2124 N93-23533
NAVSAT: An application of GPS and GLONASS for the civil user community p 2124 N93-23534
On-line health monitoring: An integrity improvement for the civil use of GPS and GLONASS p 2125 N93-23535
Precise GPS-based tracking of remote sensing satellites p 2122 N93-23587
Test results of the advanced translator processing system p 2269 N93-23620
Testing of a GPS receiver GLOBUS AN 2000 of SEL: A study of selective availability
| DLR-MITT-92-07 | p 2123 N93-24138
Analysis of DGPS MSK receivers in a non-gausian noise environment
| PB93-152866 | p 2123 N93-24310

GLOBAL WARMING
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
| DE93-002347 | p 2384 N93-22972
On the cold start problem in transient simulations with coupled atmosphere-ocean models
| MPIM-83 | p 2397 N93-23859
A microclimate model to investigate greenhouse warming of a sub-Alpine ecosystem
| DE93-005290 | p 2388 N93-24011
General circulation model output for forest climate change research and applications
| PB93-124626 | p 2388 N93-24015

GLOVES
Evaluation of hole sizes in structures requiring EVA services as a means to prevent gloved-hand finger entrapment
| NASA-TM-104767 | p 2426 N93-23129
An innovative method for hand protection from extreme cold using heat pipe
| AD-A259720 | p 2428 N93-24128

GLUTAMATES
Study of SCN neurochemistry using in vivo microdialysis in the conscious brain: Correlation with circadian activity rhythms
| AD-A259803 | p 2421 N93-23459

GOES SATELLITES
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150

GOGGLES
Optical analysis of lenslet arrays
| AD-A260126 | p 2488 N93-23702

GOLD
Reconstruction of twist grain boundaries in gold
| DE93-004861 | p 2226 N93-22049
A vibrational analysis of Au implanted Al2O3 single crystals: Ion and thermal annealing effects
| DE93-006216 | p 2501 N93-22508
Peculiarities of structures and meltinglike transition in gold clusters
| DE93-004810 | p 2228 N93-22741
Sequential deposition of copper on solid gold (111): A statistical model
| AD-A260269 | p 2234 N93-24233
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
| AD-A260309 | p 2234 N93-24237

GONIOMETERS
Bearing determination and bearing quality indication from a goniometric HF DF system p 2268 N93-23617
Location of emissions by evasion of frequency and gusts by sequential analysis sensor in fast scanning p 2270 N93-23625

GOVERNMENT/INDUSTRY RELATIONS
Post Cold War assessment of US space policy: A task group report
| PB93-139962 | p 2532 N93-22900
Science, technology, and the states in America's third century
| ISBN-1-881054-03-9 | p 2519 N93-23074
Outreach and public service p 2517 N93-23147
State and local governments p 2517 N93-23149
Communications p 2517 N93-23153
ANL's electric vehicle battery activities for USABC
| DE93-005691 | p 2319 N93-24446

GOVERNMENTS
State and local governments p 2517 N93-23149
Total quality management in the Federal Government. Implementation of TQM in federal agencies receiving the Federal Quality Institute Quality Improvement Prototype Award, 1990-1992
| PB93-154573 | p 2521 N93-24306
In the national interest: The Federal Government and research-intensive universities
| PB93-140135 | p 2518 N93-24583

GRADIENTS
Extending compile-time reverse mode and exploiting partial separability in ADIFOR
| DE93-004668 | p 2467 N93-22776
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
| PB93-136497 | p 2396 N93-23650

GRAIN BOUNDARIES
Reconstruction of twist grain boundaries in gold
| DE93-004861 | p 2226 N93-22049
Flux pinning structures in melt-processed YBa2Cu3O(7-x)
| DE93-005151 | p 2501 N93-22497
Characterization of doped NiAl by atom probe field ion microscopy
| DE93-005932 | p 2228 N93-22692
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
| DE93-004854 | p 2503 N93-22745
Computer simulation of the anomalous elastic behavior of thin films and superlattices
| DE93-004154 | p 2504 N93-22939
Fabrication and properties of Si3N4 with rare earth apatite grain boundary phases
| DE93-005752 | p 2505 N93-23037
Grain boundary chemistry effects on environment-induced crack growth of iron-based alloys
| DE93-005039 | p 2232 N93-23980
Silicon nitride containing rare earth silicate intergranular phases
| DE93-006624 | p 2509 N93-24034
Studies of microstructure/critical current density relationships for grain boundaries in YBa2Cu3O(7-delta) bicrystals
| DE93-003000 | p 2513 N93-24512

GRAIN SIZE
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
| DE93-004716 | p 2330 N93-24051

GRANTS
The role of university research in aviation safety and competitiveness: Testimony to the US Congress
| NIAR-92-3 | p 2116 N93-22379
First National Space Grant Conference report
| NASA-EP-275 | p 2516 N93-23140
Evaluation of NASA space grant consortia programs p 2516 N93-23141
Publicity and public relations p 2516 N93-23145
Underrepresented groups p 2517 N93-23146
Outreach and public service p 2517 N93-23147
State and local governments p 2517 N93-23149
Focusing educational initiatives p 2517 N93-23150
University-industry interaction p 2517 N93-23151
Organization and management of space grant programs p 2517 N93-23152
Communications p 2517 N93-23153
Use of fellowships p 2517 N93-23154
Pitfalls p 2517 N93-23155

GRANULAR MATERIALS
Microstatic study of the behavior of granular media
| ECL-90-31 | p 2236 N93-22460
Continuous production of granular or powder Ti, Zr, and Hf or their alloy products
| PB93-135051 | p 2227 N93-22592

GRAPH THEORY
Predicting structure in nonsymmetric sparse matrix factorizations
| DE93-004119 | p 2468 N93-22938

GRAPHITE
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
| DE93-006742 | p 2208 N93-22578
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
| DE93-005533 | p 2237 N93-22909
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
| DE93-007670 | p 2229 N93-22912
Magnetic response of certain curved graphitic geometries
| DE93-003694 | p 2243 N93-24500

GRAPHITE-EPOXY COMPOSITES
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
Ultrasonic inspection of filament wound graphite epoxy cylinders
| AD-A260361 | p 2321 N93-24173

Modeling the thermal properties and processing of composite materials p 2214 N93-24206
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217
Large-amplitude forced response of dynamic systems
| AD-A260394 | p 2332 N93-24426

GRAPHS (CHARTS)
Advanced display object selection methods for enhancing user-computer productivity p 2444 N93-22151
An ontology of knowledge graphs
| MEMO-1049 | p 2441 N93-24063
Automated program recognition by graph parsing
| AD-A259609 | p 2441 N93-24125

GRATINGS
Design and fabrication of Dammann gratings to illuminate a time-integrating correlator
| CTN-93-60700 | p 2305 N93-24650

GRATINGS (SPECTRA)
Laser diagnostics p 2311 N93-23260
Millimeter-wave applications of semiconductor dielectric waveguides with plasma layers (surface or buried) generated from semiconductor lasers
| AD-A260484 | p 2510 N93-24134
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
| AD-D015623 | p 2241 N93-24257
Atom wave interferometer
| AD-A260082 | p 2484 N93-24410

GRAVIMETRY
Commercialization of atom interferometers for borehole gravity gradiometry
| DE93-006889 | p 2398 N93-24018

GRAVITATION
Use of non-spherical gravity harmonics for relative motion GN/C (category 2) p 2141 N93-22262
Hamiltonian structure of the Vlasov-Einstein system and the problem of stability for spherical relativistic star clusters
| DE93-006180 | p 2546 N93-22507
Electromagnetism from counting
| DE93-006930 | p 2261 N93-22582
Anti-gravity: The key to 21st century physics
| DE93-006929 | p 2475 N93-24463

GRAVITATIONAL EFFECTS
Use of non-spherical gravity harmonics for relative motion GN/C (category 2) p 2141 N93-22262
Gravitational Biology Facility on Space Station: Meeting the needs of space biology p 2186 N93-22625
Materials science research in microgravity p 2191 N93-22645
Action of an acceleration field on premixed methane/air flames p 2226 N93-22838
Influence of gravity on polyedric flames p 2226 N93-22840
Heat and mass transfer in polyphase flows p 2248 N93-22844
Boiling under microgravity conditions p 2249 N93-22847
The influence of gravity on the equilibrium and the growth of tenuous structures p 2249 N93-22851
Polyreactions in microgravity environment p 2251 N93-22859
Thermocapillary instabilities in the presence of a homogeneous magnetic field p 2252 N93-22865
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
The effect of microgravity on tremor (microvibration) p 2160 N93-24368
Altered fluid shift dynamics with 6 days in microgravity p 2160 N93-24369
Fluid science users requirements p 2163 N93-24385

GRAVITATIONAL FIELDS
Fundamental symmetry tests with antihydrogen
| DE93-005467 | p 2479 N93-22541

GRAVITATIONAL LENSES
Gravitational lenses p 2534 N93-23883

GRAVITATIONAL PHYSIOLOGY
Gravitational Biology Facility on Space Station: Meeting the needs of space biology p 2186 N93-22625
Research opportunities with the Centrifuge Facility p 2187 N93-22627
Micromotional studies of utricular and canal afferents
| NASA-CR-192703 | p 2417 N93-22800
Neural processing of gravity information
| NASA-CR-192766 | p 2419 N93-23233
Physiological experiments within the project AustroMir p 2157 N93-24354
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362
Development and implementation of the MotoMir experiment on the Mir Space Station p 2159 N93-24363
Monitoring of cardiovascular parameters during the AustroMir space flight p 2160 N93-24367

The effect of microgravity on tremor (microvibration) p 2160 N93-24368
Altered fluid shift dynamics with 6 days in microgravity p 2160 N93-24369
Influence of microgravity on immune system and genetic information p 2160 N93-24370

GRAVITATIONAL WAVES
HST imaging of the binary pulsar PSR1913 + 16 p 2536 N93-23902
On colliding plane gravitational waves coupled with fluid motions
| MATHS-REPT-A-161 | p 2398 N93-24060
On the propagation of a gravitational wave in a stiff perfect fluid
| MATHS-REPT-A-178 | p 2398 N93-24079
The collision of gravitational waves in a stiff perfect fluid
| MATHS-REPT-A-179 | p 2398 N93-24080

GRAVITROPISM
Gravity and root morphogenesis p 2166 N93-24403

GRAVITY GRADIOMETERS
Commercialization of atom interferometers for borehole gravity gradiometry
| DE93-006889 | p 2398 N93-24018

GRAVITY WAVES
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
| AD-A259659 | p 2396 N93-23657
Visualization of gravity wave data by Iris Explorer (a computer program)
| FFI-92/7022 | p 2399 N93-24090

GRAY SCALE
PLTPWR: A versatile tool for greyscale and power spectral display
| DREA-TC-92-306 | p 2435 N93-22473
A survey of quality measures for gray-scale image compression p 2431 N93-24550

GREAT CIRCLES
Large bearing errors observed at a high latitude DF site p 2268 N93-23615

GREAT LAKES (NORTH AMERICA)
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
| PB93-129864 | p 2392 N93-22894

GREEN'S FUNCTIONS
Green's function methods in heavy ion shielding
| NASA-TP-3311 | p 2485 N93-22488

GREENHOUSE EFFECT
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models
| DE93-005114 | p 2402 N93-22408
The Finnish research programme on climate change
| DE93-752870 | p 2383 N93-22597
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
| DE93-002947 | p 2384 N93-22972
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
| DE93-000690 | p 2405 N93-23305
A microclimate model to investigate greenhouse warming of a sub-Alpine ecosystem
| DE93-005290 | p 2388 N93-24011

GREENLAND
Investigations into the dynamics of sea ice in the East Greenland Sea region in May 1988, using NOAA-AVHRR data p 2341 N93-22446

GRID GENERATION (MATHEMATICS)
Adaptive meshing in solids
| DE93-003238 | p 2287 N93-22331
Copper Mountain conference on iterative methods, volume 2
| DE93-004994 | p 2466 N93-22405
Mapping methods for computationally efficient and accurate structural reliability
| NASA-TM-105892 | p 2330 N93-23745
On essentially non-oscillatory schemes on unstructured meshes: Analysis and implementation
| NASA-CR-191415 | p 2471 N93-24492

GROUND BASED CONTROL
Intelligent systems technology infrastructure for integrated systems p 2145 N93-22285
Proposed ground-based control of accelerometer on Space Station Freedom
| NASA-TM-105960 | p 2201 N93-23738

GROUND CREWS
Columbus program: Ground staff training simulation
| ETN-93-93694 | p 2194 N93-23415
Training concept for crew, end user, and ground centre personnel in the Columbus utilisation programme p 2162 N93-24382

GROUND HANDLING
Bogie-gripping transfer device
| CA-PATENT-APPL-SN-024586 | p 2135 N93-24643
Wheeled transfer device for moving an aircraft
| CA-PATENT-APPL-SN-2-024584 | p 2135 N93-24644

GROUND OPERATIONAL SUPPORT SYSTEM
GEOTAIL Spacecraft historical data report
| NASA-TM-108710 | p 2194 N93-23168
Advancing automation and robotics technology for the Space Station Freedom and for the U.S. Economy
| NASA-TM-103895 | p 2430 N93-23240
The role of the APM centre to support Columbus precursor flights p 2156 N93-24344

GROUND STATE
Electron-phonon driven spin frustration in multi-band Hubbard models: MX chains and oxide superconductors
| DE93-003697 | p 2503 N93-22754
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
| AD-A260181 | p 2308 N93-23315

GROUND STATIONS
Transportation systems analyses, volume 2
| NASA-CR-192486 | p 2177 N93-22386
The Goldstone solar system radar: A science instrument for planetary research
| NASA-CR-192793 | p 2261 N93-22478
Activities report of the Norwegian Space Center
| ETN-93-93540 | p 2570 N93-23107
Common Carrier Earth Station Application
| PB93-111722 | p 2263 N93-23268
Meteosat operational programme current missions and services p 2357 N93-23752
SPOT 4 image ground segment p 2360 N93-23768
The role of the APM centre to support Columbus precursor flights p 2156 N93-24344

GROUND SUPPORT EQUIPMENT
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193
The role of the APM centre to support Columbus precursor flights p 2156 N93-24344
Bogie-gripping transfer device
| CA-PATENT-APPL-SN-024586 | p 2135 N93-24643
Wheeled transfer device for moving an aircraft
| CA-PATENT-APPL-SN-2-024584 | p 2135 N93-24644

GROUND SUPPORT SYSTEMS
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193
The first European remote sensing satellite, ERS-1. A summary of useful load, mission, ground segment, standard products and user service p 2339 N93-22437
Columbus program: Ground staff training simulation
| ETN-93-93694 | p 2194 N93-23415
SPOT 4 image ground segment p 2360 N93-23768
SAX overview p 2540 N93-23927
The role of the APM centre to support Columbus precursor flights p 2156 N93-24344
Telescience opportunities in the precursor flights p 2161 N93-24376
Information handling as task layer of Columbus user support p 2163 N93-24383

GROUND TESTS
Autonomous docking ground demonstration (category 3) p 2145 N93-22282
Test facilities for evaluating nuclear thermal propulsion systems
| DE93-002468 | p 2202 N93-22411
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
| NASA-TM-107729 | p 2327 N93-23235
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
| NASA-TM-106084 | p 2195 N93-23742

GROUND TRUTH
The program of oceanological experiments within the Priroda project p 2361 N93-23773
Development of data sets for the ISY sea surface temperature: MOS-1/MOS-1b data sets p 2371 N93-23838
ISY sea surface temperature validation test program in Mutsu Bay (Japan) p 2371 N93-23839
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
| AD-A260288 | p 2411 N93-24568

GROUND WATER
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24006
Development of membrane film fiber optic based sensors for the remote monitoring of the quality of surface and groundwater
| PB93-150001 | p 2375 N93-24638

GROUND-AIR-GROUND COMMUNICATION
Airline applications in air-/ground communication using advanced technologies p 2275 N93-23514
The future role of satellite communications in an improved air traffic management p 2275 N93-23518

GROUP DYNAMICS
Advanced team decision making: A developmental method
| AD-A259512 | p 2520 N93-23466
The study of crew coordination and performance in hierarchical team decision making
| AD-A259514 | p 2520 N93-23698

GROUP THEORY
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
| DE93-006504 | p 2480 N93-22712
The canonical forms of a lattice rule
| DE93-005686 | p 2466 N93-22759
The study of crew coordination and performance in hierarchical team decision making
| AD-A259514 | p 2520 N93-23698

GROWTH
Gravity and root morphogenesis p 2166 N93-24403
Development of Arabidopsis thaliana grown under microgravity conditions p 2166 N93-24404

GUIDANCE (MOTION)
Robust Neighboring Optimal Guidance for the Advanced Launch System --- Author
| NASA-CR-192087 | p 2171 N93-22009
Advances in Guidance and Control of Precision Guided Weapons
| AGARD-CP-524 | p 2254 N93-22018
Linear payout systems for dispensing fiber-optic data links from precision-guided munitions or high-performance aircraft/missles p 2255 N93-22026

GUIDANCE SENSORS
Video guidance sensor for autonomous capture p 2142 N93-22267

GULF OF MEXICO
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
| PB93-123909 | p 2412 N93-22067
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
| PB93-108090 | p 2404 N93-23090
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
| PB93-152031 | p 2416 N93-24605

GUN LAUNCHERS
Concept definition study for an extremely large aerophysics range facility
| NASA-CR-4491 | p 2133 N93-22987
A multiple armature railgun launcher
| AD-A259768 | p 2171 N93-23486

GUN PROPELLANTS
Reacting liquid monopropellant sprays: Experiments with high velocity full cone sprays in 33 MPa, 500 C nitrogen
| AD-A259799 | p 2245 N93-23456

GUN TURRETS
A fuzzy logic controller system
| AD-A259723 | p 2439 N93-23467

GUNN EFFECT
A review of optically controlled microwave devices and circuits
| AD-A259647 | p 2282 N93-23656

GUSTS
Air traffic operational evaluation plan for the prototype Airport Surveillance Radar Wind Shear Processor (ASR-WSP) at Orlando International Airport
| DOT/FAA/CT-TN92/45 | p 2404 N93-23064
Low-speed wind tunnel study of the direct lift and direct side-force characteristics of a joined-wing airplane
| DE93-767971 | p 2115 N93-24508

GYROSCOPES
Initial trials results for image stabilisation using a rugged low noise gyroscope p 2255 N93-22021
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking p 2151 N93-22316
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784
Visual autonomous automatic landing of airplanes p 2121 N93-22791
Broadband erbium-doped fiber sources for the fiber-optic gyroscope p 2304 N93-23723

H

H ALPHA LINE
The x ray transient GS2023 + 338: The 0(sup d).24 and 6(sup d).5 modulations p 2536 N93-23901

H I REGIONS
Neutral gas in the central 2 parsecs of the galaxy
| NASA-CR-192801 | p 2546 N93-23095
The Boston University-Arecibo galactic HI survey: The galaxy at 4 arcminute resolution p 2543 N93-23720

HABITATS
Research opportunities with the Centrifuge Facility
p 2187 N93-22627
Chesapeake Bay Program: Wetlands workgroup
[PB93-136893] p 2385 N93-23266
A computer simulation of a hyperbaric chamber environment
[AD-A260137] p 2134 N93-23705
HALF PLANES
Role of acoustics in flame/vortex interactions
[NASA-CR-191429] p 2299 N93-24494
HALIDES
A structural study of charge-density-wave perturbations in mixed-halide MX solids
[DE93-005449] p 2503 N93-22747
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
[DE93-005450] p 2503 N93-22748
HALL EFFECT
Physical properties of ultrathin films of high-temperature superconductors p 2506 N93-23197
NIST mesurement service for DC standard resistors
[PB93-139079] p 2280 N93-23205
HALLEY'S COMET
Analysis of IUE observations of hydrogen in comets
[NASA-CR-192693] p 2548 N93-23231
Evidence for two types of sources creating Halley's coma p 2540 N93-23926
HALOGENS
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
[DE93-005883] p 2235 N93-22422
HALOS
A study of properties of dark galaxy halos in a CDM universe using N-body computer simulations
p 2546 N93-23132
X raying the interstellar dust p 2540 N93-23925
HAMILTONIAN FUNCTIONS
Hamiltonian structure of the Vlasov-Einstein system and the problem of stability for spherical relativistic star clusters
[DE93-006180] p 2546 N93-22507
Review of quantum computation
[DE93-003735] p 2474 N93-22919
A mechanism for capture into resonance
[PB93-145761] p 2469 N93-23648
Quantum mechanics of electrons in crystals with graded composition
[AD-A260294] p 2512 N93-24262
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
[AD-A260001] p 2243 N93-24443
HANDBOOKS
Specifications, tolerances, and other technical requirements for weighing and measuring devices as adopted by the 77th National Conference on Weights and Measures, 1992
[PB93-130474] p 2257 N93-22895
Space Biology Initiative. Trade Studies, volume 1
[NASA-CR-190989] p 2417 N93-23068
Space Biology Initiative. Trade Studies, volume 2
[NASA-CR-190990] p 2418 N93-23079
1993 Earth Observing System reference handbook
[NASA-NP-202] p 2356 N93-23737
Writer's guide for technical procedures
[DE93-007746] p 2529 N93-24573
HANDLING EQUIPMENT
Bogie-gripping transfer device
[CA-PATENT-APPL-SN-024586] p 2135 N93-24643
Wheeled transfer device for moving an aircraft
[CA-PATENT-APPL-SN-2-024584] p 2135 N93-24644
HARDNESS
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
[DE93-006679] p 2278 N93-22577
Synthesis, processing, and properties of Ti5Si3
[DE93-004465] p 2229 N93-22820
HARDWARE
Space biology initiative program definition review. Trade study 5: Modification of existing hardware (COTS) versus new hardware build cost analysis p 2417 N93-23069
Space biology initiative program definition review. Trade study 4: Design modularity and commonality
p 2418 N93-23071
Space biology initiative program definition review. Trade study 3: Hardware miniaturization versus cost
p 2418 N93-23080
Space biology initiative program definition review. Trade study 6: Space Station Freedom/spacelab modules compatibility
[EEI-89-236] p 2418 N93-23081
Technical management and test procedures for AustroMir-1991 p 2158 N93-24357
HARDWARE UTILIZATION LISTS
Space biology initiative program definition review. Trade study 3: Hardware miniaturization versus cost
p 2418 N93-23080
Space biology initiative program definition review. Trade study 2: Prototype utilization in the development of space biology hardware p 2418 N93-23082
HARMONIC ANALYSIS
The acoustical impedance at the junction of non-coaxial cylindrical ducts
[MATHS-REPT-A-157] p 2477 N93-24123
HARMONIC EXCITATION
Response of a non-viscous liquid column with anchored liquid surface to axial excitation
[LRT-WE-9-FB-4-1991] p 2288 N93-22677
The effect of UV light on Ir absorption in chemically vapor deposited a-SiN(x):H films
[DE93-004502] p 2486 N93-22941
HARMONIC GENERATIONS
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Nonlinear analysis of relativistic harmonic generation by intense lasers in plasmas
[AD-A260092] p 2497 N93-24052
HARMONIC OSCILLATION
Oscillations of finite liquid columns
p 2250 N93-22855
HARMONICS
Use of non-spherical gravity harmonics for relative motion GN/C (category 2) p 2141 N93-22262
A high performance spectral code for nonlinear MHD stability
[DE93-004541] p 2494 N93-22984
Understanding and modeling the behavior of a harmonic drive gear transmission
[AD-A259610] p 2317 N93-24152
Suppression of power line harmonic interference in HF surface-wave radar
[AD-A259917] p 2273 N93-24563
HASTELLOY (TRADEMARK)
Improved techniques for thermomechanical testing in support of deformation modeling
[NASA-TM-105944] p 2323 N93-22555
HAWAII
Small business profiles, 1992. Region 9: Arizona, California, Hawaii, and Nevada
[PB93-111003] p 2521 N93-24160
HAZARDS
Often overlooked electrical hazards common in many lasers
[DE93-003856] p 2307 N93-22430
Environmental projects. Volume 14: Removal of contaminated soil and debris
[NASA-CR-192803] p 2384 N93-22803
Sneak analysis applied to process systems
[DE93-752866] p 2257 N93-22970
The annual probability of an aircraft crash on the US Department of Energy reservation in Oak Ridge, Tennessee
[DE93-005171] p 2118 N93-23325
Orbiting space debris: Dangers, measurement and mitigation
[AD-A260533] p 2196 N93-24279
HEAD MOVEMENT
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362
HEAD-UP DISPLAYS
Attention factors associated with head-up display and helmet-mounted display systems
[AD-A260204] p 2427 N93-24001
Attitude awareness enhancements for the F-16 head-up display
[AD-A260280] p 2428 N93-24168
HEALTH
Crew health p 2187 N93-22630
Tobacco and health of the pilot
[ETN-93-93693] p 2421 N93-23414
Sustaining health and performance in the cold: A pocket guide to environmental medicine aspects of cold-weather operations
[AD-A259625] p 2422 N93-24021
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590
HEART RATE
Monitoring of cardiovascular parameters during the AustroMir space flight p 2160 N93-24367
HEAT BALANCE
The structure and energetics of Amazon squall lines
p 2404 N93-23166
HEAT ENGINES
A round-robin for particle electrophoresis standardization
[DE93-003018] p 2217 N93-22400
Time-reversible Maxwell's demon
[AD-A260170] p 2460 N93-23709
Mechanical Working Group meeting minutes --- power generation and delivery systems
[DE93-004884] p 2571 N93-24435
HEAT EXCHANGERS
COP improvement of refrigerator/freezers, air-conditioners, and heat pumps using nonazeotropic refrigerant mixtures p 2259 N93-22166
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
[DE93-005616] p 2257 N93-22416
High-pressure ceramic air heater for indirectly fired gas turbine applications
[DE93-005022] p 2315 N93-23296
High performance microchannel heat exchanger for cooling high heat load x ray optical elements
[DE93-004245] p 2296 N93-23688
Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
[NASA-CR-184472] p 2259 N93-23715
Determination and characteristics of the transition to two-phase slug flow in small channels
[DE93-004250] p 2299 N93-24434
HEAT FLUX
Boiling under microgravity conditions
p 2249 N93-22847
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
[DE93-000690] p 2405 N93-23305
HEAT MEASUREMENT
Gel time measurements on carbon fiber/epoxy resin prepregs
[ICAS-90-4-10-4] p 2210 N93-23400
HEAT OF COMBUSTION
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
[AD-A260211] p 2129 N93-22735
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels data sets
[AD-A260220] p 2220 N93-22917
Modeling the heat release rate of aircraft cabin panels
[DOT/FAA/CT-92/3] p 2118 N93-23222
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
[AD-A260249] p 2246 N93-24332
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion studies
[AD-A260253] p 2224 N93-24333
HEAT PIPES
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
[NASA-CR-191065] p 2203 N93-22662
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
[DE93-004432] p 2228 N93-22724
Researches and developments on typical thermal technologies for space applications
p 2248 N93-22845
Heat pipe fatigue test specimen: Metallurgical evaluation
[NASA-CR-189120] p 2381 N93-23360
An innovative method for hand protection from extreme cold using heat pipe
[AD-A259720] p 2428 N93-24128
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
[DLR-FB-92-09] p 2382 N93-24139
Design manual for two-phase components of spacecraft thermal management systems
[AD-A260027] p 2196 N93-24439
HEAT PUMPS
COP improvement of refrigerator/freezers, air-conditioners, and heat pumps using nonazeotropic refrigerant mixtures p 2259 N93-22166
Heat pump technology: Responding to new opportunities
[DE93-005939] p 2379 N93-22978
An environmental rating for heat pump equipment
[DE93-004526] p 2379 N93-22983
HEAT RADIATORS
Automating an orbiter approach to Space Station Freedom to minimize plume impingement
p 2149 N93-22305
Liquid droplet radiator: Design concepts and development logic p 2247 N93-22834
HEAT RESISTANT ALLOYS
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
[NASA-TM-105978] p 2130 N93-23013
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
[NASA-TP-3257] p 2297 N93-24096

HEAT SHIELDING
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
|NASA-CR-192454| p 2202 N93-22012
Rigid fibrous ceramics for entry systems p 2177 N93-22117
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
HEAT SOURCES
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows
|DE93-004122| p 2287 N93-22071
An innovative method for hand protection from extreme cold using heat pipe
|AD-A259720| p 2428 N93-24128
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
|AD-A260556| p 2298 N93-24282
HEAT STORAGE
Method of measuring nighttime U-values using the Mobile Window Thermal Test (MoWiTT) Facility
|DE93-004778| p 2404 N93-22964
Evaluation of diurnal thermal energy storage combined with cogeneration systems
|DE93-004798| p 2378 N93-22966
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
|DLR-FB-92-09| p 2382 N93-24139
HEAT TOLERANCE
AFTERRISE: Deep body temperature following exercise
|AD-A259887| p 2421 N93-23984
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
|AD-A259909| p 2427 N93-23995
HEAT TRANSFER
Multi-heat addition turbine engine
|NASA-CASE-LEW-15094-1| p 2129 N93-22034
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows
|DE93-004122| p 2287 N93-22071
A distributed visualization environment for engineering sciences
|DE93-006961| p 2257 N93-22600
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
|NASA-CR-191065| p 2203 N93-22662
COMMIX-1AR/P: A three-dimensional transient single-phase computer program for thermal hydraulic analysis of single and multicomponent systems
|DE93-006044| p 2289 N93-22694
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
|AD-A260211| p 2129 N93-22735
Analysis of upward flame spread
|DE93-752850| p 2257 N93-22770
Fluids in Space
|ESA-SP-353| p 2246 N93-22830
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
Engineering aspects of two-phase flow systems for heat transport p 2247 N93-22833
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity p 2247 N93-22836
Heat and mass transfer in polyphase flows p 2248 N93-22844
First results of a Freon 12 capillary pumped loop p 2249 N93-22846
Boiling under microgravity conditions p 2249 N93-22847
Forced convection boiling and condensation in microgravity: A critical appraisal of the literature p 2249 N93-22849
Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852
Heat transfer simulation with a conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 2251 N93-22863
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866
Finite element methods in heat transfer
|DE93-006451| p 2290 N93-22886
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels data sets
|AD-A260220| p 2220 N93-22917
Summary of experimental heat-transfer results from the turbine hot section facility
|NASA-TP-3250| p 2290 N93-23059
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
Modeling the heat release rate of aircraft cabin panels
|DOT/FAA/CT-92/3| p 2118 N93-23222
Stability and heat transfer in time-modulated flows
|DE93-006423| p 2293 N93-23339
Smoke movement in a corridor-hybrid model, simple model, and comparison with experiments
|PB93-146678| p 2259 N93-23435
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
|AD-A259659| p 2396 N93-23657
An innovative method for hand protection from extreme cold using heat pipe
|AD-A259720| p 2428 N93-24128
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
|AD-A260249| p 2246 N93-24332
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion studies
|AD-A260253| p 2224 N93-24333
HEAT TRANSFER COEFFICIENTS
Summary of experimental heat-transfer results from the turbine hot section facility
|NASA-TP-3250| p 2290 N93-23059
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
|NASA-TM-106083| p 2294 N93-23404
HEAT TREATMENT
Processing and microstructural development of Ag-clad Bi-Sr-Ca-Cu-O tapes
|DE93-004201| p 2500 N93-22078
Effects of rolling on the ductility of 80 percent tungsten heavy alloy
|DE93-004840| p 2232 N93-23972
HEATERS
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
|PB93-138915| p 2297 N93-24141
HEATING
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating p 2247 N93-22835
Thermophysical properties
|DE93-007807| p 2220 N93-22916
HEATING EQUIPMENT
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
|DE93-005795| p 2376 N93-22417
High-pressure ceramic air heater for indirectly fired gas turbine applications
|DE93-005022| p 2315 N93-23296
HEAVY IONS
From simple to complex reactions: Nuclear collisions near the Coulomb barrier
|DE93-004197| p 2478 N93-22063
Implications of defect clusters formed in cascades on free defect generation and microstructural development
|DE93-005551| p 2500 N93-22344
Green's function methods in heavy ion shielding
|NASA-TP-3311| p 2485 N93-22488
Physics from photon and lepton-pair spectra
|DE93-003083| p 2481 N93-22752
Design and qualification of the SEU/TD Radiation Monitor chip
|NASA-CR-192797| p 2280 N93-23041
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
|NASA-TM-4443| p 2559 N93-23396
HEAVY LIFT LAUNCH VEHICLES
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
|NASA-CR-192454| p 2202 N93-22012
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
On-orbit operational scenarios, tools and techniques p 2143 N93-22271
Autonomous rendezvous targeting techniques for national launch system application p 2145 N93-22284
Base heating methodology improvements, volume 1
|NASA-CR-192455| p 2202 N93-22350
Future of the US Space Launch capability: A task group report
|PB93-139947| p 2171 N93-22899
HEAVY NUCLEI
From simple to complex reactions: Nuclear collisions near the Coulomb barrier
|DE93-004197| p 2478 N93-22063
HEIGHT
The comparison of satellite radar altimeter derived heights with global digital terrain model heights p 2355 N93-23584
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
|PB93-136497| p 2396 N93-23650
HELICAL FLOW
Turbulence models for helical flow
|GKSS-92/E/12| p 2291 N93-23189
HELICAL WINDINGS
SPRING2: Helical compression spring geometry generator program manual
|DREA-TC-92-314| p 2438 N93-23345
HELICOPTER CONTROL
Fuzzy control of an unmanned helicopter p 2455 N93-22366
Fuzzy logic mode switching in helicopters p 2455 N93-22367
A teleoperated unmanned rotorcraft flight test technique p 2132 N93-22369
Flight investigation of the effect of tail boom strakes on helicopter directional control
|NASA-TP-3278| p 2108 N93-22654
Variable control system limits on Black Hawk and Seahawk helicopters
|AD-A259624| p 2132 N93-24153
HELICOPTER DESIGN
Advanced Rotorcraft Transmission (ART) program
|NASA-CR-191057| p 2311 N93-22466
HELICOPTER ENGINES
Icing cloud simulator for use in helicopter engine induction system ice protection testing
|DOT/FAA/CT-TN92/43| p 2133 N93-23087
HELICOPTER PROPELLER DRIVE
Advanced Rotorcraft Transmission (ART) program
|NASA-CR-191057| p 2311 N93-22466
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
|NASA-TM-105830| p 2312 N93-22826
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
|NASA-TM-106080| p 2313 N93-23019
Planetary gear train ring gear and support structure investigation p 2314 N93-23188
HELICOPTERS
Flight investigation of the effect of tail boom strakes on helicopter directional control
|NASA-TP-3278| p 2108 N93-22654
Icing cloud simulator for use in helicopter engine induction system ice protection testing
|DOT/FAA/CT-TN92/43| p 2133 N93-23087
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
|NASA-CR-192303| p 2126 N93-23186
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
|NASA-TM-103883| p 2122 N93-23419
Condition based machinery maintenance (helicopter fault detection), phase 1
|AD-A259774| p 2316 N93-23477
Tip-vortex/airframe interactions p 2111 N93-23489
The consequence of joint failures p 2212 N93-23941
Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
|NASA-CR-177611| p 2113 N93-24058
An oscillating three-dimensional wing experiment: Compressibility, sweep, rate, waveform, and geometry effects on unsteady separation and dynamic stall
|AD-A260530| p 2114 N93-24224
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
|NASA-TM-102642| p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
|NASA-TM-102643| p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
|NASA-TM-102645| p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
|NASA-TM-102644| p 2116 N93-24528

Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
[NASA-TM-104224] p 2116 N93-24532
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
[NASA-TM-101599] p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
[NASA-TM-101598] p 2116 N93-24540

HELIOSEISMOLOGY
Chaotic dynamics of the solar cycle
[AD-A260039] p 2557 N93-23644

HELIOSPHERE
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921
Remote sensing of inner heliospheric plasmas
[AD-A260337] p 2558 N93-24268

HELIOSTATS
A summary of recent activities at the National Solar Thermal Test Facility
[DE92-040969] p 2379 N93-22967

HELIUM
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
[DE93-005616] p 2257 N93-22416
A new approach for helium backfilling and leak testing seal-welded capsules in a hot cell
[DE93-004519] p 2317 N93-24049

HELIUM IONS
ESTAR, PSTAR, and ASTAR: Computer programs for calculating stopping-power and range tables for electrons, protons, and helium ions
[PB93-146033] p 2481 N93-22898
Cavities in He-implanted Si: Internal surface science
[DE93-005340] p 2509 N93-24012

HELMET MOUNTED DISPLAYS
Concepts for conformal and body-axis attitude information for spatial awareness presented in a helmet-mounted display
[NASA-TM-4438] p 2129 N93-23408
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
[NASA-TM-103883] p 2122 N93-23419
Comparative evaluation of a monocular head mounted display device versus a flat screen display device in presenting aircraft maintenance technical data
[AD-A259684] p 2427 N93-23660
In-flight field-of-view with ANVIS
[AD-A259905] p 2427 N93-23992
Attention factors associated with head-up display and helmet-mounted display systems
[AD-A260204] p 2427 N93-24001

HEPTANES
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854

HERMES MANNED SPACEPLANE
Thermodynamical behaviour of supercritical oxygen in the Hermes spaceplane environmental conditions p 2249 N93-22850
The European astronauts training programme p 2156 N93-24346
Training facilities at the Crew Training Complex p 2156 N93-24347

HETEROCYCLIC COMPOUNDS
Polybenzoxazoles via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 2207 N93-23077
Organic electrolytes for sodium batteries
[AD-A260242] p 2284 N93-24164

HETEROGENEITY
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
[DE93-005917] p 2479 N93-22418

HETEROJUNCTION DEVICES
Simulation of electronic transport in semiconductor heterolayer devices
[AD-A260122] p 2502 N93-22548

HEURISTIC METHODS
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
[AD-A259293] p 2119 N93-22398
Protocol design and implementation using formal methods
[MEMO-INF-92-43] p 2440 N93-23867

HIERARCHIES
A hierarchical structure for representing and learning fuzzy rules p 2454 N93-22358
Reliable vision-guided grasping
[NASA-CR-193197] p 2464 N93-24603

HIGH ELECTRON MOBILITY TRANSISTORS
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656
Study of the compatibility of PIN detector circuits and field effect transistors. Extension to high mobility and one dimensional electron gas transitors
[LAAS-92242] p 2283 N93-23863

HIGH ENERGY INTERACTIONS
Software engineering: What do experiments need?
[DE93-004767] p 2436 N93-22740
Theoretical studies in elementary particle physics
[DE93-005923] p 2481 N93-22883
High energy physics program at Texas A and M University
[DE93-005112] p 2485 N93-23324

HIGH FREQUENCIES
Fully automatic transmission of information via HF and comparison to satellite transmission p 2275 N93-23516
Propagation effects on HF direction finding p 2265 N93-23602
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604
The single-gap hollow spherical dipole in non-conducting media
[AD-A260017] p 2273 N93-24460

HIGH POWER LASERS
High-power optical coatings for a mega-Joule class ICF laser
[DE93-005821] p 2306 N93-22328
Self-focusing of broadband laser pulses in dispersive media
[DE93-007369] p 2307 N93-22529
Studies of tunable, high power excimer lasers p 2309 N93-23597
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
[ONERA-P-1992-3] p 2309 N93-24137

HIGH PRESSURE
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
[DE93-005917] p 2479 N93-22418
Pressure-induced amorphizations of silica analogues: A probe of the relationship between order and disorder
[DE93-007966] p 2237 N93-22730
Gas separation with glass membranes
[DE93-000217] p 2219 N93-22871
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
[NASA-CR-190782] p 2327 N93-23125
Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
[DLR-FB-92-14] p 2422 N93-24093

HIGH RESOLUTION
Experimental demonstration of high resolution three-dimensional x ray holography
[DE93-004178] p 2302 N93-22072
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
[DE93-004432] p 2228 N93-22724
Pressure-induced amorphizations of silica analogues: A probe of the relationship between order and disorder
[DE93-007966] p 2237 N93-22730
High resolution three-dimensional solder joint measurement system evaluation
[DE93-005840] p 2437 N93-23000
A current assessment of single site locating technology p 2267 N93-23608
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Radio location through high resolution eigenstructure processing techniques that yield accurate multipath AOA and differential time delay estimates p 2270 N93-23626
The SPOT program p 2360 N93-23766
High resolution digital thermometer
[PAT-APPL-7-831-603] p 2304 N93-24172
High resolution measurements of mixing and reaction processes in turbulent flows
[AD-A259952] p 2298 N93-24246

HIGH REYNOLDS NUMBER
Dynamic response characteristics of two transport models tested in the National Transonic Facility
[NASA-CR-191420] p 2125 N93-23047

HIGH SPEED
Flexible high speed CODEC p 2287 N93-22178
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
[NASA-TP-3247] p 2113 N93-24118
Applicability of superconducting interconnection technology for high speed IC's and systems
[AD-A259520] p 2285 N93-24302

HIGH SPEED PHOTOGRAPHY
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
[NASA-TM-107558] p 2178 N93-22669
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
[NASA-TM-107556] p 2179 N93-23085
Imaging technique for welding studies
[DE93-006449] p 2316 N93-23694

HIGH TEMPERATURE
Polyimide from bis(n-isoprenyl)s of aryl diamides
[NASA-CASE-LAR-14330-2-CU] p 2235 N93-22033
Three-dimensional laser window formation for industrial application p 2310 N93-22197
Dynamics of a metal overlayer on metallic substrates: High temperature effects
[DE93-006382] p 2227 N93-22547
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
[DE93-006745] p 2325 N93-22896
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
[NASA-TM-105978] p 2130 N93-23013
High-temperature Au implantation into Ni-Be and Ni-Si alloys
[DE93-005555] p 2505 N93-23022
High Temperature Composite Analyzer (HITCAN) demonstration manual, version 1.0
[NASA-TM-106003] p 2328 N93-23411
High temperature deformation characteristics of discontinuous fiber reinforced composites
[DE93-004466] p 2214 N93-24047

HIGH TEMPERATURE ENVIRONMENTS
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
[NASA-TM-105939] p 2206 N93-22590
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-105961] p 2231 N93-23418
AFTERRISE: Deep body temperature following exercise
[AD-A259887] p 2421 N93-23984
Fiber optic microphone having a pressure sensing reflective membrane and a voltage source for calibration purpose
[NASA-CASE-LAR-14402-2-CU] p 2478 N93-24602

HIGH TEMPERATURE GASES
Gas separation with glass membranes
[DE93-000217] p 2219 N93-22871
Patch testing of ceramic barrier filters
[DE93-005017] p 2315 N93-23294
High temperature filter materials
[DE93-005018] p 2315 N93-23295
Development of the nested fiber filter
[DE93-005015] p 2315 N93-23322
Spectroscopy and kinetics of combustion gases at high temperatures
[DE93-006892] p 2221 N93-23340
Gas separations using ceramic membranes
[DE93-003204] p 2225 N93-24498

HIGH TEMPERATURE SUPERCONDUCTORS
Positron studies of defected metals, metallic surfaces
[DE93-006089] p 2499 N93-22051
Midwest Superconductivity Consortium
[DE93-006146] p 2276 N93-22054
Processing and microstructural development of Ag-clad Bi-Sr-Ca-Cu-O tapes
[DE93-004201] p 2500 N93-22078
Synchrotron studies of narrow band materials
[DE93-006981] p 2502 N93-22526
Growth of precipitates in Bi2Sr2CaCu2O8
[DE93-004443] p 2502 N93-22725
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
[DE93-004445] p 2503 N93-22726
Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
[DE93-004453] p 2503 N93-22728
Electron-phonon driven spin frustration in multi-band Hubbard models: MX chains and oxide superconductors
[DE93-003697] p 2503 N93-22754
Physical properties of ultrathin films of high-temperature superconductors p 2506 N93-23197
Quantum Monte Carlo simulation on Hubbard model for high temperature superconductivity p 2507 N93-23395
Low-temperature specific heat of several high-temperature superconductors in the superconducting and mixed states p 2507 N93-23397
Applicability of superconducting interconnection technology for high speed IC's and systems
[AD-A259706] p 2282 N93-23665

Recrystallization of amorphous and nanocrystalline NdBa2Cu3O(7-x) and GdBa2Cu3O(7-x)
| DE93-004469 | p 2508 N93-23950
High temperature superconductivity
| AD-A259692 | p 2283 N93-24023
Practical superconductor development for electrical power applications
| DE93-007785 | p 2286 N93-24519
Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
| PB93-152072 | p 2514 N93-24647

HIGH TEMPERATURE TESTS
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
| NASA-TP-3257 | p 2297 N93-24096

HIPPARCOS SATELLITE
Status and early results of the Hipparcos astrometry project p 2533 N93-23879

HISTORIES
GEOTAIL Spacecraft historical data report
| NASA-TM-108710 | p 2194 N93-23168

HOHLRAUMS
Witness plate shock velocity study
| DE93-005742 | p 2474 N93-22760

HOLE GEOMETRY (MECHANICS)
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043

HOLES (ELECTRON DEFICIENCIES)
Study of the model of hole superconductivity in multiple band cases and its application to transition metals p 2511 N93-24195

HOLES (MECHANICS)
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043
Evaluation of hole sizes in structures requiring EVA services as a means to prevent gloved-hand finger entrapment
| NASA-TM-104767 | p 2426 N93-23129
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406

HOLOGRAPHIC INTERFEROMETRY
Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290

HOLOGRAPHY
Experimental demonstration of high resolution three-dimensional x ray holography
| DE93-004178 | p 2302 N93-22072
Automated rendezvous and capture system p 2144 N93-22277
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
Development of optical three-dimensional measurement techniques for fluid dynamics p 2294 N93-23398
Research in photorefractive crystals
| AD-A260391 | p 2513 N93-24425

HOMING DEVICES
The Missle-Borne Integrated Network Demonstration Program p 2255 N93-22023
Near-earth object interception workshop summary
| DE93-003793 | p 2546 N93-22403

HOMOTOPY THEORY
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
| NASA-CR-4503 | p 2466 N93-22672

HONEYCOMB STRUCTURES
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
| NASA-TP-3257 | p 2297 N93-24096

HORIZONTAL FLIGHT
Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
| NASA-CR-177611 | p 2113 N93-24058
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
| NASA-TM-102643 | p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
| NASA-TM-102644 | p 2116 N93-24528
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
| NASA-TM-104224 | p 2116 N93-24532
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
| NASA-TM-101599 | p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
| NASA-TM-101598 | p 2116 N93-24540

HORIZONTAL ORIENTATION
AudiMir: Directional hearing at microgravity p 2159 N93-24365

HORN ANTENNAS
Antenna pattern control using impedance surfaces
| NASA-CR-192712 | p 2273 N93-24471

HOT CATHODES
PISCES Program: Plasma-materials interactions and edge-plasma physics research
| DE93-005089 | p 2491 N93-22406

HOT ISOSTATIC PRESSING
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
| DE93-006745 | p 2325 N93-22896
Solid-particle erosion of in-situ reinforced Si3Ni4
| DE92-014868 | p 2209 N93-22911
Effects of processing parameters on the microstructure of a 30 w/o SiCw-2080 aluminum composite
| NRC-IAR-CR-20 | p 2216 N93-24651

HOT-FILM ANEMOMETERS
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
| NASA-TM-107734 | p 2133 N93-22675
Investigation of hot wire anemometers at very low velocities under microgravity p 2251 N93-22858

HOT-WIRE ANEMOMETERS
Investigation of hot wire anemometers at very low velocities under microgravity p 2251 N93-22858

HOVERING
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
| NASA-CR-192303 | p 2126 N93-23186
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
| NASA-TM-104224 | p 2116 N93-24532

HOVERING STABILITY
Stability of elastically tailored rotor systems
| AD-A260550 | p 2132 N93-24241

HUBBLE DIAGRAM
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933

HUBBLE SPACE TELESCOPE
Contact dynamics testing of automated three point docking mechanism p 2149 N93-22306
Solar system observations with HST p 2534 N93-23889
Archival and analysis of Hubble Space Telescope data p 2535 N93-23894
HST imaging of the binary pulsar PSR1913+16 p 2536 N93-23902

HUGHES AIRCRAFT
The consequence of joint failures p 2212 N93-23941

HULLS (STRUCTURES)
Multiobjective optimization of aerospace structures
| AD-A260433 | p 2127 N93-24430

HUMAN BEHAVIOR
Why do we see three-dimensional objects?
| AD-A259892 | p 2424 N93-23986

HUMAN BEINGS
Adaptive filters for monitoring localized brain activity from surface potential time series
| DE93-003795 | p 2420 N93-22774
Cytokines and immune surveillance in humans
| NASA-CR-192728 | p 2447 N93-22828

HUMAN BODY
New approach to the interaction of cosmic rays with nuclei in spacecraft shielding and the human body
| DE93-006263 | p 2559 N93-22544

HUMAN FACTORS ENGINEERING
The Data Egg: A new solution to text entry barriers p 2530 N93-22192
Operator Performance Support System (OPSS) p 2429 N93-22195
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 5: Human Support
| NASA-TM-108653 | p 2518 N93-22465
Joint University Program for Air Transportation Research, 1991-1992
| NASA-CP-3193 | p 2105 N93-22561
Controller evaluation of initial terminal data link ATC services: Mini study 3
| DOT/FAA/CT-92/18 | p 2262 N93-23046
Evaluation of hole sizes in structures requiring EVA services as a means to prevent gloved-hand finger entrapment
| NASA-TM-104767 | p 2426 N93-23129
The effects of display and response codes on information processing in an identification task
| AD-A259531 | p 2427 N93-23451
Human Factors Issues in Aircraft Maintenance and Inspection. Science, technology, and management: A program review
| PB93-146975 | p 2427 N93-23647
Comparative evaluation of a monocular head mounted display device versus a flat screen display device in presenting aircraft maintenance technical data
| AD-A259684 | p 2427 N93-23660
Total Quality Management: Good enough for government work
| AD-A259847 | p 2520 N93-23954
An innovative method for hand protection from extreme cold using heat pipe
| AD-A259720 | p 2428 N93-24128
Attitude awareness enhancements for the F-16 head-up display
| AD-A260280 | p 2428 N93-24168

HUMAN FACTORS LABORATORIES
Columbus payload requirements in human physiology p 2163 N93-24386

HUMAN PERFORMANCE
Hazard alerting and situational awareness in advanced air transport cockpits p 2106 N93-22566
3D object recognition: Symmetry and virtual views
| AD-A259738 | p 2460 N93-23474
Comparative evaluation of a monocular head mounted display device versus a flat screen display device in presenting aircraft maintenance technical data
| AD-A259684 | p 2427 N93-23660
The study of crew coordination and performance in hierarchical team decision making
| AD-A259514 | p 2520 N93-23698
Sustaining health and performance in the cold: A pocket guide to environmental medicine aspects of cold-weather operations
| AD-A259625 | p 2422 N93-24021
Perception/action: An holistic approach
| AD-A259597 | p 2428 N93-24067
Training high performance skills using above real-time training
| NASA-CR-192616 | p 2425 N93-24192
The five-factor personality model and naval aviation candidates
| AD-A260227 | p 2425 N93-24319
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2165 N93-24398
An automated method for determining mass properties
| AD-A259924 | p 2428 N93-24441

HUMAN RESOURCES
Underrepresented groups p 2517 N93-23146
Pipeline issues p 2517 N93-23148
Space support forum p 2153 N93-23160

HUMAN TOLERANCES
Sustaining health and performance in the cold: A pocket guide to environmental medicine aspects of cold-weather operations
| AD-A259625 | p 2422 N93-24021

HUMIDITY
Technical Digest. Detection systems and technology, September 1992
| AD-A259812 | p 2271 N93-23670
Observed annual and interannual variations in tropospheric water
| PB93-123313 | p 2411 N93-24588

HYBRID NAVIGATION SYSTEMS
Silicon accelerometer for AHRS and hybrid navigation systems p 2120 N93-22786

HYBRID PROPELLANT ROCKET ENGINES
Hybrid rocket propulsion p 2175 N93-22102

HYBRID PROPULSION
Hybrid rocket propulsion p 2175 N93-22102
The ANL electric vehicle battery R/D program for DOE-EHP
| DE93-005689 | p 2278 N93-22688
The ANL Electrochemical Program for DOE on electric vehicle R/D
| DE93-005690 | p 2279 N93-22689

Development of test procedures for nybrid/electric vehicles
|DE93-005179| p 2316 N93-23336

HYDRATION
Comparison of total body water estimates from O-18 and bioelectrical response prediction equations
|NASA-TP-3299| p 2421 N93-23734

HYDRAULIC FLUIDS
Chlorotrifluoroethylene decay in the atmosphere: Controlled-environment chamber studies
|AD-A259902| p 2388 N93-23989

HYDRAZINES
Active Hydrazine Vapor Sampler (AHVS)
p 2225 N93-22165
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling
|AD-A260252| p 2389 N93-24165

HYDROCARBON COMBUSTION
Taguchi methods applied to oxygen-enriched diesel engine experiments
|DE93-004873| p 2317 N93-23976

HYDROCARBON FUELS
Direct conversion of light hydrocarbon gases to liquid fuel
|DE93-004916| p 2245 N93-23321

HYDROCARBONS
Polyimide from bis(n-isoprenyl)s of aryl diamides
|NASA-CASE-LAR-14330-2-CU| p 2235 N93-22033
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
|DE93-005372| p 2218 N93-22505
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
|DE93-007013| p 2218 N93-22515
Contribution to the study of soot formation in combustion environments by optical methods based on light diffusion
|ECL-91-26| p 2218 N93-22697
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
|PB93-144376| p 2313 N93-22902
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
|PB93-124618| p 2386 N93-23348
Experimental and theoretical studies of reverse micelles in dense gases
|PB93-141901| p 2222 N93-24143

HYDRODYNAMICS
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
|DE93-006932| p 2182 N93-22583
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity
p 2247 N93-22836
Thermodynamic and stochastic theory of hydrodynamic and power-producing processes
|DE93-006891| p 2515 N93-23028
The radiation gasdynamics of planetary nebulae
p 2547 N93-23133
Laser driven hydrodynamic instability experiments
|DE93-005822| p 2308 N93-23330
Fluid science users requirements
p 2163 N93-24385

HYDROGEN
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
|DE93-007013| p 2218 N93-22515
Fundamental symmetry tests with antihydrogen
|DE93-005467| p 2479 N93-22541
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
|NASA-TM-105939| p 2206 N93-22590
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
|DE93-006500| p 2228 N93-22710
Biological production of hydrogen
|DE93-002604| p 2219 N93-22736
Electron-electron interactions in fast neutral-neutral collisions
|DE93-004841| p 2481 N93-22743
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
|DE93-000049| p 2377 N93-22750
H(-) beam neutralization measurements in a solenoidal beam transport system
|DE93-005460| p 2481 N93-22908
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
|DE93-005533| p 2237 N93-22909
Analysis of IUE observations of hydrogen in comets
|NASA-CR-192693| p 2548 N93-23231
Electron-beam rocket acceleration of hydrogen pellets
|DE93-002822| p 2171 N93-23685
Experimental and numerical investigation of hydrogen combustion in a supersonic flow p 2223 N93-24212
Laser excitation and chemi-ionization of combustion species
|AD-A260120| p 2224 N93-24414

HYDROGEN BONDS
The effect of UV light on Ir absorption in chemically vapor deposited a-SiN(x):H films
|DE93-004502| p 2486 N93-22941

HYDROGEN FUELS
Catalytic combustion of hydrogen
|DE93-752854| p 2217 N93-22073
A comparative analysis of alternative fuels for the INEL vehicle fleet
|DE93-007224| p 2319 N93-24256

HYDROGEN IONS
Electron-electron interactions in fast neutral-neutral collisions
|DE93-004841| p 2481 N93-22743
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere
p 2394 N93-23388

HYDROGEN PLASMA
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
|NASA-TM-104765| p 2492 N93-22475

HYDROGEN PRODUCTION
Biological production of hydrogen
|DE93-002604| p 2219 N93-22736

HYDROGENATION
Correlations between surface structure and catalytic activity/selectivity
|DE93-005884| p 2217 N93-22423

HYDROGEOLOGY
High resolution shear wave reflection surveying for hydrogeological investigations
|DE93-004732| p 2398 N93-24006

HYDROGRAPHY
Evaluation of the Bathyscan sweep survey system
|AD-A260162| p 2415 N93-23708

HYDROLOGICAL CYCLE
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
|NASA-CR-192772| p 2413 N93-22700

HYDROLOGY
Classification of TM data as a contribution to remote sensing for a hydrological run-off model
p 2341 N93-22448
Thematic Mapper land use classification as a remote sensing contribution for hydrologic runoff prediction model
|ESA-TT-1238| p 2342 N93-22461
Microscale geomorphological analysis in middle Italy using airborne and satellite remote sensing techniques
p 2355 N93-23581
High resolution shear wave reflection surveying for hydrogeological investigations
|DE93-004732| p 2398 N93-24006

HYDROLOGY MODELS
Classification of TM data as a contribution to remote sensing for a hydrological run-off model
p 2341 N93-22448
Thematic Mapper land use classification as a remote sensing contribution for hydrologic runoff prediction model
|ESA-TT-1238| p 2342 N93-22461
Estimation of runoff and erosion using GIS integrating DEM, LANDSAT data, and terrain hydrological data
p 2351 N93-23558

HYDROLYSIS
Apparatus and method for cellulose processing using microwave pretreatment
|NASA-CASE-MSC-21936-1-SB| p 2216 N93-22036
Sol-gel/rhodamine 6G composite films with tailored microstructures
|DE93-005364| p 2208 N93-22504

HYDROSTATICS
User's guide to the Penn State/NCAR Mesoscale Modeling System
|P993-126654| p 2391 N93-22380
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
|AD-A260129| p 2210 N93-23703

HYDROTHERMAL SYSTEMS
Survey of the Hokkaido development project
|DE93-761804| p 2382 N93-24013
Supply of geothermal power from hydrothermal sources: A study of the cost of power in 20 and 40 years
|DE93-004479| p 2382 N93-24036

HYDROXYL RADICALS
Determination of rates of reaction in the gas-phase in the troposphere. Theory and practice. 5. Rate of indirect photoreaction
|PB93-149334| p 2402 N93-24569

HYPERBARIC CHAMBERS
A computer simulation of a hyperbaric chamber environment
|AD-A260137| p 2134 N93-23705

HYPERBOLIC DIFFERENTIAL EQUATIONS
On essentially non-oscillatory schemes on unstructured meshes: Analysis and implementation
|NASA-CR-191415| p 2471 N93-24492

HYPERBOLIC SYSTEMS
Time-stable boundary conditions for finite-difference schemes solving hyperbolic systems: Methodology and application to high-order compact schemes
|NASA-CR-191436| p 2468 N93-23126

HYPERCUBE MULTIPROCESSORS
Hyperstructures as computer architectures for high performance multiprocessor systems
|ISBN-0-315-58975-2| p 2433 N93-24613

HYPERNUCLEI
Physics opportunities with higher energy pion beams
|DE93-006678| p 2480 N93-22585

HYPERSONIC FLOW
Upwind relaxation method for hypersonic flow simulation
|DLR-FB-91-36| p 2109 N93-22659
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
|NASA-CR-185677| p 2109 N93-22802
Asymptotic analysis of: 1: Wave propagation in dispersive optical media with quadratic nonlinearity. 2: A hypersonic wing with three-dimensional self-similarity
p 2112 N93-23594
Investigation of aerothermodynamics and optical radiation in the AFE hypersonic flow field
|NASA-CR-192844| p 2114 N93-24475
Hypersonic shock/boundary-layer interaction database
|NASA-CR-177577| p 2299 N93-24526
Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
|NASA-TM-103909| p 2300 N93-24537
Instrumentation for hypersonic aerodynamics research with tethered satellites
|NASA-CR-191435| p 2442 N93-24539
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
|NASA-TM-103838| p 2300 N93-24542

HYPERSONIC SPEED
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow
p 2114 N93-24209

HYPERSONIC VEHICLES
Entry systems technology assessment
p 2177 N93-22118
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
|NASA-CR-185677| p 2109 N93-22802
Saenger: A space transportation system for the 21st century
|ETN-93-93696| p 2126 N93-23363
CFD-based approximation concepts for aerodynamic design optimization with application to a 2-D scramjet vehicle p 2126 N93-23505
An extended supersonic combustion model for the dynamic analysis of hypersonic vehicles
|NASA-CR-192716| p 2225 N93-24472

HYPERSONICS
Materials and structures technologies for hypersonics
p 2177 N93-22116
Annual progress report, 1990-1991
|CTN-93-60695| p 2570 N93-23115

HYPERVELOCITY IMPACT
Metallization and insulization during impact
|DE93-004708| p 2500 N93-22420
Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts
|DE93-003845| p 2323 N93-22516
Repeatability and uncertainty analyses of NASA/MSFC light gas gun test data
|NASA-CR-192496| p 2325 N93-23012
Impact experiments into multiple-mesh targets: Concept development of a lightweight collisional bumper
|NASA-TM-104764| p 2194 N93-23247
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
|DE93-003846| p 2327 N93-23291
Penetration mechanics research in the former Soviet Union
|PB93-146488| p 2259 N93-24495

HYPERVELOCITY LAUNCHERS
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
|DE93-006932| p 2182 N93-22583

Transient simulation of ram accelerator flowfields
| AD-A259767 | p 2295 N93-23485

HYPERVELOCITY PROJECTILES
Impact experiments into multiple-mesh targets: Concept development of a lightweight collisional bumper
| NASA-TM-104764 | p 2194 N93-23247

HYSTERESIS
Wetting hysteresis of tin on silica solid surfaces of controlled periodic roughness p 2251 N93-22861

I

I BEAMS
Inelastic nonuniform torsion of steel I-beams
| PB93-118776 | p 2333 N93-24589

ICE
Heat transfer on accreting ice surfaces
| AIAA PAPER 90-0200 | p 2106 N93-22565
Navier-Stokes analysis of airfoils with leading edge ice accretions
| NASA-CR-191008 | p 2109 N93-22822
An experimental study of the aerodynamics of a NACA0012 airfoil with a simulated glaze ice accretion, volume 2
| NASA-CR-191007 | p 2109 N93-22823
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
| NASA-TM-107556 | p 2179 N93-23085
A nitrate signal of solar flares in polar snow and ice
| AD-A260559 | p 2558 N93-24284

ICE CLOUDS
Icing cloud simulator for use in helicopter engine induction system ice protection testing
| DOT/FAA/CT-TN92/43 | p 2133 N93-23087
Airborne studies of ocean-particle-cloud interactions
| AD-A259874 | p 2415 N93-23958

ICE ENVIRONMENTS
A gas extraction system for the measurement of carbon dioxide and carbon isotopes in polar ice cores
| DE93-005289 | p 2412 N93-22225

ICE FLOES
Investigations into the dynamics of sea ice in the East Greenland Sea region in May 1988, using NOAA-AVHRR data p 2341 N93-22446

ICE FORMATION
Heat transfer on accreting ice surfaces
| AIAA PAPER 90-0200 | p 2106 N93-22565
Icing research tunnel rotating bar calibration measurement system
| NASA-TM-106010 | p 2303 N93-22598
Navier-Stokes analysis of airfoils with leading edge ice accretions
| NASA-CR-191008 | p 2109 N93-22822
An experimental study of the aerodynamics of a NACA0012 airfoil with a simulated glaze ice accretion, volume 2
| NASA-CR-191007 | p 2109 N93-22823
Wind power plants in the weather conditions of Northern Finland
| DE93-752927 | p 2379 N93-22971
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
| PB93-118586 | p 2405 N93-23333
Blade Assessment for Ice Impact (BLASIM). User's manual, version 1.0
| NASA-CR-191075 | p 2331 N93-24102

ICE MAPPING
Overview of activities of ISY PIE Committee p 2335 N93-22129
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
Microwave remote sensing of ice p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
ERS-1 SAR ice routing of l'Astrolabe through the Northeast passage p 2358 N93-23759
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761

ICE PREVENTION
Icing cloud simulator for use in helicopter engine induction system ice protection testing
| DOT/FAA/CT-TN92/43 | p 2133 N93-23087

ICE REPORTING
Overview of Earth environment data set: MOS-1/MOS-1b data sets p 2334 N93-22121
Overview of activities of ISY PIE Committee p 2335 N93-22129
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
Microwave remote sensing of ice p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
Distinguishing ice thickness from sea ice surface shape by using NOAA-AVHRR (National Oceanic and Atmosphere Administration Advanced Very .High Resolution Radiometer) and SAR data p 2340 N93-22445
Report of the Sea Ice Thickness Workshop
| AD-A259696 | p 2414 N93-23663
Early results on the use of ERS-1 SAR data for real-time sea ice monitoring in Canadian waters p 2359 N93-23762
Inter-comparison of satellite derived passive microwave ice products p 2371 N93-23836
The Oden real time ice monitoring demonstration p 2371 N93-23837

IDAHO
Small business profiles, 1992. Region 10: Alaska, Idaho, Oregon, and Washington
| PB93-111011 | p 2521 N93-24305

IDEAL FLUIDS
On the propagation of a gravitational wave in a stiff perfect fluid
| MATHS-REPT-A-178 | p 2398 N93-24079
The collision of gravitational waves in a stiff perfect fluid
| MATHS-REPT-A-179 | p 2398 N93-24080

IDENTIFYING
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
| DE93-005607 | p 2279 N93-22945
Prototype for a regional data management system, a step towards a regional land use project p 2353 N93-23571
Off-shore platform identification signs
| CAA-PAPER-92006 | p 2123 N93-24124

IGNITION
High-power optical coatings for a mega-Joule class ICF laser
| DE93-005821 | p 2306 N93-22328
Role of acoustics in flame/vortex interactions
| NASA-CR-191429 | p 2299 N93-24494

ILLINOIS
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
| PB93-110963 | p 2520 N93-24158

ILLUMINATING
Employing lighting techniques during on-orbit operations p 2151 N93-22319

ILLUMINATORS
Electro-optic frame photography with pulsed ruby illumination
| DE93-005819 | p 2306 N93-22327

IMAGE ANALYSIS
An investigative study of multispectral data compression for remotely-sensed images using vector quantization and difference-mapped shift-coding p 2445 N93-22157
Adaptive fuzzy system for 3-D vision p 2451 N93-22216
Learning fuzzy information in a hybrid connectionist, symbolic model p 2453 N93-22354
Geological applications of space SAR data p 2339 N93-22440
Geocoded products of future radar sensors p 2340 N93-22441
Prediction of the quality of resistance welds by computer based color image analysis
| DE93-002402 | p 2312 N93-22818
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
| NASA-TM-107556 | p 2179 N93-23085
RLE progress report no. 133, 1 January - 31 December 1990
| NASA-CR-192144 | p 2263 N93-23195
Image interpretation for landforms using expert systems and terrain analysis p 2342 N93-23213
Effectiveness of feature and classifier algorithms in character recognition systems
| PB93-147197 | p 2525 N93-23272
Mapping from SPOT data p 2349 N93-23544
Vineyard cadastre monitoring using remote sensed data in an integrated GIS p 2351 N93-23556
The influence of geology and geomorphology on landslide hazards in an area in the Colombian Andes: The GIS approach p 2351 N93-23557
Integration of digital image matching and multi image shape from shading p 2354 N93-23575
Valency of different information categories and its importance for the effectiveness of image analysis by the visual system and automatic systems p 2354 N93-23577
Analysis of human impact on degradation and desertification of the West African Sahel by means of multi-level remote sensing techniques p 2355 N93-23578
TM-SPOT multitemporal analysis on areas devasted by fire p 2355 N93-23580
Water regions extraction from radar imagery using a neural network
| AD-A259517 | p 2356 N93-23668
Towards infrared image understanding p 2488 N93-24000
Editing images of text
| PB93-149896 | p 2443 N93-24576
Scattering centre analysis of simple metallic objects
| ESA-TT-1250 | p 2274 N93-24619
Shape-contour recognition using moment invariants
| ISBN-0-315-61036-0 | p 2444 N93-24624

IMAGE CONVERTERS
Electro-optic frame photography with pulsed ruby illumination
| DE93-005819 | p 2306 N93-22327

IMAGE CORRELATORS
Optical correlators for automated rendezvous and capture p 2143 N93-22273

IMAGE ENHANCEMENT
Robust algebraic image enhancement for intelligent control systems p 2454 N93-22361
Developing a neural network to act as a noise filter
| AD-A259515 | p 2460 N93-23699
Method for enhancing of the spatial resolution of the passive radiometric systems p 2365 N93-23799

IMAGE INTENSIFIERS
Apparent opacity affects perception of structure from motion
| AD-A260099 | p 2488 N93-24054
Human visual limitations on suprathreshold contrast perception through ANVIS
| AD-A259970 | p 2425 N93-24431
The detection and amplification processes in low light level cameras with CCD and image intensifier
| FFI-92/7017 | p 2490 N93-24646

IMAGE MOTION COMPENSATION
Multi-window registration algorithm for automatic detection and tracking of moving targets p 2255 N93-22022
Studies on dynamism in photogrammetry p 2374 N93-24122

IMAGE PROCESSING
Advances in automatic electro-optical tracking systems p 2254 N93-22020
System evaluation of a fiber optic guided missile with a simple guidance addition to improve system effectiveness p 2255 N93-22025
Experimental demonstration of high resolution three-dimensional x ray holography
| DE93-004178 | p 2302 N93-22072
An investigative study of multispectral data compression for remotely-sensed images using vector quantization and difference-mapped shift-coding p 2445 N93-22157
Knowledge From Pictures (KFP) p 2465 N93-22187
The 3-D image recognition based on fuzzy neural network technology p 2450 N93-22210
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239
A PARC system for terminal docking p 2141 N93-22259
Virtual reality applications to automated rendezvous and capture p 2141 N93-22261
AR/D image processing system p 2152 N93-22321
Robust algebraic image enhancement for intelligent control systems p 2454 N93-22361
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
| ESA-TT-1245 | p 2339 N93-22436
Satellite image and reference data investigations for exploration purposes p 2341 N93-22449
Apparatus and method for computer vision measurements
| PB93-135077 | p 2432 N93-22536
High speed, wide area distributed computing for scientific imaging
| DE93-004727 | p 2436 N93-22778
Applications of x ray lasers
| DE93-005299 | p 2308 N93-22953
Asteroid detection and monitoring using a satellite-borne visible scanner
| AD-A259797 | p 2543 N93-23455
A vector signal processing approach to color
| AD-A259499 | p 2487 N93-23465
A Star Pattern Recognition Sensor (SPRS) of high accuracy: A contribution to new possibilities of autonomous attitude determination p 2201 N93-23532
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
Precision geocoding demonstrator system p 2348 N93-23539
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
Mapping from SPOT data p 2349 N93-23544

System design for ARTEMIS environmental monitoring p 2349 N93-23545
Multisensor data applications for digital landscape models p 2350 N93-23550
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data p 2350 N93-23552
Data for map algebra p 2350 N93-23553
A Digital Landscape Model for Europe (DLME) p 2351 N93-23554
Satellite image mosaics from automatic scene re-navigation p 2352 N93-23563
Multispectral intelligent fusion techniques p 2352 N93-23564
Application of remote sensing and GIS. Technology to natural resources management: Selecting rice fields in Vietnam p 2353 N93-23569
Use of satellite data and GIS for evaluating urban environment p 2354 N93-23572
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
The analysis of remotely sensed data with neural networks p 2355 N93-23579
Feature detection using ERS-1 SAR data p 2356 N93-23586
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
Localization system based on data merging of images and inertia p 2269 N93-23623
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
|AD-A259711| p 2440 N93-23638
Recognizing 3D objects for 2D images: An error analysis
|AD-A260150| p 2469 N93-23707
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761
SPOT 4 image ground segment p 2360 N93-23768
Space technologies in French education p 2369 N93-23824
Computer-based lessons in satellite oceanography: An academic network for teachers and students p 2369 N93-23825
Satellite-images in secondary education in Baden-Wuerttemberg (Germany) p 2370 N93-23830
Why do we see three-dimensional objects?
|AD-A259892| p 2424 N93-23986
Towards infrared image understanding p 2488 N93-24000
Projective structure from two uncalibrated images: Structure from motion and recognition
|AD-A260102| p 2470 N93-24056
Studies on dynamism in photogrammetry p 2374 N93-24122
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
|AD-A259944| p 2273 N93-24243
Distance metric between 3D models and 2D images for recognition and classification
|AD-A260069| p 2463 N93-24313
Computer based analysis and synthesis of retinal function
|AD-A260514| p 2423 N93-24420
Neural net architecture for computing structure from motion
|AD-A260526| p 2463 N93-24421
Control of two- and three-dimensional wake instabilities from bluff-bodies
|AD-A260410| p 2299 N93-24428
Obtaining high-resolution images of ceramic from 3-D x-ray microtomography by region-of-interest reconstruction
|DE93-006796| p 2243 N93-24461
The 1993 Space and Earth Science Data Compression Workshop
|NASA-CP-3191| p 2430 N93-24544
Compression through decomposition into browse and residual images p 2430 N93-24546
Applications of wavelet-based compression to multidimensional Earth science data p 2430 N93-24547
Wavelet encoding and variable resolution progressive transmission p 2431 N93-24548
Fast image decompression for telebrowsing of images p 2431 N93-24549
A survey of quality measures for gray-scale image compression p 2431 N93-24550
Digital mammography, cancer screening: Factors important for image compression p 2424 N93-24551
Proposed data compression schemes for the Galileo S-band contingency mission p 2431 N93-24554
Nonlinear dynamics research in the former Soviet Union
|PB93-146496| p 2333 N93-24571
Editing images of text
|PB93-149896| p 2443 N93-24576
A parameter-controlled relaxation algorithm for Bayesian restoration of images using the maximum entropy method (design, analysis, Mach band simulation and parallelization)
|ISBN-0-315-64776-0| p 2444 N93-24608

IMAGE RECONSTRUCTION

Perception, scene reconstruction and world modeling for unmanned underwater vehicles
|PB93-146983| p 2459 N93-23443
The multi-scale veto model: A two-stage analog network for edge detection and image reconstruction
|AD-A259600| p 2462 N93-24069
A parameter-controlled relaxation algorithm for Bayesian restoration of images using the maximum entropy method (design, analysis, Mach band simulation and parallelization)
|ISBN-0-315-64776-0| p 2444 N93-24608

IMAGE RESOLUTION

Wavelet encoding and variable resolution progressive transmission p 2431 N93-24548

IMAGERY

Wavelet encoding and variable resolution progressive transmission p 2431 N93-24548
Fast image decompression for telebrowsing of images p 2431 N93-24549
A survey of quality measures for gray-scale image compression p 2431 N93-24550
A study of video frame rate on the perception of moving imagery detail p 2431 N93-24552

IMAGES

Knowledge From Pictures (KFP) p 2465 N93-22187
Planning multiple observations for object recognition
|AD-A259879| p 2440 N93-23959
Apparent opacity affects perception of structure from motion
|AD-A260099| p 2488 N93-24054

IMAGING RADAR

An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
|ORAE-R107| p 2133 N93-23114

IMAGING SPECTROMETERS

Inner Magnetosphere Imager (IMI) instrument heritage
|NASA-CR-4498| p 2391 N93-22685
German participation within the international Earth observation mission Priroda p 2361 N93-23774
Medium Resolution Imaging Spectrometer (MERIS) p 2363 N93-23785
Broadband imaging spectrometer technology and its use potential for environmental change mission p 2364 N93-23791
Design of an imaging spectrometer processing chain for space application p 2364 N93-23792
Evidence for two types of sources creating Halley's coma p 2540 N93-23926

IMAGING TECHNIQUES

Method and apparatus for filtering visual documents
|NASA-CASE-MSC-22093-1| p 2522 N93-22017
Off-surface infrared flow visualization
|NASA-CASE-LAR-14568-1| p 2486 N93-22037
Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180
A strongly goal-directed close-range vision system for spacecraft docking p 2136 N93-22232
Image based tracking approaches to AR/C at the Johnson Space Center p 2140 N93-22256
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
|DE93-005474| p 2500 N93-22342
Design and manufacture of optical system for use in UV lithography with the free electron laser
|DE93-005440| p 2307 N93-22539
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
|DE93-004784| p 2303 N93-22706
Laser range camera data fusion
|DE93-005159| p 2263 N93-23313
A vector signal processing approach to color
|AD-A259499| p 2487 N93-23465
High resolution computed tomography
|AD-A259728| p 2321 N93-23470
3D pose from 3 corresponding points under weak-perspective projection
|AD-A259737| p 2460 N93-23473
Mapping from SPOT data p 2349 N93-23544
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
Satellite image mosaics from automatic scene re-navigation p 2352 N93-23563
Integration of digital image matching and multi image shape from shading p 2354 N93-23575
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
Imaging technique for welding studies
|DE93-006449| p 2316 N93-23694
Meteosat second generation: A look to the future p 2357 N93-23753
Ultrasonic inspection of filament wound graphite epoxy cylinders
|AD-A260361| p 2321 N93-24173
The liquid crystal polarimeter for solid-state imaging of solar vector magnetic fields
|AD-A260029| p 2483 N93-24251
Study of high spatial resolution narrow spectral band ultraviolet images of the earth's atmosphere
|AD-A260035| p 2400 N93-24254
Human visual limitations on suprathreshold contrast perception through ANVIS
|AD-A259970| p 2425 N93-24431

IMMUNE SYSTEMS

Influence of microgravity on immune system and genetic information p 2160 N93-24370

IMMUNITY

Cytokines and immune surveillance in humans
|NASA-CR-192728| p 2447 N93-22828

IMMUNOLOGY

Cytokines and immune surveillance in humans
|NASA-CR-192728| p 2447 N93-22828

IMPACT

Contact-impact simulations on massively parallel SIMD supercomputers
|DE93-004188| p 2445 N93-22060

IMPACT DAMAGE

Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts
|DE93-003845| p 2323 N93-22516
Damage in laminated composites due to low velocity impact p 2213 N93-23947
Structural impact simulation using program KRASH
|CRANFIELD-AERO-9010| p 2333 N93-24639

IMPACT LOADS

Two techniques for measuring locomotion impact forces during zero G
|NASA-TP-3305| p 2421 N93-23410

IMPACT PREDICTION

Blade Assessment for Ice Impact (BLASIM). User's manual, version 1.0
|NASA-CR-191075| p 2331 N93-24102
Structural impact simulation using program KRASH
|CRANFIELD-AERO-9010| p 2333 N93-24639

IMPACT RESISTANCE

The characterization of impact properties of composites p 2213 N93-23945

IMPACT STRENGTH

Mechanical properties of martensitic alloy AISI 422
|DE93-004834| p 2229 N93-22882

IMPACT TESTS

Contact-impact simulations on massively parallel SIMD supercomputers
|DE93-004188| p 2445 N93-22060
Pyroshock simulation for satellite components using a tunable resonant fixture
|DE93-005338| p 2322 N93-22500
Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts
|DE93-003845| p 2323 N93-22516
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
|DE93-006932| p 2182 N93-22583
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
|DE93-005382| p 2325 N93-22975
Repeatability and uncertainty analyses of NASA/MSFC light gas gun test data
|NASA-CR-192496| p 2325 N93-23012
Impact experiments into multiple-mesh targets: Concept development of a lightweight collisional bumper
|NASA-TM-104764| p 2194 N93-23247
A new method of impact tension testing of adhesively-bonded joints p 2212 N93-23939
The characterization of impact properties of composites p 2213 N93-23945

IMPACT TOLERANCES

Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper) p 2150 N93-22311

IMPEDANCE

Traceability for radio frequency coaxial line standards
|NPL-DES-114| p 2277 N93-22451

IMPELLERS

Space propulsion p 2174 N93-22092
Development of code evaluation criteria for assessing predictive capability and performance
|NASA-CR-192623| p 2442 N93-24473

IMPINGEMENT

Automating an orbiter approach to Space Station Freedom to minimize plume impingement p 2149 N93-22305

IMPLANTATION
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
IMPLOSIONS
Design and characterization of the Pegasus 1 plasma flow switch
| DE93-003812 | p 2276 N93-22322
Experimental studies of instabilities in radially imploding plasmas
| DE93-003831 | p 2492 N93-22427
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
| DE93-003834 | p 2492 N93-22428
Radiation magnetohydrodynamic modeling of x ray output from perturbed plasma implosions
| DE93-005454 | p 2494 N93-22907
IMPREGNATING
Continuous fiber thermoplastic prepreg
| NASA-CASE-LAR-14459-1 | p 2215 N93-24597
IMPROVEMENT
The SPOT 4 satellite and beyond
p 2360 N93-23767
IMPURITIES
Plasma edge diagnostics p 2495 N93-23261
Grain boundary chemistry effects on environment-induced crack growth of iron-based alloys
| DE93-005039 | p 2232 N93-23980
Edge effects during DIII-D divertor biasing
| DE93-005847 | p 2498 N93-24325
Aspects of photoionization of impurities and electron transfer in ionic crystals
| DE93-008544 | p 2513 N93-24511
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
| PB93-146215 | p 2499 N93-24606
IN SITU MEASUREMENT
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
| DE93-003806 | p 2208 N93-22432
Fluid density and concentration measurement using noninvasive in situ ultrasonic resonance interferometry
| DE93-003741 | p 2220 N93-23051
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
| AD-A260043 | p 2488 N93-23645
Acoustic emission of structural materials exposed to open flames
| PB93-138980 | p 2477 N93-23951
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
| DE93-005038 | p 2415 N93-23979
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
| AD-A259616 | p 2510 N93-24126
A study of high-latitude auroral arcs using radar, optical, and in situ techniques p 2399 N93-24183
INCOMPRESSIBLE BOUNDARY LAYER
Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
| AD-A259923 | p 2289 N93-22734
INCOMPRESSIBLE FLOW
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method
p 2291 N93-23180
Operator splitting methods for the Navier-Stokes equations p 2292 N93-23226
Fully implicit solutions of the benchmark backward facing step problem using finite element discretization and inexact Newton's method
| DE93-005246 | p 2293 N93-23299
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations
p 2294 N93-23402
INCOMPRESSIBLE FLUIDS
Response of a non-viscous liquid column with anchored liquid surface to axial excitation
| LRT-WE-9-FB-4-1991 | p 2288 N93-22677
Experimental investigation of developing and fully developed flow in a curved duct of square cross section
| ISBN-0-315-70029-7 | p 2291 N93-23177
INDENTATION
Development of an interfacial test system for the determination of interfacial properties in fiber reinforced ceramic composites
| DE93-006743 | p 2236 N93-22579
INDEPENDENT VARIABLES
Control design variable linking for optimization of structural/control systems
| NASA-CR-4493 | p 2125 N93-22827
INDEXES (DOCUMENTATION)
Universal Index System p 2530 N93-22152
Aeronautical engineering: A cumulative index to a continuing bibliography (supplement 287)
| NASA-SP-7037(287) | p 2107 N93-23038
Aeronautical engineering: A continuing bibliography with indexes (supplement 288)
| NASA-SP-7037(288) | p 2107 N93-23039
Index to NASA news releases and speeches, 1992
| NASA-TM-109187 | p 2524 N93-23172
Bibliography of the Biosciences Division: 1986 to present
| DCIEM-92-20 | p 2419 N93-23343
List of journals indexed in AGRICOLA, 1992
| PB93-152650 | p 2528 N93-24204
NASA scientific and technical publications: A catalog of special publications, reference publications, conference publications, and technical papers, 1991-1992
| NASA-SP-7063(06) | p 2529 N93-24654
INDIANA
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
| PB93-110963 | p 2520 N93-24158
INDIUM COMPOUNDS
Polycrystalline thin films
| DE93-000070 | p 2500 N93-22336
Research on high efficiency, large-area CuInSe2-based thin-film modules
| DE93-000077 | p 2513 N93-24433
INDONESIA
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811
INDUCTION MOTORS
Fuzzy efficiency optimization of AC induction motors
p 2454 N93-22363
INDUSTRIAL PLANTS
Three-dimensional laser window formation for industrial application p 2310 N93-22197
INDUSTRIES
Biofuels program plan, FY 1992 - 1996
| DE93-000036 | p 2245 N93-23048
The Photovoltaic Manufacturing Technology Project, phase 1
| DE92-010597 | p 2380 N93-23302
Assessment of future natural gas vehicle concepts
| PB93-138923 | p 2317 N93-24145
Technology transfer from NASA to targeted industries, volume 1
| NASA-CR-192757 | p 2532 N93-24482
Technology transfer from NASA to targeted industries, volume 2
| NASA-CR-192758 | p 2533 N93-24484
Small business profiles, 1992: Region 1
| PB93-110922 | p 2521 N93-24556
INELASTIC SCATTERING
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
| DE93-006500 | p 2228 N93-22710
INERTIAL CONFINEMENT FUSION
High-power optical coatings for a mega-Joule class ICF laser
| DE93-005821 | p 2306 N93-22328
Witness plate shock velocity study
| DE93-005742 | p 2474 N93-22760
INERTIAL GUIDANCE
Localization system based on data merging of images and inertia p 2269 N93-23623
Spirit 2 vehicle: (A26.780). Post flight report
| AD-A259991 | p 2172 N93-24250
INERTIAL NAVIGATION
The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
Optimization of the integration of inertia and GPS
p 2120 N93-22787
Integrated precision navigation system
p 2120 N93-22789
Flight evaluation of differential GPS aided inertial navigation systems p 2120 N93-22790
An hierarchic alliance of filters for fault tolerant navigation using two inertial systems with aiding sensors
p 2121 N93-22793
Precise flight navigation by integration of global positioning system and inertial measurement units
p 2124 N93-23523
INFERENCE
Truth-Valued-Flow Inference (TVFI) and its applications in approximate reasoning p 2452 N93-22223
Structure identification in fuzzy inference using reinforcement learning p 2456 N93-22371
Change PP plot and continuous sample quantile function
| AD-A259833 | p 2472 N93-23460
Interpretation as abduction
| AD-A259608 | p 2425 N93-24227
INFORMATION
Method and apparatus for filtering visual documents
| NASA-CASE-MSC-22093-1 | p 2522 N93-22017
Eye movements and visual information processing
| AD-A259955 | p 2425 N93-24297
INFORMATION DISSEMINATION
Department of Energy new technology
| DE92-041170 | p 2522 N93-22058
Newly available technologies present expanding opportunities for scientific and technical information exchange
| NASA-CR-4494 | p 2261 N93-22470
National security and national competitiveness: Open source solutions NASA requirements and capabilities
| NASA-TM-4458 | p 2523 N93-23030
Technology utilization and American competitiveness
p 2153 N93-23158
Outlook for the U.S. Space Program
p 2153 N93-23159
Public libraries in the US, 1990
| PB93-127926 | p 2525 N93-23285
Collection and Distribution of Ecological Data by Satellite: CDEDS p 2344 N93-23511
Collection and distribution of ecological data by satellite pilot projects as demonstration of the concept
p 2344 N93-23512
Delivery of information from Earth observation satellites p 2350 N93-23549
Advanced information processing
| AD-A260245 | p 2529 N93-24258
INFORMATION FLOW
Demonstration plan for real time receiving and processing of flight data from the space transportation system
| NASA-TM-107725 | p 2152 N93-22468
INFORMATION MANAGEMENT
An application protocol for CAD to CAD transfer of electronic information p 2530 N93-22154
Concentration and diversity in informetric research
p 2524 N93-23185
US Geological Survey library classification system
| PB93-129708 | p 2525 N93-23256
Public libraries in the US, 1990
| PB93-127926 | p 2525 N93-23285
Coordinating Council. First Meeting: NASA/RECON database
| NASA-TM-108766 | p 2526 N93-23412
Ocean colour programmes for the European marine environment p 2366 N93-23808
Information handling as task layer of Columbus user support p 2163 N93-24383
INFORMATION PROCESSING (BIOLOGY)
The effects of display and response codes on information processing in an identification task
| AD-A259531 | p 2427 N93-23451
INFORMATION RETRIEVAL
An integrated information retrieval and document management system p 2530 N93-22156
A proposal of fuzzy connective with learning function and its application to fuzzy retrieval system
p 2450 N93-22211
Occurrence Reporting and Processing System (ORPS) lessons learned: Tools to improve workplace performance
| DE93-005241 | p 2522 N93-22498
Searching the Occurrence Reporting and Processing Systems (ORPS) database
| DE93-005242 | p 2523 N93-22499
Beyond interlibrary loan state-of-the-art article retrieval
| DE93-004425 | p 2523 N93-22723
An electronic stroll through the global village
| DE93-005962 | p 2446 N93-22763
The nature of relevance in information retrieval: An empirical study p 2524 N93-23184
US Geological Survey library classification system
| PB93-129708 | p 2525 N93-23256
Medical subject headings: Supplementary chemical records, 1993
| PB93-115244 | p 2525 N93-23279
Comparison of four-cursor buttons versus joystick to access computerized technical information from an integrated maintenance information system
| AD-A259967 | p 2526 N93-23462
Intelligent information retrieval for a multimedia database using captions
| AD-A260438 | p 2528 N93-24113
AGRICOLA subject category codes with scope notes (modified AGRIS)
| PB93-152643 | p 2528 N93-24202
List of journals indexed in AGRICOLA, 1992
| PB93-152650 | p 2528 N93-24204
Advanced information processing
| AD-A260245 | p 2529 N93-24258
Fast image decompression for telebrowsing of images
p 2431 N93-24549

INFORMATION SYSTEMS
The development of a natural language interface to a geographical information system p 2530 N93-22153
An application protocol for CAD to CAD transfer of electronic information p 2530 N93-22154
Development of interactive multimedia applications p 2530 N93-22171
Operator Performance Support System (OPSS) p 2429 N93-22195
A PARC system for terminal docking p 2141 N93-22259
Exploratory research for the development of a computer aided software design environment with the software technology program
|NASA-CR-192821| p 2434 N93-22385
Terrain Referenced Information and Guidance Systems (TRIGS)
|MBB-FE-315-S-PUB-0494| p 2119 N93-22390
Earth sensing data service p 2339 N93-22439
The use of remote sensing data in a statistical ground utilization information system p 2341 N93-22447
Searching the Occurrence Reporting and Processing Systems (ORPS) database
|DE93-005242| p 2523 N93-22499
Beyond interlibrary loan state-of-the-art article retrieval
|DE93-004425| p 2523 N93-22723
An electronic stroll through the global village
|DE93-005962| p 2446 N93-22763
Technology and the 21st Century government organization
|DE93-002506| p 2519 N93-22982
National security and national competitiveness: Open source solutions NASA requirements and capabilities
|NASA-TM-4458| p 2523 N93-23030
The nature of relevance in information retrieval: An empirical study p 2524 N93-23184
Concentration and diversity in informetric research p 2524 N93-23185
Assessing federal and commercial information security needs
|PB93-138956| p 2525 N93-23228
US Geological Survey library classification system
|PB93-129708| p 2525 N93-23256
Automated tools for testing computer system vulnerability
|PB93-146025| p 2433 N93-23273
Engineering data integration: Problems and solutions
|PNR-90999| p 2525 N93-23370
An object-oriented database approach to the storage and use of medical data p 2526 N93-23382
Comparison of four-cursor buttons versus joystick to access computerized technical information from an integrated maintenance information system
|AD-A259967| p 2526 N93-23462
Collection and Distribution of Ecological Data by Satellite: CDEDS p 2344 N93-23511
Collection and distribution of ecological data by satellite pilot projects as demonstration of the concept p 2344 N93-23512
System design for ARTEMIS environmental monitoring p 2349 N93-23545
Remote sensing applied to mapping and other purposes: STADIS project, a practical example in Tunisia p 2352 N93-23561
Prototype for a regional data management system, a step towards a regional land use project p 2353 N93-23571
Executive summary of information systems plans: Fiscal years 1994 to 1998
|PB93-146330| p 2527 N93-23646
1993 Earth Observing System reference handbook
|NASA-NP-202| p 2356 N93-23737
NASDA's Earth observation satellite program p 2357 N93-23751
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810
Integrated global environmental (global change) data activities support researchers and educators p 2370 N93-23834
Mission to Planet Earth p 2372 N93-23845
Modernization and unification: Strategic goals for NASA STI program
|NASA-TM-109186| p 2528 N93-24117
Architecture for human-computer design, management and coordination in a collaborative AEC environment p 2528 N93-24186
List of journals indexed in AGRICOLA, 1992
|PB93-152650| p 2528 N93-24204
Step stress testing of receiver/transmitter units, part 1
|AD-A260182| p 2273 N93-24318
Information handling as task layer of Columbus user support p 2163 N93-24383
Treatment of human-computer interface in a decision support system
|DE93-002281| p 2428 N93-24502
The 1993 Space and Earth Science Data Compression Workshop
|NASA-CP-3191| p 2430 N93-24544
Data compression opportunities in EOSDIS p 2430 N93-24545
Compression through decomposition into browse and residual images p 2430 N93-24546
Activities of the Institute for Information Technology
|NRC-35023| p 2571 N93-24648

INFORMATION TRANSFER
Communications p 2517 N93-23153
New developments in the coordination of Earth observation from space activities: The role of the Committee on Earth Observations Satellites (CEOS) p 2372 N93-23844
United Kingdom Earth observation programme p 2373 N93-23848
US data policy for Earth observation from space p 2373 N93-23852
Satellite data protection from the point of view of a data user: Preparation for full utilization of remote sensing technology p 2374 N93-23854
The impact of computer instruction on the near transfer and far transfer of a general problem-solving strategy p 2527 N93-24094
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
|PB93-152031| p 2416 N93-24605

INFRARED ABSORPTION
The effect of UV light on Ir absorption in chemically vapor deposited a-SiN(x):H films
|DE93-004502| p 2486 N93-22941

INFRARED ASTRONOMY
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
|NASA-CR-192704| p 2546 N93-22469
Observations and modeling of the dust and gas in an isolated diffuse interstellar cloud p 2549 N93-23722
The Infrared Space Observatory (ISO) p 2170 N93-23912
Mid-infrared spectroscopy of solids in relation to the composition of interstellar and intergalactic dust p 2550 N93-24179
Telescience Testbed Program: A study of software for SIRTF instrument control
|NASA-CR-192764| p 2442 N93-24476

INFRARED ASTRONOMY SATELLITE
ROSAT all sky survey observations of IRAS galaxies
|MPE-PREPRINT-220| p 2542 N93-22462

INFRARED DETECTORS
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
|AD-A260043| p 2488 N93-23645

INFRARED IMAGERY
Off-surface infrared flow visualization
|NASA-CASE-LAR-14568-1| p 2486 N93-22037
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
|DE93-004784| p 2303 N93-22706
Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351
Automatic feature extraction and localization using data fusion of radar and infrared images p 2270 N93-23628
Towards infrared image understanding p 2488 N93-24000

INFRARED INSTRUMENTS
Wireless infrared communications for space and terrestrial applications p 2275 N93-22177

INFRARED INTERFEROMETERS
IASI (Infrared Atmospheric Sounding Interferometer): Programme objectives and status p 2364 N93-23794

INFRARED LASERS
An infrared free electron laser system for the proposed Chemical Dynamics Research Laboratory at LBL based on a 500 MHz superconducting linac
|DE93-004723| p 2307 N93-22346
Field profile and loading measurements on higher order modes in a two cell 500 MHz superconducting structure
|DE93-004771| p 2308 N93-22921
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295
Operator interface assessment for the sensor fusion flight demonstration program
|AD-A260235| p 2129 N93-24416

INFRARED PHOTOMETRY
Towards infrared image understanding p 2488 N93-24000

INFRARED RADIATION
Off-surface infrared flow visualization
|NASA-CASE-LAR-14568-1| p 2486 N93-22037
ATTIRE (analytical tools for thermal infrared engineering): A sensor simulation and modeling package p 2305 N93-22203
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
|NASA-TM-105914| p 2125 N93-22588
Field profile and loading measurements on higher order modes in a two cell 500 MHz superconducting structure
|DE93-004771| p 2308 N93-22921
Possible power sources for the Jovian polar infrared hot spots p 2554 N93-23221
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
|AD-A260381| p 2484 N93-24275
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors
|AD-A260532| p 2223 N93-24278
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment
|AD-A259986| p 2401 N93-24424
Infrared vacuum soldering process for thick-film hybrid microcircuits
|DE93-007483| p 2285 N93-24451
Photoabsorption and photodissociation of molecules important in the interstellar medium
|NASA-CR-192829| p 2552 N93-24488

INFRARED RADIOMETERS
Upper-air circulation systems p 2337 N93-22138
Meteosat second generation: A look to the future p 2357 N93-23753
Meteosat second generation enhanced visible-IR imager SEVIRI and its environmental monitoring potential p 2362 N93-23780

INFRARED SCANNERS
Asteroid detection and monitoring using a satellite-borne visible scanner
|AD-A259797| p 2543 N93-23455

INFRARED SIGNATURES
Detectability of high power aircraft
|MBB-FE-S-PUB-0490| p 2262 N93-22682

INFRARED SOURCES (ASTRONOMY)
ROSAT all sky survey observations of IRAS galaxies
|MPE-PREPRINT-220| p 2542 N93-22462
IRAS galaxies in the ROSAT survey p 2536 N93-23897

INFRARED SPACE OBSERVATORY (ISO)
The Infrared Space Observatory (ISO) p 2170 N93-23912

INFRARED SPECTRA
Spirit 2 vehicle: (A26.780). Post flight report
|AD-A259991| p 2172 N93-24250

INFRARED SPECTROMFTERS
Dielectric for the supercapacitors
|AD-A260124| p 2283 N93-24072

INFRARED SPECTROSCOPY
Sputter-deposition and characterization of molybdenum disulfide thin films
|DE93-004801| p 2235 N93-22048
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
|NASA-TM-106021| p 2206 N93-22605
Neutral gas in the central 2 parsecs of the galaxy
|NASA-CR-192801| p 2546 N93-23095
Mid-infrared spectroscopy of solids in relation to the composition of interstellar and intergalactic dust p 2550 N93-24179
High-resolution free-electron laser spectroscopy p 2309 N93-24191

INJECTION
Transverse injection of liquid and gaseous fuels into subsonic/supersonic flow
|AD-A259771| p 2111 N93-23476

INJECTION GUIDANCE
The effect of missions and payload performance on the configuration of an orbital injection system design p 2156 N93-24349

INJECTION MOLDING
Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
|DS-2024| p 2208 N93-22603
Results on powder injection molding of Ni3Al and application to other intermetallic compositions
|DE93-005681| p 2213 N93-24016

INNER RADIATION BELT
Preparation for analysis of data from the langmuir probe instrument on the CRRES satellite
|AD-A260534| p 2201 N93-24280

INSERTS
Blind fastening apparatus
|NASA-CASE-LAR-14542-1| p 2311 N93-22384
Automatic computation of wing-fuselage intersection lines and fillet inserts with fixed-area constraint
|NASA-TM-4406| p 2108 N93-22487

INSOLATION
Current performance and potential improvements in solar thermal industrial heat
|DE93-000048| p 2377 N93-22927
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578

INSPECTION
Reentry systems: Material technology needs p 2176 N93-22108
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping p 2259 N93-22174
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
|NASA-TM-107558| p 2178 N93-22669
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
|NASA-TM-107556| p 2179 N93-23085

INSTALLING
Retrofitting of GPS into existing navigation suites p 2120 N93-22788
The Westinghouse solid oxide fuel cell program: Clean, *efficient energy for the future*
|DE93-003487| p 2380 N93-23287

INSTRUCTORS
Development of interactive multimedia applications p 2530 N93-22171
Earth's mysterious atmosphere. ATLAS 1: Teachers guide with activities
|NASA-EP-282| *p 2396 N93-23733*
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
|NASA-EP-285| *p 2399 N93-24148*

INSTRUMENT ERRORS
Techniques for improving the accuracy of cyrogenic *temperature measurement in ground test programs*
|NASA-TM-105996| p 2302 N93-22484

INSTRUMENT LANDING SYSTEMS
Terrain Referenced Information and Guidance Systems (TRIGS)
|MBB-FE-315-S-PUB-0494| p 2119 N93-22390

INSTRUMENTS
Activities of the Industrial Materials Institute
|NRC-34380| p 2207 N93-24288

INSULATION
A variable current bypass shunt for electromagnets
|DE93-004273| p 2278 N93-22686
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom
|NASA-CR-191106| p 2258 N93-23430
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
|PB93-146991| p 2259 N93-24635

INSULIN
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393

INSURANCE (CONTRACTS)
Insurance cover for space ventures p 2344 N93-23510

INTAKE SYSTEMS
Icing cloud simulator for use in helicopter engine induction system ice protection testing
|DOT/FAA/CT-TN92/43| p 2133 N93-23087

INTEGRAL EQUATIONS
A class of hybrid finite element methods for electromagnetics: A review
|NASA-CR-192631| p 2260 N93-22467
Solution of the Helmholtz-Poincare Wave Equation using the coupled boundary integral equations and optimal surface eigenfunctions
|DE93-005300| p 2470 N93-24038

INTEGRATED CIRCUITS
Analysis of MMIC arrays for use in the ACTS Aero Experiment
|NASA-TM-106073| p 2180 N93-22589
Guided wave phenomena in millimeter wave integrated circuits and components
|AD-A260407| p 2262 N93-22946
A review of optically controlled microwave devices and circuits
|AD-A259647| p 2282 N93-23656
Applicability of superconducting interconnection technology for high speed IC's and systems
|AD-A259706| p 2282 N93-23665
GaAs-based optoelectronic neurons
|NASA-CASE-NPO-18497-1-CU| p 2464 N93-24599

INTEGRATED ENERGY SYSTEMS
Communications and control for electric power. systems
|NASA-CR-192794| p 2261 N93-22477

INTEGRATORS
IMP: A performance code p 2139 N93-22245
A sparse architecture low power gated integrator for use with germanium gamma ray spectrometers in remote geochemistry measurements
|DE93-004769| p 2303 N93-22491
CO2 laser beam propagation with ZnSe optics
|DE93-002927| p 2308 N93-23307
High-frequency BiCMOS transconductance integrators
|ISBN-0-315-60484-0| p 2286 N93-24612

INTELLIGENCE
Intelligent flight control systems p 2107 N93-22576
The impact on organization structure on team decision making under stress and uncertainty
|AD-A259831| p 2519 N93-23434

INTERACTIONAL AERODYNAMICS
Tip-vortex/airframe interactions p 2111 N93-23489

INTERACTIONS
Electron-electron interactions in fast neutral-neutral collisions
|DE93-004841| p 2481 N93-22743

INTERACTIVE CONTROL
Micro-video display with ocular tracking and interactive voice control p 2433 N93-22172
Reactive control and reasoning assistance for scientific laboratory instruments p 2465 N93-22186
Proposed ground-based control of accelerometer on Space Station Freedom
|NASA-TM-105960| p 2201 N93-23738

INTERCEPTION
A conceptual design analysis of an air launched anti-satellite missile system
|ETN-93-93487| *p 2126 N93-23372*

INTERCEPTORS
Near-earth object interception workshop summary
|DE93-003793| p 2546 N93-22403

INTERFACE STABILITY
On the nonlinear interfacial instability of rotating core-annular flow
|NASA-CR-191432| p 2289 N93-22811

INTERFACES
Study and development of a multiprocessor interface circuit (thesis annex), volume 2
|ECL-91-11-VOL-2| p 2446 N93-22676

INTERFACIAL TENSION
Development of an interfacial test system for the determination of interfacial properties in fiber reinforced ceramic composites
|DE93-006743| p 2236 N93-22579
Response of a non-viscous liquid column with anchored liquid surface to axial excitation
|LRT-WE-9-FB-4-1991| p 2288 N93-22677
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating p 2247 N93-22835
Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841
The study of surface tension tanks from the neutral buoyancy to the space flight p 2248 N93-22842
Oscillations of finite liquid columns p 2250 N93-22855
Surface tension and buoyancy driven Stokes flow in cavities p 2250 N93-22856
A method of measuring the interfacial tension of two liquids of the same mass volume: The cylindrical method p 2251 N93-22860
Recent results of multimagnetical simulations of the Ising model
|DE93-005213| p 2475 N93-22951
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178

INTERFEROMETERS
System identification of the JPL micro-precision interferometer truss
|DE93-004044| p 2323 N93-22519
A current assessment of single site locating technology p 2267 N93-23608
Commercialization of atom interferometers for borehole gravity gradiometry
|DE93-006889| p 2398 N93-24018
Fiber optic interferometer configuration with pump-induced phase carrier
|AD-D015617| p 2489 N93-24156
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
|AD-A260229| p 2310 N93-24320
Atom wave interferometer
|AD-A260082| p 2484 N93-24410

INTERFEROMETRY
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
Fluid density and concentration measurement using noninvasive in situ ultrasonic resonance interferometry
|DE93-003741| p 2220 N93-23051
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
|NASA-TM-104002| p 2128 N93-23175
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
The influence of propagation on high frequency radiogoniometry and single station location p 2266 N93-23607
Evaluation of the Bathyscan sweep survey system
|AD-A260162| p 2415 N93-23708
Fiber optic interferometer configuration with pump-induced phase carrier
|AD-D015617| p 2489 N93-24156

INTERFERON
Cytokines and immune surveillance in humans
|NASA-CR-192728| p 2447 N93-22828

INTERGALACTIC MEDIA
Nearby dwarf galaxies: Dust masses and their implications p 2540 N93-23928

INTERGRANULAR CORROSION
Grain boundary chemistry effects on *environment-induced crack growth of iron-based alloys*
|DE93-005039| p 2232 N93-23980

INTERLAMINAR STRESS
Interlaminar mode-2 fracture toughness of a glass-fiber epoxy laminate
|VTT-PUBS-105| p 2208 N93-22815
Analysis of delamination related fracture processes in composites
|NASA-CR-192632| p 2209 N93-23073

INTERLAYERS
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
|DE93-004191| p 2499 N93-22062
Advanced reinforcement systems for intermetallic applications
|NASA-CR-4488| p 2209 N93-22875

INTERMETALLICS
Fracture properties of 7010 and 7050 aluminium alloys under inert and aggressive environmental conditions
|DLR-FB-91-35| p 2228 N93-22658
Characterization of doped NiAl by atom probe field ion microscopy
|DE93-005932| p 2228 N93-22692
Synthesis, processing, and properties of Ti5Si3
|DE93-004465| p 2229 N93-22820
Advanced reinforcement systems for intermetallic applications
|NASA-CR-4488| p 2209 N93-22875
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
|DE93-005558| p 2230 N93-22977
Characterization of SAES St198 zirconium-iron-tin alloy
|DE93-005697| p 2230 N93-23036
Copper/solder intermetallic growth studies
|AD-A259856| p 2232 N93-23955
Results on powder injection molding of Ni3Al and application to other intermetallic compositions
|DE93-005681| p 2213 N93-24016
Phase stability and electronic structure of transition-metal aluminides
|DE93-003584| p 2234 N93-24499

INTERNAL COMBUSTION ENGINES
Controlling chaos in spark-ignition engines
|DE93-005754| p 2312 N93-22761
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
|PB93-144376| p 2313 N93-22902
Formation and control of combustion pollutants from gasoline-fueled spark-ignition motor vehicle engines
|PB93-141042| p 2314 N93-23275
1991 CRC octane number requirement survey
|AD-A259821| p 2245 N93-23667
Assessment of future natural gas vehicle concepts
|PB93-138923| p 2317 N93-24145
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
|PB93-141059| p 2320 N93-24628

INTERNAL PRESSURE
Optimal bolt preload for dynamic loading
|DE92-017527| p 2313 N93-22923

INTERNAL WAVES
Bottom generated velocity fluctuations in one-dimensional open channel flow
|MEMO-1051| p 2297 N93-23865
Studies of mixing and internal waves in the upper ocean p 2415 N93-23962

INTERNATIONAL COOPERATION
Use of remote sensing as part of the technical co-operation with developing countries p 2339 N93-22438
CORECT: Committee On Renewable Energy Commerce and Trade, 1991
|DE92-016436| p 2377 N93-22890
Industry perspectives p 2154 N93-23162

NASA reports p 2154 N93-23163
International cooperation and commitments in the ISY and beyond p 2154 N93-23164
European Telecommunications Standards Institute. Apreliminary analysis
|PB93-138824| p 2263 N93-23271
Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
|ESA-ISY-2| p 2343 N93-23507
Financial alternatives for global satellite navigation p 2124 N93-23519
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
|ESA-ISY-1-VOL-3| p 2356 N93-23748
Meteosat operational programme current missions and services p 2357 N93-23752
Cooperation with Europe in NOAA operational satellite programs p 2357 N93-23754
Italian Space Agency activities in Earth observation p 2358 N93-23756
The scientific program of the Priroda project p 2360 N93-23771
Priroda project: Optical sensors for environment research p 2362 N93-23782
The International Space Year programme p 2366 N93-23803
COSPAR/SAFISY panel of experts on space science scientific program for the ISY p 2366 N93-23804
NOAA participation in ISY Earth science and other activities p 2366 N93-23805
German contributions to the International Space Year ISY 1992 p 2366 N93-23806
The Swedish ISY projects: A joint national contribution p 2366 N93-23807
GeoEnvironment Carpathes project p 2368 N93-23816
Centres for space science and technology education: A United Nations initiative p 2369 N93-23826
The tropical school for atmospheric and space sciences: An international project proposal p 2369 N93-23828
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
Mission to Planet Earth p 2372 N93-23845
NASDA's Earth observing programs and the contribution to resolving global environment programs p 2372 N93-23846
Canadian Earth observation program p 2373 N93-23847
The contribution of the Italian Space Agency to the establishment of space services for the changing Earth p 2373 N93-23849
Columbus programme overview p 2155 N93-24337
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
Final report on the first step in distributed remote sensing
|DE93-007936| p 2375 N93-24520

INTERNATIONAL LAW
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851
International law perspective on establishing a European regulation with regard to the legal protection of the use of satellite remote sensing data p 2374 N93-23855

INTERNATIONAL RELATIONS
Post Cold War assessment of US space policy: A task group report
|PB93-139962| p 2532 N93-22900

INTERNATIONAL SPACE YEAR
International cooperation and commitments in the ISY and beyond p 2154 N93-23164
Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
|ESA-ISY-2| p 2343 N93-23507
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
|ESA-ISY-1-VOL-3| p 2356 N93-23748
The International Space Year programme p 2366 N93-23803
COSPAR/SAFISY panel of experts on space science scientific program for the ISY p 2366 N93-23804
NOAA participation in ISY Earth science and other activities p 2366 N93-23805
German contributions to the International Space Year ISY 1992 p 2366 N93-23806
The Swedish ISY projects: A joint national contribution p 2366 N93-23807
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
|ESA-ISY-3| p 2533 N93-23878
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
|ESA-ISY-4| p 2154 N93-24336
Columbus precursor Spacelab missions p 2155 N93-24341

INTERNATIONAL SYSTEM OF UNITS
NASA metric transition plan
|NASA-TM-108606| p 2258 N93-23209
Federal move to metric: Public Law, DoC and NIST
|PB93-139129| p 2258 N93-23284
Support measurement and estimating for oracle database applications using Mark 2 function points
|AD-A259686| p 2440 N93-23661

INTERNATIONAL TRADE
Future trends in power generation cost by power resource
|DE93-761825| p 2378 N93-22957

INTERPLANETARY DUST
Inward electrostatic precipitation of interplanetary particles
|NASA-CR-192786| p 2552 N93-24477

INTERPLANETARY MAGNETIC FIELDS
The solar wind control of reconnection at the dayside magnetopause p 2556 N93-23236
Long period pulsation events in electron precipitation and magnetic fields at the South Pole p 2394 N93-23387

INTERPLANETARY MEDIUM
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
|PB93-134021| p 2556 N93-23243
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921

INTERPLANETARY SPACE
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO p 2540 N93-23929

INTERPLANETARY SPACECRAFT
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 1: Draft final
|NASA-CR-192488| p 2177 N93-22348
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 2: Draft final
|NASA-CR-192489| p 2178 N93-22959
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
|NASA-CR-192491| p 2178 N93-22960
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 5: Nuclear electric propulsion vehicle
|NASA-CR-192493| p 2178 N93-22990
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 4: Solar electric propulsion vehicle
|NASA-CR-192492| p 2178 N93-22993
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 2: Cryo/aerobrake vehicle
|NASA-CR-192490| p 2179 N93-23251

INTERPOLATION
Regional-scale analysis and forecasting
|AD-A259894| p 2403 N93-22733
Comparison of operational and standard methods for data in rectangular array
|DE93-007783| p 2471 N93-24574

INTERPROCESSOR COMMUNICATION
The design of scalable software libraries for distributed memory concurrent computers
|DE93-003612| p 2434 N93-22332
PMC: A shared short-cut to portable parallel power
|DE93-005815| p 2447 N93-22868
Reducing communication inefficiencies for a flexible programming paradigm
|DE93-005670| p 2438 N93-23327

INTERSTELLAR EXTINCTION
Multiwavelength analysis of starburst galaxies p 2539 N93-23920
X raying the interstellar dust p 2540 N93-23925

INTERSTELLAR GAS
The kinematics of stars and gas in the galactic disk p 2550 N93-23991
The formation of enhanced, low-ionization emission in galactic halos p 2551 N93-24180

INTERSTELLAR MATTER
Stellar lyman alpha emission and the local interstellar medium
|NASA-CR-192635| p 2541 N93-22381
An MHD study of the interaction between the solar wind and the interstellar medium
|NASA-CR-192353| p 2556 N93-23067
The Boston University-Arecibo galactic HI survey: The galaxy at 4 arcminute resolution p 2543 N93-23720
Observations and modeling of the dust and gas in an isolated diffuse interstellar cloud p 2549 N93-23722
ROSAT observations of supernova remnants and the interstellar medium p 2534 N93-23884
X raying the interstellar dust p 2540 N93-23925
Nearby dwarf galaxies: Dust masses and their implications p 2540 N93-23928
Mid-infrared spectroscopy of solids in relation to the composition of interstellar and intergalactic dust p 2550 N93-24179
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue p 2164 N93-24394
Photoabsorption and photodissociation of molecules important in the interstellar medium
|NASA-CR-192829| p 2552 N93-24488

INTERSTITIALS
Implications of defect clusters formed in cascades on free defect generation and microstructural development
|DE93-005551| p 2500 N93-22344

INTOXICATION
Safety study: Alcohol and other drug involvement in fatal general aviation accidents, 1983 through 1988
|PB92-917008| p 2117 N93-23187

INVARIANCE
Galileo's relativity principle, the concept of pressure, and complex characteristics, for the six-equation, one-pressure model
|DE93-005240| p 2515 N93-22952
On positive invariance and constrained control of linear multivariable systems
|LAAS-92223| p 2462 N93-23862

INVENTIONS
Quick acting gimbal joint
|NASA-CASE-MSC-21918-1| p 2314 N93-23076
Technology utilization and American competitiveness p 2153 N93-23158

INVENTORIES
Guidelines for estimating and applying rule effectiveness for ozone CO state implementation plan base year inventories
|PB93-131498| p 2389 N93-24163

INVERSE KINEMATICS
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension p 2318 N93-24184

INVERSIONS
Inverting sets and the packing problem
|DE93-003822| p 2466 N93-22075
A systematic study of the effects of crust and upper mantle structure on regional seismograms
|AD-A260231| p 2399 N93-24086

INVERTERS
Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
|ETN-93-93421| p 2278 N93-22679
Modelling a single phase voltage controlled rectifier using Laplace transforms
|NASA-TM-106005| p 2474 N93-23016

INVISCID FLOW
Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
|NASA-TM-107726| p 2108 N93-22552
Upwind relaxation method for hypersonic flow simulation
|DLR-FB-91-36| p 2109 N93-22659

IO
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403
Solar system observations with HST p 2534 N93-23889

IODINE
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
|ONERA-P-1992-3| p 2309 N93-24137

IODINE COMPOUNDS
Control of the concentration gradient during crystal growth from solution p 2165 N93-24395

ION ATOM INTERACTIONS
Electron transfer, ionization, and excitation in atomic collisions
|DE93-005918| p 2478 N93-22050

Dissipative trapped electron mode turbulence with ion Landau damping and FLR effects
| DE93-004524 | p 2494 N93-22942
Computer simulation of atomic collision processes in solids
| DE93-005106 | p 2483 N93-23310

ION BEAMS
The PNL high-transmission three-stage mass spectrometer
| DE93-006143 | p 2486 N93-22506
Alpha effects on TAE modes and alpha transport
| DE93-004160 | p 2494 N93-22940
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
| DE93-005560 | p 2230 N93-22943
Ion and electron beam processing of condensed molecular solids to form thin films
| DE93-007273 | p 2504 N93-22955
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
| DE93-004815 | p 2230 N93-22991
High-temperature Au implantation into Ni-Be and Ni-Si alloys
| DE93-005555 | p 2505 N93-23022
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
| DE93-003846 | p 2327 N93-23291
Novel materials synthesis using an intense pulsed ion beam
| DE93-005470 | p 2506 N93-23314
Ion beam modification of ceramics: Mechanical properties and structure
| AD-A260504 | p 2242 N93-24419
Ion beam mixing in multi-quantum well structures
| AD-A259772 | p 2516 N93-24509

ION CURRENTS
Electronic and ionic transport in processable conducting polymers
| AD-A260223 | p 2238 N93-22918
Multiply charged ions from laser driven plasma sources p 2495 N93-23242
Methane conversion by solid electrolyte membranes
| PB93-127041 | p 2222 N93-23994

ION CYCLOTRON RADIATION
An ICRF antenna edge plasma density profile diagnostic for DIII-D
| DE93-006729 | p 2498 N93-24328

ION EMISSION
LOGION: Operation of a liquid metal ion emitter module under microgravity p 2158 N93-24359

ION IMPACT
Theory of electron ejection from surfaces by highly charged ion impact
| DE93-004109 | p 2479 N93-22070

ION IMPLANTATION
Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180
A vibrational analysis of Au implanted Al2O3 single crystals: Ion and thermal annealing effects
| DE93-006216 | p 2501 N93-22508
Influence of addition elements in copper or implanted in aluminum on the adhesion to the solid state of the copper/aluminum (Cu/Al2O3) system
| ECL-91-34 | p 2228 N93-22698
Design of a large-scale plasma source ion implantation experiment
| DE93-005438 | p 2493 N93-22746
High-temperature Au implantation into Ni-Be and Ni-Si alloys
| DE93-005555 | p 2505 N93-23022
Cavities in He-implanted Si: Internal surface science
| DE93-005340 | p 2509 N93-24012
Solute binding at void surfaces in silicon and germanium
| DE93-004504 | p 2233 N93-24048
ion beam mixing in multi-quantum well structures
| AD-A259772 | p 2516 N93-24509

ION IRRADIATION
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
| DE93-005560 | p 2230 N93-22943
Ion and electron beam processing of condensed molecular solids to form thin films
| DE93-007273 | p 2504 N93-22955
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
| DE93-007392 | p 2485 N93-24565

ION MICROSCOPES
Characterization of doped NiAl by atom probe field ion microscopy
| DE93-005932 | p 2228 N93-22692
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360

ION PLATING
Sputter ion plating on Ti6Al4V4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
| MBB-Z-0444-92-PUB | p 2239 N93-23365

ION PROBES
Construction and evaluation of a metal ion biosensor
| AD-A259775 | p 2304 N93-23452

ION PROPULSION
Development of arcjet and ion propulsion for spacecraft stationkeeping
| NASA-TM-106102 | p 2204 N93-23747

ION SCATTERING
The PNL high-transmission three-stage mass spectrometer
| DE93-006143 | p 2486 N93-22506

ION SOURCES
Development of a miniature mass analyzer and associated instrumentation for improved capabilities in the analysis of low energy plasmas from a rocket or satellite platform
| NASA-CR-192453 | p 2202 N93-22014
Simple optics description of the plasma sheath and plasma electrode region
| DE93-004851 | p 2491 N93-22224
LOGION: Operation of a liquid metal ion emitter module under microgravity p 2158 N93-24359

ION TRAPS (INSTRUMENTATION)
The design and construction of an ion trap based system for laser pyrolysis/mass spectrometry of single organic aerosol particles
| AD-A260455 | p 2222 N93-24115

IONIC COLLISIONS
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions
| DE93-003478 | p 2478 N93-22031
Theory of electron ejection from surfaces by highly charged ion impact
| DE93-004109 | p 2479 N93-22070

IONIC CRYSTALS
Aspects of photoionization of impurities and electron transfer in ionic crystals
| DE93-008544 | p 2513 N93-24511

IONIC MOBILITY
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere p 2394 N93-23388
Methane conversion by solid electrolyte membranes
| PB93-127041 | p 2222 N93-23994
The study of polyether solvation mechanisms using UV/visible spectroscopy
| AD-A260355 | p 2241 N93-24170

IONIC REACTIONS
Laser excitation and chemi-ionization of combustion species
| AD-A260120 | p 2224 N93-24414

IONIZATION
Electron transfer, ionization, and excitation in atomic collisions
| DE93-005918 | p 2478 N93-22050
Photon acceleration via laser-produced ionization fronts
| DE93-005205 | p 2480 N93-22719
Studies of the formation chemical reactivity and properties of small clusters application to an understanding of aerosol formation and heterogeneous chemistry
| DE93-005920 | p 2221 N93-23309
New methods and instrumentation for the characterization of biopolymers using electrospray ionization-mass spectrometry
| DE93-005100 | p 2239 N93-23323
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
| NASA-TM-4443 | p 2559 N93-23396
Metallic ions and atoms in the upper atmosphere
| AD-A259741 | p 2394 N93-23478
Laser excitation and chemi-ionization of combustion species
| AD-A260120 | p 2224 N93-24414

IONIZATION CROSS SECTIONS
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions
| DE93-003478 | p 2478 N93-22031
Negative ion detachment cross sections
| DE93-005679 | p 2483 N93-23328

IONIZATION POTENTIALS
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
| AD-A260309 | p 2234 N93-24237

IONIZED GASES
The formation of enhanced, low-ionization emission in galactic halos p 2551 N93-24180

IONIZING RADIATION
P0004-1 quick look
| NASA-CR-192459 | p 2193 N93-23009
DosiMir: Radiation measurements inside the Soviet Space Station Mir, first results p 2160 N93-24371

IONOPAUSE
Model of Venus ionopause formation p 2554 N93-23354

IONOSPHERIC CONDUCTIVITY
Radiolocation of a satellite-borne LOVHF beacon p 2268 N93-23613

IONOSPHERIC CURRENTS
Latitudinally period-dependent pulsations: A model of the distributed perturbation ionospheric Hall current. The resultant ground field and a study of 3 intervals p 2547 N93-23194

IONOSPHERIC DISTURBANCES
Latitudinally period-dependent pulsations: A model of the distributed perturbation ionospheric Hall current. The resultant ground field and a study of 3 intervals p 2547 N93-23194
Source mechanisms and radio effects of ionospheric plasma
| AD-A259743 | p 2395 N93-23480
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604

IONOSPHERIC ELECTRON DENSITY
Radiolocation of a satellite-borne LOVHF beacon p 2268 N93-23613
Systematic bearing errors of HF signals observed over a North-South propagation path p 2268 N93-23614
Large bearing errors observed at a high latitude DF site p 2268 N93-23615
Measurements of the direction of arrival of an oblique chirp sounder signal p 2268 N93-23616

IONOSPHERIC F-SCATTER PROPAGATION
On the hierarchy of processes contributing to equatorial spread F p 2395 N93-23595

IONOSPHERIC HEATING
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
| DE93-005833 | p 2493 N93-22779

IONOSPHERIC PROPAGATION
High Arctic high frequency radio communications and a seven day polar cap absorption event
| DREP-TM-91-18 | p 2264 N93-23344
Propagation characteristics of the ionospheric transmission window relating to long wave radio location issues p 2265 N93-23600
Propagation effects on HF direction finding p 2265 N93-23602
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604
Irregular media effects on radiowave signals used in navigation and positioning systems p 2266 N93-23606

IONOSPHERIC SOUNDING
Measurements of the direction of arrival of an oblique chirp sounder signal p 2268 N93-23616
Angle of arrival characteristics of ionospheric skywave signals p 2268 N93-23618

IONOSPHERIC TILTS
Propagation effects on HF direction finding p 2265 N93-23602

IONS
Theory of electron ejection from surfaces by highly charged ion impact
| DE93-004109 | p 2479 N93-22070
EXCPACK: A package of codes for electron impact excitation of ions by a distorted wave method
| DE93-006095 | p 2479 N93-22525
Design of a large-scale plasma source ion implantation experiment
| DE93-005438 | p 2493 N93-22746
Spectroscopy of highly-ionized atoms using position-sensitive detection
| DE93-002914 | p 2482 N93-22985
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
| DE93-004815 | p 2230 N93-22991
Multiply charged ions from laser driven plasma sources p 2495 N93-23242
Computer simulation of atomic collision processes in solids
| DE93-005106 | p 2483 N93-23310
The role of the dipole-dipole interaction in the solvation of monoatomic monovalent ions on the basis of the mean spherical approximation
| AD-A260284 | p 2483 N93-24234
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
| AD-A260309 | p 2234 N93-24237
Laser excitation and chemi-ionization of combustion species
| AD-A260120 | p 2224 N93-24414

IOWA
Small business profiles, 1992: Region 7: Iowa, Kansas, Missouri, and Nebraska
| PB93-110989 | p 2521 N93-24285

IRIS SATELLITES
Italian Space Agency activities in Earth observation
p 2358 N93-23756

IRON
Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
| DE93-004204 | p 2499 N93-22064
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
| DE93-004203 | p 2502 N93-22523
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films
p 2505 N93-23100
Iron fertilization of the austral ocean: A model assessment
| MPIM-84 | p 2415 N93-23860

IRON ALLOYS
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
| DE93-004104 | p 2226 N93-22069
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Characterization of SAES St198 zirconium-iron-tin alloy
| DE93-005697 | p 2230 N93-23036
Grain boundary chemistry effects on environment-induced crack growth of iron-based alloys
| DE93-005039 | p 2232 N93-23980
The magnetism of metallic manganese alloys
| DE93-005153 | p 2233 N93-24037
Acceptable aluminum additions for minimal environmental effect in iron-aluminum alloys
| DE93-006738 | p 2234 N93-24329

IRON CHLORIDES
Structure of molten iron chloride
| DE93-004814 | p 2219 N93-22742

IRON ISOTOPES
A massive neutrino in nuclear beta decay?
| DE93-004718 | p 2479 N93-22333
A massive neutrino in nuclear beta decay?
| DE93-004706 | p 2482 N93-22950

IRON OXIDES
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films
p 2505 N93-23100

IRRADIANCE
Multiple molecular scattering and albedo action on the solar spectral irradiance in the region of the UVB (less than or equal to 320 nm): A preliminary inventory
| AERONOMICA-ACTA-A-363-1991 |
p 2558 N93-24637

IRRADIATION
Near-earth object interception workshop summary
| DE93-003793 | p 2546 N93-22403
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
| DE93-005560 | p 2230 N93-22943
Enhanced vortex pinning and critical current density in proton-irradiated YBa2Cu3O(7-delta) thin films
| DE93-005367 | p 2507 N93-23326
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
| AD-D015623 | p 2241 N93-24257

IRREGULARITIES
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
| AD-A259943 | p 2401 N93-24322

ISING MODEL
Pretransformation strain modulations in proper ferroelastics
| DE93-005468 | p 2226 N93-22340
Experimental studies of critical behavior of systems with quenched disorder
| DE93-005090 | p 2228 N93-22717
Recent results of multimagnetical simulations of the Ising model
| DE93-005213 | p 2475 N93-22951

ISOTHERMAL FLOW
Three-dimensional isothermal flow simulations of an MHD secondary combustor
| DE93-006631 | p 2497 N93-24035

ISOTHERMAL PROCESSES
Gel time measurements on carbon fiber/epoxy resin prepregs
| ICAS-90-4-10-4 | p 2210 N93-23400

ISOTOPE EFFECT
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
| DE93-005115 | p 2235 N93-22409
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
| DE93-005450 | p 2503 N93-22748

ISOTOPE SEPARATION
Growth and characterization of isotopically enriched Ge-70 and Ge-74 single crystals
| DE93-004697 | p 2510 N93-24050

ISOTOPES
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
| DE93-005115 | p 2235 N93-22409
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
| DE93-005450 | p 2503 N93-22748
Isotope tracer studies of diffusion in silicates and of geological transport processes using actinide elements
| DE93-006902 | p 2392 N93-23029

ISOTOPIC LABELING
High resolution studies of atoms and small molecules
| DE93-004340 | p 2481 N93-22758
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
| DE93-004800 | p 2220 N93-22989

ISOTOPIC SPIN
Particle physics
| DE93-006894 | p 2482 N93-22992

ISOTROPIC MEDIA
Metrologic support for the DARPA/NRL-XRL Mask Program: Ellipsometric analyses of SiC thin films on Si
| PB93-152098 | p 2225 N93-24632

ISOTROPY
Propagation of elastic waves through inhomogeneous, anisotropic materials
| DE93-006247 | p 2288 N93-22509

ITALIAN SPACE PROGRAM
Italian Space Agency activities in Earth observation
p 2358 N93-23756
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798
The contribution of the Italian Space Agency to the establishment of space services for the changing Earth
p 2373 N93-23849
Italian payload development status for Columbus
p 2164 N93-24392

ITALY
Microscale geomorphological analysis in middle Italy using airborne and satellite remote sensing techniques
p 2355 N93-23581

ITERATIVE SOLUTION
Copper Mountain conference on iterative methods, volume 2
| DE93-004994 | p 2466 N93-22405
Improved deterministic calculational methods for irregularly shaped shields
| DE93-004955 | p 2467 N93-22795
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
Automatic differentiation of advanced CFD codes for multidisciplinary design
| DE93-005685 | p 2290 N93-22867
A comparative study of preconditioned Lanczos methods for nonsymmetric linear system
| DE93-006453 | p 2436 N93-22979
Development of iterative techniques for the solution of unsteady compressible viscous flows
| NASA-CR-192636 | p 2296 N93-23724

IUE
The IUE archive(s) p 2535 N93-23895

J

J INTEGRAL
J-integral of circumferential crack in large diameter pipes
| DE93-003708 | p 2326 N93-23050
Two-parameter fracture mechanics theory and applications
| AD-A259907 | p 2330 N93-23993

JACKETS
Variable pressure insulating jackets for high-temperature batteries
| DE93-006404 | p 2283 N93-24027
Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
| AD-D015627 | p 2241 N93-24221

JAHN-TELLER EFFECT
Theoretical study of reactions at the electrode-electrolyte interface
| DE93-006899 | p 2221 N93-23341

JAMMERS
Data selection for fast projection techniques: A comparative study of direction finding performance
| AD-A259916 | p 2262 N93-22814
Detection of active emitters using triangulation and trilateration techniques: Theory and practice
p 2267 N93-23612

JAMMING
Communication interference/jamming and propagation analysis system and its application to radio location
p 2269 N93-23621

JAPAN
Survey of the Hokkaido development project
| DE93-761804 | p 2382 N93-24013

JAPANESE SPACE PROGRAM
Overview of ISY plan p 2334 N93-22120
Japanese plan for SSF utilization
p 2184 N93-22616
NASDA's Earth observation satellite program
p 2357 N93-23751
NASDA's Earth observing programs and the contribution to resolving global environment programs
p 2372 N93-23846
JEM program status p 2155 N93-24339

JAPANESE SPACECRAFT
Overview of Earth environment data set: MOS-1/MOS-1b data sets p 2334 N93-22121
MOS-1 p 2340 N93-22442
NASDA's Earth observation satellite program
p 2357 N93-23751

JET AIRCRAFT
Report to the Chairman, Subcommittee on Defense, Committee on Appropriations, House of Representatives. Intelligence programs: New RC-135 aircraft engines can reduce cost and improve performance
| AD-A259283 | p 2105 N93-22397
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575

JET ENGINE FUELS
Exhaust emissions from diesel engines
| DE93-752852 | p 2384 N93-22805
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
| AD-A260249 | p 2246 N93-24332

JET ENGINES
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
| NASA-TM-105914 | p 2125 N93-22588
Conceptual design study of a variable cycle engine for a supersonic business jet
| ETN-93-93486 | p 2130 N93-23371
X ray computed tomography for whole system evaluation (small engines)
| AD-A259519 | p 2130 N93-23669

JET FLOW
Spatial development of chaos in an open flow system
p 2515 N93-24293

JET STREAMS (METEOROLOGY)
Intraseasonal relationships between tropical heating and extratropical jets
| AD-A260212 | p 2408 N93-24004

JFET
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
| DE93-006679 | p 2278 N93-22577

JOINED WINGS
Low-speed wind tunnel study of the direct lift and direct side-force characteristics of a joined-wing airplane
| DE93-767971 | p 2115 N93-24508

JOINTS (JUNCTIONS)
Quick acting gimbal joint
| NASA-CASE-MSC-21918-1 | p 2314 N93-23076
The consequence of joint failures
p 2212 N93-23941
Joint flexibility effects on the dynamic response of structures. Part 1: Deterministic analysis
| AD-A260487 | p 2331 N93-24135

JOSEPHSON JUNCTIONS
High temperature superconductivity
| AD-A259692 | p 2283 N93-24023

JOURNAL BEARINGS
Stability and stability degree of a cracked flexible rotor supported on journal bearings
| ILR-MITT-268(1991) | p 2313 N93-23020

JP-8 JET FUEL
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels data sets
| AD-A260220 | p 2220 N93-22917
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
| AD-A260249 | p 2246 N93-24332

JUDGMENTS
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
[NASA-TM-105914] p 2125 N93-22588
JUPITER (PLANET)
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403
Solar system observations with HST p 2534 N93-23889
JUPITER ATMOSPHERE
Possible power sources for the Jovian polar infrared hot spots p 2554 N93-23221

K

K LINES
Global solar intensity oscillations near solar maximum p 2557 N93-23492
K-EPSILON TURBULENCE MODEL
Navier-Stokes computation of compressible turbulent flows with a second order closure, part 1
[NASA-CR-192287] p 2288 N93-22604
Numerical simulation of flow through orifice meters
[PB93-124121] p 2293 N93-23349
KALMAN FILTERS
Multivariable frequency response methods for optimal Kalman-Bucy filters with applications to radar tracking systems p 2255 N93-22024
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking p 2151 N93-22316
Optimization of the integration of inertia and GPS p 2120 N93-22787
Flight evaluation of differential GPS aided inertial navigation systems p 2120 N93-22790
An hierarchic alliance of filters for fault tolerant navigation using two inertial systems with aiding sensors p 2121 N93-22793
Semi-active suspension for automotive application
[MEMT-17] p 2316 N93-23377
Precise flight navigation by integration of global positioning system and inertial measurement units p 2124 N93-23523
Localization system based on data merging of images and inertia p 2269 N93-23623
Real-time signal processing systems
[AD-A259548] p 2272 N93-24084
KANSAS
Small business profiles, 1992: Region 7: Iowa, Kansas, Missouri, and Nebraska
[PB93-110989] p 2521 N93-24285
KAONS
Fundamental symmetry tests with antihydrogen
[DE93-005467] p 2479 N93-22541
KAPTON (TRADEMARK)
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom
[NASA-CR-191106] p 2258 N93-23430
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
[NASA-TM-106084] p 2195 N93-23742
KELVIN-HELMHOLTZ INSTABILITY
Structure and dynamics of the magnetopause p 2400 N93-24296
KENTUCKY
Small business profiles, 1992: Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
[PB93-110955] p 2519 N93-23286
KINEMATIC EQUATIONS
Variational theory of deformations of curved, twisted, and extensible elastic rods
[AD-A260331] p 2332 N93-24266
KINEMATICS
Theories of elastoplasticity coupled with continuum damage mechanics
[DE93-007426] p 2323 N93-22534
A study of four-jet events and search for double parton interactions at square root of s = 1.8 TeV
[DE93-005973] p 2480 N93-22693
Kinematics and dynamics of robotic systems with multiple closed loops p 2318 N93-24218
KINETIC ENERGY
H(-) beam neutralization measurements in a solenoidal beam transport system
[DE93-005460] p 2481 N93-22908
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
[DE93-004815] p 2230 N93-22991
Energy dissipator
[NASA-CASE-MSC-21555-1] p 2314 N93-23075
Turbulence models for helical flow
[GKSS-92/E/12] p 2291 N93-23189
Control and analysis of a single-link flexible beam with experimental verification
[DE93-003756] p 2314 N93-23289
A multiple-scale model for compressible turbulent flows
[NASA-TM-106072] p 2296 N93-23736
Studies in penetration mechanics
[AD-A260436] p 2332 N93-24304
KINETIC EQUATIONS
Poloidal variation of viscous forces in the banana collisionality regime
[DE93-006822] p 2499 N93-24504
KINETICS
Photochemical observation of ion flows in membrane channels
[AD-A259869] p 2219 N93-22731
Adsorption kinetics at liquid-liquid interfaces in microgravity conditions. Experimental approach and theoretical background p 2248 N93-22843
Kinetics of diffusional droplet growth in a liquid/liquid two-phase system
[NASA-CR-192624] p 2292 N93-23220
KNOWLEDGE BASED SYSTEMS
Knowledge-based vision techniques for the autonomous land vehicle program
[AD-A259801] p 2459 N93-23457
Knowledge-based systems for computational control
[AD-A260409] p 2527 N93-24110
KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Advanced software development workstation. Knowledge base design: Design of knowledge base for flight planning application
[NASA-CR-192818] p 2434 N93-22040
Application of fuzzy set and Dempster-Shafer theory to organic geochemistry interpretation p 2450 N93-22212
Intelligent systems technology infrastructure for integrated systems p 2145 N93-22285
Fuzzy logic controllers: A knowledge-based system perspective p 2453 N93-22352
An expert system for the diagnostic and maintenance of various aircraft components
[MBB-FE-363-S-PUB-0499] p 2105 N93-22392
Trail maneuver generation and selection in the Paladin tactical decision generation system
[NASA-TM-107722] p 2131 N93-23088
Access methods for large, multifunctional knowledge bases p 2525 N93-23381
KNOWLEDGE REPRESENTATION
Advanced software development workstation. Knowledge base design: Design of knowledge base for flight planning application
[NASA-CR-192818] p 2434 N93-22040
Application of fuzzy set and Dempster-Shafer theory to organic geochemistry interpretation p 2450 N93-22212
Multi-layered reasoning by means of conceptual fuzzy sets p 2455 N93-22365
Access methods for large, multifunctional knowledge bases p 2525 N93-23381
Multispectral intelligent fusion techniques p 2352 N93-23564
An ontology of knowledge graphs
[MEMO-1049] p 2441 N93-24063
KOLMOGOROFF THEORY
Transformations of gaussian random fields and a test for independence of a survival time from a covariate
[AD-A260442] p 2472 N93-24114
KONDO EFFECT
Synchrotron studies of narrow band materials
[DE93-006981] p 2502 N93-22526
KORTEWEG-DEVRIES EQUATION
The symmetry equation package for REDUCE
[MEMO-1053] p 2469 N93-23866
KRYPTON FLUORIDE LASERS
New analysis of KrF picosecond pulse experiment
[DE93-003805] p 2308 N93-23290
KRYPTON 85
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
[DE93-004585] p 2217 N93-22339

L

LABORATORIES
Capsule review of DOE research and development laboratories and field facilities
[DE93-003282] p 2570 N93-22402
Laser safety training programs for a large and diverse research and development laboratory
[DE93-006291] p 2307 N93-22546
Ongoing research projects at VTT in 1991
[ISBN-951-38-3771-8] p 2570 N93-23423
LABORATORY EQUIPMENT
Gravitational Biology Facility on Space Station: Meeting the needs of space biology p 2186 N93-22625
LAGEOS (SATELLITE)
Italian Space Agency activities in Earth observation p 2358 N93-23756
LAGRANGE MULTIPLIERS
Adaptive meshing in solids
[DE93-003238] p 2287 N93-22331
LAKES
Water temperature characteristics of lakes subjected to climate change
[PB93-135648] p 2385 N93-23265
Computational modeling of the environment with applications to lake eutrophication
[TKK-1991/1] p 2386 N93-23425
LAMINAR BOUNDARY LAYER
Swept wing attachment line contamination fence
[NASA-CASE-LAR-13400-1] p 2107 N93-22015
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402
LAMINAR FLOW
Structure of confined laminar spray diffusion flames: Numerical investigation
[NASA-TM-106038] p 2288 N93-22596
Space Station Freedom combustion research p 2190 N93-22643
Upwind relaxation method for hypersonic flow simulation
[DLR-FB-91-36] p 2109 N93-22659
Mechanisms and enhancement of flame stabilization
[DE93-006467] p 2219 N93-22709
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
Numerical prediction of transition of the F-16 wing at supersonic speeds
[NASA-CR-192706] p 2111 N93-23392
Numerical modeling of fluidic flow meters
[PB93-124139] p 2301 N93-24577
LAMINAR FLOW AIRFOILS
Numerical prediction of transition of the F-16 wing at supersonic speeds
[NASA-CR-192706] p 2111 N93-23392
LAMINATES
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
Interlaminar mode-2 fracture toughness of a glass-fiber epoxy laminate
[VTT-PUBS-105] p 2208 N93-22815
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
[NASA-CR-192813] p 2209 N93-23043
High Temperature Composite Analyzer (HITCAN) programmer's manual. Version 1.0
[NASA-TM-106004] p 2326 N93-23056
Analysis of delamination related fracture processes in composites
[NASA-CR-192632] p 2209 N93-23073
The effects of delamination on the vibrational characteristics of composite structural elements p 2210 N93-23202
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
[NASA-CR-190783] p 2210 N93-23429
Fiber-metal laminates: A solution to weight, strength, and fatigue problems p 2211 N93-23938
Damage in laminated composites due to low velocity impact p 2213 N93-23947
A process model for control of resin volume fraction in filament wound composite laminates p 2213 N93-23948
High temperature superconducting compounds
[AD-A259926] p 2284 N93-24129
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217
LAND MANAGEMENT
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
Environmental data sets for International Space Year activities in Australia p 2338 N93-22147
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
Study of the cultivated land losses around Tunis p 2368 N93-23819
LAND MOBILE SATELLITE SERVICE
Land mobile satellite communications systems and services p 2275 N93-23517
EUTELTRACS: The European land mobile satellite service p 2276 N93-23526
LAND USE
Gridded state maps of wind electric potential
[DE93-004556] p 2379 N93-22988

Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
| DE93-000690 | p 2405 N93-23305
The ERS-1 radarmaps of Germany and the Antarctic Peninsula p 2352 N93-23562
Remote sensing and land use in the region of Tuscany (Italy). A new methodology for the integration of very heterogeneous data p 2353 N93-23567
Assessment of actual land use by means of an integrated LIS p 2353 N93-23568
Prototype for a regional data management system, a step towards a regional land use project p 2353 N93-23571
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm p 2354 N93-23576
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770
Contribution of remote sensing and GIS for rangeland management in the region of Ouarzazate (Morocco) p 2367 N93-23814
Study of the cultivated land losses around Tunis p 2368 N93-23819

LANDFORMS
Image interpretation for landforms using expert systems and terrain analysis p 2342 N93-23213

LANDING
Integrated and Multi-Function Navigation
| AGARD-CP-525 | p 2119 N93-22780
Visual autonomous automatic landing of airplanes p 2121 N93-22791

LANDING AIDS
Scene correlation for INS aiding in flight-test systems: Runway-referenced flight-tests with on-board sensors only p 2121 N93-22792

LANDING GEAR
Orbiter lessons learned: A guide to future vehicle development p 2175 N93-22100

LANDING INSTRUMENTS
Ground proximity warning system for use with aircraft having degraded performance
| CA-PATENT-1-295-716 | p 2118 N93-24200

LANDING SITES
GPS multipath errors in the precision landing environment p 2106 N93-22569

LANDSAT SATELLITES
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
| ESA-TT-1245 | p 2339 N93-22436
Effects of cloud cover on satellite positioning
| AD-A260032 | p 2409 N93-24252

LANDSAT 4
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
| DLR-FB-92-10 | p 2374 N93-24140

LANDSAT 5
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573

LANDSLIDES
The influence of geology and geomorphology on landslide hazards in an area in the Colombian Andes: The GIS approach p 2351 N93-23557
Remote sensing landslide hazard mapping using GIS technology in Colombian Andes p 2351 N93-23559
Applicability of satellite remote sensing for slope instability hazard zonation p 2368 N93-23817

LANGEVIN FORMULA
Data-parallel Langevin dynamics simulations
| DE93-003836 | p 2445 N93-22434

LANTHANUM OXIDES
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
| DE93-004800 | p 2220 N93-22989

LAP JOINTS
A new method of impact tension testing of adhesively-bonded joints p 2212 N93-23939
A fracture mechanics approach to failure load predictions of structural adhesive joints p 2212 N93-23940
Designing for damage tolerant composite repairs
| AD-A260094 | p 2214 N93-24053

LAPLACE EQUATION
Numerical treatment of vertex singularities and intensity factors for mixed boundary value problems for the Laplace equation in R3
| AD-A260107 | p 2469 N93-23713

LAPLACE TRANSFORMATION
Modelling a single phase voltage controlled rectifier using Laplace transforms
| NASA-TM-106005 | p 2474 N93-23016

LARGE SPACE STRUCTURES
Space Transportation Materials and Structures Technology Workshop. Volume 2: Proceedings
| NASA-CP-3148-VOL-2 | p 2172 N93-22081
System identification of the JPL micro-precision interferometer truss
| DE93-004044 | p 2323 N93-22519
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
Control design variable linking for optimization of structural/control systems
| NASA-CR-4493 | p 2125 N93-22827
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
| NASA-TM-107729 | p 2327 N93-23235
Vibration control experiments on a 12-meter cantilever truss structure
| AD-A259764 | p 2328 N93-23484
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956
Antenna pattern control using impedance surfaces
| NASA-CR-192712 | p 2273 N93-24471

LASER ABLATION
The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
| DE93-006279 | p 2501 N93-22510
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
| DE93-005420 | p 2505 N93-22976

LASER ANEMOMETERS
Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
| NASA-TM-105986 | p 2129 N93-22599

LASER APPLICATIONS
Molecular design concept for x ray laser research
| DE93-004561 | p 2306 N93-22046
Approach range and velocity determination using laser sensors and retroreflector targets p 2147 N93-22297
Laser safety training programs for a large and diverse research and development laboratory
| DE93-006291 | p 2307 N93-22546
Quantum theory of multiwave mixing with applications to squeezing in both atomic and semiconductor media
| AD-A259875 | p 2514 N93-22732
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
| DE93-005833 | p 2493 N93-22779
Applications of x ray lasers
| DE93-005299 | p 2308 N93-22953
Geochemical mapping of the lunar surface using laser-induced ion mass spectrometry from landers and rovers
| DE93-003849 | p 2554 N93-23292
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393
Imaging technique for welding studies
| DE93-006449 | p 2316 N93-23694
The design and construction of an ion trap based system for laser pyrolysis/mass spectrometry of single organic aerosol particles
| AD-A260455 | p 2222 N93-24115
Laser excitation and chemi-ionization of combustion species
| AD-A260120 | p 2224 N93-24414
Nonlinear dynamics research in the former Soviet Union
| PB93-146496 | p 2333 N93-24571

LASER BEAMS
Experimental, theoretical and computational study of frequency upshift of electromagnetic radiation using plasma techniques
| DE93-005092 | p 2260 N93-22407
Self-focusing of broadband laser pulses in dispersive media
| DE93-007369 | p 2307 N93-22529
Laser diagnostics p 2311 N93-23260
CO2 laser beam propagation with ZnSe optics
| DE93-002927 | p 2308 N93-23307
Active microparticle media
| AD-A259722 | p 2487 N93-23639
Nonlinear optics and turbulence
| AD-A259950 | p 2489 N93-24244
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
| AD-D015623 | p 2241 N93-24257
Sample positioning in microgravity
| NASA-CASE-NPO-18448-1-CU | p 2253 N93-24600

LASER CAVITIES
Semiconductor laser with a self-pumped phase conjugate external cavity
| AD-A260028 | p 2310 N93-24323

LASER DAMAGE
Laser safety training programs for a large and diverse research and development laboratory
| DE93-006291 | p 2307 N93-22546
Optical analysis of lenslet arrays
| AD-A260126 | p 2488 N93-23702

LASER DEPOSITION
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
| DE93-005474 | p 2500 N93-22342

LASER DOPPLER VELOCIMETERS
Photochemical observation of ion flows in membrane channels
| AD-A259869 | p 2219 N93-22731
An investigation of particle turbulence quantities in a dense two-phase pipe flow, using laser Doppler velocimetry p 2295 N93-23496
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
| AD-A260149 | p 2297 N93-24132
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
| NASA-TM-102643 | p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
| NASA-TM-102644 | p 2116 N93-24528
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
| NASA-TM-101599 | p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
| NASA-TM-101598 | p 2116 N93-24540

LASER FUSION
High-power optical coatings for a mega-Joule class ICF laser
| DE93-005821 | p 2306 N93-22328
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
| DE93-005833 | p 2493 N93-22779
Pulse power requirements for large aperture optical switches based on plasma electrode Pockels cells
| DE93-005824 | p 2279 N93-22997
Experimental determination of the hydrodynamic instability growth rates in indirect and direct drive ICF
| DE93-006278 | p 2496 N93-23676

LASER GYROSCOPES
An overview of optical gyroscopes for navigation p 2119 N93-22783

LASER HEATING
Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation p 2251 N93-22857
Experimental investigation of consolidation of thermoplastic tape using laser energy p 2212 N93-23944

LASER INDUCED FLUORESCENCE
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
| DE93-005457 | p 2482 N93-23244
Development of a laser-induced fluorescence system for application to rocket plumes
| AD-A259760 | p 2205 N93-24025
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors
| AD-A260532 | p 2223 N93-24278

LASER INTERFEROMETRY
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
| AD-A260119 | p 2329 N93-23700
Calibration of a standard transducer using a laser interferometer (TTCP calibration round-robin)
| NRC-34387 | p 2305 N93-24289

Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
| AD-A260229 | p 2310 N93-24320

LASER MATERIALS
CO2 laser beam propagation with ZnSe optics
| DE93-002927 | p 2308 N93-23307
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295

LASER OUTPUTS
High power diode pumped solid state lasers
| DE93-005818 | p 2307 N93-22691
Calculation of 3-D free electron laser gain: Comparison with simulation and generalization to elliptical cross section
| DE93-004768 | p 2308 N93-22920
Studies of tunable, high power excimer lasers p 2309 N93-23597
Nonlinear analysis of relativistic harmonic generation by intense lasers in plasmas
| AD-A260092 | p 2497 N93-24052
High-resolution free-electron laser spectroscopy p 2309 N93-24191
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295

LASER PLASMA INTERACTIONS
Experimental, theoretical and computational study of frequency upshift of electromagnetic radiation using plasma techniques
| DE93-005092 | p 2260 N93-22407

LASER PLASMAS
Witness plate shock velocity study
| DE93-005742 | p 2474 N93-22760
Multiply charged ions from laser driven plasma sources p 2495 N93-23242
Laser driven hydrodynamic instability experiments
| DE93-005822 | p 2308 N93-23330
X ray absorption spectroscopy of dense, shock compressed, laser plasma p 2496 N93-23497
Nonlinear analysis of relativistic harmonic generation by intense lasers in plasmas
| AD-A260092 | p 2497 N93-24052

LASER PROPULSION
A reactor-pumped laser as primary power for nuclear rocket engines
| DE93-005342 | p 2203 N93-22501

LASER PUMPING
Selective reactivity, ultrafast energy transfer and the development of chemically pumped visible lasers
| AD-A260123 | p 2309 N93-24071
Inexpensive capillary discharge x ray laser driver
| AD-A260388 | p 2310 N93-24276

LASER RANGE FINDERS
A comparison of laser based ranging systems for AR/C category 1: Hardware p 2144 N93-22278

LASER SPECTROSCOPY
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
| DE93-004432 | p 2228 N93-22724
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
| DE93-003865 | p 2553 N93-22949
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
| DE93-005457 | p 2482 N93-23244
High-resolution free-electron laser spectroscopy p 2309 N93-24191
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors
| AD-A260532 | p 2223 N93-24278
Laser spectroscopy of chemically reactive species
| DE93-006672 | p 2310 N93-24326

LASER TARGETS
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
| DE93-005474 | p 2500 N93-22342

LASER WINDOWS
Three-dimensional laser window formation for industrial application p 2310 N93-22197

LASERS
Laser docking sensor engineering model p 2139 N93-22247
Often overlooked electrical hazards common in many lasers
| DE93-003856 | p 2307 N93-22430
Laser safety training programs for a large and diverse research and development laboratory
| DE93-006291 | p 2307 N93-22546

LASING
Application of 10 GeV electron driven x ray laser in gamma ray laser research
| DE93-003775 | p 2308 N93-22773
Inexpensive capillary discharge x ray laser driver
| AD-A260388 | p 2310 N93-24276

LATCHES
Contact dynamics testing of automated three point docking mechanism p 2149 N93-22306

LATENT HEAT
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139

LATTICE PARAMETERS
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426
A structural study of charge-density-wave perturbations in mixed-halide MX solids
| DE93-005449 | p 2503 N93-22747
Structure and dynamics in low dimensional guest-host solids
| DE93-006498 | p 2504 N93-22887
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
| DE93-005350 | p 2505 N93-22974

LATTICE VIBRATIONS
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426

LATTICES (MATHEMATICS)
Truth-Valued-Flow Inference (TVFI) and its applications in approximate reasoning p 2452 N93-22223
The canonical forms of a lattice rule
| DE93-005686 | p 2466 N93-22759

LAUNCH VEHICLES
Space propulsion p 2174 N93-22092
Vehicle systems p 2174 N93-22095
Propulsion Systems Panel p 2174 N93-22096
Vehicle Systems Panel deliberations p 2175 N93-22098
Built-up Al-Li structures for cryogenic tank and dry bay applications p 2175 N93-22099
Orbiter lessons learned: A guide to future vehicle development p 2175 N93-22100
Hybrid rocket propulsion p 2175 N93-22102
Reliability of solid rocket motor cases and nozzles p 2176 N93-22103
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236
Transportation systems analyses, volume 2
| NASA-CR-192486 | p 2177 N93-22386
Candidate technologies for the Integrated Health Management Program
| NASA-CR-192339 | p 2420 N93-22655
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
| NASA-CR-192456 | p 2203 N93-22963
Transportation systems analyses. Volume 1: Executive summary
| NASA-CR-192485 | p 2179 N93-23008
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104
New launch technologies and American competitiveness p 2153 N93-23157
Spirit 2 vehicle: (A26.780). Post flight report
| AD-A259991 | p 2172 N93-24250
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
| NASA-TM-101641 | p 2180 N93-24522

LAUNCH WINDOWS
Autonomous rendezvous targeting techniques for national launch system application p 2145 N93-22284

LAUNCHERS
A multiple armature railgun launcher
| AD-A259768 | p 2171 N93-23486

LAUNCHING
Robust Neighboring Optimal Guidance for the Advanced Launch System --- Author
| NASA-CR-192087 | p 2171 N93-22009
Advanced launch system trajectory optimization using suboptimal control p 2171 N93-22010
National Launch System: Structures and materials p 2172 N93-22083
Thermal protection materials at NASA Ames Research Center p 2177 N93-22114
Rendezvous strategy impacts on CTV avionics design, system reliability requirements, and available collision avoidance maneuvers p 2139 N93-22248
On-board fault management for autonomous spacecraft p 2140 N93-22255
Space Station Freedom research capabilities p 2183 N93-22609
New launch technologies and American competitiveness p 2153 N93-23157
A multiple armature railgun launcher
| AD-A259768 | p 2171 N93-23486

LAW (JURISPRUDENCE)
Vulnerability assessment of aircraft: A review of the Department of Defense Live Fire Test and Evaluation Program
| PB93-149946 | p 2127 N93-23678
Eumetsat practice for protection of its satellite data p 2373 N93-23850
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851
US data policy for Earth observation from space p 2373 N93-23852
Conditions of access to Earth observation data: Legal aspects p 2373 N93-23853
Satellite data protection from the point of view of a data user: Preparation for full utilization of remote sensing technology p 2374 N93-23854
International law perspective on establishing a European regulation with regard to the legal protection of the use of satellite remote sensing data p 2374 N93-23855

LAYOUTS
Center for shape optimization and material layout
| AD-A260087 | p 2471 N93-24411

LEAD (METAL)
The diffusion of lead toward the interface of a rapidly solidified carbon fiber reinforced aluminum-lead matrix composite p 2210 N93-23719
Airborne studies of ocean-particle-cloud interactions
| AD-A259874 | p 2415 N93-23958

LEAD ACID BATTERIES
Interagency Advanced Power Group Solar Photovoltaic Panel Fall Meeting minutes
| DE93-006188 | p 2376 N93-22330
Battery compatibility with photovoltaic charge controllers
| DE93-005373 | p 2377 N93-22537

LEAD ALLOYS
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
| DE93-006041 | p 2230 N93-23024

LEAD ZIRCONATE TITANATES
Chemically prepared Pb(Zr,Ti)O3 thin films: The effects of orientation and stress
| DE93-004501 | p 2500 N93-22324
Metallo-organic solution deposition of ferroelectric PZT films
| AD-A260127 | p 2502 N93-22549
Processing of patterned ferroelectric capacitors
| AD-A259936 | p 2284 N93-24131

LEADERSHIP
Implementing total quality management (TQM) 1: The command imperative
| AD-A259885 | p 2520 N93-23981

LEADING EDGE FLAPS
Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics p 2113 N93-24136

LEADING EDGES
Swept wing attachment line contamination fence
| NASA-CASE-LAR-13400-1 | p 2107 N93-22015
Navier-Stokes analysis of airfoils with leading edge ice accretions
| NASA-CR-191008 | p 2109 N93-22822
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402
An oscillating three-dimensional wing experiment: Compressibility, sweep, rate, waveform, and geometry effects on unsteady separation and dynamic stall
| AD-A260530 | p 2114 N93-24224

LEAKAGE
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803
A leakage canceller for a single antenna radar
| ETN-93-93495 | p 2264 N93-23379
A new approach for helium backfilling and leak testing seal-welded capsules in a hot cell
| DE93-004519 | p 2317 N93-24049

LEARNING
Space support forum p 2153 N93-23160
Using recurrent networks for dimensionality reduction
| AD-A259497 | p 2459 N93-23464

LEAST SQUARES METHOD
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
System identification and model reduction using modulating function techniques
| NASA-CR-192807 | p 2438 N93-23248
A comparison of polynomial and rational NARMAX models for nonlinear system identification
| RR-444 | p 2469 N93-23374

Identification of systems from non-uniformly sampled data
[RR-452] p 2472 N93-23375
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Least squares surface approximation to scattered data using multiquadric functions
[AD-A259804] p 2469 N93-23640
Comparison of operational and standard methods for data in rectangular array
[DE93-007783] p 2471 N93-24574

LECTURES
Index to NASA news releases and speeches, 1992
[NASA-TM-109187] p 2524 N93-23172

LENGTH
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
[PB93-139004] p 2256 N93-22079

LENSES
The PNL high-transmission three-stage mass spectrometer
[DE93-006143] p 2486 N93-22506
CO2 laser beam propagation with ZnSe optics
[DE93-002927] p 2308 N93-23307
Optical analysis of lenslet arrays
[AD-A260126] p 2488 N93-23702

LEPTONS
Physics from photon and lepton-pair spectra
[DE93-003083] p 2481 N93-22752

LIAPUNOV FUNCTIONS
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956

LIBRARIES
The design of scalable software libraries for distributed memory concurrent computers
[DE93-003612] p 2434 N93-22332
Motif, the basics: An overview of the widget set
[DE93-005273] p 2436 N93-22720
Beyond interlibrary loan state-of-the-art article retrieval
[DE93-004425] p 2523 N93-22723
US Geological Survey library classification system
[PB93-129708] p 2525 N93-23256
Medical subject headings: Supplementary chemical records, 1993
[PB93-115244] p 2525 N93-23279
Public libraries in the US, 1990
[PB93-127926] p 2525 N93-23285
Modernization and unification: Strategic goals for NASA STI program
[NASA-TM-109186] p 2528 N93-24117
AGRICOLA subject category codes with scope notes (modified AGRIS)
[PB93-152643] p 2528 N93-24202
List of journals indexed in AGRICOLA, 1992
[PB93-152650] p 2528 N93-24204

LICENSING
Applicability of trends in nuclear safety analysis to space nuclear power systems
[DE93-003169] p 2205 N93-24497

LIFE (DURABILITY)
Non-proprietary stack research
[DE93-007523] p 2376 N93-22535

LIFE CYCLE COSTS
Rendezvous strategy impacts on CTV avionics design, system reliability requirements, and available collision avoidance maneuvers p 2139 N93-22248
Approach range and velocity determination using laser sensors and retroreflector targets p 2147 N93-22297
Summary of activities of the Life Cycle Costing Workshop conducted by the Environmental Restoration Program of Oak Ridge National Laboratory
[DE93-000823] p 2531 N93-22935

LIFE SCIENCES
A modular, programmable measurement system for physiological and spaceflight applications p 2305 N93-22201
Space Station Freedom Utilization Conference
[NASA-TM-108742] p 2182 N93-22606
Space Station Freedom Utilization Conference: Executive summary p 2182 N93-22607
Opportunities for research on Space Station Freedom p 2183 N93-22610
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Space life sciences perspectives for Space Station Freedom p 2185 N93-22619
Life sciences utilization of Space Station Freedom p 2185 N93-22622
Life sciences recruitment objectives p 2186 N93-22623
Biomedical Monitoring and Countermeasures Facility p 2186 N93-22624
Gravitational Biology Facility on Space Station: Meeting the needs of space biology p 2186 N93-22625
Research opportunities with the Centrifuge Facility p 2187 N93-22627
An on-orbit viewpoint of life sciences research p 2187 N93-22629
Crew health p 2187 N93-22630
Bibliography of the Biosciences Division: 1986 to present
[DCIEM-92-20] p 2419 N93-23343

LIFE SUPPORT SYSTEMS
Mars transfer vehicle studies p 2173 N93-22088
Introduction to Space Station Freedom p 2182 N93-22608
Integrated oxygen recovery system
[NASA-CR-192343] p 2426 N93-22663
A computer simulation of a hyperbaric chamber environment
[AD-A260137] p 2134 N93-23705

LIFT
An approximate method for estimating the lifting characteristics of thin bodies of non-circular cross-section
[CRANFIELD-AERO-9006] p 2108 N93-22395

LIFT DEVICES
Advanced underwater lift device
[NASA-CR-185709] p 2169 N93-22877

LIFTING BODIES
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
[NASA-TM-101641] p 2180 N93-24522

LIFTOFF (LAUNCHING)
Characterizing the uncertainty in holddown post load measurements
[NASA-TP-3332] p 2304 N93-23731

LIGANDS
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
[DE93-007013] p 2218 N93-22515

LIGHT ALLOYS
NASA-UVA Light Aerospace Alloy and Structures Technology Program: LA(2)ST
[NASA-CR-192354] p 2230 N93-23193

LIGHT AMPLIFIERS
Pulse power requirements for large aperture optical switches based on plasma electrode Pockels cells
[DE93-005824] p 2279 N93-22997

LIGHT CURVE
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO p 2540 N93-23929

LIGHT ELEMENTS
An x ray scatter approach for non-destructive chemical analysis of low atomic numbered elements p 2485 N93-22184

LIGHT EMITTING DIODES
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Solar-powered light emitting diode power line avoidance marker design
[AD-A259886] p 2381 N93-23983

LIGHT GAS GUNS
Concept definition study for an extremely large aerophysics range facility
[NASA-CR-4491] p 2133 N93-22987

LIGHT IONS
From simple to complex reactions: Nuclear collisions near the Coulomb barrier
[DE93-004197] p 2478 N93-22063
Novel materials synthesis using an intense pulsed ion beam
[DE93-005470] p 2506 N93-23314

LIGHT MODULATION
Novel optical processor for phased array antenna
[AD-A260474] p 2273 N93-24277

LIGHT SCATTERING
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
[DE93-005115] p 2235 N93-22409
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates p 2395 N93-23493
Light extinction in the atmosphere
[DE93-005034] p 2397 N93-23978
Quasi-binary decision making using light scattering
[AD-A260470] p 2489 N93-24197

LIGHT SOURCES
Transversely polarized source cladding for an optical fiber
[NASA-CASE-LAR-14652-1-SB] p 2486 N93-22039
Application of 10 GeV electron driven x ray laser in gamma ray laser research
[DE93-003775] p 2308 N93-22773

LIGHTHILL METHOD
An asymptotic theory of supersonic propeller noise
[NASA-CR-191110] p 2477 N93-24070

LIGHTNING
Local Lightning Early Warning System (LLEWS), phase 1
[DE93-006609] p 2403 N93-22595
Radiolocation in the lower ELF frequency band p 2270 N93-23630

LIMBS (ANATOMY)
Finite element analysis of a composite artificial ankle p 2423 N93-22189

LINE CURRENT
Modelling a single phase voltage controlled rectifier using Laplace transforms
[NASA-TM-106005] p 2474 N93-23016

LINE OF SIGHT
Climatological probability of cloud-free line-of-sight
[AD-A260139] p 2407 N93-23706

LINE OF SIGHT COMMUNICATION
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
[ACTA-POL-SCAND-EL-69] p 2264 N93-23367

LINE SPECTRA
A joint program with Japanese investigators to map carbon 2 line emission from the galaxy
[NASA-CR-192704] p 2546 N93-22469
A proposed neutral line signature
[NASA-CR-192335] p 2393 N93-23211
Global solar intensity oscillations near solar maximum p 2557 N93-23492
SUMER: Solar Ultraviolet Measurements of Emitted Radiation p 2541 N93-23931

LINEAR ACCELERATORS
Application of 10 GeV electron driven x ray laser in gamma ray laser research
[DE93-003775] p 2308 N93-22773

LINEAR ARRAYS
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604

LINEAR ENERGY TRANSFER (LET)
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
[NASA-TM-4443] p 2559 N93-23396

LINEAR SYSTEMS
Temporal identification of linear and nonlinear structures
[ECL-90-33] p 2324 N93-22696
A comparative study of preconditioned Lanczos methods for nonsymmetric linear system
[DE93-006453] p 2436 N93-22979
Mean levels in nonlinear analysis and identification
[RR-454] p 2525 N93-23378
On positive invariance and constrained control of linear multivariable systems
[LAAS-92223] p 2462 N93-23862

LINEARIZATION
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
[DE93-005607] p 2279 N93-22945
Adaptive predistortion linearization of nonlinear power amplifiers
[ISBN-0-315-60483-2] p 2286 N93-24611

LINGUISTICS
Natural Language Processing Systems Evaluation Workshop
[RL-TR-91-362] p 2437 N93-23091
Interpretation as abduction
[AD-A259608] p 2425 N93-24227

LININGS
Analysis of upward flame spread
[DE93-752850] p 2257 N93-22770
User's guide to Flexible Membrane Liner Advisory Expert System, Flex version 3.0
[PB93-134872] p 2259 N93-24559

LINKAGES
Quick acting gimbal joint
[NASA-CASE-MSC-21918-1] p 2314 N93-23076
Force reflecting hand controller
[NASA-CASE-NPO-17851-1-CU] p 2314 N93-23078

LIQUEFACTION
Horizontal stress in-situ by cone penetrometers and related studies
[AD-A260503] p 2401 N93-24418

LIQUEFIED NATURAL GAS
A comparative analysis of alternative fuels for the INEL vehicle fleet
[DE93-007224] p 2319 N93-24256

LIQUID CHROMATOGRAPHY
A gel-permeation chromatography study of electrochemically synthesized Poly(3-alkylthiophenes)
[AD-A259864] p 2239 N93-23957

LIQUID COOLING
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
| DE93-005795 | p 2376 N93-22417
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
| AD-A260556 | p 2298 N93-24282
LIQUID CRYSTALS
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
| NASA-TM-106083 | p 2294 N93-23404
Processable precursors to high performance liquid crystalline polymers
| AD-A260466 | p 2240 N93-24116
LIQUID FUELS
Biofuels program plan, FY 1992 - 1996
| DE93-000036 | p 2245 N93-23048
Direct conversion of light hydrocarbon gases to liquid fuel
| DE93-004916 | p 2245 N93-23321
Spray combustion experiments and numerical predictions
| NASA-TM-106069 | p 2296 N93-23744
LIQUID HELIUM
Zero sound experiments in superfluid He3
| ISBN-951-22-0841-5 | p 2476 N93-23005
LIQUID HYDROGEN
Space propulsion p 2174 N93-22092
LIQUID METALS
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
| NASA-CR-191065 | p 2203 N93-22662
LOGION: Operation of a liquid metal ion emitter module under microgravity p 2158 N93-24359
LIQUID PHASE EPITAXY
Control of the concentration gradient during crystal growth from solution p 2165 N93-24395
LIQUID PROPELLANT ROCKET ENGINES
Advanced rocket propulsion p 2174 N93-22091
Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
| NASA-CR-184472 | p 2259 N93-23715
LIQUID ROCKET PROPELLANTS
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
| NASA-CR-192456 | p 2203 N93-22963
LIQUID SURFACES
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation p 2251 N93-22857
LIQUID-GAS MIXTURES
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Determination and characteristics of the transition to two-phase slug flow in small channels
| DE93-004250 | p 2299 N93-24434
LIQUID-LIQUID INTERFACES
On the nonlinear interfacial instability of rotating core-annular flow
| NASA-CR-191432 | p 2289 N93-22811
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating p 2247 N93-22835
Adsorption kinetics at liquid-liquid interfaces in microgravity conditions. Experimental approach and theoretical background p 2248 N93-22843
Oscillations of finite liquid columns p 2250 N93-22855
A method of measuring the interfacial tension of two liquids of the same mass volume: The cylindrical method p 2251 N93-22860
Charge transfer processes on liquid/liquid interfaces: The first hundred years
| AD-A260421 | p 2225 N93-24429
LIQUID-SOLID INTERFACES
Response of a non-viscous liquid column with anchored liquid surface to axial excitation
| LRT-WE-9-FB-4-1991 | p 2288 N93-22677
Wetting hysteresis of tin on silica solid surfaces of controlled periodic roughness p 2251 N93-22861
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897
Phase transitions at the fluid-solid interface in a model for the adsorption of hard spheres
| AD-A260304 | p 2223 N93-24235
LIQUID-VAPOR INTERFACES
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864
LIQUIDS
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating p 2247 N93-22835
LITERATURE
Chinese research on shock physics
| PB93-134450 | p 2474 N93-22080
LITHIUM
Microstructure of rapidly-solidified lithium powders
| DE93-004765 | p 2229 N93-22880
Reversible potassium vanadium bronze cathodes (K(x)V6O(13 + y)) with various potassium to vanadium ratios
| CTN-93-60709 | p 2285 N93-24291
LITHIUM ALLOYS
Design of an ultra-high-strength weldable Al-Cu-Li alloy for space applications p 2211 N93-23936
LITHIUM CHLORIDES
Life cycle testing of desiccant core samples
| PB93-127058 | p 2220 N93-23098
LITHIUM HYDRIDES
Microstructure of rapidly-solidified lithium powders
| DE93-004765 | p 2229 N93-22880
LITHIUM NIOBATES
Research in photorefractive crystals
| AD-A260391 | p 2513 N93-24425
LITHIUM SULFUR BATTERIES
Study on the improved reliability and safety of lithium batteries by the use of electrochemical noise measurement, volume 1
| FL-D-22-VOL-1 | p 2282 N93-23501
Study on the improved reliability and safety of lithium batteries by the use of electrochemical noise measurement, volume 2
| FL-D-22-VOL-2 | p 2282 N93-23728
ANL's electric vehicle battery activities for USABC
| DE93-005691 | p 2319 N93-24446
LITHOGRAPHY
Design and manufacture of optical system for use in UV lithography with the free electron laser
| DE93-005440 | p 2307 N93-22539
LITHOLOGY
Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
| PB93-132769 | p 2394 N93-23255
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24006
LOAD DISTRIBUTION (FORCES)
Development and production of sandwich rods with load transmitting elements carrying high tension and compression loads
| DLR-FB-91-33 | p 2208 N93-22657
LOAD TESTS
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
| DE93-003806 | p 2208 N93-22432
Dynamic analysis of Free-Piston Stirling Engine/Linear Alternator-load system-experimentally validated
| NASA-TM-106034 | p 2473 N93-22559
The role of fatigue testing in the design, development, and certification of the ATR 42/72
| ETN-93-93704 | p 2127 N93-23969
LOADS (FORCES)
A macro-micro robot for precise force applications p 2465 N93-22158
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704
Energy dissipator
| NASA-CASE-MSC-21555-1 | p 2314 N93-23075
Geogrid reinforced base courses for flexible pavements for light aircraft: Test section construction, behavior under traffic, laboratory tests, and design criteria
| DOT/FAA/RD-92/25 | p 2134 N93-23128
Characterizing the uncertainty in holddown post load measurements
| NASA-TP-3332 | p 2304 N93-23731
LOCAL AREA NETWORKS
Evaluating the potential of combining an expert system and simulation for LAN selection p 2524 N93-23127
Intelligent, integrated fiber optic networks
| AD-A260282 | p 2490 N93-24260
LOCOMOTION
Two techniques for measuring locomotion impact forces during zero G
| NASA-TP-3305 | p 2421 N93-23410
Perception/action: An holistic approach
| AD-A259597 | p 2428 N93-24067
LOG PERIODIC ANTENNAS
Log-periodic slot antenna
| CA-PATENT-1-296-421 | p 2272 N93-24203
LOGIC CIRCUITS
Study and development of a multiprocessor interface circuit (thesis annex), volume 2
| ECL-91-11-VOL-2 | p 2446 N93-22676
Theoretical and experimental investigations of coincidences in Poisson distributed pulse trains and spectral distortion caused by pulse pileup
| ISBN-0-315-60449-2 | p 2286 N93-24614
LOGIC DESIGN
Two generalizations of Kohonen clustering p 2449 N93-22207
A fuzzy logic controller system
| AD-A259723 | p 2439 N93-23467
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133
LOGISTICS
The role of smart systems in rendezvous, close proximity operations and docking maneuvers p 2150 N93-22310
Distributed computer systems and logistics systems: What do they have in common besides distribution?
| MEMO-INF-92-44 | p 2448 N93-23872
LOGISTICS MANAGEMENT
NetView technical research
| NASA-CR-192822 | p 2434 N93-22043
LONG DURATION SPACE FLIGHT
Crew health p 2187 N93-22630
LONG WAVE RADIATION
Propagation characteristics of the ionospheric transmission window relating to long wave radio location issues p 2265 N93-23600
LONGITUDE
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
LOSSES
Non-proprietary stack research
| DE93-007523 | p 2376 N93-22535
LOUISIANA
Small business profiles, 1992. Region 6: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
| PB93-110971 | p 2520 N93-24159
LOW ALTITUDE
Optimal recovery from microburst wind shear p 2107 N93-22574
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
| NASA-TM-103863 | p 2122 N93-23419
An integrated Rotorcraft Avionics/Controls Architecture to support advanced controls and low-altitude guidance flight research
| NASA-TM-103983 | p 2134 N93-24493
LOW CARBON STEELS
A study into the effects of electric fields and currents on the aging and quench hardening of steels
| AD-A260228 | p 2233 N93-24098
LOW CONCENTRATIONS
Solubility, viscosity and density of refrigerant/lubricant mixtures
| DE93-007809 | p 2243 N93-24506
LOW COST
Built-up Al-Li structures for cryogenic tank and dry bay applications p 2175 N93-22099
Inexpensive capillary discharge x ray laser driver
| AD-A260388 | p 2310 N93-24276
LOW FREQUENCIES
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
| PB93-136422 | p 2413 N93-22893
The single-gap hollow spherical dipole in non-conducting media
| AD-A260017 | p 2273 N93-24460
Suspension device for low-frequency structures
| NASA-CASE-LAR-14272-1-CU | p 2169 N93-24598
LOW GRAVITY MANUFACTURING
The scientific microgravity fluid mechanics program of ZARM p 2247 N93-22832
LOW NOISE
Initial trials results for image stabilisation using a rugged low noise gyroscope p 2255 N93-22021
Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
Low-voltage-swing CMOS transceivers
| DE93-006607 | p 2277 N93-22511
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
| NASA-TM-106080 | p 2313 N93-23019
LOW PRESSURE
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
| DE93-005616 | p 2257 N93-22416
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
| DE93-005917 | p 2479 N93-22418
LOW SPEED
Damage in laminated composites due to low velocity impact p 2213 N93-23947

Low-speed wind tunnel study of the direct lift and direct side-force characteristics of a joined-wing airplane
[DE93-767971] p 2115 N93-24508

LOW TEMPERATURE
Methane oxidation over dual redox catalysts
[DE92-012454] p 2217 N93-22431
Summary of the 1992 ACP Winter Conference on Future Trends in Low Temperature Physics
[AD-A259809] p 2508 N93-23643
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
[AD-A260184] p 2484 N93-24467

LOW TEMPERATURE PHYSICS
Summary of the 1992 ACP Winter Conference on Future Trends in Low Temperature Physics
[AD-A259809] p 2508 N93-23643

LOW THRUST
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
[NASA-CR-185171] p 2205 N93-24536

LOWER ATMOSPHERE
Low altitude acoustic propagation analysis by use of a three-dimensional parabolic wave equation
[ONERA-P-1992-1] p 2477 N93-24190

LOWER BODY NEGATIVE PRESSURE
Altered fluid shift dynamics with 6 days in microgravity p 2160 N93-24369
Cardiovascular stress test with non-invasive techniques p 2165 N93-24399

LOWER IONOSPHERE
Propagation characteristics of the ionospheric transmission window relating to long wave radio location issues p 2265 N93-23600

LUBRICANTS
Compatibility of refrigerants and lubricants with elastomers
[DE93-006429] p 2216 N93-22057
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
[NASA-TM-106014] p 2236 N93-22560
Compatibility of refrigerants and lubricants with elastomers
[DE93-007808] p 2237 N93-22729
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE93-006426] p 2237 N93-22884
Compatibility of refrigerants and lubricants with motor materials
[DE93-006428] p 2237 N93-22885
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE93-007806] p 2237 N93-22915
Formability of type 304 stainless steel sheet
[DE92-018619] p 2229 N93-22924
Friction microprobe investigation of particle layer effects on sliding friction
[DE92-018868] p 2313 N93-22925
ARTI refrigerant database
[DE93-006431] p 2239 N93-23949
Solubility, viscosity and density of refrigerant/lubricant mixtures
[DE93-007809] p 2243 N93-24506
Compatibility of refrigerants and lubricants with engineering plastics
[DE93-007826] p 2243 N93-24507

LUBRICATING OILS
Compatibility of refrigerants and lubricants with engineering plastics
[DE93-007826] p 2243 N93-24507

LUBRICATION
Friction microprobe investigation of particle layer effects on sliding friction
[DE92-018868] p 2313 N93-22925
Boundary film for structural ceramic materials
[DE93-004871] p 2240 N93-23975

LUBRICATION SYSTEMS
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
[NASA-TM-105830] p 2312 N93-22826

LUMINESCENCE
Luminescence and picosecond photo-induced absorption of polyaniline
[AD-A260002] p 2242 N93-24436

LUMINOSITY
The optical counterparts of the x ray binaries in NGC 6712 and 47 Tucanae p 2538 N93-23914

LUNAR BASES
Space transfer concepts and analysis for exploration missions
[NASA-CR-192482] p 2178 N93-22705
Lunar electric power systems utilizing the SP-100 reactor coupled to dynamic conversion systems
[NASA-CR-191023] p 2377 N93-22879
First Lunar Outpost support study
[NASA-CR-192843] p 2153 N93-23054

LUNAR EXPLORATION
An analysis of power beaming for the Moon and Mars
[NASA-CR-191072] p 2182 N93-22554
Space transfer concepts and analysis for exploration missions
[NASA-CR-192482] p 2178 N93-22705
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
[NASA-CR-192494] p 2179 N93-23007

LUNAR LAUNCH
Neighboring suboptimal control for vehicle guidance p 2171 N93-22011

LUNAR LOGISTICS
First Lunar Outpost support study
[NASA-CR-192843] p 2153 N93-23054

LUNAR OBSERVATORIES
LUTE primary mirror materials and design study report
[NASA-CR-192487] p 2487 N93-22961

LUNAR ORBITS
Mars transfer vehicle studies p 2173 N93-22088
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
[NASA-CR-192494] p 2179 N93-23007

LUNAR RESOURCES
Geochemical mapping of the lunar surface using laser-induced ion mass spectrometry from landers and rovers
[DE93-003849] p 2554 N93-23292

LUNAR ROCKS
Lunar science measurements and instruments for resource characterization
[DE93-005436] p 2553 N93-22905

LUNAR SOIL
Lunar science measurements and instruments for resource characterization
[DE93-005436] p 2553 N93-22905

LUNAR SPACECRAFT
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 1: Draft final
[NASA-CR-192488] p 2177 N93-22348
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 2: Draft final
[NASA-CR-192489] p 2178 N93-22959
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
[NASA-CR-192491] p 2178 N93-22960
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 5: Nuclear electric propulsion vehicle
[NASA-CR-192493] p 2178 N93-22990
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 4: Solar electric propulsion vehicle
[NASA-CR-192492] p 2178 N93-22993
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
[NASA-CR-192494] p 2179 N93-23007

LUNAR SURFACE
Geochemical mapping of the lunar surface using laser-induced ion mass spectrometry from landers and rovers
[DE93-003849] p 2554 N93-23292

LUNGS
A linear, time-varying simulation of the respiratory tract system
[DE93-004515] p 2421 N93-24009

LYMAN ALPHA RADIATION
Stellar lyman alpha emission and the local interstellar medium
[NASA-CR-192635] p 2541 N93-22381
Analysis of IUE observations of hydrogen in comets
[NASA-CR-192693] p 2548 N93-23231

LYMPHOCYTES
Influence of microgravity on immune system and genetic information p 2160 N93-24370

LYSOZYME
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393

M

M REGION
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
[PB93-138469] p 2556 N93-23334

MACH NUMBER
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
[NASA-TM-107732] p 2108 N93-22457
Dynamic response characteristics of two transport models tested in the National Transonic Facility
[NASA-CR-191420] p 2125 N93-23047
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
[NASA-CR-191087] p 2111 N93-23431
Transverse injection of liquid and gaseous fuels into subsonic/supersonic flow
[AD-A259771] p 2111 N93-23476
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
[AD-A260118] p 2113 N93-23714
An experimental investigation of a supercritical airfoil at transonic speeds
[NASA-TM-103933] p 2300 N93-24534

MACHINE LEARNING
Learning fuzzy information in a hybrid connectionist, symbolic model p 2453 N93-22354
Design issues for a reinforcement-based self-learning fuzzy controller p 2454 N93-22362
Structure identification in fuzzy inference using reinforcement learning p 2456 N93-22371
Genetic learning in rule-based and neural systems p 2456 N93-22374
Evolving fuzzy rules in a learning classifier system p 2457 N93-22375
A self growing binary tree neural network for the identification of multiclass systems
[RR-451] p 2459 N93-23362
Learning optimal control using learning automata
[MATHS-REPT-A-176] p 2462 N93-24078
Permissive planning: A machine-learning approach to planning in complex real-world domains
[AD-A260019] p 2521 N93-24303

MACHINE TOOLS
Improved dynamic stiffness (system modeling), state-of-the-art review
[PB93-127744] p 2331 N93-24208

MACHINERY
Neural networks for the monitoring of rotating machinery
[DE93-003549] p 2464 N93-24503
Continuous fiber thermoplastic prepreg
[NASA-CASE-LAR-14459-1] p 2215 N93-24597

MACHINING
Improved dynamic stiffness (system modeling), state-of-the-art review
[PB93-127744] p 2331 N93-24208

MACROMOLECULES
Basic research on macromolecular dynamics
[PB93-138907] p 2240 N93-24142

MAGNESIUM OXIDES
Textured coatings from colloidal suspensions of faceted oxide microcrystals
[DE93-006601] p 2240 N93-24033

MAGNET COILS
Reduced mass persistent switches for large superconducting magnets in space
[DE93-004782] p 2474 N93-22047
A comparison of the Space Station version of ASTROMAG with two free-flyer versions
[DE93-004695] p 2193 N93-22777

MAGNETIC ANOMALIES
Latitudinally period-dependent pulsations: A model of the distributed perturbation ionospheric Hall current. The resultant ground field and a study of 3 intervals p 2547 N93-23194

MAGNETIC CIRCUITS
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
[NASA-CR-192348] p 2263 N93-23215

MAGNETIC COMPRESSION
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
[DE93-005831] p 2493 N93-22869

MAGNETIC COOLING
An evaluation of magnetic refrigeration cycles based on how effectively the thermal properties of the refrigerant are utilized p 2258 N93-23170

MAGNETIC DISTURBANCES
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
[PB93-138469] p 2556 N93-23334

MAGNETIC DOMAINS
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
[DE93-004191] p 2499 N93-22062

MAGNETIC EFFECTS
Micromagnetic surface studies of materials for nondestructive evaluation
| DE93-006303 | p 2321 N93-22695
Macroscopic models of superconductivity p 2508 N93-23500
MAGNETIC EQUATOR
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
MAGNETIC FIELD CONFIGURATIONS
Magnetic field structure and collective effects in supernova remnants p 2548 N93-23218
Model of Venus ionopause formation p 2554 N93-23354
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
MAGNETIC FIELD RECONNECTION
The solar wind control of reconnection at the dayside magnetopause p 2556 N93-23236
MAGNETIC FIELDS
Explosive pulse power for fusion applications
| DE93-003828 | p 2491 N93-22076
De Haas van Alphen effect in superconductors in megagauss fields
| DE93-005465 | p 2277 N93-22540
Micromagnetic surface studies of materials for nondestructive evaluation
| DE93-006303 | p 2321 N93-22695
Thermocapillary instabilities in the presence of a homogeneous magnetic field p 2252 N93-22865
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
| DE93-005831 | p 2493 N93-22869
Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendocrine system of nonhuman primates
| DE93-007677 | p 2417 N93-22913
Field profile and loading measurements on higher order modes in a two cell 500 MHz superconducting structure
| DE93-004771 | p 2308 N93-22921
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
| NASA-CR-192348 | p 2263 N93-23215
Poloidal magnetic field profile measurements on the microwave tokamak experiment using far-infrared polarimetry p 2498 N93-24294
Structure and dynamics of the magnetopause p 2400 N93-24296
Investigation of effects of 60-Hz electric and magnetic fields on operant and social behavior and on the neuroendocrine system of nonhuman primates
| DE93-007678 | p 2419 N93-24455
Magnetic response of certain curved graphitic geometries
| DE93-003694 | p 2243 N93-24500
Potential human health effects associated with power frequency electric and magnetic fields
| PB93-132678 | p 2423 N93-24590
MAGNETIC FLUX
Explosive pulse power for fusion applications
| DE93-003828 | p 2491 N93-22076
Superconductivity and flux pinning in Nd(1+x)Ba(2-x)Cu(3)O(7+delta)
| DE93-004444 | p 2505 N93-23052
The liquid crystal polarimeter for solid-state imaging of solar vector magnetic fields
| AD-A260029 | p 2483 N93-24251
MAGNETIC LEVITATION VEHICLES
Dynamic stability of maglev systems
| DE93-004796 | p 2315 N93-23335
Advanced power conditioning for maglev systems
| PB93-150274 | p 2320 N93-24586
MAGNETIC MATERIALS
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
| NASA-CR-192348 | p 2263 N93-23215
MAGNETIC MEASUREMENT
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films p 2505 N93-23100
Long period pulsation events in electron precipitation and magnetic fields at the South Pole p 2394 N93-23387
The SSIMT: A CMOS based magnetic sensor
| ISBN-0-315-60334-8 | p 2305 N93-24610
MAGNETIC PERMEABILITY
Magnetic response of certain curved graphitic geometries
| DE93-003694 | p 2243 N93-24500
MAGNETIC PROBES
Tunneling magnetic force microscopy p 2514 N93-22194
MAGNETIC PROPERTIES
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
| DE93-004203 | p 2502 N93-22523
Dynamic stability of maglev systems
| DE93-004796 | p 2315 N93-23335
Magnetic anisotropy in the high transition temperature superconductor YBa2Cu3O(7-delta) p 2509 N93-23985
The magnetism of metallic manganese alloys
| DE93-005153 | p 2233 N93-24037
MAGNETIC RECORDING
Tunneling magnetic force microscopy p 2514 N93-22194
MAGNETIC RELAXATION
Superconductivity and flux pinning in Nd(1+x)Ba(2-x)Cu(3)O(7+delta)
| DE93-004444 | p 2505 N93-23052
MAGNETIC RESONANCE
Learning fuzzy information in a hybrid connectionist, symbolic model p 2453 N93-22354
MAGNETIC SIGNATURES
NASA Marshall Space Flight Center Solar Observatory Report, July to December 1992
| NASA-TM-108396 | p 2542 N93-22665
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
| AD-A260001 | p 2243 N93-24443
MAGNETIC STORMS
Electrostatic charging of spacecraft in geosynchronous orbit
| DRA-TM-SPACE-389 | p 2181 N93-22489
Geomagnetic storm environments and effects on electrical systems
| DE92-041257 | p 2262 N93-22980
The formation, structure, and evolution of plasmoids p 2547 N93-23210
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
| AD-A259943 | p 2401 N93-24322
MAGNETIC SUSPENSION
Advanced power conditioning for maglev systems
| PB93-150274 | p 2320 N93-24586
MAGNETIC TRANSDUCERS
The SSIMT: A CMOS based magnetic sensor
| ISBN-0-315-60334-8 | p 2305 N93-24610
MAGNETIZATION
De Haas van Alphen effect in superconductors in megagauss fields
| DE93-005465 | p 2277 N93-22540
Magnetic response of certain curved graphitic geometries
| DE93-003694 | p 2243 N93-24500
MAGNETOHYDRODYNAMIC FLOW
Design and characterization of the Pegasus 1 plasma flow switch
| DE93-003812 | p 2276 N93-22322
Ionospheric plasma flow about a system of electrically biased flat plates
| NASA-CR-191119 | p 2194 N93-23131
Model of Venus ionopause formation p 2554 N93-23354
On the dynamics of space plasma
| AD-A259898 | p 2497 N93-23987
Optical diagnostics in supersonic plasma flows: Purging fluid effects
| DE93-006243 | p 2497 N93-24042
MAGNETOHYDRODYNAMIC GENERATORS
Simulation of a particle-laden combustion flow in an MHD second stage combustor
| DE93-004244 | p 2491 N93-22065
MHD seed recovery/regeneration, phase 2
| DE93-006008 | p 2493 N93-22769
Three-dimensional isothermal flow simulations of an MHD secondary combustor
| DE93-006631 | p 2497 N93-24035
Optical diagnostics in supersonic plasma flows: Purging fluid effects
| DE93-006243 | p 2497 N93-24042
MAGNETOHYDRODYNAMIC STABILITY
Experimental studies of instabilities in radially imploding plasmas
| DE93-003831 | p 2492 N93-22427
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
| DE93-003834 | p 2492 N93-22428
High beta effects and nonlinear evolution of the TAE instability
| DE93-004170 | p 2492 N93-22522
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
| DE93-005833 | p 2493 N93-22779
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
| DE93-005831 | p 2493 N93-22869
Radiation magnetohydrodynamic modeling of x ray output from perturbed plasma implosions
| DE93-005454 | p 2494 N93-22907
Alpha effects on TAE modes and alpha transport
| DE93-004160 | p 2494 N93-22940
A high performance spectral code for nonlinear MHD stability
| DE93-004541 | p 2494 N93-22984
Selection of an appropriate tokamak operating regime using magnetohydrodynamic and current drive constraints p 2495 N93-23167
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
Experimental determination of the hydrodynamic instability growth rates in indirect and direct drive ICF
| DE93-006278 | p 2496 N93-23676
Equilibria and stability of non-adiabatic Vlasov-Maxwellian plasmas p 2497 N93-23998
Poloidal variation of viscous forces in the banana collisionality regime
| DE93-006822 | p 2499 N93-24504
MAGNETOHYDRODYNAMIC TURBULENCE
Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis
| DE93-006123 | p 2491 N93-22052
Thermally driven turbulence and transport in a sheared system
| DE93-006125 | p 2491 N93-22053
MAGNETOHYDRODYNAMIC WAVES
Low frequency RF current drive
| DE93-005130 | p 2260 N93-22421
Alpha effects on TAE modes and alpha transport
| DE93-004160 | p 2494 N93-22940
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
MAGNETOHYDRODYNAMICS
Simulation of a particle-laden combustion flow in an MHD second stage combustor
| DE93-004244 | p 2491 N93-22065
Experimental studies of instabilities in radially imploding plasmas
| DE93-003831 | p 2492 N93-22427
Radiation magnetohydrodynamic modeling of x ray output from perturbed plasma implosions
| DE93-005454 | p 2494 N93-22907
A high performance spectral code for nonlinear MHD stability
| DE93-004541 | p 2494 N93-22984
An MHD study of the interaction between the solar wind and the interstellar medium
| NASA-CR-192353 | p 2556 N93-23067
MAGNETOMETERS
NASA Marshall Space Flight Center Solar Observatory Report, July to December 1992
| NASA-TM-108396 | p 2542 N93-22665
MAGNETOPAUSE
The solar wind control of reconnection at the dayside magnetopause p 2556 N93-23236
Structure and dynamics of the magnetopause p 2400 N93-24296
MAGNETORESISTIVITY
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
| DE93-004191 | p 2499 N93-22062
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
| DE93-004854 | p 2503 N93-22745
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films p 2505 N93-23100
Physical properties of ultrathin films of high-temperature superconductors p 2506 N93-23197
MAGNETOSHEATH
The solar wind control of reconnection at the dayside magnetopause p 2556 N93-23236
MAGNETOSPHERE-IONOSPHERE COUPLING
Latitudinally period-dependent pulsations: A model of the distributed perturbation ionospheric Hall current. The resultant ground field and a study of 3 intervals p 2547 N93-23194
On the dynamics of space plasma
| AD-A259898 | p 2497 N93-23987
MAGNETOSPHERIC INSTABILITY
Latitudinally period-dependent pulsations: A model of the distributed perturbation ionospheric Hall current. The resultant ground field and a study of 3 intervals p 2547 N93-23194
MAGNETOSTATIC FIELDS
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
| NASA-CR-192348 | p 2263 N93-23215
MAGNETOSTRICTION
The magnetism of metallic manganese alloys
| DE93-005153 | p 2233 N93-24037

MAGNETOTAILS
A proposed neutral line signature
|NASA-CR-192335| p 2393 N93-23211
MAGNETRON SPUTTERING
Sputter-deposition and characterization of molybdenum disulfide thin films
|DE93-004801| p 2235 N93-22048
MAGNETS
The PNL high-transmission three-stage mass spectrometer
|DE93-006143| p 2486 N93-22506
A variable current bypass shunt for electromagnets
|DE93-004273| p 2278 N93-22686
MAGNONS
The magnetism of metallic manganese alloys
|DE93-005153| p 2233 N93-24037
MAINTENANCE
Candidate technologies for the Integrated Health Management Program
|NASA-CR-192339| p 2420 N93-22655
Columbus program: Ground staff training simulation
|ETN-93-93694| p 2194 N93-23415
Comparison of four-cursor buttons versus joystick to access computerized technical information from an integrated maintenance information system
|AD-A259967| p 2526 N93-23462
Electric and hybrid vehicle program; Site Operator Program
|DE93-005239| p 2319 N93-24444
Neural networks for the monitoring of rotating machinery
|DE93-003549| p 2464 N93-24503
MAINTENANCE TRAINING
Human Factors Issues in Aircraft Maintenance and Inspection. Science, technology, and management: A program review
|PB93-146975| p 2427 N93-23647
MALAYSIA
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811
MALFUNCTIONS
MSFC Three Point Docking Mechanism design review
|NASA-CR-192462| p 2181 N93-22013
MAN ENVIRONMENT INTERACTIONS
Prototype for a regional data management system, a step towards a regional land use project
p 2353 N93-23571
Analysis of human impact on degradation and desertification of the West African Sahel by means of multi-level remote sensing techniques
p 2355 N93-23578
The Earth Observing System p 2356 N93-23749
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
MAN MACHINE SYSTEMS
Cargo vehicle architecture options
p 2172 N93-22082
The Data Egg: A new solution to text entry barriers
p 2530 N93-22192
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 5: Human Support
|NASA-TM-108653| p 2518 N93-22465
Operator interface assessment for the sensor fusion flight demonstration program
|AD-A260235| p 2129 N93-24416
MAN-COMPUTER INTERFACE
Investigation of cognition acquisition using natural language conversational process
|MBB-FE-315-S-PUB-0498| p 2435 N93-22391
Motif, the basics: An overview of the widget set
|DE93-005273| p 2436 N93-22720
Operational evaluation of the converging runway display aid at Saint Louis
|MTR-92W0000217| p 2133 N93-22874
Force reflecting hand controller
|NASA-CASE-NPO-17851-1-CU| p 2314 N93-23078
Natural Language Processing Systems Evaluation Workshop
|RL-TR-91-362| p 2437 N93-23091
Software design specification for the Manufacturing Optimization (MO) system
|AD-A259707| p 2440 N93-23666
Architecture for human-computer design, management and coordination in a collaborative AEC environment
p 2528 N93-24186
Remotely piloted vehicle control and interface system
|AD-D015618| p 2132 N93-24228
Treatment of human-computer interface in a decision support system
|DE93-002281| p 2428 N93-24502
MANAGEMENT ANALYSIS
GEOTAIL Spacecraft historical data report
|NASA-TM-108710| p 2194 N93-23168
MANAGEMENT INFORMATION SYSTEMS
Universal Index System p 2530 N93-22152
Methods and means used in programming intelligent searches of technical documents p 2530 N93-22155
An integrated information retrieval and document management system p 2530 N93-22156
US Geological Survey library classification system
|PB93-129708| p 2525 N93-23256
Public libraries in the US, 1990
|PB93-127926| p 2525 N93-23285
Executive summary of information systems plans: Fiscal years 1994 to 1998
|PB93-146330| p 2527 N93-23646
Treatment of human-computer interface in a decision support system
|DE93-002281| p 2428 N93-24502
MANAGEMENT METHODS
You want it when: A TQM guide to customer service
|PB93-154540| p 2520 N93-23446
Total quality implementation guide
|PB93-154524| p 2520 N93-23447
Total Quality Management: Good enough for government work
|AD-A259847| p 2520 N93-23954
Implementing total quality management (TQM) 1: The command imperative
|AD-A259885| p 2520 N93-23981
MANAGEMENT PLANNING
Consortium for materials development in space interaction with Space Station Freedom
p 2192 N93-22650
Structural dynamics division research and technology accomplishments for FY 1992 and plans for FY 1993
|NASA-TM-107713| p 2109 N93-22671
Summary of activities of the Life Cycle Costing Workshop conducted by the Environmental Restoration Program of Oak Ridge National Laboratory
|DE93-000823| p 2531 N93-22935
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
|NASA-CR-192656| p 2152 N93-23033
NASA reports p 2154 N93-23163
Total quality implementation guide
|PB93-154524| p 2520 N93-23447
Executive summary of information systems plans: Fiscal years 1994 to 1998
|PB93-146330| p 2527 N93-23646
Human Factors Issues in Aircraft Maintenance and Inspection. Science, technology, and management: A program review
|PB93-146975| p 2427 N93-23647
Total Quality Management: Good enough for government work
|AD-A259847| p 2520 N93-23954
Implementing total quality management (TQM) 1: The command imperative
|AD-A259885| p 2520 N93-23981
MANAGEMENT SYSTEMS
NetView technical research
|NASA-CR-192822| p 2434 N93-22043
On-board fault management for autonomous spacecraft p 2140 N93-22255
Advanced air traffic management
p 2107 N93-22571
Precursor Space Station Freedom experiments
p 2188 N93-22632
Risk management in fly-by-wire systems
|NASA-TM-104757| p 2180 N93-22703
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
|NASA-CR-192656| p 2152 N93-23033
Executive summary of information systems plans: Fiscal years 1994 to 1998
|PB93-146330| p 2527 N93-23646
A version and configuration model for software evolution
|AD-A260557| p 2441 N93-24283
Design manual for two-phase components of spacecraft thermal management systems
|AD-A260027| p 2196 N93-24439
MANEUVERABILITY
Trail maneuver generation and selection in the Paladin tactical decision generation system
|NASA-TM-107722| p 2131 N93-23088
MANEUVERS
Entry Systems Panel p 2175 N93-22097
MANGANESE
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
|DE93-005350| p 2505 N93-22974
Microtopography of manganese crusts
|PB93-120830| p 2398 N93-23996
MANGANESE ALLOYS
The magnetism of metallic manganese alloys
|DE93-005153| p 2233 N93-24037
MANGANESE COMPOUNDS
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
|DE93-005350| p 2505 N93-22974
MANIFOLDS (MATHEMATICS)
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
|NASA-CR-4503| p 2466 N93-22672
MANIPULATORS
ROBOSIM: An intelligent simulator for robotic systems
p 2465 N93-22161
Autonomous prealignment of a docking mechanism
p 2137 N93-22238
Path planning for manipulators
|DE93-004050| p 2457 N93-22756
Sensor-based whole-arm obstacle avoidance utilizing ASIC technology
|DE93-003602| p 2279 N93-22819
Adaptive control of a flexible manipulator
p 2458 N93-23201
Control and analysis of a single-link flexible beam with experimental verification
|DE93-003756| p 2314 N93-23289
Modeling and control of flexible manipulators
p 2318 N93-24182
A capacitance-based proximity sensor for whole arm obstacle avoidance
|DE93-006773| p 2463 N93-24331
A global path planning approach for redundant manipulators
|NASA-CR-193017| p 2320 N93-24656
MANNED MANEUVERING UNITS
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
A navigation and control system for an autonomous rescue vehicle in the space station environment
p 2146 N93-22289
MANNED MARS MISSIONS
Space transfer concepts and analysis for exploration missions
|NASA-CR-192482| p 2178 N93-22705
MANNED ORBITAL LABORATORIES
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
The European astronauts training programme
p 2156 N93-24346
Training facilities at the Crew Training Complex
p 2156 N93-24347
The strategic role of automation and robotics for Columbus utilization p 2164 N93-24389
Columbus automation testbed: A tool for users
p 2164 N93-24390
MANNED SPACE FLIGHT
New approach to the interaction of cosmic rays with nuclei in spacecraft shielding and the human body
|DE93-006263| p 2559 N93-22544
French Mir missions p 2156 N93-24348
Mir '92 project p 2157 N93-24350
MANNED SPACECRAFT
Manned versus unmanned rendezvous and capture
p 2137 N93-22234
MANUAL CONTROL
Manned versus unmanned rendezvous and capture
p 2137 N93-22234
Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper)
p 2150 N93-22311
Force reflecting hand controller
|NASA-CASE-NPO-17851-1-CU| p 2314 N93-23078
Orbiter Autoland reliability analysis
|NASA-TM-4464| p 2194 N93-23139
An introduction to multivariable flight control system design
|AD-A260408| p 2131 N93-24087
MANUALS
Video animation system operators manual
|DE93-007425| p 2435 N93-22533
Technical report writing
|NASA-TM-105419| p 2523 N93-23002
High Temperature Composite Analyzer (HITCAN) programmer's manual. Version 1.0
|NASA-TM-106004| p 2326 N93-23056
Design manual for two-phase components of spacecraft thermal management systems
|AD-A260027| p 2196 N93-24439
Writer's guide for technical procedures
|DE93-007746| p 2529 N93-24573
CONVEX mini manual
|NASA-TM-107564-REV| p 2433 N93-24594
MANUFACTURING
National Launch System: Structures and materials
p 2172 N93-22083
Orbiter lessons learned: A guide to future vehicle development p 2175 N93-22100

Thermal protection systems for space transportation vehicles p 2177 N93-22113
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping p 2259 N93-22174
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
Printed wiring assembly cleanliness
|DE93-006040| p 2277 N93-22524
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
|DE93-002347| p 2384 N93-22972
Statistical process control program at a ceramics vendor facility
|DE93-006043| p 2238 N93-23025
The Photovoltaic Manufacturing Technology Project, phase 1
|DE92-010597| p 2380 N93-23302
Automated manufacturing of continuous fibre composite structures for aerospace applications p 2212 N93-23942
A review of design and manufacturing methodologies for stiffened composite panels used in aircraft p 2128 N93-23943
Solar collector manufacturing activity 1991
|DE93-006559| p 2382 N93-24032
High reliability residual compressive stress processes. State-of-the-art assessment
|PB93-127751| p 2331 N93-24207
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
|DE93-006722| p 2442 N93-24327
Technology transfer from NASA to targeted industries, volume 1
|NASA-CR-192757| p 2532 N93-24482
Technology transfer from NASA to targeted industries, volume 2
|NASA-CR-192758| p 2533 N93-24484
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
|PB93-146991| p 2259 N93-24635

MANY BODY PROBLEM
Peculiarities of structures and meltinglike transition in gold clusters
|DE93-004810| p 2228 N93-22741
Phase transitions at the fluid-solid interface in a model for the adsorption of hard spheres
|AD-A260304| p 2223 N93-24235

MAPPING
Satellite image and reference data investigations for exploration purposes p 2341 N93-22449
Mapping the Universe: Statistical measures of the galaxy distribution
|ETN-93-93456| p 2542 N93-23116
Map production and updating using SPOT data and SPOT data derived products p 2348 N93-23536
Image maps p 2348 N93-23537
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
Comparison of mapping with different satellite images p 2348 N93-23540
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
Mapping from SPOT data p 2349 N93-23544
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
Multisensor data applications for digital landscape models p 2350 N93-23550
Remote sensing applied to mapping and other purposes: STADIS project, a practical example in Tunisia p 2352 N93-23561
Cartography of hazards from geological instabilities: Volcanic regions in Peru p 2368 N93-23815
Climatology of station storm rainfall in the continental United States: Parameters of the Bartlett-Lewis and Poisson rectangular pulses models
|NASA-CR-192968| p 2411 N93-24523

MAPS
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
|PB93-129864| p 2392 N93-22894
Map production and updating using SPOT data and SPOT data derived products p 2348 N93-23536
Image maps p 2348 N93-23537
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
System design for ARTEMIS environmental monitoring p 2349 N93-23545
Data for map algebra p 2350 N93-23553
Operational geocoding of ERS-1 SAR imagery p 2359 N93-23765

MARANGONI CONVECTION
Marangoni convection in a spinning liquid column
|LRT-WE-9-FB-13-1991| p 2289 N93-22678
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating p 2247 N93-22835
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation p 2251 N93-22857
Experimental investigation of the influence of the temperature gradient on the thermocapillary convection in spherical drops under low-gravity p 2251 N93-22862
Thermocapillary instabilities in the presence of a homogeneous magnetic field p 2252 N93-22865
Stability and instability of thermocapillary convection in models of the float-zone crystal-growth process
|NASA-CR-192695| p 2252 N93-23122

MARINE BIOLOGY
The environmental biogeochemistry of open ocean and partially enclosed marine systems p 2413 N93-23130

MARINE CHEMISTRY
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
|DE93-005061| p 2383 N93-22602

MARINE ENVIRONMENTS
Microstructure and texture control of fatigue in hydrogen and marine environments
|AD-A259808| p 2231 N93-23642
Ocean colour programmes for the European marine environment p 2366 N93-23808
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810

MARINE METEOROLOGY
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
|PB93-108090| p 2404 N93-23090
Mariners weather log, volume 36, number 3, summer 1992
|PB93-132033| p 2405 N93-23282
Mariners weather log, volume 36, number 4, fall 1992
|PB93-132041| p 2405 N93-23283

MARINE RESOURCES
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR p 2337 N93-22141
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
|PB93-136604| p 2343 N93-23278
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
|PB93-136927| p 2387 N93-23438
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
|PB93-152031| p 2416 N93-24605

MARINE TECHNOLOGY
Advanced underwater lift device
|NASA-CR-185709| p 2169 N93-22877

MARITIME SATELLITES
Maritime satellite communication and navigation p 2275 N93-23508
Mobile satellite communications in the 1990's p 2275 N93-23520
SkyFix: A better position through the use of INMARSAT and GPS p 2124 N93-23522

MARKARIAN GALAXIES
Very high energy gamma ray astrophysics
|DE93-007625| p 2551 N93-24453

MARKERS
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
|AD-A258453| p 2233 N93-23982
Solar-powered light emitting diode power line avoidance marker design
|AD-A259886| p 2381 N93-23983

MARKET RESEARCH
Market penetration of new energy technologies
|DE92-016409| p 2375 N93-22323
An overview of DOE's wind turbine development programs
|DE93-000044| p 2376 N93-22335
NASA's commercial research plans and opportunities p 2183 N93-22612
An environmental rating for heat pump equipment
|DE93-004526| p 2379 N93-22983

MARKETING
An overview of DOE's wind turbine development programs
|DE93-000044| p 2376 N93-22335
An environmental rating for heat pump equipment
|DE93-004526| p 2379 N93-22983
Insurance cover for space ventures p 2344 N93-23510
Definition of a European promotion concept p 2162 N93-24381

MARKOV PROCESSES
Theoretical and experimental investigations of coincidences in Poisson distributed pulse trains and spectral distortion caused by pulse pileup
|ISBN-0-315-60449-2| p 2286 N93-24614

MARS (PLANET)
Aerobraking technology studies p 2173 N93-22089

MARS ATMOSPHERE
A modified flow/field model of the solar wind interaction with Mars p 2556 N93-23216
Modeling of forced planetary waves in the Mars atmosphere p 2555 N93-24579

MARS ENVIRONMENT
Thermal protection materials at NASA Ames Research Center p 2177 N93-22114

MARS SAMPLE RETURN MISSIONS
Simulation models for autonomous rendezvous and capture p 2149 N93-22304

MARS SURFACE
Workshop on chemical weathering on Mars, part 2
|NASA-CR-192261| p 2554 N93-23192

MARTENSITE
Formability of type 304 stainless steel sheet
|DE92-018619| p 2229 N93-22924

MARTENSITIC STAINLESS STEELS
Pretransformation strain modulations in proper ferroelastics
|DE93-005468| p 2228 N93-22340
Mechanical properties of martensitic alloy AISI 422
|DE93-004834| p 2229 N93-22882

MARYLAND
Small business profiles, 1992. Region 3: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
|PB93-110948| p 2520 N93-24157

MASS
A body mass measurement device based on the oscillation principle p 2166 N93-24400

MASS DISTRIBUTION
X ray morphology and the mass of clusters of galaxies p 2534 N93-23887
Stochastic inflation and inflationary density fluctuations p 2473 N93-24457

MASS SPECTRA
Charm physics at Fermilab E791
|DE93-006020| p 2480 N93-22543
A detailed study of nonperturbative solutions of two-body Dirac equations
|DE93-004794| p 2468 N93-22965

MASS SPECTROMETERS
Development of a miniature mass analyzer and associated instrumentation for improved capabilities in the analysis of low energy plasmas from a rocket or satellite platform
|NASA-CR-192453| p 2202 N93-22014
The PNL high-transmission three-stage mass spectrometer
|DE93-006143| p 2486 N93-22506

MASS SPECTROSCOPY
Geochemical mapping of the lunar surface using laser-induced ion mass spectrometry from landers and rovers
|DE93-003849| p 2554 N93-23292
New methods and instrumentation for the characterization of biopolymers using electrospray ionization-mass spectrometry
|DE93-005100| p 2239 N93-23323
The design and construction of an ion trap based system for laser pyrolysis/mass spectrometry of single organic aerosol particles
|AD-A260455| p 2222 N93-24115
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360

MASS TRANSFER
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows
|DE93-004122| p 2287 N93-22071
Fluids in Space
|ESA-SP-353| p 2246 N93-22830
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity p 2247 N93-22836
Heat and mass transfer in polyphase flows p 2248 N93-22844
Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852

MASSIVELY PARALLEL PROCESSORS
Contact-impact simulations on massively parallel SIMD supercomputers
|DE93-004188| p 2445 N93-22060
Intelligent neuroprocessors for in-situ launch vehicle propulsion systems health management
p 2452 N93-22221
Efficiently modeling neural networks on massively parallel computers p 2453 N93-22353
Data-parallel Langevin dynamics simulations
|DE93-003836| p 2445 N93-22434
Partitioning a chordal graph into transitive subgraphs for parallel sparse triangular solution
|DE93-006614| p 2446 N93-22512
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
|DE93-003825| p 2325 N93-22872
Efficiently modeling neural networks on massively parallel computers
|DE93-003787| p 2447 N93-22937
Applications and accuracy of the parallel diagonal dominant algorithm
|NASA-CR-191431| p 2438 N93-23173
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
|DE93-005461| p 2447 N93-23245
Massively parallel implementation of the Penn State/NCAR mesoscale model
|DE93-004874| p 2394 N93-23320

MATCHED FILTERS
Optimal three-dimensional matched filter processing for detection of point-like moving objects in clutter
|AD-A259727| p 2487 N93-23469

MATERIALS HANDLING
Space biology initiative program definition review. Trade study 1: Automation costs versus crew utilization
p 2417 N93-23070

MATERIALS SCIENCE
Midwest Superconductivity Consortium
|DE93-006146| p 2276 N93-22054
Technology 2002: The Third National Technology Transfer Conference and Exposition, volume 2
|NASA-CP-3189-VOL-2| p 2560 N93-22149
Space Station Furnace Facility preliminary Project Implementation Plan (PIP). Volume 2, appendix 2
|NASA-CR-192474| p 2302 N93-22347
Materials science research in microgravity
p 2191 N93-22645
Consortium for materials development in space interaction with Space Station Freedom
p 2192 N93-22650
Solid state research
|AD-A259726| p 2509 N93-24024
Activities of the Industrial Materials Institute
|NRC-34380| p 2207 N93-24288
Gravity-related phenomena in materials science
p 2161 N93-24372

MATERIALS TESTS
A summary of laboratory testing performed to characterize and select an elastomeric O-ring material to be used in the redesigned solid rocket motors of the space transportation system
|NASA-TM-108395| p 2236 N93-22557
Test requirements for coal-tar mixtures on airport pavements
|DOT/FAA/RD-92-27| p 2134 N93-23137
An overview of materials testing in DND
p 2213 N93-23946

MATHEMATICAL MODELS
Electron transfer, ionization, and excitation in atomic collisions
|DE93-005918| p 2478 N93-22050
Report of the working group on magnetotail/plasma sheet structure
|DE93-003857| p 2391 N93-22077
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
Autonomous vehicle motion control, approximate maps, and fuzzy logic p 2452 N93-22219
Simple optics description of the plasma sheath and plasma electrode region
|DE93-004851| p 2491 N93-22224
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
Applicability of relative GPS to automated rendezvous between the space shuttle and space station
p 2138 N93-22241
IMP: A performance code p 2139 N93-22245
Use of non-spherical gravity harmonics for relative motion GN/C (category 2) p 2141 N93-22262
GN/C translation and rotation control parameters for AR/C (category 2) p 2142 N93-22263
The development of an autonomous rendezvous and docking simulation using rapid integration and prototyping technology p 2148 N93-22302
Market penetration of new energy technologies
|DE92-016409| p 2375 N93-22323
Theoretical models of neutron emission in fission
|DE93-005482| p 2485 N93-22343
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
|DE93-005881| p 2207 N93-22410
Position calibration software for the form assessment of complex workpieces
|NPL-DITC-203/92| p 2435 N93-22450
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
|NASA-TM-104765| p 2492 N93-22475
Development of rate expressions for the thermal decomposition of RDX
|DE93-005345| p 2244 N93-22502
Improved techniques for thermomechanical testing in support of deformation modeling
|NASA-TM-105944| p 2323 N93-22555
On the prior probabilities for two-stage Bayesian estimates
|DE93-006389| p 2472 N93-22593
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
|DE93-005061| p 2383 N93-22602
Modal identification experiment p 2188 N93-22635
Integrated oxygen recovery system
|NASA-CR-192343| p 2426 N93-22663
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
|DE93-003253| p 2324 N93-22721
A convective drag theory for surface fluxes
|DE93-004037| p 2403 N93-22722
Electron-phonon driven spin frustration in multi-band Hubbard models: MX chains and oxide superconductors
|DE93-003697| p 2503 N93-22754
Theoretical and pragmatic modelling of governing equations for a two-phase flow in bubbly and annular flow regimes
|DE93-004200| p 2289 N93-22757
Controlling chaos in spark-ignition engines
|DE93-005754| p 2312 N93-22761
Anomalous transport modelling of tokamak plasmas
|DE93-006160| p 2493 N93-22764
The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
|DE93-000796| p 2392 N93-22807
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity
p 2247 N93-22836
Action of an acceleration field on premixed methane/air flames p 2226 N93-22838
The study of surface tension tanks from the neutral buoyancy to the space flight p 2248 N93-22842
Adsorption kinetics at liquid-liquid interfaces in microgravity conditions. Experimental approach and theoretical background p 2248 N93-22843
Heat and mass transfer in polyphase flows
p 2248 N93-22844
First results of a Freon 12 capillary pumped loop
p 2249 N93-22846
Forced convection boiling and condensation in microgravity: A critical appraisal of the literature
p 2249 N93-22849
Surface tension and buoyancy driven Stokes flow in cavities p 2250 N93-22856
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation
p 2251 N93-22857
Well-posedness of a model for structural acoustic coupling in a cavity enclosed by a thin cylindrical shell
|NASA-CR-191439| p 2473 N93-22878
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels data sets
|AD-A260220| p 2220 N93-22917
Electronic and ionic transport in processable conducting polymers
|AD-A260223| p 2238 N93-22918
Aerosol phase transformation in the atmosphere
|DE93-001903| p 2384 N93-22936
Efficiently modeling neural networks on massively parallel computers
|DE93-003787| p 2447 N93-22937
Dissipative trapped electron mode turbulence with ion Landau damping and FLR effects
|DE93-004524| p 2494 N93-22942
Galileo's relativity principle, the concept of pressure, and complex characteristics, for the six-equation, one-pressure model
|DE93-005240| p 2515 N93-22952
Statistical process control program at a ceramics vendor facility
|DE93-006043| p 2238 N93-23025
The implications of concurrent increases in temperature and CO2 concentration for terrestrial C3 photosynthesis
|DE93-005590| p 2385 N93-23035
X ray absorption fine structure strain determination in thin films p 2326 N93-23072
VASGEN: A finite element model generation program for VAST. User's manual, version 4.0
|DREA-CR-91-447| p 2437 N93-23089
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
|PB93-108090| p 2404 N93-23090
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
|NASA-CR-192303| p 2126 N93-23186
Planetary gear train ring gear and support structure investigation p 2314 N93-23188
A modified flow/field model of the solar wind interaction with Mars p 2556 N93-23216
Modeling the heat release rate of aircraft cabin panels
|DOT/FAA/CT-92/3| p 2118 N93-23222
Goal directed robot navigation in a known indoor environment with unknown stationary and moving obstacles p 2458 N93-23223
System identification and model reduction using modulating function techniques
|NASA-CR-192807| p 2438 N93-23248
Water temperature characteristics of lakes subjected to climate change
|PB93-135648| p 2385 N93-23265
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
|PB93-139087| p 2258 N93-23280
Evaluation of nozzle shapes for an optical flow meter
|PB93-124147| p 2292 N93-23281
Control and analysis of a single-link flexible beam with experimental verification
|DE93-003756| p 2314 N93-23289
New analysis of KrF picosecond pulse experiment
|DE93-003805| p 2308 N93-23290
Computer simulation of atomic collision processes in solids
|DE93-005106| p 2483 N93-23310
Consideration of history dependent damage in creep crack growth
|DE93-004398| p 2328 N93-23317
Dynamic stability of maglev systems
|DE93-004796| p 2315 N93-23335
Stability and heat transfer in time-modulated flows
|DE93-006423| p 2293 N93-23339
Model of Venus ionopause formation
p 2554 N93-23354
On wave force analysis using system identification
|RR-450| p 2293 N93-23361
A comparison of polynomial and rational NARMAX models for nonlinear system identification
|RR-444| p 2469 N93-23374
A multiple scales approach to sound generation by vibrating bodies
|NASA-CR-191414| p 2294 N93-23409
Computational modeling of the environment with applications to lake eutrophication
|TKK-1991/1| p 2386 N93-23425
Smoke movement in a corridor-hybrid model, simple model, and comparison with experiments
|PB93-146678| p 2259 N93-23435
Perception, scene reconstruction and world modeling for unmanned underwater vehicles
|PB93-146983| p 2459 N93-23443
Metallic ions and atoms in the upper atmosphere
|AD-A259741| p 2394 N93-23478
Direct numerical simulations and hydrodynamic stability problems in the upper oceanic mixed layer
p 2414 N93-23490
Macroscopic models of superconductivity
p 2508 N93-23500
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
The creation of a DEM from SPOT data
p 2355 N93-23582
Fractal theory for large lacunar antenna arrays
p 2269 N93-23624
A direct mathematical approach to optimize the age-depth relation of deep-sea sediment cores
|MPIM-77| p 2414 N93-23636
Methods for analyzing extreme events under climate change
|PB93-146827| p 2387 N93-23651
A nonlinear dynamic spherical membrane model
|AD-A259633| p 2112 N93-23654
Cartography of hazards from geological instabilities: Volcanic regions in Peru p 2368 N93-23815
Neutron stars, strange stars, and the nuclear equation of state
|DE93-004704| p 2550 N93-23952

A microclimate model to investigate greenhouse warming of a sub-Alpine ecosystem
| DE93-005290 | p 2388 N93-24011
Preliminary results from the analysis of wind component error, July data
| AD-A259654 | p 2408 N93-24022
Bayesian prediction of mean square errors with covariates
| AD-A259585 | p 2470 N93-24064
A systematic study of the effects of crust and upper mantle structure on regional seismograms
| AD-A260231 | p 2399 N93-24086
Blade Assessment for Ice Impact (BLASIM). User's manual, version 1.0
| NASA-CR-191075 | p 2331 N93-24102
A new index for the crevice corrosion resistance of materials
| AD-A260437 | p 2233 N93-24112
Heteroepitaxial diamond growth
| AD-A259623 | p 2510 N93-24127
Joint flexibility effects on the dynamic response of structures. Part 1: Deterministic analysis
| AD-A260487 | p 2331 N93-24135
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
| NASA-CR-192697 | p 2511 N93-24146
Understanding and modeling the behavior of a harmonic drive gear transmission
| AD-A259610 | p 2317 N93-24152
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling
| AD-A260252 | p 2389 N93-24165
Mathematical analysis of gasdynamic wave initiation
| AD-A260382 | p 2297 N93-24174
Modeling and control of flexible manipulators
p 2318 N93-24182
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension
p 2318 N93-24184
Modeling the thermal properties and processing of composite materials p 2214 N93-24206
Adaptive hierarchic modeling of plates and shells with a-posteriori error estimation
| AD-A259941 | p 2332 N93-24242
Analysis and synthesis of adaptive neural elements and assemblies
| AD-A259954 | p 2422 N93-24247
Computation of nonlinear optical scattering by droplets
| AD-A260333 | p 2490 N93-24267
Step stress testing of receiver/transmitter units, part 1
| AD-A260182 | p 2273 N93-24318
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
| AD-A260249 | p 2246 N93-24332
Remote sensing experiment FEM: A multisensoral dataset for radiometric and geometric analysis
p 2158 N93-24361
Computation in mechanics of materials
| AD-A260060 | p 2332 N93-24409
Analytical representation of contours
| AD-A260151 | p 2471 N93-24415
Design manual for two-phase components of spacecraft thermal management systems
| AD-A260027 | p 2196 N93-24439
New Micro- and macroscopic models of contact and friction
| AD-A259925 | p 2319 N93-24442
Use of system identification techniques for improving airframe finite element models using test data
| NASA-CR-192699 | p 2128 N93-24481
Analysis and synthesis of models for effects of climate change on agricultural systems
| DE93-007949 | p 2389 N93-24521
Climatology of station storm rainfall in the continental United States: Parameters of the Bartlett-Lewis and Poisson rectangular pulses models
| NASA-CR-192968 | p 2411 N93-24523
Three-dimensional turbulent boundary layer flow over a spinning cylinder
| NASA-TM-102240 | p 2300 N93-24533
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
| NASA-CR-185171 | p 2205 N93-24536
Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
| NASA-TM-103909 | p 2300 N93-24537
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
| NASA-TM-103838 | p 2300 N93-24542
User's guide to Flexible Membrane Liner Advisory Expert System, Flex version 3.0
| PB93-134872 | p 2259 N93-24559
Numerical modeling of fluidic flow meters
| PB93-124139 | p 2301 N93-24577
Performance and state-space analyses of systems using Petri nets
| NASA-CR-193195 | p 2443 N93-24604
A semi-empirical analysis of strong-motion peaks in terms of seismic source, propagation path, and local site conditions
| PB93-150266 | p 2402 N93-24629
Reaction/separation process for enhanced methane conversion
| PB93-150985 | p 2246 N93-24634
Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
| PB93-152072 | p 2514 N93-24647

MATHEMATICAL PROGRAMMING
Position calibration software for the form assessment of complex workpieces
| NPL-DITC-203/92 | p 2435 N93-22450

MATRICES (MATHEMATICS)
Generation of covariance data among values from a single set of experiments
| DE93-004192 | p 2522 N93-22435
Partitioning a chordal graph into transitive subgraphs for parallel sparse triangular solution
| DE93-006614 | p 2446 N93-22512
The canonical forms of a lattice rule
| DE93-005686 | p 2466 N93-22759
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
| NASA-TM-103900 | p 2467 N93-22829
Predicting structure in nonsymmetric sparse matrix factorizations
| DE93-004119 | p 2468 N93-22938
Complex principal oscillation pattern analysis
| MPIM-86 | p 2468 N93-23061
Parallel-vector unsymmetric Eigen-Solver on high performance computers
| NASA-CR-191417 | p 2433 N93-24491

MATRIX MATERIALS
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
| DE93-005473 | p 2210 N93-23246
Modeling the thermal properties and processing of composite materials p 2214 N93-24206
Thick-section structural composites and composite structures
| AD-A260081 | p 2215 N93-24316
Chemical vapor infiltration with microwave heating
| DE93-005458 | p 2243 N93-24445

MATRIX METHODS
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 1: Implementing exact mode superposition
| NASA-TM-106063 | p 2329 N93-23739
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 2: Coupled versus uncoupled integration
| NASA-TM-106064 | p 2330 N93-23740

MATTER (PHYSICS)
Neutron stars, strange stars, and the nuclear equation of state
| DE93-004704 | p 2550 N93-23952

MAXIMUM ENTROPY METHOD
On the prior probabilities for two-stage Bayesian estimates
| DE93-006389 | p 2472 N93-22593
A parameter-controlled relaxation algorithm for Bayesian restoration of images using the maximum entropy method (design, analysis, Mach band simulation and parallelization)
| ISBN-0-315-64776-0 | p 2444 N93-24608

MAXIMUM LIKELIHOOD ESTIMATES
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
| DE93-005607 | p 2279 N93-22945
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm
p 2354 N93-23576
Digital processing for positioning with one satellite
p 2270 N93-23629
Models and analysis for multivariate failure time data
p 2322 N93-24198
Simulation of a NC-FSK maximum likelihood receiver for fast Rayleigh fading
| ISBN-0-315-59024-6 | p 2274 N93-24627

MAXIMUM PRINCIPLE
Time optimal paths for high speed maneuvering
| DE93-006251 | p 2458 N93-23338

MAXIMUM USABLE FREQUENCY
A current assessment of single site locating technology p 2267 N93-23608

MAXWELL EQUATION
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
| NASA-TM-104765 | p 2492 N93-22475
Time-reversible Maxwell's demon
| AD-A260170 | p 2460 N93-23709

MAXWELL-BOLTZMANN DENSITY FUNCTION
Equilibria and stability of non-adiabatic Vlasov-Maxwellian plasmas p 2497 N93-23998

MCDONNELL DOUGLAS AIRCRAFT
MD-11: When appearances deceive
| ETN-93-93695 | p 2126 N93-23416

MEAN
Mean levels in nonlinear analysis and identification
| RR-454 | p 2525 N93-23378

MEAN SQUARE VALUES
Preliminary results from the analysis of wind component error, July data
| AD-A259654 | p 2408 N93-24022

MEASUREMENT
A method of measuring the interfacial tension of two liquids of the same mass volume: The cylindrical method
p 2251 N93-22860
An evaluation of schedule metrics used within aeronautical systems center
| AD-A260113 | p 2521 N93-24413

MEASURING INSTRUMENTS
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
| PB93-139004 | p 2256 N93-22079
Chinese research on shock physics
| PB93-134450 | p 2474 N93-22080
Specifications, tolerances, and other technical requirements for weighing and measuring devices as adopted by the 77th National Conference on Weights and Measures, 1992
| PB93-130474 | p 2257 N93-22895
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
| NASA-TM-104002 | p 2128 N93-23175
Research in ultrasonic measurements at NIST: 1982-1992
| PB93-152064 | p 2476 N93-23682
A body mass measurement device based on the oscillation principle p 2166 N93-24400

MECHANICAL DRIVES
Nonlinear adaptive control of electro-mechanical systems p 2461 N93-23716

MECHANICAL ENGINEERING
Activities of the Institute for Mechanical Engineering
| NRC-33578 | p 2319 N93-24287

MECHANICAL PROPERTIES
Chinese research on shock physics
| PB93-134450 | p 2474 N93-22080
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
| DE93-005472 | p 2235 N93-22341
Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
| DS-2024 | p 2208 N93-22603
Strength optimization through powder modification
| DE93-005109 | p 2237 N93-22718
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
| DE93-007670 | p 2229 N93-22912
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
| DE93-005473 | p 2210 N93-23246
Molecular control of liquid crystalline orientation of Poly (p-phenylene -2,6-benzobisoxazole) and Poly (p-phenylene -2,6-benzobisthiazole)
| AD-A259729 | p 2508 N93-23471
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
| DE93-006420 | p 2214 N93-24030
Crystal chemistry of ceramic/mineral systems
| AD-A260440 | p 2241 N93-24193
Relating porosity and mechanical properties in spray formed alloy 625
| AD-A260341 | p 2234 N93-24269
Thick-section structural composites and composite structures
| AD-A260081 | p 2215 N93-24316
Computation in mechanics of materials
| AD-A260060 | p 2332 N93-24409
Use of block copolymer as polymer blend compatibilizer
| AD-A260435 | p 2242 N93-24417
Ion beam modification of ceramics: Mechanical properties and structure
| AD-A260504 | p 2242 N93-24419

Penetration mechanics research in the former Soviet Union
| PB93-146488 | p 2259 N93-24495

MEDICAL EQUIPMENT
Cardiovascular stress test with non-invasive techniques p 2165 N93-24399

MEDICAL SCIENCE
Commercial opportunities in bioseparations and physiological testing aboard Space Station Freedom p 2192 N93-22649
Medical subject headings: Supplementary chemical records, 1993
| PB93-115244 | p 2525 N93-23279

MEDICAL SERVICES
Photovoltaic evaluation study
| DE93-761330 | p 2378 N93-22956

MELT SPINNING
Microstructure of rapidly-solidified lithium powders
| DE93-004765 | p 2229 N93-22880
Recrystallization of amorphous and nanocrystalline NdBa2Cu3O(7-x) and GdBa2Cu3O(7-x)
| DE93-004469 | p 2508 N93-23950

MELTING
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Ablation, melting, and smoothing of polycrystalline alumina by pulsed excimer laser radiation
| DE93-005148 | p 2227 N93-22496
Peculiarities of structures and meltinglike transition in gold clusters
| DE93-004810 | p 2228 N93-22741
Structure of molten iron chloride
| DE93-004814 | p 2219 N93-22742

MELTS (CRYSTAL GROWTH)
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897

MEMBRANE STRUCTURES
A nonlinear dynamic spherical membrane model
| AD-A259633 | p 2112 N93-23654

MEMBRANES
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
| DE93-005883 | p 2235 N93-22422
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
| DE93-004784 | p 2303 N93-22706
Photochemical observation of ion flows in membrane channels
| AD-A259869 | p 2219 N93-22731
Gas separation with glass membranes
| DE93-000217 | p 2219 N93-22871
Methane conversion by solid electrolyte membranes
| PB93-127041 | p 2222 N93-23994
Gas separations using ceramic membranes
| DE93-003204 | p 2225 N93-24498
User's guide to Flexible Membrane Liner Advisory Expert System, Flex version 3.0
| PB93-134872 | p 2259 N93-24559
Development of membrane film fiber optic based sensors for the remote monitoring of the quality of surface and groundwater
| PB93-150001 | p 2375 N93-24638

MEMORY (COMPUTERS)
The design of scalable software libraries for distributed memory concurrent computers
| DE93-003612 | p 2434 N93-22332

MENISCI
CO2 laser beam propagation with ZnSe optics
| DE93-002927 | p 2308 N93-23307

MENTAL PERFORMANCE
Hazard alerting and situational awareness in advanced air transport cockpits p 2106 N93-22566

MERCURY CADMIUM TELLURIDES
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
| AD-A260043 | p 2488 N93-23645
Influence of defects in HgCdTe grown by Molecular Beam Epitaxy (MBE) on electrical devices
| AD-A260457 | p 2511 N93-24194

MERCURY COMPOUNDS
Construction and evaluation of a metal ion biosensor
| AD-A259775 | p 2304 N93-23452
Control of the concentration gradient during crystal growth from solution p 2165 N93-24395

MESOMETEOROLOGY
Massively parallel implementation of the Penn State/NCAR mesoscale model
| DE93-004874 | p 2394 N93-23320
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
| PB93-118586 | p 2405 N93-23333
The use of the Air Force cloud cover data to evaluate and improve cloud forecast and parameterization in mesoscale meteorology models
| AD-A260357 | p 2409 N93-24171

MESON-NUCLEON INTERACTIONS
Physics opportunities with higher energy pion beams
| DE93-006678 | p 2480 N93-22585

MESONS
Meson form-factors and wave-functions with Wilson fermions
| DE93-003859 | p 2479 N93-22542
Inclusive J/psi, psi(2S) and b-quark production in (-p)p collisions at square root of s - 1.8 TeV
| DE93-004739 | p 2481 N93-22739
Physics from photon and lepton-pair spectra
| DE93-003083 | p 2481 N93-22752
Experimental studies of pion-nucleus interactions at intermediate energies
| DE93-005872 | p 2482 N93-23308
Study of electroweak interactions
| DE93-007261 | p 2484 N93-24510

MESOSCALE PHENOMENA
User's guide to the Penn State/NCAR Mesoscale Modeling System
| PB93-126654 | p 2391 N93-22380
The effect of current-induced stress perturbation on large- and meso-scale air-sea interactions p 2393 N93-23207
Massively parallel implementation of the Penn State/NCAR mesoscale model
| DE93-004874 | p 2394 N93-23320
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
| PB93-118586 | p 2405 N93-23333
Impact of a Newtonian assimilation and physical initialization on the initialization and prediction in a tropical mesoscale model p 2394 N93-23353
Southward burst mesoscale convective systems: An observational and modeling study p 2406 N93-23494
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603
Dynamic and thermodynamic characteristics of a pre-frontal convective rainband in northern Taiwan determined form Tamex data p 2409 N93-24162
The use of the Air Force cloud cover data to evaluate and improve cloud forecast and parameterization in mesoscale meteorology models
| AD-A260357 | p 2409 N93-24171

MESOSPHERE
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment
| AD-A259986 | p 2401 N93-24424

MESSAGE PROCESSING
PMC: A shared short-cut to portable parallel power
| DE93-005815 | p 2447 N93-22868
Isomorphic routing on a toroidal mesh
| NASA-CR-191430 | p 2437 N93-23058
Fully automatic transmission of information via HF and comparison to satellite transmission p 2275 N93-23516
EUTELTRACS: The European land mobile satellite service p 2276 N93-23526
The ECA critical requirements model
| AD-A259682 | p 2440 N93-23659
Progressive retry for software error recovery in distributed systems
| AD-A260075 | p 2442 N93-24315
The actor model
| AD-A260196 | p 2442 N93-24469

METABOLISM
Xylose fermentation to ethanol
| DE93-000067 | p 2244 N93-22929
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
| DE93-006091 | p 2386 N93-23301
Biotechnical production and use of pyruvic acid with special reference to coenzyme regeneration
| VTT-PUBS-77 | p 2419 N93-23369

METAL BONDING
Influence of addition elements in copper or implanted in aluminum on the adhesion to the solid state of the copper/aluminum (Cu/Al2O3) system
| ECL-91-34 | p 2228 N93-22698

METAL COATINGS
Boundary film for structural ceramic materials
| DE93-004871 | p 2240 N93-23975

METAL FATIGUE
An investigation into the multiaxial fatigue behavior of IMI 829 titanium alloy p 2327 N93-23182
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
| DE93-007971 | p 2234 N93-24566

METAL FILMS
Correlations between surface structure and catalytic activity/selectivity
| DE93-005884 | p 2217 N93-22423
Investigation of the kinetics of surface-limited thin film growth of SiGe alloys
| DE93-005419 | p 2502 N93-22538
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films p 2505 N93-23100
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
| DE93-007392 | p 2485 N93-24565

METAL FOILS
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
| DE93-003834 | p 2492 N93-22428

METAL HALIDES
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
| DE93-007013 | p 2218 N93-22515
Continuous production of granular or powder Ti, Zr, and Hf or their alloy products
| PB93-135051 | p 2227 N93-22592

METAL IONS
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions
| DE93-003478 | p 2478 N93-22031
Spectroscopy of highly-ionized atoms using position-sensitive detection
| DE93-002914 | p 2482 N93-22985
Theoretical study of reactions at the electrode-electrolyte interface
| DE93-006899 | p 2221 N93-23341
Construction and evaluation of a metal ion biosensor
| AD-A259775 | p 2304 N93-23452
Metallic ions and atoms in the upper atmosphere
| AD-A259741 | p 2394 N93-23478
The study of polyether solvation mechanisms using UV/visible spectroscopy
| AD-A260355 | p 2241 N93-24170
Aspects of photoionization of impurities and electron transfer in ionic crystals
| DE93-008544 | p 2513 N93-24511

METAL MATRIX COMPOSITES
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
| DE93-003806 | p 2208 N93-22432
Pressure-reaction synthesis of titanium composite materials
| PB93-135036 | p 2208 N93-22591
High Temperature Composite Analyzer (HITCAN) programmer's manual. Version 1.0
| NASA-TM-106004 | p 2326 N93-23056
High Temperature Composite Analyzer (HITCAN) demonstration manual, version 1.0
| NASA-TM-106003 | p 2328 N93-23411
Residual stress measurements in continuous fiber titanium matrix composites
| DE93-003733 | p 2232 N93-23686
The diffusion of lead toward the interface of a rapidly solidified carbon fiber reinforced aluminum-lead matrix composite p 2210 N93-23719
X-ray computed tomography for advanced materials and processes
| AD-A259828 | p 2213 N93-23953
Effects of processing parameters on the microstructure of a 30 w/o SiCw-2080 aluminum composite
| NRC-IAR-CR-20 | p 2216 N93-24651

METAL OXIDE SEMICONDUCTORS
Positron studies of defected metals, metallic surfaces
| DE93-006089 | p 2499 N93-22051
Processing of patterned ferroelectric capacitors
| AD-A259936 | p 2284 N93-24131

METAL OXIDES
Correlations between surface structure and catalytic activity/selectivity
| DE93-005884 | p 2217 N93-22423
Photopromoted and thermal decomposition of nitric oxide by metal oxides
| AD-A259766 | p 2224 N93-24422

METAL PARTICLES
Active microparticle media
| AD-A259722 | p 2487 N93-23639

METAL POWDER
Synthesis, processing, and properties of Ti5Si3
| DE93-004465 | p 2229 N93-22820
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
| DE93-004476 | p 2508 N93-23691
Analysis of residual phases in nickel aluminide powders produced by reaction synthesis
| DE93-005680 | p 2233 N93-24014
Results on powder injection molding of Ni3Al and application to other intermetallic compositions
| DE93-005681 | p 2213 N93-24016

METAL SHEETS
Formability of type 304 stainless steel sheet
[DE92-018619] p 2229 N93-22924
METAL SURFACES
Positron studies of defected metals, metallic surfaces
[DE93-006089] p 2499 N93-22051
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
[NASA-TM-106014] p 2236 N93-22560
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
[DE93-006500] p 2228 N93-22710
Friction microprobe investigation of particle layer effects on sliding friction
[DE92-018868] p 2313 N93-22925
Chemistry of bimetallic and alloy surfaces
[DE93-006893] p 2230 N93-22981
Theory of the dissociation dynamics of small molecules on metal surfaces: Finite temperature studies
[DE93-005870] p 2482 N93-23298
Formation of defect-free metal/semiconductor contacts
[AD-A259604] p 2284 N93-24151
METAL VAPORS
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors
[AD-A260532] p 2223 N93-24278
METALORGANIC CHEMICAL VAPOR DEPOSITION
Metallo-organic solution deposition of ferroelectric PZT films
[AD-A260127] p 2502 N93-22549
New 3-5 cell design approaches for very high efficiency
[DE92-010558] p 2381 N93-23697
METALS
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
[DE93-004432] p 2228 N93-22724
Analysis of automated fatigue crack growth rate data
[DE93-752853] p 2324 N93-22771
Large-amplitude forced response of dynamic systems
[AD-A260394] p 2332 N93-24426
METASTABLE STATE
Towards a first-principles thermodynamics of solids
[DE93-002544] p 2514 N93-22426
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE93-000050] p 2505 N93-22969
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
[AD-A260181] p 2308 N93-23315
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
[ONERA-P-1992-3] p 2309 N93-24137
METATHESIS
Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
[AD-A260071] p 2224 N93-24314
METEORITE COLLISIONS
Impact contribution of prebiotic reactants to Earth
[NASA-CR-192785] p 2552 N93-24480
METEORITES
Near-earth object interception workshop summary
[DE93-003793] p 2546 N93-22403
METEORITIC MICROSTRUCTURES
Studies of cosmic dusts using synchrotron radiation
p 2549 N93-23390
METEOROID HAZARDS
Repeatability and uncertainty analyses of NASA/MSFC light gas gun test data
[NASA-CR-192496] p 2325 N93-23012
METEOROID PROTECTION
Propulsion Systems Panel p 2174 N93-22096
METEOROIDS
Analysis of the results of the first year of operation of the Munich Dust Counter p 2537 N93-23910
METEOROLOGICAL CHARTS
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
Satellite-images in secondary education in Baden-Wuerttemberg (Germany) p 2370 N93-23830
METEOROLOGICAL INSTRUMENTS
Correlation and prediction of snow water equivalent from snow sensors
[PB93-127413] p 2374 N93-23870
METEOROLOGICAL PARAMETERS
Regional-scale analysis and forecasting
[AD-A259894] p 2403 N93-22733
Wind power plants in the weather conditions of Northern Finland
[DE93-752927] p 2379 N93-22971
Data ingest and objective analysis for the PSU/NCAR modeling system. Programs DATAGRID and RAWINS
[PB93-138519] p 2393 N93-23252
Mariners weather log, volume 36, number 3, summer 1992
[PB93-132033] p 2405 N93-23282
Mariners weather log, volume 36, number 4, fall 1992
[PB93-132041] p 2405 N93-23283
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
Methods for analyzing extreme events under climate change
[PB93-146827] p 2387 N93-23651
The use of the Air Force cloud cover data to evaluate and improve cloud forecast and parameterization in mesoscale meteorology models
[AD-A260357] p 2409 N93-24171
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
[AD-A260363] p 2409 N93-24239
Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
Assessment of spaceborne lidar for meteorological analyses
[AD-A260026] p 2410 N93-24517
Aerosol measurements at the South Pole during 1987
[PB93-137016] p 2390 N93-24567
METEOROLOGICAL RADAR
Plan for the evaluation of the prototype Terminal Doppler Weather Radar (TDWR) system
[DOT/FAA/CT-TN92/44] p 2404 N93-23045
Air traffic operational evaluation plan for the prototype Airport Surveillance Radar Wind Shear Processor (ASR-WSP) at Orlando International Airport
[DOT/FAA/CT-TN92/45] p 2404 N93-23064
The vertical profile of reflectivity and errors in radar estimates of rainfall p 2406 N93-23350
Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351
A satellite-based Radar Wind Sounder (RAWS)
p 2406 N93-23384
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
[PB93-136497] p 2396 N93-23650
METEOROLOGICAL SATELLITES
Investigation of cloud/water vapor motion winds from geostationary satellite
[NASA-CR-192274] p 2403 N93-22653
On the navigation of polar orbiting meteorological satellites
[MPIM-75] p 2180 N93-23111
Cooperation with Europe in NOAA operational satellite programs p 2357 N93-23754
METEOROLOGICAL SERVICES
Data sets for weather information services
p 2337 N93-22140
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810
METEOROLOGY
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
[PB93-123909] p 2412 N93-22067
Local Lightning Early Warning System (LLEWS), phase 1
[DE93-006609] p 2403 N93-22595
Turbulence models for helical flow
[GKSS-92/E/12] p 2291 N93-23189
Aircraft accident report: United Airlines flight 585, Boeing 737-291, N999UA, uncontrolled collision with terrain for undetermined reasons, 4 miles south of Colorado Springs Municipal Airport, Colorado Springs, Colorado, 3 March 1991
[PB92-910407] p 2117 N93-23191
A comprehensive glossary of weather terms for storm spotters
[PB93-128940] p 2407 N93-23649
Climatological probability of cloud-free line-of-sight
[AD-A260139] p 2407 N93-23706
GLOBSAT/METOC: An alternative approach for a European Earth observation programme from the polar orbit p 2361 N93-23775
Programmes and strategy for the World Meteorological Organization with respect to Earth observation from space p 2372 N93-23842
World Meteorological Organization
[WMO-774] p 2408 N93-24061
Meteorological data assimilation by adaptive Bayesian optimization p 2409 N93-24272
Assessment of spaceborne lidar for meteorological analyses
[AD-A260026] p 2410 N93-24517
METEOSAT SATELLITE
Meteosat operational programme current missions and services p 2357 N93-23752
Meteosat second generation: A look to the future
p 2357 N93-23753
Meteosat second generation enhanced visible-IR imager SEVIRI and its environmental monitoring potential
p 2362 N93-23780
METHANATION
Solar reforming applications study summary
[DE93-002286] p 2244 N93-22424
METHANE
Evaluation of ceramic materials for an advanced steam-methane reformer
[DE93-005931] p 2235 N93-22329
Methane oxidation over dual redox catalysts
[DE92-012454] p 2217 N93-22431
Computer-aided design of molecular catalysts for alkane oxidation using dodeca-substituted iron porphyrins
[DE93-004046] p 2218 N93-22520
Methane conversion by solid electrolyte membranes
[PB93-127041] p 2222 N93-23994
NOAA/CMDL atmospheric methane data from shipboard flask sampling
[PB93-136489] p 2389 N93-24226
Laser excitation and chemi-ionization of combustion species
[AD-A260120] p 2224 N93-24414
Reaction/separation process for enhanced methane conversion
[PB93-150985] p 2246 N93-24634
METHYL ALCOHOL
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
[DE93-004659] p 2244 N93-22325
Computer-aided design of molecular catalysts for alkane oxidation using dodeca-substituted iron porphyrins
[DE93-004046] p 2218 N93-22520
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
[PB93-144350] p 2313 N93-22901
Conversion of methanol-fueled 16-valve, 4-cylinder engine to operation on gaseous 2H2/CO fuel
[PB93-144376] p 2313 N93-22902
Direct conversion of light hydrocarbon gases to liquid fuel
[DE93-004916] p 2245 N93-23321
High octane ethers from synthesis gas-derived alcohols
[DE93-006476] p 2245 N93-24031
A comparative analysis of alternative fuels for the INEL vehicle fleet
[DE93-007224] p 2319 N93-24256
Design of a high activity and selectivity alcohol catalyst
[DE93-008100] p 2225 N93-24575
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
[PB93-141059] p 2320 N93-24628
Reaction/separation process for enhanced methane conversion
[PB93-150985] p 2246 N93-24634
METHYL COMPOUNDS
Spectroscopy and kinetics of combustion gases at high temperatures
[DE93-006892] p 2221 N93-23340
METHYLHYDRAZINE
Active Hydrazine Vapor Sampler (AHVS)
p 2225 N93-22165
METRICATION
NASA metric transition plan
[NASA-TM-108606] p 2258 N93-23209
Federal move to metric: Public Law, DoC and NIST
[PB93-139129] p 2258 N93-23284
METROLOGY
Federal move to metric: Public Law, DoC and NIST
[PB93-139129] p 2258 N93-23284
MICHELSON INTERFEROMETERS
MIPAS: Michelson Interferometer for Passive Atmospheric Sounding for POEM-1
p 2363 N93-23786
Calibration of a standard transducer using a laser interferometer (TTCP calibration round-robin)
[NRC-34387] p 2305 N93-24289
MICHIGAN
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
[PB93-110983] p 2520 N93-24158

MICROANALYSIS
Friction microprobe investigation of particle layer effects on sliding friction
[DE92-018868] p 2313 N93-22925
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360
MICROBURSTS (METEOROLOGY)
Optimal recovery from microburst wind shear p 2107 N93-22574
A statistical characterization of Denver-area microbursts
[DOT/FAA/NR-92/13] p 2404 N93-23094
MICROCHANNELS
High performance microchannel heat exchanger for cooling high heat load x ray optical elements
[DE93-004245] p 2296 N93-23688
MICROCLIMATOLOGY
A microclimate model to investigate greenhouse warming of a sub-Alpine ecosystem
[DE93-005290] p 2388 N93-24011
MICROCOMPUTERS
NTIA Microcomputer Spectrum Analysis Models (MSAM), Version 4.0, August 1992
[PB93-108346] p 2432 N93-23269
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761
MICROCRACKS
Factors influencing the thermal shock behavior of ceramics
[DE93-005762] p 2236 N93-22690
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
[AD-A260129] p 2210 N93-23703
MICROCRYSTALS
Textured coatings from colloidal suspensions of faceted oxide microcrystals
[DE93-006601] p 2240 N93-24033
MICROELECTRONICS
Development of a miniature mass analyzer and associated instrumentation for improved capabilities in the analysis of low energy plasmas from a rocket or satellite platform
[NASA-CR-192453] p 2202 N93-22014
Center for Space Microelectronics Technology
[NASA-CR-192799] p 2279 N93-22812
Solid state research
[AD-A259726] p 2509 N93-24024
Electronics and electrical engineering laboratory technical publication announcements covering laboratory programs, April to June 1992, with 1992/1993 EEEL events calendar
[PB93-147163] p 2284 N93-24225
Infrared vacuum soldering process for thick-film hybrid microcircuits
[DE93-007483] p 2265 N93-24451
Microelectronic and micromechanical sensors and actuators in CMOS technology: A novel scheme toward s regularization and integration
[ISBN-0-315-60192-2] p 2305 N93-24609
MICROGRAVITY APPLICATIONS
NASA PPO microgravity projects support
[NASA-CR-192460] p 2246 N93-22038
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620
Microgravity fluid physics research in the Space Station Freedom era p 2191 N93-22644
Protein crystal growth in microgravity p 2191 N93-22646
Electrically driven convection p 2247 N93-22837
Materials science on parabolic aircraft: The FY 1987-1989 KC-135 microgravity test program
[NASA-TM-4456] p 2252 N93-23171
Space Station Furnace Facility. Volume 1: Requirements definition and conceptual design study, executive summary
[NASA-CR-192471] p 2199 N93-23225
Microgravity science and applications: Program tasks and bibliography for FY 1992
[NASA-TM-4469] p 2253 N93-23428
Proposed ground-based control of accelerometer on Space Station Freedom
[NASA-TM-105960] p 2201 N93-23738
Gravity-related phenomena in materials science p 2161 N93-24372
The Microgravity User Support Center (MUSC) p 2161 N93-24374
Telescience opportunities in the precursor flights p 2161 N93-24376
The surface plasmon spectroscopy applications in microgravity: The measurement theory and preliminary experimental layout p 2165 N93-24396
MICROHARDNESS
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
[DE93-005473] p 2210 N93-23246
MICROMECHANICS
Microstatic study of the behavior of granular media
[ECL-90-31] p 2236 N93-22460
Micromotional studies of utricular and canal afferents
[NASA-CR-192703] p 2417 N93-22800
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
[NASA-CR-192813] p 2209 N93-23043
Microstructure and texture control of fatigue in hydrogen and marine environments
[AD-A259808] p 2231 N93-23642
Thermally induced micromechanical stresses in ceramic/ceramic composites
[DE93-004860] p 2239 N93-23974
Thick-section structural composites and composite structures
[AD-A260081] p 2215 N93-24316
MICROMETEORITES
Atmospheric transmission of polar meteorites
[ESA-TT-1283] p 2547 N93-23206
MICROMETEOROIDS
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
MICROORGANISMS
Measuring variation in ecosystem sensitivity to stress
[AD-A259521] p 2387 N93-23450
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
[AD-A258453] p 2233 N93-23982
MICROPARTICLES
Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts
[DE93-003845] p 2323 N93-22516
Active microparticle media
[AD-A259722] p 2487 N93-23639
MICROPHONES
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
[NASA-TM-104002] p 2128 N93-23175
Fiber optic microphone having a pressure sensing reflective membrane and a voltage source for calibration purpose
[NASA-CASE-LAR-14402-2-CU] p 2478 N93-24602
MICROPROCESSORS
Real-time signal processing systems
[AD-A259548] p 2272 N93-24084
MICROSCOPY
Tunneling magnetic force microscopy p 2514 N93-22194
MICROSTRIP ANTENNAS
A class of hybrid finite element methods for electromagnetics: A review
[NASA-CR-192631] p 2260 N93-22467
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
[NASA-CR-191089] p 2277 N93-22479
MICROSTRIP TRANSMISSION LINES
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
[NASA-CR-191089] p 2277 N93-22479
MICROSTRUCTURE
Processing and microstructural development of Ag-clad Bi-Sr-Ca-Cu-O tapes
[DE93-004201] p 2500 N93-22078
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344
Microstatic study of the behavior of granular media
[ECL-90-31] p 2236 N93-22460
Flux pinning structures in melt-processed YBa2Cu3O(7-x)
[DE93-005151] p 2501 N93-22497
Sol-gel/rhodamine 6G composite films with tailored microstructures
[DE93-005364] p 2208 N93-22504
Materials science research in microgravity p 2191 N93-22645
Fracture properties of 7010 and 7050 aluminium alloys under inert and aggressive environmental conditions
[DLR-FB-91-35] p 2228 N93-22658
Micromagnetic surface studies of materials for nondestructive evaluation
[DE93-006303] p 2321 N93-22695
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
[DE93-004445] p 2503 N93-22726
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
[DE93-003792] p 2504 N93-22808
Synthesis, processing, and properties of Ti5Si3
[DE93-004465] p 2229 N93-22820
Microstructure of rapidly-solidified lithium powders
[DE93-004765] p 2229 N93-22880
Solid-particle erosion of in-situ reinforced Si3Ni4
[DE92-014868] p 2209 N93-22911
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
[DE93-007670] p 2229 N93-22912
Substrate surface structure effects on microstructure of epitaxial films
[DE93-005562] p 2504 N93-22944
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
[DE93-005473] p 2210 N93-23246
Heat pipe fatigue test specimen: Metallurgical evaluation
[NASA-CR-189120] p 2381 N93-23360
Microstructure and texture control of fatigue in hydrogen and marine environments
[AD-A259808] p 2231 N93-23642
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
[AD-A260129] p 2210 N93-23703
Cavities in He-implanted Si: Internal surface science
[DE93-005340] p 2509 N93-24012
Analysis of residual phases in nickel aluminide powders produced by reaction synthesis
[DE93-005680] p 2233 N93-24014
Textured coatings from colloidal suspensions of faceted oxide microcrystals
[DE93-006601] p 2240 N93-24033
Silicon nitride containing rare earth silicate intergranular phases
[DE93-006624] p 2509 N93-24034
Heteroepitaxial diamond growth
[AD-A259623] p 2510 N93-24127
Computation in mechanics of materials
[AD-A260060] p 2332 N93-24409
Center for shape optimization and material layout
[AD-A260087] p 2471 N93-24411
Studies of microstructure/critical current density relationships for grain boundaries in YBa2Cu3O(7-delta) bicrystals
[DE93-003000] p 2513 N93-24512
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
[DE93-007971] p 2234 N93-24566
MICROWAVE AMPLIFIERS
A high-power 95 GHz gyro-TWT amplifier
[DE93-002332] p 2277 N93-22425
Space power amplification with active linearly tapered slot antenna array
[NASA-TM-106036] p 2277 N93-22485
MICROWAVE ANTENNAS
Analysis of MMIC arrays for use in the ACTS Aero Experiment
[NASA-TM-106073] p 2180 N93-22589
Guided wave phenomena in millimeter wave integrated circuits and components
[AD-A260407] p 2262 N93-22946
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas) p 2264 N93-23504
Antenna pattern control using impedance surfaces
[NASA-CR-192712] p 2273 N93-24471
MICROWAVE CIRCUITS
Analysis of MMIC arrays for use in the ACTS Aero Experiment
[NASA-TM-106073] p 2180 N93-22589
Guided wave phenomena in millimeter wave integrated circuits and components
[AD-A260407] p 2262 N93-22946
A leakage canceller for a single antenna radar
[ETN-93-93495] p 2264 N93-23379
Simulation of TunneLadder traveling-wave tube cold-test characteristics: Implementation of the three-dimensional, electromagnetic circuit analysis code micro-SOS
[NASA-TP-3294] p 2281 N93-23394
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656
MICROWAVE EQUIPMENT
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
[ACTA-POL-SCAND-EL-69] p 2264 N93-23367
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656

MICROWAVE FREQUENCIES
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
[NASA-TM-104765] p 2492 N93-22475
MICROWAVE IMAGERY
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[DLR-FB-91-32] p 2262 N93-22656
Use of Special Sensor Microwave/Imager (SSM/I) for estimation of precipitation features in a semi-arid, mountain region: A case study of southwest Saudi Arabia p 2407 N93-23721
Scattering centre analysis of simple metallic objects
[ESA-TT-1250] p 2274 N93-24619
MICROWAVE OSCILLATORS
Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
Study of a plasma-filled X-band backward wave oscillator p 2281 N93-23498
MICROWAVE POWER BEAMING
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas) p 2264 N93-23504
MICROWAVE RADIOMETERS
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Observation in Arctic p 2336 N93-22133
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Ground-based microwave radiometric remote sensing of the tropical atmosphere p 2343 N93-23352
The design of the ESA Multiband Imaging Microwave Radiometer MIMR p 2364 N93-23790
MICROWAVE SENSORS
Microwave remote sensing of ice p 2336 N93-22132
MICROWAVE SPECTROMETERS
Millimeter wave Atmospheric Sounder (MAS) p 2364 N93-23795
MICROWAVE TRANSMISSION
Traceability for radio frequency coaxial line standards
[NPL-DES-114] p 2277 N93-22451
Microwave-powered aircraft
[CA-PATENT-1-295-019] p 2128 N93-24591
MICROWAVES
Apparatus and method for cellulose processing using microwave pretreatment
[NASA-CASE-MSC-21936-1-SB] p 2216 N93-22036
Photon acceleration via laser-produced ionization fronts
[DE93-005205] p 2480 N93-22719
Plasma technology p 2496 N93-23265
Poloidal magnetic field profile measurements on the microwave tokamak experiment using far-infrared polarimetry p 2498 N93-24294
Application of microwave heating for fabrication of silicon nitride ceramics
[DE93-006741] p 2242 N93-24330
Chemical vapor infiltration with microwave heating
[DE93-005458] p 2243 N93-24445
MIDCOURSE TRAJECTORIES
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
[NASA-CR-185171] p 2205 N93-24536
MIDDLE ATMOSPHERE
The quasi-biennial oscillation in the middle atmosphere p 2397 N93-23965
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
[NASA-EP-285] p 2399 N93-24148
MIE SCATTERING
Contribution to the study of soot formation in combustion environments by optical methods based on light diffusion
[ECL-91-26] p 2218 N93-22697
MILITARY AIR FACILITIES
NetView technical research
[NASA-CR-192822] p 2434 N93-22043
MILITARY AIRCRAFT
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682
Non-chromated surface pretreatments for aluminum
[AD-A260130] p 2232 N93-23704
MILITARY OPERATIONS
Post Cold War assessment of US space policy: A task group report
[PB93-139962] p 2532 N93-22900
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
[AD-A259922] p 2407 N93-23710
Sustaining health and performance in the cold: A pocket guide to environmental medicine aspects of cold-weather operations
[AD-A259625] p 2422 N93-24021
MILITARY SPACECRAFT
Military space capabilities and requirements p 2154 N93-23161
MILITARY TECHNOLOGY
Military space capabilities and requirements p 2154 N93-23161
Industry perspectives p 2154 N93-23162
Interagency Advanced Power Group Steering Group meeting minutes
[DE93-005641] p 2382 N93-24324
Mechanical Working Group meeting minutes --- power generation and delivery systems
[DE93-004884] p 2571 N93-24435
Summary from a study group on neural networks at NDRE
[FFI-92/7015] p 2465 N93-24640
MILKY WAY GALAXY
Neutral gas in the central 2 parsecs of the galaxy
[NASA-CR-192801] p 2546 N93-23095
The kinematics of stars and gas in the galactic disk p 2550 N93-23991
MILLIMETER WAVES
A bolometric radiometer for investigations in cosmology p 2303 N93-22684
Guided wave phenomena in millimeter wave integrated circuits and components
[AD-A260407] p 2262 N93-22946
Electron Cyclotron Resonance Heating (ECRH) p 2495 N93-23259
Millimeter wave Atmospheric Sounder (MAS) p 2364 N93-23795
Hexagonal ferrites for millimeter wave applications
[AD-A260483] p 2510 N93-24101
Millimeter-wave applications of semiconductor dielectric waveguides with plasma layers (surface or buried) generated from semiconductor lasers
[AD-A260484] p 2510 N93-24134
MILLING (MACHINING)
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
[DE93-004476] p 2508 N93-23691
MIMD (COMPUTERS)
Data-parallel Langevin dynamics simulations
[DE93-003836] p 2445 N93-22434
Survey of benchmarks
[NPL-DITC-192/91] p 2436 N93-22816
MINERAL DEPOSITS
Satellite image and reference data investigations for exploration purposes p 2341 N93-22449
Survey of the Hokkaido development project
[DE93-761804] p 2382 N93-24013
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
[PB93-152031] p 2416 N93-24605
MINERAL EXPLORATION
Satellite image and reference data investigations for exploration purposes p 2341 N93-22449
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949
MINERALOGY
Reactive control and reasoning assistance for scientific laboratory instruments p 2465 N93-22186
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949
MINERALS
Fabrication and properties of Si3N4 with rare earth apatite grain boundary phases
[DE93-005752] p 2505 N93-23037
Crystal chemistry of ceramic/mineral systems
[AD-A260440] p 2241 N93-24193
MINIATURE ELECTRONIC EQUIPMENT
Flight experience with lightweight, low-power miniaturized instrumentation systems
[NASA-TM-4463] p 2128 N93-23102
MINIATURIZATION
Micro-video display with ocular tracking and interactive voice control p 2433 N93-22172
Space biology initiative program definition review. Trade study 3: Hardware miniaturization versus cost p 2418 N93-23080
Flight experience with lightweight, low-power miniaturized instrumentation systems
[NASA-TM-4463] p 2128 N93-23102
MINING
Apparatus and method for computer vision measurements
[PB93-135077] p 2432 N93-22536
MINNESOTA
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
[PB93-110963] p 2520 N93-24158
MINORITIES
Underrepresented groups p 2517 N93-23146
Focusing educational initiatives p 2517 N93-23150
MIR SPACE STATION
Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620
The scientific program of the Priroda project p 2360 N93-23771
High resolution stereo images from the Space Station Mir p 2365 N93-23800
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
[ESA-ISY-4] p 2154 N93-24336
French Mir missions p 2156 N93-24348
Mir '92 project p 2157 N93-24350
Mir 1992: Scientific program and payload p 2157 N93-24351
Mir 1992 operations and crew training p 2157 N93-24352
The joint Austro-Soviet space project Austromir-91 p 2157 N93-24353
Physiological experiments within the project AustroMir p 2157 N93-24354
Flight experiences on board Space Station Mir p 2157 N93-24355
VideoMir: Satellite video conferencing during the AustroMir spaceflight p 2158 N93-24356
Technical management and test procedures for AustroMir-1991 p 2158 N93-24357
DataMir: A PC-based computer system for application at Space Station Mir p 2158 N93-24358
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360
Remote sensing experiment FEM: A multisensoral dataset for radiometric and geometric analysis p 2158 N93-24361
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362
Development and implementation of the MotoMir experiment on the Mir Space Station p 2159 N93-24363
CogiMir: A study of cognitive functions in microgravity p 2159 N93-24364
DosiMir: Radiation measurements inside the Soviet Space Station Mir, first results p 2160 N93-24371
Japanese treefrog experiment onboard the Space Station Mir p 2166 N93-24402
MIRRORS
LUTE primary mirror materials and design study report
[NASA-CR-192487] p 2487 N93-22961
Solar concentrators for advanced solar-dynamic power systems in space
[NASA-CR-187148] p 2204 N93-23017
Low-damage multilayer mirror for the soft x ray region
[AD-D015621] p 2489 N93-24231
MIS (SEMICONDUCTORS)
Advanced dielectrics for passivation of InSb
[DE93-005353] p 2501 N93-22503
MISCIBILITY GAP
Phase separation under a weak concentration gradient p 2226 N93-22853
MISS DISTANCE
A current assessment of single site locating technology p 2267 N93-23608
MISSILE COMPONENTS
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
MISSILE CONFIGURATIONS
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
[NASA-TM-105267] p 2325 N93-23015
MISSILE CONTROL
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
System evaluation of a fiber optic guided missile with a simple guidance addition to improve system effectiveness p 2255 N93-22025
Linear payout systems for dispensing fiber-optic data links from precision-guided munitions or high-performance aircraft/missiles p 2255 N93-22026
An overview of autonomous rendezvous and docking system technology development at General Dynamics p 2145 N93-22281
Bank-to-turn missiles and autopilot design
[ETN-93-93488] p 2131 N93-23373
Localization system based on data merging of images and inertia p 2269 N93-23623

MISSILE DEFENSE
Dual use of distributed remote sensing satellites
[DE93-005442] p 2193 N93-22906
A conceptual design analysis of an air launched anti-satellite missile system
[ETN-93-93487] p 2126 N93-23372
MISSILE DESIGN
Versatile attack weapon p 2256 N93-22027
Bank-to-turn missiles and autopilot design
[ETN-93-93488] p 2131 N93-23373
MISSILE TRACKING
Test results of the advanced translator processing system p 2269 N93-23620
MISSILES
The avionic system of the experimental standoff dispenser ADW p 2129 N93-22028
System concept for an advanced stand-off weapon p 2256 N93-22029
MISSION PLANNING
Cargo vehicle architecture options p 2172 N93-22082
Advanced Manned Launch System p 2172 N93-22084
Advanced Crew Rescue Vehicle/Personnel Launch System p 2173 N93-22085
Single stage to orbit/SDIO p 2173 N93-22086
Lunar transfer vehicle studies p 2173 N93-22087
Mars transfer vehicle studies p 2173 N93-22088
Aerobraking technology studies p 2173 N93-22089
CSTI Earth-to-orbit propulsion research and technology program overview p 2174 N93-22090
Advanced rocket propulsion p 2174 N93-22091
Vehicle systems p 2174 N93-22095
Entry Systems Panel p 2175 N93-22097
Vehicle Systems Panel deliberations p 2175 N93-22098
Built-up Al-Li structures for cryogenic tank and dry bay applications p 2175 N93-22099
Orbiter lessons learned: A guide to future vehicle development p 2175 N93-22100
Propulsion Systems Panel deliberations p 2175 N93-22101
Hybrid rocket propulsion p 2175 N93-22102
Reliability of solid rocket motor cases and nozzles p 2176 N93-22103
Solid Propulsion Integrity Program (SPIP) for verifiable enhanced solid rocket motor reliability p 2176 N93-22104
Entry Systems Panel deliberations p 2176 N93-22105
Space assembled entry systems certification p 2176 N93-22106
Thermal protection system of the Space Shuttle's orbiter p 2176 N93-22107
Thermal protection systems for all-weather reusable launch vehicles p 2176 N93-22109
Thermal protection systems for aerobrakes p 2176 N93-22110
Thermal protection materials at NASA Ames Research Center p 2177 N93-22114
Some materials perspectives for space transportation systems p 2177 N93-22115
Materials and structures technologies for hypersonics p 2177 N93-22116
Rigid fibrous ceramics for entry systems p 2177 N93-22117
Entry systems technology assessment p 2177 N93-22118
Use of automated rendezvous trajectory planning to improve spacecraft operations efficiency p 2146 N93-22292
Approach range and velocity determination using laser sensors and retroreflector targets p 2147 N93-22297
Proposed CTV design reference missions in support of Space Station Freedom p 2148 N93-22300
The role of smart systems in rendezvous, close proximity operations and docking maneuvers p 2150 N93-22310
How to get on board Space Station Freedom p 2183 N93-22611
Space technology research plans p 2184 N93-22613
Space transfer concepts and analysis for exploration missions
[NASA-CR-192482] p 2178 N93-22705
Mission requirements and applications of integrated and multi-function navigation systems p 2119 N93-22781
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
[NASA-CR-192494] p 2179 N93-23007
Public Congressional forum on space p 2154 N93-23165
1993 Earth Observing System reference handbook
[NASA-NP-202] p 2356 N93-23737
The first mission of the ESA Earth observation polar platform p 2362 N93-23783
Scientific visualization of volumetric radar cross section data
[AD-A259586] p 2272 N93-24065
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
[ESA-ISY-4] p 2154 N93-24336
Payload operations for precursor mission E-1 p 2155 N93-24342
Aids to Navigation Service Force Mix 2000 Project. Volume 3: Analysis of multi-mission requirements and development of planning factors for the Replacement Buoy Tender Fleet
[PB93-142370] p 2123 N93-24489
MISSISSIPPI
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
[PB93-110955] p 2519 N93-23286
MISSOURI
Small business profiles, 1992: Region 7: Iowa, Kansas, Missouri, and Nebraska
[PB93-110989] p 2521 N93-24285
MIXING LAYERS (FLUIDS)
The three-dimensional evolution of a plane mixing layer. Part 2: Pairing and transition to turbulence
[NASA-TM-103926] p 2294 N93-23417
Studies of mixing and internal waves in the upper ocean p 2415 N93-23962
Modeling the tropical ocean response to westerly wind forcing
[AD-A260230] p 2416 N93-24099
MIXING LENGTH FLOW THEORY
Navier-Stokes analysis of airfoils with leading edge ice accretions
[NASA-CR-191008] p 2109 N93-22822
MIXTURES
Oscillating-body viscometry and its application to phase-separating liquid mixtures p 2293 N93-23386
MOBILE COMMUNICATION SYSTEMS
The Canadian mobile satellite system p 2275 N93-23515
The future role of satellite communications in an improved air traffic management p 2275 N93-23518
Mobile satellite communications in the 1990's p 2275 N93-23520
OSI applied to aeronautical satellite mobile communications in EURATN p 2276 N93-23525
COMLINE p 2276 N93-23530
Fleet management based on satellite positioning and communication p 2276 N93-23531
MOBILITY
A round-robin for particle electrophoresis standardization
[DE93-003018] p 2217 N93-22400
MODAL RESPONSE
Modal identification experiment p 2188 N93-22635
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 1: Implementing exact mode superposition
[NASA-TM-106063] p 2329 N93-23739
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 2: Coupled versus uncoupled integration
[NASA-TM-106064] p 2330 N93-23740
MODEL REFERENCE ADAPTIVE CONTROL
A new approach for designing self-organizing systems and application to adaptive control p 2451 N93-22215
MODELS
AEROBA: A control blackboard approach for model formulation p 2524 N93-23183
A version and configuration model for software evolution
[AD-A260557] p 2441 N93-24283
MODULARITY
System concept for an advanced stand-off weapon p 2256 N93-22029
Space biology initiative program definition review. Trade study 4: Design modularity and commonality p 2418 N93-23071
MODULATION
Pretransformation strain modulations in proper ferroelastics
[DE93-005468] p 2226 N93-22340
MODULATION TRANSFER FUNCTION
System identification and model reduction using modulating function techniques
[NASA-CR-192807] p 2438 N93-23248
Influence due to satellite attitude jitter on estimation of Digital Elevation Model (DEM) p 2350 N93-23551
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
[AD-A259944] p 2273 N93-24243
MODULES
Space Station Furnace Facility Core. Requirements definition and conceptual design study. Volume 2: Technical report. Appendix 6: Technical summary reports
[NASA-CR-192477] p 2302 N93-22349
Field programmable gate arrays: Evaluation report for space-flight application
[NASA-CR-192796] p 2432 N93-23042
Space biology initiative program definition review. Trade study 6: Space Station Freedom/spacelab modules compatibility
[EEI-89-236] p 2418 N93-23081
MODULUS OF ELASTICITY
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
Towards a first-principles thermodynamics of solids
[DE93-002544] p 2514 N93-22426
Computer simulation of the anomalous elastic behavior of thin films and superlattices
[DE93-004154] p 2504 N93-22939
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
[NASA-CR-191422] p 2211 N93-23877
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
[DE93-006420] p 2214 N93-24030
MOIRE INTERFEROMETRY
Moire interferometry at high temperatures p 2328 N93-23380
MOISTURE
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
[DE93-004104] p 2226 N93-22069
MOISTURE CONTENT
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
Aerosol phase transformation in the atmosphere
[DE93-001903] p 2384 N93-22936
Taguchi methods applied to oxygen-enriched diesel engine experiments
[DE93-004873] p 2317 N93-23976
MOJAVE DESERT (CA)
The Goldstone solar system radar: A science instrument for planetary research
[NASA-CR-192793] p 2261 N93-22478
MOLDING MATERIALS
Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
[AD-D015627] p 2241 N93-24221
MOLECULAR ABSORPTION
High temperature superconductivity
[AD-A259692] p 2283 N93-24023
MOLECULAR BEAM EPITAXY
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
[DE93-005350] p 2505 N93-22974
Time-resolved reflectivity study of solid-phase epitaxial regrowth in relaxed and strained Si(1-x)Ge(x)
[DE93-005154] p 2506 N93-23312
Process toward a comprehensive control system for molecular beam epitaxy
[AD-A259724] p 2507 N93-23468
New 3-5 cell design approaches for very high efficiency
[DE92-010558] p 2381 N93-23697
High temperature superconductivity
[AD-A259692] p 2283 N93-24023
Nitride semiconductors for ultraviolet detection
[AD-A259545] p 2510 N93-24040
Joint services electronics program. Basic research in electronics (JSEP)
[AD-A259598] p 2283 N93-24068
High temperature superconducting compounds
[AD-A259926] p 2284 N93-24129
Influence of defects in HgCdTe grown by Molecular Beam Epitaxy (MBE) on electrical devices
[AD-A260457] p 2511 N93-24194
Gas source molecular beam epitaxial growth of GaN
[AD-A260524] p 2512 N93-24199
Heteroepitaxial growth of gallium nitride and native defect formation in III-V nitrides p 2512 N93-24216
MOLECULAR CHAINS
Molecular control of liquid crystalline orientation of Poly (p-phenylene -2,6-benzobisoxazole) and Poly (p-phenylene -2,6-benzobisthiazole)
[AD-A259729] p 2508 N93-23471
Basic research on macromolecular dynamics
[PB93-138907] p 2240 N93-24142
MOLECULAR CLOUDS
The kinematics of stars and gas in the galactic disk p 2550 N93-23991

MOLECULAR COLLISIONS
Computer simulation of atomic collision processes in solids
[DE93-005106] p 2483 N93-23310
Laser excitation and chemi-ionization of combustion species
[AD-A260120] p 2224 N93-24414
MOLECULAR DIFFUSION
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
[NASA-TM-106079] p 2207 N93-23014
MOLECULAR EXCITATION
Local vibronic and electronic excitations of doping-induced states in the copper oxides
[DE93-003844] p 2501 N93-22429
High resolution studies of atoms and small molecules
[DE93-004340] p 2481 N93-22758
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
[DE93-005457] p 2482 N93-23244
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
[AD-A260381] p 2484 N93-24275
Laser spectroscopy of chemically reactive species
[DE93-006672] p 2310 N93-24326
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
[AD-A260001] p 2243 N93-24443
MOLECULAR GASES
Neutral gas in the central 2 parsecs of the galaxy
[NASA-CR-192801] p 2546 N93-23095
MOLECULAR INTERACTIONS
Molecular design concept for x ray laser research
[DE93-004561] p 2306 N93-22046
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
[DE93-003825] p 2325 N93-22872
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
[DE93-005558] p 2230 N93-22977
Laser excitation and chemi-ionization of combustion species
[AD-A260120] p 2224 N93-24414
MOLECULAR ORBITALS
Local vibronic and electronic excitations of doping-induced states in the copper oxides
[DE93-003844] p 2501 N93-22429
MOLECULAR RELAXATION
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
[AD-A260001] p 2243 N93-24443
MOLECULAR SPECTRA
Plasma edge diagnostics p 2495 N93-23261
Multiple molecular scattering and albedo action on the solar spectral irradiance in the region of the UVB (less than or equal to 320 nm): A preliminary inventory
[AERONOMICA-ACTA-A-363-1991] p 2558 N93-24637
MOLECULAR SPECTROSCOPY
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
[DE93-005457] p 2482 N93-23244
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062
MOLECULAR STRUCTURE
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
[DE93-005883] p 2235 N93-22422
Commercial researcher perspective p 2184 N93-22615
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
[DE93-005558] p 2230 N93-22977
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062
Luminescence and picosecond photo-induced absorption of polyaniline
[AD-A260002] p 2242 N93-24436
MOLECULAR THEORY
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062
MOLECULAR WEIGHT
Polybenzoxazoles via aromatic nucleophilic displacement
[NASA-CASE-LAR-14606-1-CU] p 2207 N93-23077
A gel-permeation chromatography study of electrochemically synthesized Poly(3-alkylthiophenes)
[AD-A259864] p 2239 N93-23957
MOLECULES
High resolution studies of atoms and small molecules
[DE93-004340] p 2481 N93-22758
Photoabsorption and photodissociation of molecules important in the interstellar medium
[NASA-CR-192829] p 2552 N93-24488
MOLTEN SALTS
Continuous production of granular or powder Ti, Zr, and Hf or their alloy products
[PB93-135051] p 2227 N93-22592
Structure of molten iron chloride
[DE93-004814] p 2219 N93-22742
Organic electrolytes for sodium batteries
[AD-A260242] p 2284 N93-24164
MOLYBDENUM
Magnetic coupling of Fe/Mo/Fe and Co/Cu/Co sandwiches across wedged spacer layers
[DE93-004203] p 2502 N93-22523
MOLYBDENUM COMPOUNDS
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
MOMENTS OF INERTIA
An automated method for determining mass properties
[AD-A259924] p 2428 N93-24441
MOMENTUM
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
[PB93-138915] p 2297 N93-24141
MOMENTUM TRANSFER
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
[AD-A259659] p 2396 N93-23657
MONGOLIA
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
MONITORS
An artificial intelligence-based structural health monitoring system for aging aircraft p 2465 N93-22185
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
[NASA-TM-105830] p 2312 N93-22826
Pattern classifier for health monitoring of helicopter gearboxes
[NASA-TM-106099] p 2316 N93-23741
Neural networks for the monitoring of rotating machinery
[DE93-003549] p 2464 N93-24503
MONOMERS
Luminescence and picosecond photo-induced absorption of polyaniline
[AD-A260002] p 2242 N93-24436
MONOPOLE ANTENNAS
Widebanding techniques for VHF antennas, 1
[AD-A259301] p 2260 N93-22399
MONOPROPELLANTS
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Reacting liquid monopropellant sprays: Experiments with high velocity full cone sprays in 33 MPa, 500 C nitrogen
[AD-A259799] p 2245 N93-23456
MONOPULSE RADAR
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
[AD-D015622] p 2272 N93-24232
MONSOONS
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period p 2405 N93-23219
MONTANA
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
[PB93-110997] p 2521 N93-24557
MONTE CARLO METHOD
Biases in Monte Carlo eigenvalue calculations
[DE93-004189] p 2471 N93-22061
Improving the chi-squared approximation for bivariate normal tolerance regions
[NASA-TP-3304] p 2472 N93-22670
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
[DE93-006816] p 2480 N93-22714
Design of a large-scale plasma source ion implantation experiment
[DE93-005438] p 2493 N93-22746
PMC: A shared short-cut to portable parallel power
[DE93-005815] p 2447 N93-22868
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
[PB93-136422] p 2413 N93-22893
Monte Carlo variance reduction approaches for non-Boltzmann tallies
[DE93-005665] p 2467 N93-22910
A local exponential transform method for global variance reduction in Monte Carlo transport problems
[DE92-018992] p 2468 N93-22926
Recent results of multimagnetical simulations of the Ising model
[DE93-005213] p 2475 N93-22951
Monte Carlo modeling of solid-state photoswitches
[DE93-005829] p 2280 N93-22999
Analysis of IUE observations of hydrogen in comets
[NASA-CR-192693] p 2548 N93-23231
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
[DE93-005461] p 2447 N93-23245
Quantum Monte Carlo simulation on Hubbard model for high temperature superconductivity p 2507 N93-23395
The meaning and utility of confidence
[AD-A259646] p 2472 N93-23655
The kinematics of stars and gas in the galactic disk p 2550 N93-23991
Monte Carlo simulation of high-field electron transport in alternating-current thin-film electroluminescent devices
[AD-A260274] p 2284 N93-24166
The theory behind the SOCRATES code
[AD-A259987] p 2196 N93-24298
MORPHOLOGY
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
[DE93-003792] p 2504 N93-22808
Feature-oriented signal processing under nonlinear partial differential equations
[AD-A259951] p 2470 N93-24245
First European tri-service advanced materials workshop: Compressive strength in rigid-rod polymers
[AD-A259997] p 2242 N93-24300
MOSAICS
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
The ERS-1 radarmaps of Germany and the Antarctic Peninsula p 2352 N93-23562
Satellite image mosaics from automatic scene re-navigation p 2352 N93-23563
MOTION PICTURES
A study of video frame rate on the perception of moving imagery detail p 2431 N93-24552
MOTION SICKNESS
A demonstration of motion base design alternatives for the National Advanced Driving Simulator
[NASA-TM-103881] p 2428 N93-24490
MOTION SIMULATION
Goal directed robot navigation in a known indoor environment with unknown stationary and moving obstacles p 2458 N93-23223
Meteo Disc: Satellite cloud motion presentation by interactively controlled video disc for research, teaching, and training p 2371 N93-23835
MOTION SIMULATORS
Demonstration of automated proximity and docking technology p 2135 N93-22227
MOTOR VEHICLES
Visual system performance for driving simulators
[MBB-FE-521-S-PUB-0497] p 2132 N93-22393
Emergency vehicle alert system, phase 2
[NASA-CR-192464] p 2260 N93-22455
MOUNTAINS
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
MOUNTING
High performance sapphire windows p 2310 N93-22198
MOVING TARGET INDICATORS
The Missle-Borne Integrated Network Demonstration Program p 2255 N93-22023
MSAT
The Canadian mobile satellite system p 2275 N93-23515
MTBF
Step stress testing of receiver/transmitter units, part 1
[AD-A260182] p 2273 N93-24318
MULLITES
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
[NASA-TM-105939] p 2206 N93-22590
MULTIGRID METHODS
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
[DE93-006816] p 2480 N93-22714
Automatic differentiation of advanced CFD codes for multidisciplinary design
[DE93-005685] p 2290 N93-22867

An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
[ETN-93-93703] p 2297 N93-23871
MULTILAYER INSULATION
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
[NASA-TM-104748] p 2243 N93-24474
MULTIMEDIA
Intelligent information retrieval for a multimedia database using captions
[AD-A260438] p 2528 N93-24113
MULTIPATH TRANSMISSION
GPS multipath errors in the precision landing environment p 2106 N93-22569
Multipath runway exits and taxiways
[DOT/FAA/CT-92/19] p 2134 N93-23217
Radiolocation Techniques
[AGARD-CP-528] p 2265 N93-23598
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601
A new passive SSL technique for HF radiolocation p 2267 N93-23609
Radio location through high resolution eigenstructure processing techniques that yield accurate multipath AOA and differential time delay estimates p 2270 N93-23626
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
[AD-D015622] p 2272 N93-24232
MULTIPHASE FLOW
Fluids in Space
[ESA-SP-353] p 2246 N93-22830
Heat and mass transfer in polyphase flows p 2248 N93-22844
MULTIPROCESSING (COMPUTERS)
A macro-micro robot for precise force applications p 2465 N93-22158
Investigation of the possibility of success of the Futurebus+ as a military and commercial standard in the current context, revision A
[CTN-93-60712] p 2445 N93-22474
Study and development of a multiprocessor interface circuit (thesis annex), volume 2
[ECL-91-11-VOL-2] p 2446 N93-22676
PMC: A shared short-cut to portable parallel power
[DE93-005815] p 2447 N93-22868
Shiva Mark 2 hardware architecture, version 1
[AD-A259534] p 2449 N93-24039
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A260051] p 2442 N93-24407
Hyperstructures as computer architectures for high performance multiprocessor systems
[ISBN-0-315-58975-2] p 2433 N93-24613
MULTISENSOR APPLICATIONS
Multisensor data applications for digital landscape models p 2350 N93-23550
Multispectral intelligent fusion techniques p 2352 N93-23564
German participation within the international Earth observation mission Priroda p 2361 N93-23774
Remote sensing experiment FEM: A multisensoral dataset for radiometric and geometric analysis p 2158 N93-24361
MULTISPECTRAL BAND CAMERAS
X-EOS: A multi-mode X-band synthetic aperture radar for EOS SAR p 2365 N93-23797
MULTISPECTRAL BAND SCANNERS
An investigative study of multispectral data compression for remotely-sensed images using vector quantization and difference-mapped shift-coding p 2445 N93-22157
Calibration, navigation, and registration of MAMS data for FIFE
[NASA-CR-108397] p 2342 N93-22699
New images of the Earth in highest resolution: MOMS-02 on the second German Spacelab mission D2 p 2365 N93-23801
Simulation of MOMS-02 stereo band radiometric capability using field spectroscopy data p 2365 N93-23802
MULTISPECTRAL PHOTOGRAPHY
Calibration, navigation, and registration of MAMS data for FIFE
[NASA-CR-108397] p 2342 N93-22699
MULTIVARIABLE CONTROL
Multidisciplinary optimization of a controlled space structure using 150 design variables
[NASA-CR-4502] p 2125 N93-22799
An introduction to multivariable flight control system design
[AD-A260408] p 2131 N93-24087
MULTIVARIATE STATISTICAL ANALYSIS
The joint normal modes of the coupled atmosphere-ocean system observed from 1967 to 1986
[MPIM-78] p 2396 N93-23637
Normal modes of the atmosphere as estimated by principal oscillation patterns and derived from quasi-geostrophic theory
[MPIM-81] p 2397 N93-23857
MUONS
An experimental study of the possible association of deep underground muons with astronomical point sources p 2549 N93-23596
High sensitivity tests of the standard model for electroweak interactions
[DE93-006186] p 2483 N93-23684
MUSCULAR FATIGUE
Development and implementation of the MotoMir experiment on the Mir Space Station p 2159 N93-24363
MUSCULOSKELETAL SYSTEM
The effect of microgravity on tremor (microvibration) p 2160 N93-24368

N

NAMING
From Ship to Shuttle: NASA Orbiter Naming Program, September 1988 - May 1989
[NASA-EP-276] p 2179 N93-23732
NARROWBAND
Widebanding techniques for VHF antennas, 1
[AD-A259301] p 2260 N93-22399
Study of high spatial resolution narrow spectral band ultraviolet images of the earth's atmosphere
[AD-A260035] p 2400 N93-24254
NASA PROGRAMS
NASA PPO microgravity projects support
[NASA-CR-192460] p 2246 N93-22038
Ten-year space launch technology plan
[NASA-TM-108701] p 2135 N93-22204
University guide to NASA, 1993
[NASA-EP-287] p 2152 N93-22383
NASA's commercial research plans and opportunities p 2183 N93-22612
Remarks by NASA administrator Daniel S. Goldin p 2167 N93-22621
Life sciences recruitment objectives p 2186 N93-22623
Technical report writing
[NASA-TM-105419] p 2523 N93-23002
National security and national competitiveness: Open source solutions NASA requirements and capabilities
[NASA-TM-4458] p 2523 N93-23030
FY 1991 safety program status report
[NASA-TM-108707] p 2257 N93-23136
Index to NASA news releases and speeches, 1992
[NASA-TM-109187] p 2524 N93-23172
NASA's strategic plan for education. A strategy for change, 1993-1998
[NASA-EP-289] p 2517 N93-23174
NASA-UVA Light Aerospace Alloy and Structures Technology Program: LA(2)ST
[NASA-CR-192354] p 2230 N93-23193
NASA's Education Program Inventory FY 91
[NASA-EP-284] p 2518 N93-23250
NASA contract management
[GAO/HR-93-11] p 2519 N93-23376
Innovation: Key to the future
[NASA-TM-103599] p 2571 N93-24095
NASA SPACE PROGRAMS
Space programs: NASA's independent cost estimating capability needs improvement
[AD-A259263] p 2531 N93-22404
Precursor Space Station Freedom experiments p 2188 N93-22632
Flight project data book
[NASA-TM-108657] p 2152 N93-22870
Future of the US Space Launch capability: A task group report
[PB93-139947] p 2171 N93-22899
Post Cold War assessment of US space policy: A task group report
[PB93-139962] p 2532 N93-22900
Group Task Force on Satellite Rescue and Repair
[NASA-TM-108713] p 2193 N93-23040
First National Space Grant Conference report
[NASA-EP-275] p 2516 N93-23140
Evaluation of NASA space grant consortia programs p 2516 N93-23141
Pre-college education p 2516 N93-23142
College education p 2516 N93-23143
The use of continuing adult education p 2516 N93-23144
Underrepresented groups p 2517 N93-23146
Outreach and public service p 2517 N93-23147
State and local governments p 2517 N93-23149
Focusing educational initiatives p 2517 N93-23150
University-industry interaction p 2517 N93-23151
Organization and management of space grant programs p 2517 N93-23152
Communications p 2517 N93-23153
Use of fellowships p 2517 N93-23154
Pitfalls p 2517 N93-23155
NASA reports p 2154 N93-23163
Flight project data book, 1991
[NASA-TM-108656] p 2154 N93-23385
Earth's mysterious atmosphere. ATLAS 1: Teachers guide with activities
[NASA-EP-282] p 2396 N93-23733
The Earth Observing System p 2356 N93-23749
NASA's upper atmosphere research satellite: A program to study global ozone change p 2357 N93-23750
Cooperation with Europe in NOAA operational satellite programs p 2357 N93-23754
Mission to Planet Earth p 2372 N93-23845
NASTRAN
Stress calculation for the Sandia 34-meter wind turbine using the local circulation method and turbulent wind
[DE93-004480] p 2375 N93-22045
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 1: Implementing exact mode superposition
[NASA-TM-106063] p 2329 N93-23739
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 2: Coupled versus uncoupled integration
[NASA-TM-106064] p 2330 N93-23740
NATIONAL AEROSPACE PLANE PROGRAM
New launch technologies and American competitiveness p 2153 N93-23157
An overview of aeroelasticity studies for the National Aerospace Plane
[NASA-TM-107728] p 2111 N93-23422
NATIONAL AIRSPACE SYSTEM
Plan for the evaluation of the prototype Terminal Doppler Weather Radar (TDWR) system
[DOT/FAA/CT-TN92/44] p 2404 N93-23045
NATIONAL LAUNCH VEHICLE PROGRAM
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
[NASA-CR-192454] p 2202 N93-22012
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236
NATIONAL PARKS
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
[DLR-FB-92-10] p 2374 N93-24140
Aircraft overflight study: Effect of aircraft altitude upon sound levels at the ground
[PB93-144194] p 2477 N93-24572
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
[PB93-144186] p 2478 N93-24649
NATURAL GAS
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
[PB93-123909] p 2412 N93-22067
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
[DE93-004659] p 2244 N93-22325
Overview of Advanced Turbine Systems Program
[DE93-003193] p 2311 N93-22413
Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
[PB93-132769] p 2394 N93-23255
Acoustic determination of dewpoints in natural gas mixtures and retrograde condensates
[PB93-142917] p 2221 N93-23274
Direct conversion of light hydrocarbon gases to liquid fuel
[DE93-004916] p 2245 N93-23321
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
[PB93-132702] p 2222 N93-23347
Advanced Turbine Design Program
[DE93-005077] p 2317 N93-24007
Assessment of future natural gas vehicle concepts
[PB93-138923] p 2317 N93-24145
A comparative analysis of alternative fuels for the INEL vehicle fleet
[DE93-007224] p 2319 N93-24256
NATURAL GAS EXPLORATION
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
[PB93-123909] p 2412 N93-22067

Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
[PB93-132769] p 2394 N93-23255

NATURAL LANGUAGE (COMPUTERS)
The development of a natural language interface to a geographical information system p 2530 N93-22153
Investigation of cognition acquisition using natural language conversational process
[MBB-FE-315-S-PUB-0498] p 2435 N93-22391
Natural Language Processing Systems Evaluation Workshop
[RL-TR-91-362] p 2437 N93-23091
An ontology of knowledge graphs
[MEMO-1049] p 2441 N93-24063

NATURAL SATELLITES
Reports of planetary astronomy - 1991
[NASA-TM-4459] p 2542 N93-23055
Space exploration of planetary and satellite atmospheres p 2535 N93-23890

NAVIER-STOKES EQUATION
Navier-Stokes computation of compressible turbulent flows with a second order closure, part 1
[NASA-CR-192287] p 2288 N93-22604
Upwind relaxation method for hypersonic flow simulation
[DLR-FB-91-36] p 2109 N93-22659
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
[NASA-TM-106056] p 2466 N93-22664
Navier-Stokes analysis of airfoils with leading edge ice accretions
[NASA-CR-191008] p 2109 N93-22822
Large-scale computation of incompressible viscous flow by least-squares finite element method
[NASA-TM-105904] p 2467 N93-22825
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation p 2251 N93-22857
Automatic differentiation of advanced CFD codes for multidisciplinary design
[DE93-005685] p 2290 N93-22867
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178
Operator splitting methods for the Navier-Stokes equations p 2292 N93-23226
Algorithm and code development for unsteady three-dimensional Navier-Stokes equations
[NASA-CR-192760] p 2292 N93-23234
Fully implicit solutions of the benchmark backward facing step problem using finite element discretization and inexact Newton's method
[DE93-005246] p 2293 N93-23299
Numerical simulation of flow through orifice meters
[PB93-124121] p 2293 N93-23349
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402
Determining nodes and long-time approximations to the Navier-Stokes equations p 2296 N93-23593
Bottom generated velocity fluctuations in one-dimensional open channel flow
[MEMO-1051] p 2297 N93-23865
Three-dimensional isothermal flow simulations of an MHD secondary combustor
[DE93-006631] p 2497 N93-24035
Analysis of a high speed civil transport configuration at subsonic flow conditions using a Navier-Stokes solver
[NASA-CR-4490] p 2127 N93-24108
Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics p 2113 N93-24136
Numerical modeling of fluidic flow meters
[PB93-124139] p 2301 N93-24577

NAVIGATION
Fault detection and isolation p 2106 N93-22568
Intelligent flight control systems p 2107 N93-22576
Integrated and Multi-Function Navigation
[AGARD-CP-525] p 2119 N93-22780
Mission requirements and applications of integrated and multi-function navigation systems p 2119 N93-22781
An overview of optical gyroscopes for navigation p 2119 N93-22783
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784
Fiber optic gyros and systems p 2120 N93-22785
Silicon accelerometer for AHRS and hybrid navigation systems p 2120 N93-22786
Retrofitting of GPS into existing navigation suites p 2120 N93-22788
NAVSAT: An application of GPS and GLONASS for the civil user community p 2124 N93-23534

NAVIGATION AIDS
An integrated autonomous rendezvous and docking system architecture using Centaur modern avionics p 2147 N93-22293
Piloting decision aid for spacecraft proximity operations p 2147 N93-22295
An overview of optical gyroscopes for navigation p 2119 N93-22783
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784
Fiber optic gyros and systems p 2120 N93-22785
Silicon accelerometer for AHRS and hybrid navigation systems p 2120 N93-22786
Retrofitting of GPS into existing navigation suites p 2120 N93-22788
Integrated precision navigation system p 2120 N93-22789
Flight evaluation of differential GPS aided inertial navigation systems p 2120 N93-22790
Toward achieving global sole means radionavigation systems p 2121 N93-22794
Operational evaluation of the converging runway display aid at Saint Louis
[MTR-92W0000217] p 2133 N93-22874
Maritime satellite communication and navigation p 2275 N93-23508
The role of GPS in a future radionavigation mix: Trends in the 1992 US Federal Radionavigation Plan p 2124 N93-23509
A European radionavigation plan? p 2124 N93-23513
Financial alternatives for global satellite navigation p 2124 N93-23519
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
[PB93-142362] p 2122 N93-23652
Relative motion pinwheel
[AD-D015629] p 2123 N93-24222
Aids to Navigation Service Force Mix 2000 Project. Volume 3: Analysis of multi-mission requirements and development of planning factors for the Replacement Buoy Tender Fleet
[PB93-142370] p 2123 N93-24489

NAVIGATION INSTRUMENTS
An overview of optical gyroscopes for navigation p 2119 N93-22783
An hierarchic alliance of filters for fault tolerant navigation using two inertial systems with aiding sensors p 2121 N93-22793

NAVIGATION SATELLITES
Office of Space Flight standard spaceborne Global Positioning System user equipment project p 2148 N93-22301
Maritime satellite communication and navigation p 2275 N93-23508

NAVIGATORS
An hierarchic alliance of filters for fault tolerant navigation using two inertial systems with aiding sensors p 2121 N93-22793
Automatic analysis and synthesis of controllers for dynamical systems based on phase-space knowledge
[AD-A259491] p 2459 N93-23448

NAVSTAR SATELLITES
NAVSAT: An application of GPS and GLONASS for the civil user community p 2124 N93-23534

NAVY
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
[AD-A260363] p 2409 N93-24239

NEAR WAKES
The effects of three-dimensional imposed disturbances on bluff body near wake flows
[AD-A259501] p 2298 N93-24311

NEBRASKA
Small business profiles, 1992: Region 7: Iowa, Kansas, Missouri, and Nebraska
[PB93-110989] p 2521 N93-24285

NEBULAE
The cold ionized shell around the old nova DQ Herculis p 2543 N93-23964

NEGATIVE IONS
Negative ion detachment cross sections
[DE93-005679] p 2483 N93-23328

NEODYMIUM COMPOUNDS
Superconductivity and flux pinning in Nd(1+x)Ba(2-x)Cu(3)O(7+delta)
[DE93-004444] p 2505 N93-23052

NEODYMIUM LASERS
High-power optical coatings for a mega-Joule class ICF laser
[DE93-005821] p 2306 N93-22328
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949

NEPHANALYSIS
Climatological probability of cloud-free line-of-sight
[AD-A260139] p 2407 N93-23706

NEPHELOMETERS
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates p 2395 N93-23493

NERVOUS SYSTEM
Computer based analysis and synthesis of retinal function
[AD-A260514] p 2423 N93-24420

NETWORK ANALYSIS
Efficiently modeling neural networks on massively parallel computers
[DE93-003787] p 2447 N93-22937
Coordinating Council. First Meeting: NASA/RECON database
[NASA-TM-108766] p 2526 N93-23412
Time dependent classification of features with a nonlinear, dynamic network
[VTT-PUBS-83] p 2448 N93-23868
Advanced power conditioning for maglev systems
[PB93-150274] p 2320 N93-24586

NETWORK CONTROL
NetView technical research
[NASA-CR-192822] p 2434 N93-22043
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
Expanded geodetic control along the primary road system by use of satellite surveying technology
[PB93-127090] p 2343 N93-23257

NEURAL NETS
The Missle-Borne Integrated Network Demonstration Program p 2255 N93-22023
Learning characteristics of a space-time neural network as a tether skiprope observer p 2197 N93-22176
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 2
[NASA-CP-10111-VOL-2] p 2449 N93-22206
Two generalizations of Kohonen clustering p 2449 N93-22207
The 3-D image recognition based on fuzzy neural network technology p 2450 N93-22210
Determining the number of hidden units in multi-layer perceptrons using F-ratios p 2451 N93-22214
A new approach for designing self-organizing systems and application to adaptive control p 2451 N93-22215
Adaptive fuzzy system for 3-D vision p 2451 N93-22216
Intelligent neuroprocessors for in-situ launch vehicle propulsion systems health management p 2452 N93-22221
Truth-Valued-Flow Inference (TVFI) and its applications in approximate reasoning p 2452 N93-22223
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
Automated target recognition and tracking using an optical pattern recognition neural network p 2138 N93-22240
Autonomous rendezvous and capture system design p 2138 N93-22244
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 1
[NASA-CP-10111-VOL-1] p 2452 N93-22351
Efficiently modeling neural networks on massively parallel computers p 2453 N93-22353
Learning fuzzy information in a hybrid connectionist, symbolic model p 2453 N93-22354
On the neural substrates leading to the emergence of mental operational structures p 2453 N93-22355
Advanced telerobotic control using neural networks p 2455 N93-22364
A neural based intelligent flight control system for the NASA F-15 flight research aircraft p 2132 N93-22368
Space time neural networks for tether operations in space p 2456 N93-22370
Approximation paper, part 1 --- neural networks, fuzzy systems p 2456 N93-22372
Nonlinear rescaling of control values simplifies fuzzy control p 2456 N93-22373
Genetic learning in rule-based and neural systems p 2456 N93-22374
Design of fuzzy system by NNs and realization of adaptability p 2457 N93-22377
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Translational controller results
[NASA-CR-192320] p 2457 N93-22396
Investigation of air transportation technology at Princeton University, 1991-1992 p 2106 N93-22570
Smart electromagnetic structures: The neural antenna
[AD-A260469] p 2262 N93-22931
Efficiently modeling neural networks on massively parallel computers
[DE93-003787] p 2447 N93-22937

Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Attitude control results
[NASA-CR-192291] p 2458 N93-23084
A stochastic learning algorithm for layered neural networks
[DE93-003555] p 2458 N93-23288
A self growing binary tree neural network for the identification of multiclass systems
[RR-451] p 2459 N93-23362
Using recurrent networks for dimensionality reduction
[AD-A259497] p 2459 N93-23464
The use of multiple linked self-organised artificial neural networks for classification of remotely sensed images p 2353 N93-23565
Neural network methods for analysis of remotely-sensed satellite data p 2353 N93-23566
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm p 2354 N93-23576
The analysis of remotely sensed data with neural networks p 2355 N93-23579
Water regions extraction from radar imagery using a neural network
[AD-A259517] p 2356 N93-23668
Developing a neural network to act as a noise filter
[AD-A259515] p 2460 N93-23699
When networks disagree: Ensemble methods for hybrid neural netwqrks
[AD-A260121] p 2460 N93-23701
Three dimensional object recognition using an unsupervised neural network: Understanding the distinguishing features
[AD-A260048] p 2461 N93-23712
The robustness of feed-forward neural networks: A preliminary invęstigation p 2461 N93-23717
Time dependent classification of features with a nonlinear, dynamic network
[VTT-PUBS-83] p 2448 N93-23868
One-class classifier networks for target recognition applications
[DE93-006288] p 2271 N93-24043
Face recognition with neural networks
[AD-A259587] p 2462 N93-24066
Knowledge-based systems for computational control
[AD-A260409] p 2527 N93-24110
Analysis and synthesis of adaptive neural elements and assemblies
[AD-A259954] p 2422 N93-24247
Neural net architecture for computing structure from motion
[AD-A260526] p 2463 N93-24421
Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425
Test and evaluation of neural network applications for seismic signal discrimination
[AD-A260030] p 2401 N93-24440
Neural networks for the monitoring of rotating machinery
[DE93-003549] p 2464 N93-24503
Analysis of complex systems using neural networks
[DE93-003541] p 2464 N93-24514
A novel recursive partitioning criterion
[AD-A259921] p 2464 N93-24564
Summary from a study group on neural networks at NDRE
[FFI-92/7015] p 2465 N93-24640

NEUROLOGY

Effects of 60-Hz electric and magnetic fields on operant and social behavior and on neuroendoctrine system of nonhuman primates
[DE93-007677] p 2417 N93-22913
Sensory sensitivities and discriminations and their roles in aviation
[AD-A259742] p 2424 N93-23479
Theory of synaptic plasticity in visual cortex
[AD-A260052] p 2424 N93-23960
Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
[DLR-FB-92-14] p 2422 N93-24093

NEURONS

Automated system for analyzing the activity of individual neurons p 2423 N93-22163
A self growing binary tree neural network for the identification of multiclass systems
[RR-451] p 2459 N93-23362
Theory of synaptic plasticity in visual cortex
[AD-A260322] p 2422 N93-24238
Analysis and synthesis of adaptive neural elements and assemblies
[AD-A259954] p 2422 N93-24247

NEUROPHYSIOLOGY

Automated system for analyzing the activity of individual neurons p 2423 N93-22163
On the neural substrates leading to the emergence of mental operational structures p 2453 N93-22355
Micromotional studies of utricular and canal afferents
[NASA-CR-192703] p 2417 N93-22800
Analysis and synthesis of adaptive neural elements and assemblies
[AD-A259954] p 2422 N93-24247
Research in stochastic processes and their applications
[AD-A260174] p 2473 N93-24317
Computer based analysis and synthesis of retinal function
[AD-A260514] p 2423 N93-24420

NEUROTRANSMITTERS

Study of SCN neurochemistry using in vivo microdialysis in the conscious brain: Correlation with circadian activity rhythms
[AD-A259803] p 2421 N93-23459

NEUTRAL BEAMS

Alpha effects on TAE modes and alpha transport
[DE93-004160] p 2494 N93-22940
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

NEUTRAL BUOYANCY SIMULATION

The study of surface tension tanks from the neutral buoyancy to the space flight p 2248 N93-22842
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854

NEUTRAL GASES

Neutral gas in the central 2 parsecs of the galaxy
[NASA-CR-192801] p 2546 N93-23095
The Boston University-Arecibo galactic HI survey: The galaxy at 4 arcminute resolution p 2543 N93-23720

NEUTRAL PARTICLES

Summary of the 1992 ACP Winter Conference on Future Trends in Low Temperature Physics
[AD-A259809] p 2508 N93-23643
A transmission/escape probabilities model for neutral particle transport in the outer regions of a diverted tokamak
[DE93-006550] p 2497 N93-24045

NEUTRINOS

Direct searches for neutrino mass
[DE93-003867] p 2479 N93-22068
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
GALLEX: First results and implications for neutrino physics
[DE93-004908] p 2483 N93-23977

NEUTRON COUNTERS

Cosmic-ray-veto detector system
[DE93-004787] p 2559 N93-22707

NEUTRON CROSS SECTIONS

Neutron cross section standards and instrumentation
[DE93-007675] p 2484 N93-24454

NEUTRON DIFFRACTION

Application of neutron diffraction technology to the determination of residual strain in engineering composites
[DE93-004249] p 2207 N93-22066
Structure of molten iron chloride
[DE93-004814] p 2219 N93-22742
Neutron measurements of the vortex lattice in YBa2Cu3O7
[DE93-005417] p 2509 N93-24008

NEUTRON DISTRIBUTION

Biases in Monte Carlo eigenvalue calculations
[DE93-004189] p 2471 N93-22061

NEUTRON EMISSION

Theoretical models of neutron emission in fission
[DE93-005482] p 2485 N93-22343
Investigation of cold nuclear fusion in condensed matter
[DE93-006083] p 2515 N93-23683

NEUTRON IRRADIATION

Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344
Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
[DE93-004453] p 2503 N93-22728
Postirradiation deformation behavior in ferritic Fe-Cr alloys
[DE93-004833] p 2229 N93-22881
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
[DE93-005560] p 2230 N93-22943

NEUTRON SCATTERING

Experimental studies of critical behavior of systems with quenched disorder
[DE93-005090] p 2228 N93-22717
Neutron measurements of the vortex lattice in YBa2Cu3O7
[DE93-005417] p 2509 N93-24008
Neutron cross section standards and instrumentation
[DE93-007675] p 2484 N93-24454

NEUTRON STARS

Neutron stars, strange stars, and the nuclear equation of state
[DE93-004704] p 2550 N93-23952

NEUTRONS

Theoretical models of neutron emission in fission
[DE93-005482] p 2485 N93-22343
Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344
Cosmic-ray-veto detector system
[DE93-004787] p 2559 N93-22707
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
[DE93-005461] p 2447 N93-23245

NEVADA

Small business profiles, 1992. Region 9: Arizona, California, Hawaii, and Nevada
[PB93-111003] p 2521 N93-24160

NEW JERSEY

Small business profiles, 1992. Region 2: New Jersey and New York
[PB93-110930] p 2521 N93-24177

NEW MEXICO

Small business profiles, 1992. Region 6: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
[PB93-110971] p 2520 N93-24159

NEW YORK

Small business profiles, 1992. Region 2: New Jersey and New York
[PB93-110930] p 2521 N93-24177

NEWS

Index to NASA news releases and speeches, 1992
[NASA-TM-109187] p 2524 N93-23172

NEWTON METHODS

Fully implicit solutions of the benchmark backward facing step problem using finite element discretization and inexact Newton's method
[DE93-005246] p 2293 N93-23299

NEWTON-RAPHSON METHOD

Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
[NASA-CR-192348] p 2263 N93-23215
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
[PB93-142438] p 2439 N93-23436
A global path planning approach for redundant manipulators
[NASA-CR-193017] p 2320 N93-24656

NEWTONIAN FLUIDS

Experimental investigation of developing and fully developed flow in a curved duct of square cross section
[ISBN-0-315-70029-7] p 2291 N93-23177
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132

NICKEL ALLOYS

Generalized melting criterion for amorphization
[DE93-005557] p 2226 N93-22345
Characterization of doped NiAl by atom probe field ion microscopy
[DE93-005932] p 2228 N93-22692
Theoretical study of electron-phonon interaction in beta-phase NiTi and Ni-Al alloys
[DE93-004733] p 2228 N93-22738
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
[DE93-005558] p 2230 N93-22977
Analysis of residual phases in nickel aluminide powders produced by reaction synthesis
[DE93-005680] p 2233 N93-24014
Results on powder injection molding of Ni3Al and application to other intermetallic compositions
[DE93-005681] p 2213 N93-24016

NICKEL CADMIUM BATTERIES

Changes in impedance of Ni/Cd cells with voltage and cycle life
[NASA-TM-106105] p 2379 N93-23018

NICKEL HYDROGEN BATTERIES

Evaluation of a nickel/metal hydride battery for a load conditioner
[DE93-761824] p 2283 N93-24010

NICKEL STEELS

Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
[DE93-007971] p 2234 N93-24566

NIGHT
Method of measuring nighttime U-values using the Mobile Window Thermal Test (MoWiTT) Facility
[DE93-004778] p 2404 N93-22964
NIGHT VISION
In-flight field-of-view with ANVIS
[AD-A259905] p 2427 N93-23992
Human visual limitations on suprathreshold contrast perception through ANVIS
[AD-A259970] p 2425 N93-24431
The detection and amplification processes in low light level cameras with CCD and image intensifier
[FFI-92/7017] p 2490 N93-24646
NIMBUS 7 SATELLITE
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
[PB93-136604] p 2343 N93-23278
NIOBATES
Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425
NITRATES
A nitrate signal of solar flares in polar snow and ice
[AD-A260559] p 2558 N93-24284
NITRIC OXIDE
Spectroscopy and kinetics of combustion gases at high temperatures
[DE93-006892] p 2221 N93-23340
Photopromoted and thermal decomposition of nitric oxide by metal oxides
[AD-A259766] p 2224 N93-24422
Direct catalytic decomposition of nitric oxide
[DE93-008107] p 2389 N93-24515
NITRIDES
Nitride semiconductors for ultraviolet detection
[AD-A259545] p 2510 N93-24040
NITROGEN
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae
p 2547 N93-23208
Laser excitation and chemi-ionization of combustion species
[AD-A260120] p 2224 N93-24414
NITROGEN OXIDES
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
[PB93-132702] p 2222 N93-23347
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
New approaches for a second generation supersonic transport propulsion system
[DS-1934] p 2130 N93-23391
Taguchi methods applied to oxygen-enriched diesel engine experiments
[DE93-004873] p 2317 N93-23976
NOAA SATELLITES
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
[ESA-TT-1245] p 2339 N93-22436
Distinguishing ice thickness from sea ice surface shape by using NOAA-AVHRR (National Oceanic and Atmosphere Administration Advanced Very High Resolution Radiometer) and SAR data
p 2340 N93-22445
Investigations into the dynamics of sea ice in the East Greenland Sea region in May 1988, using NOAA-AVHRR data p 2341 N93-22446
Cooperation with Europe in NOAA operational satellite programs p 2357 N93-23754
NOAA participation in ISY Earth science and other activities p 2366 N93-23805
NODULES
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
[DE93-007670] p 2229 N93-22912
NOISE
Analysis and correction of noise on electronic circuits in an accelerator environment
[DE93-004816] p 2280 N93-23319
NOISE MEASUREMENT
Optimal three-dimensional matched filter processing for detection of point-like moving objects in clutter
[AD-A259727] p 2487 N93-23469
NOISE PROPAGATION
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
[NASA-CR-189715] p 2476 N93-22813
NOISE REDUCTION
New approaches for a second generation supersonic transport propulsion system
[DS-1934] p 2130 N93-23391
Developing a neural network to act as a noise filter
[AD-A259515] p 2460 N93-23699
Tiltrotor aircraft noise: A summary of the presentations and discussions at the 1991 FAA/Georgia Tech Workshop
[AD-A260072] p 2477 N93-24119
Suppression of power line harmonic interference in HF surface-wave radar
[AD-A259917] p 2273 N93-24563
NOMOGRAPHS
Climatology of station storm rainfall in the continental United States: Parameters of the Bartlett-Lewis and Poisson rectangular pulses models
[NASA-CR-192968] p 2411 N93-24523
NONCONDENSABLE GASES
Generation of monodisperse droplets by spontaneous condensation of flow in nozzles
[NASA-CR-192356] p 2287 N93-22401
NONDESTRUCTIVE TESTS
An x ray scatter approach for non-destructive chemical analysis of low atomic numbered elements
p 2485 N93-22184
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
[DE93-003806] p 2208 N93-22432
Propagation of elastic waves through inhomogeneous, anisotropic materials
[DE93-006247] p 2288 N93-22509
Micromagnetic surface studies of materials for nondestructive evaluation
[DE93-006303] p 2321 N93-22695
Using nonlinear acoustics for nondestructive materials characterization and evaluation
[DE93-004447] p 2321 N93-22727
Soft-ground arresting system for commercial aircraft
[DOT/FAA/CT-TN93/4] p 2133 N93-22797
Fluid density and concentration measurement using noninvasive in situ ultrasonic resonance interferometry
[DE93-003741] p 2220 N93-23051
The sensitivity in eddy current testing of austenitic material
[VTT-JULK-758] p 2231 N93-23368
High resolution computed tomography
[AD-A259728] p 2321 N93-23470
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
[AD-A260043] p 2488 N93-23645
X ray computed tomography for whole system evaluation (small engines)
[AD-A259519] p 2130 N93-23669
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
[AD-A260119] p 2329 N93-23700
Nondestructive evaluation of electrodeposited chromium
[AD-A259884] p 2321 N93-24020
NONEQUILIBRIUM CONDITIONS
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
[NASA-TM-104765] p 2492 N93-22475
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
[NASA-CR-185677] p 2109 N93-22802
NONEQUILIBRIUM THERMODYNAMICS
Thermodynamically-consistent phase-field models for solidification
[PB93-139012] p 2515 N93-24005
NONINTRUSIVE MEASUREMENT
High performance sapphire windows
p 2310 N93-22198
NONLINEAR EQUATIONS
A nonlinear dynamic spherical membrane model
[AD-A259033] p 2112 N93-23654
Feature-oriented signal processing under nonlinear partial differential equations
[AD-A259951] p 2470 N93-24245
A priori error estimates of finite element solutions of parametrized nonlinear equations
[AD-A260013] p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
[AD-A260014] p 2471 N93-24438
NONLINEAR FILTERS
Developing a neural network to act as a noise filter
[AD-A259515] p 2460 N93-23699
NONLINEAR OPTICS
Quantum theory of multiwave mixing with applications to squeezing in both atomic and semiconductor media
[AD-A259875] p 2514 N93-22732
Active microparticle media
[AD-A259722] p 2487 N93-23639
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Optical analysis of lenslet arrays
[AD-A260126] p 2488 N93-23702
Nonlinear optics and turbulence
[AD-A259950] p 2489 N93-24244
Computation of nonlinear optical scattering by droplets
[AD-A260333] p 2490 N93-24267
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors
[AD-A260532] p 2223 N93-24278
Semiconductor laser with a self-pumped phase conjugate external cavity
[AD-A260028] p 2310 N93-24323
NONLINEAR PROGRAMMING
Robust Neighboring Optimal Guidance for the Advanced Launch System --- Author
[NASA-CR-192087] p 2171 N93-22009
Advanced launch system trajectory optimization using suboptimal control p 2171 N93-22010
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
[AD-A259293] p 2119 N93-22398
Multidisciplinary optimization of a controlled space structure using 150 design variables
[NASA-CR-4502] p 2125 N93-22799
Transformational planning of reactive behavior
[AD-A260350] p 2463 N93-24270
NONLINEAR SYSTEMS
A fuzzy controller with nonlinear control rules is the sum of a global nonlinear controller and a local nonlinear PI-like controller p 2453 N93-22356
Nonlinear rescaling of control values simplifies fuzzy control p 2456 N93-22373
Copper Mountain conference on iterative methods, volume 2
[DE93-004994] p 2466 N93-22405
Temporal identification of linear and nonlinear structures
[ECL-90-33] p 2324 N93-22686
Nonlinear dynamical modeling and prediction of the terrestrial magnetospheric activity p 2392 N93-23135
A comparison of polynomial and rational NARMAX models for nonlinear system identification
[RR-444] p 2469 N93-23374
Mean levels in nonlinear analysis and identification
[RR-454] p 2525 N93-23378
High Temperature Composite Analyzer (HITCAN) demonstration manual, version 1.0
[NASA-TM-106003] p 2328 N93-23411
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
[PB93-142438] p 2439 N93-23436
Nonlinear attitude control of spacecraft and momentum management of control moment gyros
p 2195 N93-23506
Asymptotic analysis of: 1: Wave propagation in dispersive optical media with quadratic nonlinearity. 2: A hypersonic wing with three-dimensional self-similarity
p 2112 N93-23594
Chaotic dynamics of the solar cycle
[AD-A260039] p 2557 N93-23644
A nonlinear dynamic spherical membrane model
[AD-A259633] p 2112 N93-23654
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
[AD-A259659] p 2396 N93-23657
Time dependent classification of features with a nonlinear, dynamic network
[VTT-PUBS-83] p 2448 N93-23868
Nonlinear optics and turbulence
[AD-A259950] p 2489 N93-24244
Large-amplitude forced response of dynamic systems
[AD-A260394] p 2332 N93-24426
Stochastic inflation and inflationary density fluctuations
p 2473 N93-24457
Nonlinear dynamics research in the former Soviet Union
[PB93-146496] p 2333 N93-24571
A user's manual for software GPR92
[MATHS-REPT-A-175] p 2444 N93-24642
NONLINEARITY
A high-power 95 GHz gyro-TWT amplifier
[DE93-002332] p 2277 N93-22425
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
[DE93-003834] p 2492 N93-22426
Using nonlinear acoustics for nondestructive materials characterization and evaluation
[DE93-004447] p 2321 N93-22727
On the nonlinear interfacial instability of rotating core-annular flow
[NASA-CR-191432] p 2289 N93-22811
A high performance spectral code for nonlinear MHD stability
[DE93-004541] p 2494 N93-22984

Nonlinear analysis of relativistic harmonic generation by intense lasers in plasmas
[AD-A260092] p 2497 N93-24052
Compositional superlattices based on PtCl/PtBr MX materials
[DE93-003700] p 2513 N93-24496
A global path planning approach for redundant manipulators
[NASA-CR-193017] p 2320 N93-24656

NONNEWTONIAN FLOW
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132

NONNEWTONIAN FLUIDS
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132

NORTH CAROLINA
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
[PB93-110955] p 2519 N93-23286

NORTH DAKOTA
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
[PB93-110997] p 2521 N93-24557

NORTH SEA
The environmental biogeochemistry of open ocean and partially enclosed marine systems p 2413 N93-23130

NORWAY
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760

NORWEGIAN SPACE PROGRAM
Activities report of the Norwegian Space Center
[ETN-93-93540] p 2570 N93-23107

NOTCH TESTS
Interlaminar mode-2 fracture toughness of a glass-fiber epoxy laminate
[VTT-PUBS-105] p 2208 N93-22815

NOVA LASER SYSTEM
Laser driven hydrodynamic instability experiments
[DE93-005822] p 2308 N93-23330

NOVAE
The cold ionized shell around the old nova DQ Herculis p 2543 N93-23964

NOZZLE DESIGN
Reliability of solid rocket motor cases and nozzles p 2176 N93-22103
Evaluation of nozzle shapes for an optical flow meter
[PB93-124147] p 2292 N93-23281

NOZZLE FLOW
Turbulence modelling of flow fields in thrust chambers
[NASA-CR-192466] p 2202 N93-22382
Generation of monodisperse droplets by spontaneous condensation of flow in nozzles
[NASA-CR-192356] p 2287 N93-22401
Evaluation of nozzle shapes for an optical flow meter
[PB93-124147] p 2292 N93-23281

NOZZLE GEOMETRY
Evaluation of nozzle shapes for an optical flow meter
[PB93-124147] p 2292 N93-23281

NOZZLES
Failure environment analysis tool applications p 2322 N93-22170

NUCLEAR BINDING ENERGY
Physics opportunities with higher energy pion beams
[DE93-006678] p 2480 N93-22585

NUCLEAR ELECTRIC POWER GENERATION
Generation of covariance data among values from a single set of experiments
[DE93-004192] p 2522 N93-22435
Future trends in power generation cost by power resource
[DE93-761825] p 2378 N93-22957

NUCLEAR ELECTRIC PROPULSION
Nuclear concepts/propulsion p 2174 N93-22093
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 5: Nuclear electric propulsion vehicle
[NASA-CR-192493] p 2178 N93-22990

NUCLEAR ENGINE FOR ROCKET VEHICLES
Nuclear Engine System Simulation (NESS). Version 2.0: Program user's guide
[NASA-CR-191081] p 2204 N93-23875
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
[NASA-CR-191080] p 2204 N93-23876

NUCLEAR EXPLOSIONS
Near-earth object interception workshop summary
[DE93-003793] p 2546 N93-22403
Effects of UGTs on the ionosphere
[DE93-000793] p 2392 N93-22806

NUCLEAR FUSION
Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis
[DE93-006123] p 2491 N93-22052
Investigation of cold nuclear fusion in condensed matter
[DE93-006083] p 2515 N93-23683

NUCLEAR INTERACTIONS
Experimental studies of pion-nucleus interactions at intermediate energies
[DE93-005872] p 2482 N93-23308

NUCLEAR MAGNETIC RESONANCE
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
[AD-A259889] p 2242 N93-24321

NUCLEAR MODELS
Theoretical models of neutron emission in fission
[DE93-005482] p 2485 N93-22343

NUCLEAR PHYSICS
Particle physics
[DE93-006894] p 2482 N93-22992

NUCLEAR POWER PLANTS
Future trends in power generation cost by power resource
[DE93-761825] p 2378 N93-22957
J-integral of circumferential crack in large diameter pipes
[DE93-003708] p 2326 N93-23050
Analysis of complex systems using neural networks
[DE93-003541] p 2464 N93-24514

NUCLEAR POWER REACTORS
Automated technologies needed to prevent radioactive materials from reentering the atmosphere p 2137 N93-22237

NUCLEAR PROPULSION
Test facilities for evaluating nuclear thermal propulsion systems
[DE93-002468] p 2202 N93-22411
A reactor-pumped laser as primary power for nuclear rocket engines
[DE93-005342] p 2203 N93-22501
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
[NASA-CR-192491] p 2178 N93-22960
Nuclear Engine System Simulation (NESS). Version 2.0: Program user's guide
[NASA-CR-191081] p 2204 N93-23875
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
[NASA-CR-191080] p 2204 N93-23876

NUCLEAR REACTIONS
From simple to complex reactions: Nuclear collisions near the Coulomb barrier
[DE93-004197] p 2478 N93-22063
Experimental studies of pion-nucleus interactions at intermediate energies
[DE93-005872] p 2482 N93-23308

NUCLEAR REACTORS
Biases in Monte Carlo eigenvalue calculations
[DE93-004189] p 2471 N93-22061

NUCLEAR ROCKET ENGINES
A reactor-pumped laser as primary power for nuclear rocket engines
[DE93-005342] p 2203 N93-22501
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
[NASA-CR-192491] p 2178 N93-22960

NUCLEAR STRUCTURE
Physics opportunities with higher energy pion beams
[DE93-006678] p 2480 N93-22585

NUCLEAR VULNERABILITY
The meaning and utility of confidence
[AD-A259646] p 2472 N93-23655

NUCLEATE BOILING
Boiling under microgravity conditions p 2249 N93-22847
Forced convection boiling and condensation in microgravity: A critical appraisal of the literature p 2249 N93-22849

NUCLEATION
Generation of monodisperse droplets by spontaneous condensation of flow in nozzles
[NASA-CR-192356] p 2287 N93-22401
The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
[DE93-006279] p 2501 N93-22510
Using nonlinear acoustics for nondestructive materials characterization and evaluation
[DE93-004447] p 2321 N93-22727
In-situ characterization of growth and interfaces in a-Si:H devices
[DE93-000051] p 2504 N93-22928
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A259616] p 2510 N93-24126
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue p 2164 N93-24394

NULL HYPOTHESIS
Transformations of gaussian random fields and a test for independence of a survival time from a covariate
[AD-A260442] p 2472 N93-24114

NUMERICAL ANALYSIS
Multivariable frequency response methods for optimal Kalman-Bucy filters with applications to radar tracking systems p 2255 N93-22024
Use of non-spherical gravity harmonics for relative motion GN/C (category 2) p 2141 N93-22262
Regional-scale analysis and forecasting
[AD-A259894] p 2403 N93-22733
Extending compile-time reverse mode and exploiting partial separability in ADIFOR
[DE93-004668] p 2467 N93-22776
Recent results of multimagnetical simulations of the Ising model
[DE93-005213] p 2475 N93-22951
Theoretical study of reactions at the electrode-electrolyte interface
[DE93-006899] p 2221 N93-23341
A multiple scales approach to sound generation by vibrating bodies
[NASA-CR-191414] p 2294 N93-23409
Metallic ions and atoms in the upper atmosphere
[AD-A259741] p 2394 N93-23478
Spray combustion experiments and numerical predictions
[NASA-TM-106069] p 2296 N93-23744
Problems on numerical analysis relating to gas turbines
[DE93-753796] p 2130 N93-24002
Center for shape optimization and material layout
[AD-A260087] p 2471 N93-24411

NUMERICAL CONTROL
Micro-video display with ocular tracking and interactive voice control p 2433 N93-22172
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping p 2259 N93-22174
The MSFC space station/space operations mechanism test bed p 2149 N93-22309
Path planning for manipulators
[DE93-004050] p 2457 N93-22756
Automatic code generation for distributed robotic systems
[DE93-005779] p 2447 N93-22996

NUMERICAL FLOW VISUALIZATION
A system for the numerical simulation of complex configuration internal aerodynamic fields for the aerospace industry
[ETN-93-93698] p 2110 N93-23364

NUMERICAL INTEGRATION
CREEPSIM-2: A software package for numerical integration of 1st order differential equations
[NPL-DMM(A)-35] p 2435 N93-22452
An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
[ETN-93-93703] p 2297 N93-23871
Chaotic evolution of the solar system
[AD-A260055] p 2550 N93-23961

NUMERICAL WEATHER FORECASTING
Regional-scale analysis and forecasting
[AD-A259894] p 2403 N93-22733
CHAMMP
[AD-A260190] p 2403 N93-22765
Prognostic cloud water in the Los Alamos GCM
[DE93-000679] p 2404 N93-22772
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
[PB93-108090] p 2404 N93-23090
Data ingest and objective analysis for the PSU/NCAR modeling system. Programs DATAGRID and RAWINS
[PB93-138519] p 2393 N93-23252
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
[PB93-118586] p 2405 N93-23333
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
[AD-A259922] p 2407 N93-23710
Preliminary results from the analysis of wind component error, July data
[AD-A259654] p 2408 N93-24022

Advanced retrieval and analysis of satellite data for numerical weather prediction
[AD-A260036] p 2410 N93-24286
Assessment of spaceborne lidar for meteorological analyses
[AD-A260026] p 2410 N93-24517

NUTRIENTS
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
[PB93-136927] p 2387 N93-23438

NUTRITIONAL REQUIREMENTS
A proposal to demonstrate production of salad crops in the Space Station Mockup Facility with particular attention to space, energy, and labor constraints
[NASA-CR-192815] p 2419 N93-23169

O

O RING SEALS
A summary of laboratory testing performed to characterize and select an elastomeric O-ring material to be used in the redesigned solid rocket motors of the space transportation system
[NASA-TM-108395] p 2236 N93-22557

OBJECT-ORIENTED PROGRAMMING
Advanced software development workstation. OOPSLA 1992 Conference. Trip report
[NASA-CR-192811] p 2432 N93-22041
Advanced software development workstation. Comparison of two object-oriented development methodologies
[NASA-CR-192819] p 2434 N93-22042
Investigation of cognition acquisition using natural language conversational process
[MBB-FE-315-S-PUB-0498] p 2435 N93-22391
Object technology: A white paper
[DE93-006037] p 2522 N93-22495
An object-oriented database approach to the storage and use of medical data p 2526 N93-23382

OBLIQUE SHOCK WAVES
Numerical studies for the RAM accelerator
[AD-A259949] p 2224 N93-24423

OBSERVABILITY (SYSTEMS)
A passivity approach to controller-observer design for robots
[MEMO-1050] p 2459 N93-23355

OBSERVATION
Regional-scale analysis and forecasting
[AD-A259894] p 2403 N93-22733

OBSTACLE AVOIDANCE
Sensor-based whole-arm obstacle avoidance utilizing ASIC technology
[DE93-003602] p 2279 N93-22819
Autonomus obstacle avoidance using visual fixation and looming
[PB93-146660] p 2459 N93-23442
A capacitance-based proximity sensor for whole arm obstacle avoidance
[DE93-006773] p 2463 N93-24331
An integrated Rotorcraft Avionics/Controls Architecture to support advanced controls and low-altitude guidance flight research
[NASA-TM-103983] p 2134 N93-24493

OCCLUSION
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
[AD-A259711] p 2440 N93-23638
Perception/action: An holistic approach
[AD-A259597] p 2428 N93-24067

OCCUPATION
Pipeline issues p 2517 N93-23148

OCEAN BOTTOM
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
[DE93-005061] p 2383 N93-22602
A direct mathematical approach to optimize the age-depth relation of deep-sea sediment cores
[MPIM-77] p 2414 N93-23636
Evaluation of the Bathyscan sweep survey system
[AD-A260162] p 2415 N93-23708
Orbital tuning of marine sedimentary cores: An automatic procedure based on a general linear model
[MPIM-79] p 2415 N93-23856
Microtopography of manganese crusts
[PB93-120830] p 2398 N93-23996
On the physical boundary conditions in the ocean/bottom acoustic interaction model
[FFI-92/7023] p 2416 N93-24091

OCEAN COLOR SCANNER
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries
[PB93-149409] p 2374 N93-24309

OCEAN CURRENTS
Monitoring of Kuroshio current using the data of VTIR obtained by MOS-1 and MOS-1b p 2334 N93-22124
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Observation in the East China Sea p 2335 N93-22126
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
[DE93-005061] p 2383 N93-22602
The influence of wind-driven ocean circulation on Earth rotation p 2412 N93-22668
TOPEX/POSEIDON joint verification plan
[NASA-CR-192792] p 2413 N93-22804
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
[NASA-CR-192805] p 2414 N93-23138
The effect of current-induced stress perturbation on large- and meso-scale air-sea interactions p 2393 N93-23207
Direct numerical simulations and hydrodynamic stability problems in the upper oceanic mixed layer p 2414 N93-23490
Coupling an ocean wave model to an atmospheric general circulation model
[MPIM-72] p 2395 N93-23632
Climate variability in a coupled GCM. Part 1: The tropical pacific
[MPIM-73] p 2407 N93-23633
Report of the Sea Ice Thickness Workshop
[AD-A259696] p 2414 N93-23663
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
Iron fertilization of the austral ocean: A model assessment
[MPIM-84] p 2415 N93-23860
Studies of mixing and internal waves in the upper ocean p 2415 N93-23962
Numerical simulation and prediction of coastal ocean circulation p 2416 N93-24178

OCEAN DATA ACQUISITIONS SYSTEMS
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
[DE93-005038] p 2415 N93-23979

OCEAN DYNAMICS
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
[PB93-123909] p 2412 N93-22067

OCEAN MODELS
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
[DE93-005061] p 2383 N93-22602
CHAMMP
[AD-A260190] p 2403 N93-22765
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
[NASA-CR-192805] p 2414 N93-23138
Direct numerical simulations and hydrodynamic stability problems in the upper oceanic mixed layer p 2414 N93-23490
Coupling an ocean wave model to an atmospheric general circulation model
[MPIM-72] p 2395 N93-23632
Climate variability in a coupled GCM. Part 1: The tropical pacific
[MPIM-73] p 2407 N93-23633
On the space-time structure of ENSO
[MPIM-74] p 2407 N93-23634
A hybrid coupled tropical atmosphere ocean model: Sensitivities and hindcast skill
[MPIM-76] p 2396 N93-23635
The joint normal modes of the coupled atmosphere-ocean system observed from 1967 to 1986
[MPIM-78] p 2396 N93-23637
On the cold start problem in transient simulations with coupled atmosphere-ocean models
[MPIM-83] p 2397 N93-23859
Studies of mixing and internal waves in the upper ocean p 2415 N93-23962
On the physical boundary conditions in the ocean/bottom acoustic interaction model
[FFI-92/7023] p 2416 N93-24091
Modeling the tropical ocean response to westerly wind forcing
[AD-A260230] p 2416 N93-24099
Numerical simulation and prediction of coastal ocean circulation p 2416 N93-24178
Application of ocean models for the interpretation of AGCM experiments on the climate of the last glacial maximum
[MPIM-80] p 2416 N93-24581

OCEAN SURFACE
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
ROWS wave spectral data collected in SAXON-FPN, November 1990
[NASA-TM-104582] p 2412 N93-22387
Third Stokes parameter emission from a periodic water surface
[NASA-CR-192334] p 2342 N93-22454
Measurements of surface ocean carbon dioxide partial pressure during WOCE
[DE93-006890] p 2412 N93-22580
SeaWiFS Technical Report Series. Volume 8: Proceedings of the First SeaWiFS Science Team Meeting
[NASA-TM-104566] p 2413 N93-23010
The effect of current-induced stress perturbation on large- and meso-scale air-sea interactions p 2393 N93-23207
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601

OCEAN TEMPERATURE
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
[PB93-136422] p 2413 N93-22893
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
[DE93-005038] p 2415 N93-23979

OCEANOGRAPHIC PARAMETERS
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Environmental data sets at the University of Alaska p 2338 N93-22146
SeaWiFS Technical Report Series. Volume 8: Proceedings of the First SeaWiFS Science Team Meeting
[NASA-TM-104566] p 2413 N93-23010
An autonomous expendable conductivity, temperature, depth profiler for ocean data collection
[DE93-005038] p 2415 N93-23979

OCEANOGRAPHY
TOPEX/POSEIDON joint verification plan
[NASA-CR-192792] p 2413 N93-22804
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
[PB93-136604] p 2343 N93-23278
ERS-1: The first European Earth observation system p 2358 N93-23757
The program of oceanological experiments within the Priroda project p 2361 N93-23773
GLOBSAT/METOC: An alternative approach for a European Earth observation programme from the polar orbit p 2361 N93-23775
Observing the northeast Atlantic with NOAA-N at the University of Lisbon (Portugal) Space Oceanography Facility p 2362 N93-23779
Computer-based lessons in satellite oceanography: An academic network for teachers and students p 2369 N93-23825
Modeling the tropical ocean response to westerly wind forcing
[AD-A260230] p 2416 N93-24099
NOAA/CMDL atmospheric methane data from shipboard flask sampling
[PB93-136489] p 2389 N93-24226
Research in stochastic processes and their applications
[AD-A260174] p 2473 N93-24317
Nonlinear dynamics research in the former Soviet Union
[PB93-146496] p 2333 N93-24571
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
[PB93-152031] p 2416 N93-24605

OCEANS
Ocean colour programmes for the European marine environment p 2366 N93-23808
Ocean governance: A new vision
[PB93-136299] p 2416 N93-24144

OCTANE NUMBER
1991 CRC octane number requirement survey
[AD-A259821] p 2245 N93-23667

OFFSHORE ENERGY SOURCES
Physical oceanography of the US Atlantic and Eastern Gulf of Mexico
[PB93-123909] p 2412 N93-22067

OFFSHORE PLATFORMS
Off-shore platform identification signs
[CAA-PAPER-92006] p 2123 N93-24124

OH-58 HELICOPTER
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
[NASA-TM-106080] p 2313 N93-23019
Pattern classifier for health monitoring of helicopter gearboxes
[NASA-TM-106099] p 2316 N93-23741

OHIO
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
[PB93-110963] p 2520 N93-24158

OIL EXPLORATION
Application of fuzzy set and Dempster-Shafer theory to organic geochemistry interpretation
p 2450 N93-22212
GeoEnvironment Carpathes project
p 2368 N93-23816

OIL SLICKS
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
[PB93-152031] p 2416 N93-24605

OILS
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
[NASA-TM-105830] p 2312 N93-22826
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
[AD-A258453] p 2233 N93-23982

OKLAHOMA
Small business profiles, 1992. Region 6: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
[PB93-110971] p 2520 N93-24159

ON-LINE SYSTEMS
Self-checking on-line testable static RAM
[NASA-CASE-NPO-17939-1-CU] p 2432 N93-22032
Data sets for weather information services
p 2337 N93-22140
ROBOSIM: An intelligent simulator for robotic systems
p 2465 N93-22161
Automated system for analyzing the activity of individual neurons p 2423 N93-22163
Operator Performance Support System (OPSS)
p 2429 N93-22195
On-line process analysis innovation: DiComp (tm) shunting dielectric sensor technology
p 2287 N93-22200
Towards autonomous fuzzy control
p 2450 N93-22213
An electronic stroll through the global village
[DE93-005962] p 2446 N93-22763
Common Carrier Earth Station Application
[PB93-111722] p 2263 N93-23268
Coordinating Council. First Meeting: NASA/RECON database
[NASA-TM-108766] p 2526 N93-23412
On-line health monitoring: An integrity improvement for the civil use of GPS and GLONASS
p 2125 N93-23535

ONBOARD EQUIPMENT
Onboard navigation rendezvous expert system
p 2144 N93-22280

ONE DIMENSIONAL FLOW
An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
[ETN-93-93703] p 2297 N93-23871
Control of two- and three-dimensional wake instabilities from bluff-bodies
[AD-A260410] p 2299 N93-24428

ONTARIO
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
[PB93-129864] p 2392 N93-22894

OORT CLOUD
Studies of extra-solar OORT clouds and the Kuiper disk
[NASA-CR-192759] p 2555 N93-22476

OPERATING COSTS
Advanced rocket propulsion p 2174 N93-22091
Space transportation: The content and uses of Shuttle cost estimates. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-93-115] p 2531 N93-23097
The Eureca concept and missions
p 2156 N93-24343

OPERATING SYSTEMS (COMPUTERS)
Transportable Applications Environment (TAE) Plus: A NASA tool for building and managing graphical user interfaces p 2444 N93-22150
Petri net controllers for distributed robotic systems
[NASA-CR-193196] p 2320 N93-24658

OPERATING TEMPERATURE
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
[NASA-TM-105978] p 2130 N93-23013

OPERATIONAL AMPLIFIERS
Design of low-voltage bipolar operational amplifiers
[ISBN-90-9004571-6] p 2280 N93-23021

OPERATIONAL HAZARDS
Laser safety training programs for a large and diverse research and development laboratory
[DE93-006291] p 2307 N93-22546
Hazard alerting and situational awareness in advanced air transport cockpits p 2106 N93-22566

OPERATIONS RESEARCH
TCAS 2: Report on UK operational trial
[CAA-PAPER-92011] p 2122 N93-24105
Off-shore platform identification signs
[CAA-PAPER-92006] p 2123 N93-24124

OPERATOR PERFORMANCE
Operator Performance Support System (OPSS)
p 2429 N93-22195

OPERATORS (MATHEMATICS)
Operator splitting methods for the Navier-Stokes equations p 2292 N93-23226
A priori error estimates of finite element solutions of parametrized nonlinear equations
[AD-A260013] p 2471 N93-24437
A posteriori error estimates of finite element solutions of parametrized nonlinear equations
[AD-A260014] p 2471 N93-24438

OPERATORS (PERSONNEL)
The European astronauts training programme
p 2156 N93-24346

OPTICAL BISTABILITY
Computation of nonlinear optical scattering by droplets
[AD-A260333] p 2490 N93-24267

OPTICAL COMMUNICATION
Wireless infrared communications for space and terrestrial applications p 2275 N93-22177
Stimulated Brillouin scattering switching in mid fibers
[AD-A260456] p 2487 N93-22948
Intelligent, integrated fiber optic networks
[AD-A260282] p 2490 N93-24260

OPTICAL COMPUTERS
Automated target recognition and tracking using an optical pattern recognition neural network
p 2138 N93-22240
Novel optical processor for phased array antenna
[AD-A260474] p 2273 N93-24277

OPTICAL CORRECTION PROCEDURE
Design of an imaging spectrometer processing chain for space application p 2364 N93-23792

OPTICAL CORRELATORS
Automated target recognition and tracking using an optical pattern recognition neural network
p 2138 N93-22240
Optical correlators for automated rendezvous and capture p 2143 N93-22273
Photonic correlator pattern recognition: Application to autonomous docking p 2148 N93-22303
Effect of code augmentation or truncation on the signals produced by a time-integrating correlator
[AD-A259802] p 2264 N93-23458

OPTICAL DATA PROCESSING
Automated target recognition and tracking using an optical pattern recognition neural network
p 2138 N93-22240
When networks disagree: Ensemble methods for hybrid neural networks
[AD-A260121] p 2460 N93-23701

OPTICAL DENSITY
Valency of different information categories and its importance for the effectiveness of image analysis by the visual system and automatic systems
p 2354 N93-23577

OPTICAL DISKS
Laser disc for Earth environment data set
p 2338 N93-22142
Environmental data sets in Canada
p 2338 N93-22143

OPTICAL EQUIPMENT
Stimulated Brillouin scattering switching in mid fibers
[AD-A260456] p 2487 N93-22948
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189
Novel optical processor for phased array antenna
[AD-A260474] p 2273 N93-24277
Actuator stroke requirements based on a Zernike decomposition of atmospheric turbulence
[DE93-007393] p 2516 N93-24449

OPTICAL FIBERS
Transversely polarized source cladding for an optical fiber
[NASA-CASE-LAR-14652-1-SB] p 2486 N93-22039
Passive (self-powered) fiber-optic sensors
[DE93-005761] p 2486 N93-22762
Fiber optic interferometer configuration with pump-induced phase carrier
[AD-D015617] p 2489 N93-24156
Radio frequency cable to optical fiber cable
[AD-D015620] p 2284 N93-24230

OPTICAL FLOW
Evaluation of nozzle shapes for an optical flow meter
[PB93-124147] p 2292 N93-23281

OPTICAL GYROSCOPES
An overview of optical gyroscopes for navigation
p 2119 N93-22783
Fiber optic gyros and systems p 2120 N93-22785

OPTICAL ILLUSION
Optovert: An AustroMir-1991 experiment. Orientational effects from optokinetic stimulation
p 2160 N93-24366

OPTICAL MATERIALS
High-power optical coatings for a mega-Joule class ICF laser
[DE93-005821] p 2306 N93-22328
LUTE primary mirror materials and design study report
[NASA-CR-192487] p 2487 N93-22961
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Optical analysis of lenslet arrays
[AD-A260126] p 2488 N93-23702
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
[AD-A260525] p 2241 N93-24201
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
[AD-D015623] p 2241 N93-24257
Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425

OPTICAL MEASUREMENT
Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290
Moire interferometry at high temperatures
p 2328 N93-23380
Development of optical three-dimensional measurement techniques for fluid dynamics p 2294 N93-23398
A review of optically controlled microwave devices and circuits
[AD-A259647] p 2282 N93-23656
Spectroscopic ellipsometry and interference reflectometry measurements of CVD silicon grown on oxidized silicon
[DE93-005767] p 2509 N93-24017
Optical diagnostics in supersonic plasma flows: Purging fluid effects
[DE93-006243] p 2497 N93-24042
A study of high-latitude auroral arcs using radar, optical, and in situ techniques p 2399 N93-24183
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
[AD-A260229] p 2310 N93-24320
Atom wave interferometer
[AD-A260082] p 2484 N93-24410

OPTICAL MEASURING INSTRUMENTS
Demonstration of automated proximity and docking technology p 2135 N93-22227
Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
OTV bearing deflection investigation
[NASA-TM-106085] p 2303 N93-22994
Evaluation of nozzle shapes for an optical flow meter
[PB93-124147] p 2292 N93-23281
Priroda project: Optical sensors for environment research p 2362 N93-23782

OPTICAL PATHS
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
[AD-A260229] p 2310 N93-24320

OPTICAL PROPERTIES
Optical and scratch resistant properties of diamondlike carbon films deposited with single and dual ion beams
[NASA-TM-105943] p 2206 N93-22586
The effect of UV light on Ir absorption in chemically vapor deposited a-SiN(x):H films
[DE93-004502] p 2486 N93-22941
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
[DE93-006411] p 2419 N93-24028
Optical studies of laterally confined quantum well structures grown on ex-situ and in-situ patterned substrates
[AD-A260275] p 2511 N93-24167
Determination of the optical properties of particles for solar heated fluidized beds
[DLR-FB-92-15] p 2490 N93-24641

OPTICAL PUMPING
High power diode pumped solid state lasers
[DE93-005818] p 2307 N93-22691
Laser spectroscopy of chemically reactive species
[DE93-006672] p 2310 N93-24326

OPTICAL RADAR
Multi-beam range imager for autonomous operations p 2310 N93-22160
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture p 2139 N93-22250
LADAR vision technology for automated rendezvous and capture p 2141 N93-22258
Water surface temperatures from satellite thermal images p 2340 N93-22444
Laser range camera data fusion
[DE93-005159] p 2263 N93-23313
Shadow technique for improved inversion of lidar data to cirrus and contrail optical depth
[ESA-TT-1263] p 2405 N93-23332
Development of laser radar ATR algorithm. Phase 2: Military objects
[AD-A237544] p 2272 N93-24120
Assessment of spaceborne lidar for meteorological analyses
[AD-A260026] p 2410 N93-24517
OPTICAL SCANNERS
Effectiveness of feature and classifier algorithms in character recognition systems
[PB93-147197] p 2525 N93-23272
MOMS-02P: A modular optical system for Earth land cover observation in the multisensor environment of the Priroda/Mir mission p 2365 N93-23796
Machine-assisted human classification of segmented characters for optical character recognition testing and training
[PB93-152155] p 2529 N93-24631
OPTICAL SWITCHING
GaAs-based optoelectronic neurons
[NASA-CASE-NPO-18497-1-CU] p 2464 N93-24599
OPTICAL THICKNESS
Shadow technique for improved inversion of lidar data to cirrus and contrail optical depth
[ESA-TT-1263] p 2405 N93-23332
Light extinction in the atmosphere
[DE93-005034] p 2397 N93-23978
Low-damage multilayer mirror for the soft x ray region
[AD-D015621] p 2489 N93-24231
OPTICAL TRACKING
Apparent opacity affects perception of structure from motion
[AD-A260099] p 2488 N93-24054
Real-time signal processing systems
[AD-A259548] p 2272 N93-24084
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
[AD-A260229] p 2310 N93-24320
OPTICAL TRANSFER FUNCTION
Design and manufacture of optical system for use in UV lithography with the free electron laser
[DE93-005440] p 2307 N93-22539
OPTICAL WAVEGUIDES
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Ion beam mixing in multi-quantum well structures
[AD-A259772] p 2516 N93-24509
OPTIMAL CONTROL
Robust Neighboring Optimal Guidance for the Advanced Launch System --- Author
[NASA-CR-192087] p 2171 N93-22009
Advanced launch system trajectory optimization using suboptimal control p 2171 N93-22010
Neighboring suboptimal control for vehicle guidance p 2171 N93-22011
Autonomous vehicle motion control, approximate maps, and fuzzy logic p 2452 N93-22219
Trajectory optimization based on differential inclusion
[NASA-CR-4501] p 2181 N93-22459
Identification for robust control: What is the best approach?
[MEMT-16] p 2458 N93-23060
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
[NASA-TM-103883] p 2122 N93-23419
A new conjugate gradient method for optimal control
[MATHS-REPT-A-174] p 2462 N93-24077
Learning optimal control using learning automata
[MATHS-REPT-A-176] p 2462 N93-24078
Deterministic methods in stochastic optimal control
[AD-A260478] p 2462 N93-24100
OPTIMIZATION
User areas in aircraft cockpit, using methods of rapid prototype development
[MBB-FE-315-S-PUB-0493] p 2426 N93-22389
Computer facilities optimization studies
[NASA-CR-192702] p 2432 N93-22471
Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
[DS-2024] p 2208 N93-22603
Optimization of the integration of inertia and GPS p 2120 N93-22787
Multidisciplinary optimization of a controlled space structure using 150 design variables
[NASA-CR-4502] p 2125 N93-22799
Control design variable linking for optimization of structural/control systems
[NASA-CR-4493] p 2125 N93-22827
A local exponential transform method for global variance reduction in Monte Carlo transport problems
[DE92-018992] p 2468 N93-22926
Characterization of SAES St198 zirconium-iron-tin alloy
[DE93-005697] p 2230 N93-23036
Time optimal paths for high speed maneuvering
[DE93-006251] p 2458 N93-23338
A self growing binary tree neural network for the identification of multiclass systems
[RR-451] p 2459 N93-23362
The SPOT system development program: SPOT AVAL p 2360 N93-23769
PASCAL subroutines for standard test problems in unconstrained minimization
[MATHS-REPT-A-155] p 2441 N93-24076
A new conjugate gradient method for optimal control
[MATHS-REPT-A-174] p 2462 N93-24077
Meteorological data assimilation by adaptive Bayesian optimization p 2409 N93-24272
Center for shape optimization and material layout
[AD-A260087] p 2471 N93-24411
Multiobjective optimization of aerospace structures
[AD-A260433] p 2127 N93-24430
A user's manual for software GPR92
[MATHS-REPT-A-175] p 2444 N93-24642
OPTOELECTRONIC DEVICES
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
OPTOMETRY
Optovert: An AustroMir-1991 experiment. Orientational effects from optokinetic stimulation p 2160 N93-24366
ORBIT CALCULATION
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318
Precise GPS-based tracking of remote sensing satellites p 2122 N93-23587
A mechanism for capture into resonance
[PB93-145761] p 2469 N93-23648
ORBIT TRANSFER VEHICLES
Lunar transfer vehicle studies p 2173 N93-22087
Aerobraking technology studies p 2173 N93-22089
CSTI Earth-to-orbit propulsion research and technology program overview p 2174 N93-22090
Autonomous rendezvous targeting techniques for national launch system application p 2145 N93-22284
An automated rendezvous and capture system design concept for the cargo transfer vehicle and Space Station Freedom p 2146 N93-22287
Six degree of freedom simulation system for evaluating automated rendezvous and docking spacecraft p 2148 N93-22299
Proposed CTV design reference missions in support of Space Station Freedom p 2148 N93-22300
OTV bearing deflection investigation
[NASA-TM-106085] p 2303 N93-22994
ORBITAL ASSEMBLY
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
Vision-guided gripping of a cylinder
[NASA-CR-193199] p 2465 N93-24657
ORBITAL MANEUVERING VEHICLES
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236
Rendezvous radar for the orbital maneuvering vehicle p 2145 N93-22283
Collision avoidance for CTV: Requirements and capabilities p 2147 N93-22294
Six degree of freedom simulation system for evaluating automated rendezvous and docking spacecraft p 2148 N93-22299
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
ORBITAL MANEUVERS
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
[NASA-TM-108598] p 2135 N93-22226
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
A synthetic environment for visualization and planning of orbital maneuvers p 2140 N93-22251
Collision avoidance for CTV: Requirements and capabilities p 2147 N93-22294
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
Thruster configurations for maneuvering heavy payloads p 2150 N93-22313
ORBITAL MECHANICS
Use of non-spherical gravity harmonics for relative motion GN/C (category 2) p 2141 N93-22262
GN/C translation and rotation control parameters for AR/C (category 2) p 2142 N93-22263
ORBITAL RENDEZVOUS
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
[NASA-TM-108598] p 2135 N93-22226
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
Manned versus unmanned rendezvous and capture p 2137 N93-22234
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236
Automated technologies needed to prevent radioactive materials from reentering the atmosphere p 2137 N93-22237
Applicability of relative GPS to automated rendezvous between the space shuttle and space station p 2138 N93-22241
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation p 2138 N93-22242
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
Autonomous rendezvous and capture system design p 2138 N93-22244
Laser docking sensor engineering model p 2139 N93-22247
The real-time operations of the Space Shuttle Orbiter during rendezvous and proximity operations p 2139 N93-22249
Autonomous rendezvous and docking operations of unmanned expendable cargo transfer vehicles (e.g. Centaur) with Space Station Freedom p 2140 N93-22252
TRAC based sensing for autonomous rendezvous p 2140 N93-22253
Flight Support System (FSS) docking and umbilical services systems p 2140 N93-22254
Automated rendezvous and proximity operations p 2141 N93-22257
LADAR vision technology for automated rendezvous and capture p 2141 N93-22258
Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware p 2141 N93-22260
Virtual reality applications to automated rendezvous and capture p 2141 N93-22261
GN/C translation and rotation control parameters for AR/C (category 2) p 2142 N93-22263
Results of prototype software development for automation of shuttle proximity operations p 2142 N93-22264
Soviet automated rendezvous and docking system overview p 2142 N93-22265
On-orbit demonstration of automated closure and capture using ESA-developed proximity operations technologies and an existing, serviceable NASA Explorer Platform spacecraft p 2142 N93-22266
Video guidance sensor for autonomous capture p 2142 N93-22267
Space Shuttle Program: Automatic rendezvous, proximity operations, and capture (category 3) p 2143 N93-22269
CTV rendezvous techniques p 2143 N93-22270
An autonomous rendezvous and docking system using cruise missile technologies p 2143 N93-22272
Optical correlators for automated rendezvous and capture p 2143 N93-22273
Automatic rendezvous and capture system development in a manned environment p 2143 N93-22274
Performance capabilities of a Phase One Automatic Rendezvous and Capture System p 2144 N93-22275
Relative navigation requirements for automatic rendezvous and capture systems p 2144 N93-22276
Automated rendezvous and capture system p 2144 N93-22277
A comparison of laser based ranging systems for AR/C category 1: Hardware p 2144 N93-22278
New developments in astrodynamics algorithms for autonomous rendezvous p 2144 N93-22279
Onboard navigation rendezvous expert system p 2144 N93-22280
An overview of autonomous rendezvous and docking system technology development at General Dynamics p 2145 N93-22281
Rendezvous radar for the orbital maneuvering vehicle p 2145 N93-22283

An integrated autonomous rendezvous and docking system architecture using Centaur modern avionics p 2147 N93-22293
Automated rendezvous and docking with video imagery p 2148 N93-22298
Six degree of freedom simulation system for evaluating automated rendezvous and docking spacecraft p 2148 N93-22299
The development of an autonomous rendezvous and docking simulation using rapid integration and prototyping technology p 2148 N93-22302
Contact dynamics testing of automated three point docking mechanism p 2149 N93-22306
The role of smart systems in rendezvous, close proximity operations and docking maneuvers p 2150 N93-22310
Automatic rendezvous system testing at the Flight Robotics Laboratory p 2150 N93-22312
Electro-optical rendezvous and docking sensors p 2150 N93-22314
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking p 2151 N93-22316

ORBITAL SERVICING
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
[NASA-TM-108598] p 2135 N93-22226
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation p 2138 N93-22242
Space Station Freedom as an engineering experiment station: An overview p 2187 N93-22631
Group Task Force on Satellite Rescue and Repair
[NASA-TM-108713] p 2193 N93-23040

OREGON
High speed ground transportation study: Executive summary
[PB93-141091] p 2532 N93-22903
Small business profiles, 1992. Region 10: Alaska, Idaho, Oregon, and Washington
[PB93-111011] p 2521 N93-24305

ORGANIC COMPOUNDS
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
[DE93-005450] p 2503 N93-22748
Determination of rates of reaction in the gas-phase in the troposphere. Theory and practice. 5. Rate of indirect photoreaction
[PB93-149334] p 2402 N93-24569

ORGANIC MATERIALS
Organic Optoelectronic Materials: A Topical Workshop
[AD-A259695] p 2488 N93-23662
Mid-infrared spectroscopy of solids in relation to the composition of interstellar and intergalactic dust p 2550 N93-24179

ORGANIC SILICON COMPOUNDS
Organosilicon compounds and polymers and silicon ceramics
[AD-A260056] p 2242 N93-24408

ORGANIZATIONS
Technology and the 21st Century government organization
[DE93-002506] p 2519 N93-22982
The impact on organization structure on team decision making under stress and uncertainty
[AD-A259831] p 2519 N93-23434
Meteosat operational programme current missions and services p 2357 N93-23752
Earth observation programmes and plans of the Commission of the European Communities (CEC) p 2372 N93-23843
New developments in the coordination of Earth observation from space activities: The role of the Committee on Earth Observations Satellites (CEOS) p 2372 N93-23844
Eumetsat practice for protection of its satellite data p 2373 N93-23850

ORGANOMETALLIC COMPOUNDS
Metallo-organic solution deposition of ferroelectric PZT films
[AD-A260127] p 2502 N93-22549
Low-temperature deposition of ZrC thin films from a single source precursor
[DE93-007333] p 2514 N93-24518

ORIFICE FLOW
Numerical simulation of flow through orifice meters
[PB93-124121] p 2293 N93-23349

ORTHOGONAL FUNCTIONS
Identification of systems from non-uniformly sampled data
[RR-452] p 2472 N93-23375

ORTHOPEDICS
Design of a portable powered seat lift p 2429 N93-22190

OSCILLATING FLOW
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402
An oscillating three-dimensional wing experiment: Compressibility, sweep, rate, waveform, and geometry effects on unsteady separation and dynamic stall
[AD-A260530] p 2114 N93-24224

OSCILLATIONS
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
[DE93-004191] p 2499 N93-22062
Learning characteristics of a space-time neural network as a tether skiprope observer p 2197 N93-22176
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
[DE93-005607] p 2279 N93-22945
Complex principal oscillation pattern analysis
[MPIM-86] p 2468 N93-23061

OSCILLATORS
Optimization of the integration of inertia and GPS p 2120 N93-22787
Chaotic dynamics of the solar cycle
[AD-A260039] p 2557 N93-23644

OXIDATION
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
Methane oxidation over dual redox catalysts
[DE92-012454] p 2217 N93-22431
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
[DE93-005372] p 2218 N93-22505
The surface interaction of oxygen with a gamma TiAl
[DE93-003847] p 2227 N93-22517
Computer-aided design of molecular catalysts for alkane oxidation using dodeca-substituted iron porphyrins
[DE93-004046] p 2218 N93-22520
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
[DE93-006742] p 2208 N93-22578
Strength optimization through powder modification
[DE93-005109] p 2237 N93-22718
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
[DE93-007258] p 2219 N93-22824
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products
[PB93-131449] p 2385 N93-23267
Pilot demonstration of cerium oxide coated anodes
[DE93-002507] p 2231 N93-23316
Direct conversion of light hydrocarbon gases to liquid fuel
[DE93-004916] p 2245 N93-23321
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-105961] p 2231 N93-23418
Methane conversion by solid electrolyte membranes
[PB93-127041] p 2222 N93-23994
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling
[AD-A260252] p 2389 N93-24165
Reaction/separation process for enhanced methane conversion
[PB93-150985] p 2246 N93-24634

OXIDATION RESISTANCE
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
[DE93-006742] p 2208 N93-22578
Strength optimization through powder modification
[DE93-005109] p 2237 N93-22718
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
[MBB-Z-0444-92-PUB] p 2239 N93-23365

OXIDATION-REDUCTION REACTIONS
Methane oxidation over dual redox catalysts
[DE92-012454] p 2217 N93-22431
Carbon dioxide, climate, and the deep ocean circulation: Carbon chemistry model
[DE93-005061] p 2383 N93-22602
Integrated oxygen recovery system
[NASA-CR-192343] p 2426 N93-22663
Electronic and ionic transport in processable conducting polymers
[AD-A260223] p 2238 N93-22918
Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
[AD-A260163] p 2240 N93-24073
Electron conducting adducts of water-soluble redox polyelectrolytes and enzymes
[AD-A259938] p 2241 N93-24154
Correlations between the ligand electrochemical parameter, E(sub L)(L) and the Hammett substituent parameter sigma
[AD-A260299] p 2223 N93-24264
Reaction/separation process for enhanced methane conversion
[PB93-150985] p 2246 N93-24634

OXIDE FILMS
Evaluation of ceramic materials for an advanced steam-methane reformer
[DE93-005931] p 2235 N93-22329
Correlations between surface structure and catalytic activity/selectivity
[DE93-005884] p 2217 N93-22423
Substrate surface structure effects on microstructure of epitaxial films
[DE93-005562] p 2504 N93-22944
Ion and electron beam processing of condensed molecular solids to form thin films
[DE93-007273] p 2504 N93-22955
Textured coatings from colloidal suspensions of faceted oxide microcrystals
[DE93-006601] p 2240 N93-24033

OXIDES
The Westinghouse solid oxide fuel cell program: Clean, efficient energy for the future
[DE93-003487] p 2380 N93-23287

OXIDIZERS
Comparison of different synthetic routes for sulfonation of polyaniline
[AD-A259662] p 2222 N93-23658

OXYGEN
The surface interaction of oxygen with a gamma TiAl
[DE93-003847] p 2227 N93-22517
Thermodynamical behaviour of supercritical oxygen in the Hermes spaceplane environmental conditions p 2249 N93-22850
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
[AD-A260181] p 2308 N93-23315
Taguchi methods applied to oxygen-enriched diesel engine experiments
[DE93-004873] p 2317 N93-23976

OXYGEN AFTERGLOW
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
[ONERA-P-1992-3] p 2309 N93-24137

OXYGEN ATOMS
Combustion-related studies using weakly-bonded complexes
[DE93-005250] p 2217 N93-22415
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
[NASA-TM-106021] p 2206 N93-22605
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
[NASA-TM-104748] p 2243 N93-24474

OXYGEN IONS
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere p 2394 N93-23388

OXYGEN ISOTOPES
Orbital tuning of marine sedimentary cores: An automatic procedure based on a general linear model
[MPIM-79] p 2415 N93-23856

OXYGEN PLASMA
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
[DE93-005372] p 2218 N93-22505

OXYGEN SPECTRA
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
[ONERA-P-1992-3] p 2309 N93-24137

OXYGEN SUPPLY EQUIPMENT
Integrated oxygen recovery system
[NASA-CR-192343] p 2426 N93-22663

OXYGEN 18
Comparison of total body water estimates from O-18 and bioelectrical response prediction equations
[NASA-TP-3299] p 2421 N93-23734

OXYGENATION
Use of new oxygenates as gasoline components
[DE93-752864] p 2244 N93-22968

OZONE
NRC Twin Otter operations in the 1991 California ozone deposition experiment
[NRC-LTR-FR-118] p 2383 N93-22472
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
[DE93-002347] p 2384 N93-22972

Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
Global ozone monitoring experiment
p 2364 N93-23793
Scenario development for the northeast United States 500 millibar height field p 2408 N93-23968
Guidelines for estimating and applying rule effectiveness for ozone CO state implementation plan base year inventories
[PB93-131498] p 2389 N93-24163
Simulation of the formation and transport of ozone in the atmospheric boundary layer
[ESA-TT-1243] p 2402 N93-24615

OZONE DEPLETION
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
[DE93-002347] p 2384 N93-22972
NASA's upper atmosphere research satellite: A program to study global ozone change p 2357 N93-23750
Global ozone monitoring experiment
p 2364 N93-23793
Millimeter wave Atmospheric Sounder (MAS)
p 2364 N93-23795
The quasi-biennial oscillation in the middle atmosphere p 2397 N93-23965

OZONOSPHERE
NASA's upper atmosphere research satellite: A program to study global ozone change p 2357 N93-23750

P

P WAVES
Rigorous QCD predictions for decays of P-wave quarkonia
[DE93-004853] p 2481 N93-22744

P-I-N JUNCTIONS
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE93-000050] p 2505 N93-22969
Study of the compatibility of PIN detector circuits and field effect transistors. Extension to high mobility and one dimensional electron gas transitors
[LAAS-92242] p 2283 N93-23863

P-3 AIRCRAFT
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
[AD-A259944] p 2273 N93-24243

PACIFIC OCEAN
Oceanic CO measurements for the WOCE Hydrological Survey in the Pacific Ocean: Shipboard Alkalinity analyses during 1991 and 1992
[DE93-006900] p 2412 N93-22581
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
[PB93-136422] p 2413 N93-22893
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
[NASA-CR-192805] p 2414 N93-23138
A hybrid coupled tropical atmosphere ocean model: Sensitivities and hindcast skill
[MPIM-76] p 2396 N93-23635
NOAA/CMDL atmospheric methane data from shipboard flask sampling
[PB93-136489] p 2389 N93-24226

PACKAGING
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A260051] p 2442 N93-24407

PACKET TRANSMISSION
A current assessment of single site locating technology p 2267 N93-23608

PACKETS (COMMUNICATION)
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193

PAINTS
Conductive paints
[DE93-006511] p 2236 N93-22713

PAIR PRODUCTION
Physics from photon and lepton-pair spectra
[DE93-003083] p 2481 N93-22752

PALEOCLIMATOLOGY
A gas extraction system for the measurement of carbon dioxide and carbon isotopes in polar ice cores
[DE93-005289] p 2412 N93-22225

PALLADIUM
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-105961] p 2231 N93-23418

PANEL METHOD (FLUID DYNAMICS)
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
[NASA-TP-3247] p 2113 N93-24118

PANELS
Automating an orbiter approach to Space Station Freedom to minimize plume impingement
p 2149 N93-22305
Interagency Advanced Power Group Solar Photovoltaic Panel Fall Meeting minutes
[DE93-006188] p 2376 N93-22330
Modeling the heat release rate of aircraft cabin panels
[DOT/FAA/CT-92/3] p 2118 N93-23222
A review of design and manufacturing methodologies for stiffened composite panels used in aircraft
p 2128 N93-23943

PARABOLIC BODIES
Current displacement in parabolic cylinder
[ETN-93-93423] p 2278 N93-22681

PARABOLIC DIFFERENTIAL EQUATIONS
Low altitude acoustic propagation analysis by use of a three-dimensional parabolic wave equation
[ONERA-P-1992-1] p 2477 N93-24190

PARABOLIC FLIGHT
Polyreactions in microgravity environment
p 2251 N93-22859

PARABOLIC REFLECTORS
Current performance and potential improvements in solar thermal industrial heat
[DE93-000048] p 2377 N93-22927
A summary of recent activities at the National Solar Thermal Test Facility
[DE92-040969] p 2379 N93-22967

PARACHUTES
A nonlinear dynamic spherical membrane model
[AD-A259633] p 2112 N93-23654

PARALLAX
Asteroid detection and monitoring using a satellite-borne visible scanner
[AD-A259797] p 2543 N93-23455

PARALLEL COMPUTERS
Activities report 1990: Projects and services of the Research Department
[ETN-93-93692] p 2571 N93-23426
An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
[ETN-93-93703] p 2297 N93-23871
Parallel-vector unsymmetric Eigen-Solver on high performance computers
[NASA-CR-191417] p 2433 N93-24491

PARALLEL PLATES
Ionospheric plasma flow about a system of electrically biased flat plates
[NASA-CR-191119] p 2194 N93-23131

PARALLEL PROCESSING (COMPUTERS)
Contact-impact simulations on massively parallel SIMD supercomputers
[DE93-004188] p 2445 N93-22060
Los Alamos HPDS: High-speed data transfer
[DE93-003804] p 2434 N93-22074
Automated target recognition and tracking using an optical pattern recognition neural network
p 2138 N93-22240
The MSFC space station/space operations mechanism test bed p 2149 N93-22309
Efficiently modeling neural networks on massively parallel computers p 2453 N93-22353
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
[AD-A259293] p 2119 N93-22398
Copper Mountain conference on iterative methods, volume 2
[DE93-004994] p 2466 N93-22405
Data-parallel Langevin dynamics simulations
[DE93-003836] p 2445 N93-22434
Partitioning a chordal graph into transitive subgraphs for parallel sparse triangular solution
[DE93-006614] p 2446 N93-22512
Parallel processor for real-time structural control
[DE93-006284] p 2446 N93-22545
Survey of benchmarks
[NPL-DITC-192/91] p 2436 N93-22816
PMC: A shared short-cut to portable parallel power
[DE93-005815] p 2447 N93-22868
Applications and accuracy of the parallel diagonal dominant algorithm
[NASA-CR-191431] p 2438 N93-23173
Parallel processing research in the former Soviet Union
[PB93-134435] p 2447 N93-23204
Massively parallel implementation of the Penn State/NCAR mesoscale model
[DE93-004874] p 2394 N93-23320
Reducing communication inefficiencies for a flexible programming paradigm
[DE93-005670] p 2438 N93-23327
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
[PB93-142438] p 2439 N93-23436
Asynchronous design for parallel processing architectures
[AD-A259776] p 2448 N93-23453
Neural network methods for analysis of remotely-sensed satellite data p 2353 N93-23566
Design and analysis of scheduling policies for real-time computer systems
[AD-A259806] p 2448 N93-23641
Northeast Parallel Architectures Center (NPAC)
[AD-A259627] p 2448 N93-23653
Investigation of proof techniques within the EVES verification technology
[DREO-FR-92-5451-02] p 2440 N93-23730
Match and move: An approach to data parallel computing
[AD-A259915] p 2449 N93-23999
Parallel-vector unsymmetric Eigen-Solver on high performance computers
[NASA-CR-191417] p 2433 N93-24491

PARALLEL PROGRAMMING
Implementation and performance evaluation of a parallel transitive closure algorithm on PRISMA/DB
[MEMO-INF-92-45] p 2448 N93-23873
Match and move: An approach to data parallel computing
[AD-A259915] p 2449 N93-23999

PARALLELEPIPEDS
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
[NASA-CR-191422] p 2211 N93-23877

PARAMETER IDENTIFICATION
A modal test of a space-truss for structural parameter identification
[DE93-004043] p 2323 N93-22518
Mean levels in nonlinear analysis and identification
[RR-454] p 2525 N93-23378

PARSING ALGORITHMS
Automated program recognition by graph parsing
[AD-A259609] p 2441 N93-24125

PARTIAL DIFFERENTIAL EQUATIONS
Control and analysis of a single-link flexible beam with experimental verification
[DE93-003756] p 2314 N93-23289
The symmetry equation package for REDUCE
[MEMO-1053] p 2469 N93-23866
On the physical boundary conditions in the ocean/bottom acoustic interaction model
[FFI-92/7023] p 2416 N93-24091
Coverings and nonlocal symmetries
[MEMO-1057] p 2470 N93-24109
An analytical study of some problems in partial differential equations with applications to fluid dynamics and wave propagation
[AD-A260351] p 2470 N93-24169
Feature-oriented signal processing under nonlinear partial differential equations
[AD-A259951] p 2470 N93-24245
Analytical results for the electromagnetic response of a composite superconducting wire in parallel fields
[MEMO-1059] p 2287 N93-24625

PARTIAL PRESSURE
Measurements of surface ocean carbon dioxide partial pressure during WOCE
[DE93-006890] p 2412 N93-22580
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue
p 2164 N93-24394

PARTICLE ACCELERATION
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere
p 2394 N93-23388
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921

PARTICLE ACCELERATORS
Chaotic dynamics in accelerator physics
[DE93-004600] p 2515 N93-22766
Analysis and correction of noise on electronic circuits in an accelerator environment
[DE93-004816] p 2280 N93-23319

PARTICLE BEAMS
Active microparticle media
[AD-A259722] p 2487 N93-23639

PARTICLE COLLISIONS
Search for exotic particles at CDF
[DE93-004421] p 2480 N93-22687
A study of four-jet events and search for double parton interactions at square root of s = 1.8 TeV
[DE93-005973] p 2480 N93-22693
Inclusive J/psi, psi(2S) and b-quark production in (-p)p collisions at square root of s - 1.8 TeV
[DE93-004739] p 2481 N93-22739

Electron-electron interactions in fast neutral-neutral collisions
[DE93-004841] p 2481 N93-22743

PARTICLE DIFFUSION
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
[DE93-006816] p 2480 N93-22714
Alpha effects on TAE modes and alpha transport
[DE93-004160] p 2494 N93-22940
A transmission/escape probabilities model for neutral particle transport in the outer regions of a diverted tokamak
[DE93-006550] p 2497 N93-24045

PARTICLE ENERGY
H(-) beam neutralization measurements in a solenoidal beam transport system
[DE93-005460] p 2481 N93-22908
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
[AD-A259781] p 2557 N93-23973

PARTICLE FLUX DENSITY
Determination of the optical properties of particles for solar heated fluidized beds
[DLR-FB-92-15] p 2490 N93-24641

PARTICLE INTERACTIONS
A study of four-jet events and search for double parton interactions at square root of s = 1.8 TeV
[DE93-005973] p 2480 N93-22693
Inclusive J/psi, psi(2S) and b-quark production in (-p)p collisions at square root of s - 1.8 TeV
[DE93-004739] p 2481 N93-22739
Particle physics
[DE93-006894] p 2482 N93-22992
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
[AD-A259781] p 2557 N93-23973

PARTICLE MASS
Direct searches for neutrino mass
[DE93-003867] p 2479 N93-22068

PARTICLE MOTION
Motion of charged particles in pulsar magnetospheres
p 2550 N93-24161
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

PARTICLE PRODUCTION
Color sextet quarks and new high-energy interactions
[DE93-004187] p 2478 N93-22059
New approach to the interaction of cosmic rays with nuclei in spacecraft shielding and the human body
[DE93-006263] p 2559 N93-22544
Inclusive J/psi, psi(2S) and b-quark production in (-p)p collisions at square root of s - 1.8 TeV
[DE93-004739] p 2481 N93-22739

PARTICLE SIZE DISTRIBUTION
Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351

PARTICLE SPIN
Overview of spin physics
[DE93-006412] p 2483 N93-24029

PARTICLE THEORY
Charm physics at Fermilab E791
[DE93-006020] p 2480 N93-22543
Theoretical studies in elementary particle physics
[DE93-005923] p 2481 N93-22883
Investigations in dynamics of gauge theories in theoretical particle physics
[DE93-007260] p 2484 N93-24448

PARTICLE TRAJECTORIES
Simple optics description of the plasma sheath and plasma electrode region
[DE93-004851] p 2491 N93-22224

PARTICLES
Atmospheric transmission of polar meteorites
[ESA-TT-1283] p 2547 N93-23206

PARTICULATES
Development of size-specific data from particulate control technology research reports
[PB93-131456] p 2384 N93-22922
Development of the nested fiber filter
[DE93-005015] p 2315 N93-23322
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates
p 2395 N93-23493
The determination of particulate contamination in miniature ball bearings
[DE93-006261] p 2316 N93-23675

PARTITIONS (MATHEMATICS)
Bipartitioning of LOTOS specifications
[MEMO-INF-92-50] p 2439 N93-23359
A self growing binary tree neural network for the identification of multiclass systems
[RR-451] p 2459 N93-23362
A novel recursive partitioning criterion
[AD-A259921] p 2464 N93-24564

PARTONS
A study of four-jet events and search for double parton interactions at square root of s = 1.8 TeV
[DE93-005973] p 2480 N93-22693

PASCAL (PROGRAMMING LANGUAGE)
PASCAL subroutines for standard test problems in unconstrained minimization
[MATHS-REPT-A-155] p 2441 N93-24076

PASSENGER AIRCRAFT
Review of aeronautical fatigue investigation activities developed in Aeritalia-GAT during the period May 1987 - April 1989
[ETN-93-93702] p 2126 N93-23401
MD-11: When appearances deceive
[ETN-93-93695] p 2126 N93-23416
Aircraft fire protection system
[CA-PATENT-1-296-970] p 2118 N93-24592

PASSIVITY
Advanced dielectrics for passivation of InSb
[DE93-005353] p 2501 N93-22503

PATCH TESTS
Patch testing of ceramic barrier filters
[DE93-005017] p 2315 N93-23294

PATENTS
Center for Space Microelectronics Technology
[NASA-CR-192799] p 2279 N93-22812

PATTERN RECOGNITION
Knowledge From Pictures (KFP) p 2465 N93-22187
Possibilistic clustering for shape recognition
p 2450 N93-22208
The 3-D image recognition based on fuzzy neural network technology p 2450 N93-22210
Determining the number of hidden units in multi-layer perceptrons using F-ratios p 2451 N93-22214
Adaptive fuzzy system for 3-D vision
p 2451 N93-22216
Automated target recognition and tracking using an optical pattern recognition neural network
p 2138 N93-22240
Photonic correlator pattern recognition: Application to autonomous docking p 2148 N93-22303
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315
On using scattering statistics for ultra wideband electromagnetic target classification and identification
[DE93-003809] p 2260 N93-22433
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE93-006504] p 2480 N93-22712
Complex principal oscillation pattern analysis
[MPIM-86] p 2468 N93-23061
Knowledge-based vision techniques for the autonomous land vehicle program
[AD-A259801] p 2459 N93-23457
Localization and positioning using combinations of model views
[AD-A259734] p 2460 N93-23472
3D pose from 3 corresponding points under weak-perspective projection
[AD-A259737] p 2460 N93-23473
3D object recognition: Symmetry and virtual views
[AD-A259738] p 2460 N93-23474
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems
p 2349 N93-23546
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data
p 2350 N93-23552
Extraction of information from satellite imagery to a GIS for environmental monitoring of the mining areas in northeastern Estonia p 2352 N93-23560
Integration of digital image matching and multi image shape from shading p 2354 N93-23575
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm
p 2354 N93-23576
The creation of a DEM from SPOT data
p 2355 N93-23582
Feature detection using ERS-1 SAR data
p 2356 N93-23586
Automatic feature extraction and localization using data fusion of radar and infrared images
p 2270 N93-23628
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
[AD-A259711] p 2440 N93-23638
Recognizing 3D objects for 2D images: An error analysis
[AD-A260150] p 2469 N93-23707
Three dimensional object recognition using an unsupervised neural network: Understanding the distinguishing features
[AD-A260048] p 2461 N93-23712
Normal modes of the atmosphere as estimated by principal oscillation patterns and derived from quasi-geostrophic theory
[MPIM-81] p 2397 N93-23857
Planning multiple observations for object recognition
[AD-A259879] p 2440 N93-23959
Representation and recognition of free-form surfaces
[AD-A259883] p 2441 N93-24019
One-class classifier networks for target recognition applications
[DE93-006288] p 2271 N93-24043
Face recognition with neural networks
[AD-A259587] p 2462 N93-24066
Perception/action: An holistic approach
[AD-A259597] p 2428 N93-24067
Space efficient 3D model indexing
[AD-A259571] p 2462 N93-24085
Visualization of gravity wave data by Iris Explorer (a computer program)
[FFI-92/7022] p 2399 N93-24090
Distance metric between 3D models and 2D images for recognition and classification
[AD-A260069] p 2463 N93-24313
Analytical representation of contours
[AD-A260151] p 2471 N93-24415
Computer based analysis and synthesis of retinal function
[AD-A260514] p 2423 N93-24420
Control of two- and three-dimensional wake instabilities from bluff-bodies
[AD-A260410] p 2299 N93-24428
Shape-contour recognition using moment invariants
[ISBN-0-315-61036-0] p 2444 N93-24624

PAVEMENTS
Geogrid reinforced base courses for flexible pavements for light aircraft: Test section construction, behavior under traffic, laboratory tests, and design criteria
[DOT/FAA/RD-92/25] p 2134 N93-23128
Test requirements for coal-tar mixtures on airport pavements
[DOT/FAA/RD-92-27] p 2134 N93-23137

PAYLOAD CONTROL
Payload operations for precursor mission E-1
p 2155 N93-24342
The refined decentralized concept and development support p 2162 N93-24378
Payload operations p 2163 N93-24384

PAYLOAD DELIVERY (STS)
Space transportation: The content and uses of Shuttle cost estimates. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-93-115] p 2531 N93-23097

PAYLOAD DEPLOYMENT & RETRIEVAL SYSTEM
Attached payload issues p 2163 N93-24388

PAYLOAD INTEGRATION
Introduction to Space Station Freedom
p 2182 N93-22608
How to get on board Space Station Freedom
p 2183 N93-22611
WP-2 attached payload accommodations
p 2190 N93-22641
The role of the APM centre to support Columbus precursor flights p 2156 N93-24344
COMPASS: A computerized payload operations support system for Columbus p 2161 N93-24377
The refined decentralized concept and development support p 2162 N93-24378

PAYLOADS
Laser docking sensor engineering model
p 2139 N93-22247
Thruster configurations for maneuvering heavy payloads p 2150 N93-22313
Employing lighting techniques during on-orbit operations p 2151 N93-22319
A reactor-pumped laser as primary power for nuclear rocket engines
[DE93-005342] p 2203 N93-22501
Advanced communications technology satellite high burst rate link evaluation terminal communication protocol software user's guide, version 1.0
[NASA-CR-189162] p 2437 N93-23134
GEOTAIL Spacecraft historical data report
[NASA-TM-108710] p 2194 N93-23168
The Eureca concept and missions
p 2156 N93-24343
The effect of missions and payload performance on the configuration of an orbital injection system design
p 2156 N93-24349
COMPASS: A computerized payload operations support system for Columbus p 2161 N93-24377
Payload operations p 2163 N93-24384
Reusable reentry satellite system specification. Volume 1-9
[NASA-CR-192969] p 2196 N93-24543

PEARLITE
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
[DE93-007670] p 2229 N93-22912
PELLETS
Electron-beam rocket acceleration of hydrogen pellets
[DE93-002822] p 2171 N93-23685
PENETRATION
GTAW penetration based on electrode tip location versus weld joint center line
[DE93-004910] p 2311 N93-22494
Studies in penetration mechanics
[AD-A260436] p 2332 N93-24304
Penetration mechanics research in the former Soviet Union
[PB93-146488] p 2259 N93-24495
PENETROMETERS
Horizontal stress in-situ by cone penetrometers and related studies
[AD-A260503] p 2401 N93-24418
PENNSYLVANIA
Small business profiles, 1992. Region 3: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
[PB93-110948] p 2520 N93-24157
PEPTIDES
Photoinduced electron transfer in ordered polymers
[DE93-006784] p 2237 N93-22889
PERCOLATION
Experimental studies of critical behavior of systems with quenched disorder
[DE93-005090] p 2228 N93-22717
PERFLUORO COMPOUNDS
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
[NASA-TM-106014] p 2236 N93-22560
PERFORATING
Inward electrostatic precipitation of interplanetary particles
[NASA-CR-192786] p 2552 N93-24477
PERFORMANCE PREDICTION
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
[NASA-CR-192456] p 2203 N93-22963
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
[ACTA-POL-SCAND-EL-69] p 2264 N93-23367
Performance prediction of relational database management systems
[ISBN-0-315-69232-4] p 2526 N93-23383
PERFORMANCE TESTS
Contact dynamics testing of automated three point docking mechanism p 2149 N93-22306
Thin silicon solar cells
[DE93-007420] p 2376 N93-22532
The ANL Electrochemical Program for DOE on electric vehicle R/D
[DE93-005690] p 2279 N93-22689
Development of a 100 kW class plasma torch for ash-melting plasma furnaces
[DE93-754079] p 2493 N93-22715
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784
Safety and performance of a long life lithium-thionyl chloride battery
[DE93-005348] p 2279 N93-22821
Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841
First results of a Freon 12 capillary pumped loop p 2249 N93-22846
A summary of recent activities at the National Solar Thermal Test Facility
[DE92-040969] p 2379 N93-22967
Design of gasifiers to optimize fuel cell systems
[DE93-000219] p 2379 N93-23049
Icing cloud simulator for use in helicopter engine induction system ice protection testing
[DOT/FAA/CT-TN92/43] p 2133 N93-23087
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel
[NASA-TM-103920] p 2134 N93-23420
Solar pumping: An introduction and update on the technology, performance, costs, and economics
[WORLD BANK TP-168] p 2381 N93-23444
Technical management and test procedures for AustroMir-1991 p 2158 N93-24357
Variable speed gas engine-driven air compressor system
[PB93-147353] p 2319 N93-24561
PERIODIC FUNCTIONS
The WG sequences: Quasi perfect binary sequences p 2271 N93-23631
PERIODIC VARIATIONS
Experimental studies of instabilities in radially imploding plasmas
[DE93-003831] p 2492 N93-22427
An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
[ORAE-R107] p 2133 N93-23114
The x ray transient GS2023+338: The 0(sup d).24 and 6(sup d).5 modulations p 2536 N93-23901
PERIODICALS
Beyond interlibrary loan state-of-the-art article retrieval
[DE93-004425] p 2523 N93-22723
PERMAFROST
An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
[ORAE-R107] p 2133 N93-23114
PERMEABILITY
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
[DE93-005883] p 2235 N93-22422
Tritium permeation model for plasma facing components
[DE93-007044] p 2499 N93-24465
Gas separations using ceramic membranes
[DE93-003204] p 2225 N93-24498
PERMITTIVITY
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
[NASA-CR-191089] p 2277 N93-22479
Dielectric for the supercapacitors
[AD-A260124] p 2283 N93-24072
A simple model for the dielectric behaviour of polar solvents in the mean spherical approximation
[AD-A260283] p 2483 N93-24261
PERMUTATIONS
Inverting sets and the packing problem
[DE93-003822] p 2466 N93-22075
Partitioning a chordal graph into transitive subgraphs for parallel sparse triangular solution
[DE93-006614] p 2446 N93-22512
PERSIAN GULF
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
[AD-A260363] p 2409 N93-24239
PERSONAL COMPUTERS
The Data Egg: A new solution to text entry barriers p 2530 N93-22192
Aircraft engine reliability analysis using lower confidence limit estimate procedures
[AD-A260386] p 2131 N93-24271
DataMir: A PC-based computer system for application at Space Station Mir p 2158 N93-24358
PERSONALITY
The five-factor personality model and naval aviation candidates
[AD-A260227] p 2425 N93-24319
PERSONALITY TESTS
International application of the DLR test-system: Continuation of the cooperation with Iberia in pilot selection
[DLR-FB-92-12] p 2425 N93-24104
The five-factor personality model and naval aviation candidates
[AD-A260227] p 2425 N93-24319
PERSONNEL
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
[NASA-TM-101641] p 2180 N93-24522
PERSONNEL DEVELOPMENT
FY 1991 safety program status report
[NASA-TM-108707] p 2257 N93-23136
PERSONNEL SELECTION
Stress resistance as a diagnostic category in air traffic controller selection
[DLR-FB-92-13] p 2422 N93-24092
The five-factor personality model and naval aviation candidates
[AD-A260227] p 2425 N93-24319
Selection of astronauts for European space missions p 2156 N93-24345
The European astronauts training programme p 2156 N93-24346
PERTURBATION
Experimental studies of instabilities in radially imploding plasmas
[DE93-003831] p 2492 N93-22427
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
[NASA-CR-4503] p 2466 N93-22672
Large scale control and distributed computing systems under stochastic structural perturbations
[AD-A260501] p 2447 N93-22933
Probabilistic finite elements for fatigue and fracture analysis
[NASA-CR-191098] p 2326 N93-23053
A multiple scales approach to sound generation by vibrating bodies
[NASA-CR-191414] p 2294 N93-23409
The three-dimensional evolution of a plane mixing layer. Part 2: Pairing and transition to turbulence
[NASA-TM-103926] p 2294 N93-23417
Computation of nonlinear optical scattering by droplets
[AD-A260333] p 2490 N93-24267
PERTURBATION THEORY
A structural study of charge-density-wave perturbations in mixed-halide MX solids
[DE93-005449] p 2503 N93-22747
A mechanism for capture into resonance
[PB93-145761] p 2469 N93-23648
PETRI NETS
Multispectral intelligent fusion techniques p 2352 N93-23564
Performance and state-space analyses of systems using Petri nets
[NASA-CR-193195] p 2443 N93-24604
Petri net controllers for distributed robotic systems
[NASA-CR-193196] p 2320 N93-24658
PH
Sol-gel/rhodamine 6G composite films with tailored microstructures
[DE93-005364] p 2208 N93-22504
PH FACTOR
Electronic control of pH at sulfonated polyaniline electrodes
[AD-A260074] p 2222 N93-23963
Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
[AD-A260163] p 2240 N93-24073
PHARMACOLOGY
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change p 2191 N93-22648
PHASE CHANGE MATERIALS
Applications of fibrous substrates containing insolubilized phase change polymers p 2320 N93-22181
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
[NASA-CR-192697] p 2511 N93-24146
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 2
[NASA-CR-192698] p 2511 N93-24147
PHASE COHERENCE
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
PHASE CONJUGATION
Active microparticle media
[AD-A259722] p 2487 N93-23639
Novel optical processor for phased array antenna
[AD-A260474] p 2273 N93-24277
Semiconductor laser with a self-pumped phase conjugate external cavity
[AD-A260028] p 2310 N93-24323
PHASE DIAGRAMS
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
[DE93-004445] p 2503 N93-22726
The influence of gravity on the equilibrium and the growth of tenuous structures p 2249 N93-22851
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864
PHASE LOCKED SYSTEMS
Taming chaotic circuits
[AD-A259495] p 2439 N93-23449
PHASE SEPARATION (MATERIALS)
Phase separation under a weak concentration gradient p 2226 N93-22853
PHASE SHIFT
Photon acceleration via laser-produced ionization fronts
[DE93-005205] p 2480 N93-22719
Structure and utility of blind speed intervals associated with Doppler measurements of range rate
[DOT/FAA/CT-TN92/27] p 2122 N93-23063
Fiber optic interferometer configuration with pump-induced phase carrier
[AD-D015617] p 2489 N93-24156
PHASE SHIFT CIRCUITS
Analysis of MMIC arrays for use in the ACTS Aero Experiment
[NASA-TM-106073] p 2180 N93-22589
PHASE SHIFT KEYING
Adaptive predistortion linearization of nonlinear power amplifiers
[ISBN-0-315-60483-2] p 2286 N93-24611

PHASE TRANSFORMATIONS
Pretransformation strain modulations in proper ferroelastics
[DE93-005468] p 2226 N93-22340
Synchrotron studies of narrow band materials
[DE93-006981] p 2502 N93-22526
Aerosol phase transformation in the atmosphere
[DE93-001903] p 2384 N93-22936
Thermodynamically-consistent phase-field models for solidification
[PB93-139012] p 2515 N93-24005
Analysis of residual phases in nickel aluminide powders produced by reaction synthesis
[DE93-005680] p 2233 N93-24014
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
[DE93-004716] p 2330 N93-24051
Sequential deposition of copper on solid gold (111): A statistical model
[AD-A260269] p 2234 N93-24233
Phase transitions at the fluid-solid interface in a model for the adsorption of hard spheres
[AD-A260304] p 2223 N93-24235
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
[AD-A260309] p 2234 N93-24237
Phase stability and electronic structure of transition-metal aluminides
[DE93-003584] p 2234 N93-24499

PHASED ARRAYS
Data selection for fast projection techniques: A comparative study of direction finding performance
[AD-A259916] p 2262 N93-22814
Novel optical processor for phased array antenna
[AD-A260474] p 2273 N93-24277

PHENOMENOLOGY
Rigorous QCD predictions for decays of P-wave quarkonia
[DE93-004853] p 2481 N93-22744

PHILIPPINES
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811

PHOSPHATES
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
[AD-A259889] p 2242 N93-24321
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
[ECL-91-21] p 2225 N93-24623

PHOSPHORIC ACID FUEL CELLS
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
[DE92-001290] p 2378 N93-22934

PHOSPHORS
Nonintrusive temperature measurements on advanced turbomachinery components
[DE93-005478] p 2302 N93-22326

PHOSPHORUS
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
[AD-A259889] p 2242 N93-24321

PHOTOABSORPTION
Optical studies of laterally confined quantum well structures grown on ex-situ and in-situ patterned substrates
[AD-A260275] p 2511 N93-24167
Photoabsorption and photodissociation of molecules important in the interstellar medium
[NASA-CR-192829] p 2552 N93-24488

PHOTOACOUSTIC SPECTROSCOPY
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates p 2395 N93-23493

PHOTOCATHODES
Observation of a charge limit for photocathode electron guns
[DE93-006948] p 2485 N93-24464

PHOTOCHEMICAL REACTIONS
Photochemical observation of ion flows in membrane channels
[AD-A259869] p 2219 N93-22731
Photoinduced electron transfer in ordered polymers
[DE93-006784] p 2237 N93-22889
Chemical kinetics and photochemical data for use in stratospheric modeling
[NASA-CR-192795] p 2392 N93-23124
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products
[PB93-131449] p 2385 N93-23267
Chlorotrifluoroethylene decay in the atmosphere: Controlled-environment chamber studies
[AD-A259902] p 2388 N93-23989

PHOTODIODES
High power diode pumped solid state lasers
[DE93-005818] p 2307 N93-22691

PHOTODISSOCIATION
Laser excitation and chemi-ionization of combustion species
[AD-A260120] p 2224 N93-24414
Photoabsorption and photodissociation of molecules important in the interstellar medium
[NASA-CR-192829] p 2552 N93-24488

PHOTOELASTICITY
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials p 2214 N93-24181

PHOTOELECTRIC EMISSION
Electronic structure studies of YBa2Cu3O(x)(6.2 less than equal to x less than or equal to 6.9) using angle resolved photoemission
[DE93-004811] p 2501 N93-22493

PHOTOELECTRICITY
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
[DE93-006411] p 2419 N93-24028

PHOTOELECTRON SPECTROSCOPY
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
[NASA-TM-106014] p 2236 N93-22560
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A259616] p 2510 N93-24126

PHOTOENGRAVING
Preparation of permanent photowritten optical diffraction gratings in irradiated glasses
[AD-D015623] p 2241 N93-24257

PHOTOGRAMMETRY
Image interpretation for landforms using expert systems and terrain analysis p 2342 N93-23213
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data p 2350 N93-23552
A Digital Landscape Model for Europe (DLME) p 2351 N93-23554
Integration of digital image matching and multi image shape from shading p 2354 N93-23575
Studies on dynamism in photogrammetry p 2374 N93-24122

PHOTOGRAPHIC MEASUREMENT
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590

PHOTOGRAPHS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
[NASA-TM-107558] p 2178 N93-22669
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53
[NASA-TM-107556] p 2179 N93-23085

PHOTOINTERPRETATION
Image interpretation for landforms using expert systems and terrain analysis p 2342 N93-23213
Mapping from SPOT data p 2349 N93-23544
Remote sensing and land use in the region of Tuscany (Italy). A new methodology for the integration of very heterogeneous data p 2353 N93-23567

PHOTOIONIZATION
Photon acceleration via laser-produced ionization fronts
[DE93-005205] p 2480 N93-22719
Monte Carlo modeling of solid-state photoswitches
[DE93-005829] p 2280 N93-22999
Studies of the formation chemical reactivity and properties of small clusters application to an understanding of aerosol formation and heterogeneous chemistry
[DE93-005920] p 2221 N93-23309
The formation of enhanced, low-ionization emission in galactic halos p 2551 N93-24180
Aspects of photoionization of impurities and electron transfer in ionic crystals
[DE93-008544] p 2513 N93-24511

PHOTOLUMINESCENCE
Luminescence and picosecond photo-induced absorption of polyaniline
[AD-A260002] p 2242 N93-24436
Ion beam mixing in multi-quantum well structures
[AD-A259772] p 2516 N93-24509

PHOTOLYSIS
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
[PB93-132702] p 2222 N93-23347

PHOTOMAPPING
Calibration, navigation, and registration of MAMS data for FIFE
[NASA-CR-108397] p 2342 N93-22699

PHOTONS
Photon acceleration via laser-produced ionization fronts
[DE93-005205] p 2480 N93-22719
Physics from photon and lepton-pair spectra
[DE93-003083] p 2481 N93-22752
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
[DE93-005457] p 2482 N93-23244
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
[AD-A260525] p 2241 N93-24201

PHOTOPRODUCTION
Particle physics
[DE93-006894] p 2482 N93-22992

PHOTOSPHERE
The source of five-minute period photospheric umbral oscillations p 2548 N93-23214
Environmental conditions responsible for solar activity
[AD-A259703] p 2557 N93-23664
ORFEUS: Scientific targets and optical performance p 2537 N93-23905

PHOTOSYNTHESIS
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
The implications of concurrent increases in temperature and CO2 concentration for terrestrial C3 photosynthesis
[DE93-005590] p 2385 N93-23035

PHOTOTHERMAL CONVERSION
A review of the experience gained in 10 years operation of Gould's solar industrial process heat system
[DE93-003991] p 2381 N93-23970

PHOTOTRANSISTORS
GaAs-based optoelectronic neurons
[NASA-CASE-NPO-18497-1-CU] p 2464 N93-24599

PHOTOVOLTAIC CELLS
Photovoltaic evaluation study
[DE93-761330] p 2378 N93-22956

PHOTOVOLTAIC CONVERSION
Interagency Advanced Power Group Solar Photovoltaic Panel Fall Meeting minutes
[DE93-006188] p 2376 N93-22330
Battery compatibility with photovoltaic charge controllers
[DE93-005373] p 2377 N93-22537
Photovoltaic evaluation study
[DE93-761330] p 2378 N93-22956
Monolithic, series connected GaAs photovoltaic power converters for optoelectronic component applications
[DE93-004385] p 2380 N93-23293
Photovoltaics Performance and Reliability Workshop
[DE93-000017] p 2380 N93-23303
Evaluation of solar radiation measurement systems: EPRI/NREL
[DE93-000020] p 2380 N93-23304

PHYSICAL CHEMISTRY
Atmospheric chemistry and physical fate of HCFCs and HFCs and their degradation products
[PB93-131449] p 2385 N93-23267
Crystal chemistry of ceramic/mineral systems
[AD-A260440] p 2241 N93-24193
Gravity-related phenomena in materials science p 2161 N93-24372

PHYSICAL EXERCISE
Two techniques for measuring locomotion impact forces during zero G
[NASA-TP-3305] p 2421 N93-23410
AFTERRISE: Deep body temperature following exercise
[AD-A259887] p 2421 N93-23984

PHYSICAL PROPERTIES
Copper/solder intermetallic growth studies
[AD-A259856] p 2232 N93-23955

PHYSICS
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642

PHYSIOLOGICAL EFFECTS
Research opportunities with the Centrifuge Facility p 2187 N93-22627
Task Analysis of Shuttle Entry and Landing Activities
[NASA-TM-104761] p 2178 N93-22702
Micromotional studies of utricular and canal afferents
[NASA-CR-192703] p 2417 N93-22800
Orbiter Autoland reliability analysis
[NASA-TM-4464] p 2194 N93-23139
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
[AD-A259909] p 2427 N93-23995
Physiological experiments within the project AustroMir p 2157 N93-24354
Influence of microgravity on immune system and genetic information p 2160 N93-24370
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2165 N93-24398

PHYSIOLOGICAL RESPONSES
Cytokines and immune surveillance in humans
[NASA-CR-192728] p 2447 N93-22828
Measuring variation in ecosystem sensitivity to stress
[AD-A259521] p 2387 N93-23450
A demonstration of motion base design alternatives for the National Advanced Driving Simulator
[NASA-TM-103881] p 2428 N93-24490
PHYSIOLOGICAL TESTS
International application of the DLR test-system: Continuation of the cooperation with Iberia in pilot selection
[DLR-FB-92-12] p 2425 N93-24104
PHYSIOLOGY
Improved inhalation technology for setting safe exposure levels for workplace chemicals p 2423 N93-22164
A modular, programmable measurement system for physiological and spaceflight applications p 2305 N93-22201
Bibliography of the Biosciences Division: 1986 to present
[DCIEM-92-20] p 2419 N93-23343
A linear, time-varying simulation of the respiratory tract system
[DE93-004515] p 2421 N93-24009
Columbus payload requirements in human physiology p 2163 N93-24386
PHYTOPLANKTON
The environmental biogeochemistry of open ocean and partially enclosed marine systems p 2413 N93-23130
PICOSECOND PULSES
New analysis of KrF picosecond pulse experiment
[DE93-003805] p 2308 N93-23290
Active microparticle media
[AD-A259722] p 2487 N93-23639
PIEZOELECTRIC CERAMICS
Well-posedness of a model for structural acoustic coupling in a cavity enclosed by a thin cylindrical shell
[NASA-CR-191439] p 2473 N93-22878
Accurate evaluation of the real and imaginary material constants for a piezoelectric resonator in the radial mode
[DREA-CR-91-451] p 2508 N93-23727
PIEZOELECTRIC TRANSDUCERS
Acoustic emission of structural materials exposed to open flames
[PB93-138980] p 2477 N93-23951
Calibration of a standard transducer using a laser interferometer (TTCP calibration round-robin)
[NRC-34387] p 2305 N93-24289
PIEZOELECTRICITY
Surface acoustic wave sensors and piezoelectric actuators for investigations of transitional and turbulent flows
[AD-A260482] p 2290 N93-22932
Attenuation of empennage buffet response through active control of damping using piezoelectric material
[NASA-TM-107736] p 2110 N93-23034
Gas source molecular beam epitaxial growth of GaN
[AD-A260524] p 2512 N93-24199
PILOT PERFORMANCE
Concepts for conformal and body-axis attitude information for spatial awareness presented in a helmet-mounted display
[NASA-TM-4438] p 2129 N93-23408
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
[AD-A259909] p 2427 N93-23995
Attention factors associated with head-up display and helmet-mounted display systems
[AD-A260204] p 2427 N93-24001
Attitude awareness enhancements for the F-16 head-up display
[AD-A260280] p 2428 N93-24168
PILOT SELECTION
International application of the DLR test-system: Continuation of the cooperation with Iberia in pilot selection
[DLR-FB-92-12] p 2425 N93-24104
The five-factor personality model and naval aviation candidates
[AD-A260227] p 2425 N93-24319
PILOT TRAINING
Attention factors associated with head-up display and helmet-mounted display systems
[AD-A260204] p 2427 N93-24001
PILOTLESS AIRCRAFT
Fuzzy control of an unmanned helicopter p 2455 N93-22366
A teleoperated unmanned rotorcraft flight test technique p 2132 N93-22369
Microwave-powered aircraft
[CA-PATENT-1-295-019] p 2128 N93-24591
PILOTS (PERSONNEL)
Tobacco and health of the pilot
[ETN-93-93693] p 2421 N93-23414
PINHOLE CAMERAS
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
PINNING
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
[DE93-004854] p 2503 N93-22745
PION BEAMS
Physics opportunities with higher energy pion beams
[DE93-006678] p 2480 N93-22585
PIONEER VENUS SPACECRAFT
SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-192273] p 2554 N93-23096
PIONS
Meson form-factors and wave-functions with Wilson fermions
[DE93-003859] p 2479 N93-22542
Physics opportunities with higher energy pion beams
[DE93-006678] p 2480 N93-22585
Experimental studies of pion-nucleus interactions at intermediate energies
[DE93-005872] p 2482 N93-23308
PIPE FLOW
An investigation of particle turbulence quantities in a dense two-phase pipe flow, using laser Doppler velocimetry p 2295 N93-23496
PIPELINES
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
[AD-A258453] p 2233 N93-23982
PIPER AIRCRAFT
The consequence of joint failures p 2212 N93-23941
PIPES (TUBES)
Pipe crawler development for duct elbow removal
[DE93-002169] p 2313 N93-22892
J-integral of circumferential crack in large diameter pipes
[DE93-003708] p 2326 N93-23050
Pyroelectric anemometers and kinetic calorimeters
[PB93-141919] p 2303 N93-23230
Chaotic vibrations of tubes with nonlinear supports in crossflow
[DE93-004247] p 2329 N93-23689
Basic research on macromolecular dynamics
[PB93-138907] p 2240 N93-24142
PISTON ENGINES
Dynamic analysis of Free-Piston Stirling Engine/Linear Alternator-load system-experimentally validated
[NASA-TM-106034] p 2473 N93-22559
PITCHING MOMENTS
An experimental study of the aerodynamics of a NACA0012 airfoil with a simulated glaze ice accretion, volume 2
[NASA-CR-191007] p 2109 N93-22823
PLANAR STRUCTURES
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
[NASA-TM-106057] p 2283 N93-23743
Projective structure from two uncalibrated images: Structure from motion and recognition
[AD-A260102] p 2470 N93-24056
PLANE STRAIN
A higher-order direct boundary integral-displacement discontinuity method for fracture propagation in layered elastic media p 2330 N93-23988
PLANE WAVES
On colliding plane gravitational waves coupled with fluid motions
[MATHS-REPT-A-161] p 2398 N93-24060
The acoustical impedance at the junction of non-coaxial cylindrical ducts
[MATHS-REPT-A-157] p 2477 N93-24123
The single-gap hollow spherical dipole in non-conducting media
[AD-A260017] p 2273 N93-24460
PLANETARIUMS
The role of planetariums in promoting space sciences p 2170 N93-23827
PLANETARY ATMOSPHERES
Gas-Grain Simulation Facility (GGSF) p 2186 N93-22626
Space exploration of planetary and satellite atmospheres p 2535 N93-23890
Thermal convection in rotating systems and the band structure of the major planets p 2164 N93-24393
PLANETARY BOUNDARY LAYER
Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
[DE93-002164] p 2402 N93-22337
User's guide to the Penn State/NCAR Mesoscale Modeling System
[PB93-126654] p 2391 N93-22380
PLANETARY COMPOSITION
Lunar science measurements and instruments for resource characterization
[DE93-005436] p 2553 N93-22905
SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-192273] p 2554 N93-23096
PLANETARY EVOLUTION
Studies of extra-solar OORT clouds and the Kuiper disk
[NASA-CR-192759] p 2555 N93-22476
PLANETARY GEOLOGY
Workshop on chemical weathering on Mars, part 2
[NASA-CR-192261] p 2554 N93-23192
PLANETARY IONOSPHERES
A modified flow/field model of the solar wind interaction with Mars p 2556 N93-23216
PLANETARY MAGNETIC FIELDS
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403
PLANETARY MAGNETOSPHERES
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403
PLANETARY MAGNETOTAILS
Report of the working group on magnetotail/plasma sheet structure
[DE93-003857] p 2391 N93-22077
PLANETARY NEBULAE
The radiation gasdynamics of planetary nebulae p 2547 N93-23133
PLANETARY SURFACES
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949
PLANETARY SYSTEMS
Studies of extra-solar OORT clouds and the Kuiper disk
[NASA-CR-192759] p 2555 N93-22476
PLANETARY TEMPERATURE
Possible power sources for the Jovian polar infrared hot spots p 2554 N93-23221
PLANETARY WAVES
Modeling of forced planetary waves in the Mars atmosphere p 2555 N93-24579
PLANETOLOGY
Reports of planetary astronomy - 1991
[NASA-TM-4459] p 2542 N93-23055
Space exploration of planetary and satellite atmospheres p 2535 N93-23890
PLANETS
Reports of planetary astronomy - 1991
[NASA-TM-4459] p 2542 N93-23055
The German space science programme p 2536 N93-23903
Carlsberg meridian catalogue La Palma (Spain). Number 6: Observations of positions of stars and planets 1990
[ISBN-84-7469-052-8] p 2543 N93-24059
PLANNING
An environmental rating for heat pump equipment
[DE93-004526] p 2379 N93-22983
A European radionavigation plan? p 2124 N93-23513
PLANT ROOTS
Gravity and root morphogenesis p 2166 N93-24403
PLANTS (BOTANY)
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
[DE93-006091] p 2386 N93-23301
Development of Arabidopsis thaliana grown under microgravity conditions p 2166 N93-24404
Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
[OEFZS-4632] p 2375 N93-24456
PLASMA ACCELERATION
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921
PLASMA ACCELERATORS
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
[DE93-005833] p 2493 N93-22779
PLASMA COMPRESSION
Plasma focus p 2496 N93-23264
PLASMA CONTROL
The University of Wisconsin-Madison Torsatron/Stellarator Laboratory program
[DE93-005922] p 2492 N93-22419
High beta effects and nonlinear evolution of the TAE instability
[DE93-004170] p 2492 N93-22522
Anomalous transport modelling of tokamak plasmas
[DE93-006160] p 2493 N93-22764

Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
[DE93-005831] p 2493 N93-22869
Applications of divertor biasing to the next generation tokamaks
[DE93-005848] p 2494 N93-23023
Selection of an appropriate tokamak operating regime using magnetohydrodynamic and current drive constraints p 2495 N93-23167
Recent D3-D results --- tokamak reactor
[DE93-004468] p 2496 N93-23690
Space charge layers in a double plasma machine p 2498 N93-24107
Edge effects during DIII-D divertor biasing
[DE93-005847] p 2498 N93-24325
Theoretical studies on plasma heating and confinement
[DE93-007617] p 2499 N93-24452
Poloidal variation of viscous forces in the banana collisionality regime
[DE93-006822] p 2499 N93-24504

PLASMA CURRENTS
Multiply charged ions from laser driven plasma sources p 2495 N93-23242
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
[NASA-TM-106084] p 2195 N93-23742
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

PLASMA DENSITY
PISCES Program: Plasma-materials interactions and edge-plasma physics research
[DE93-005089] p 2491 N93-22406
An ICRF antenna edge plasma density profile diagnostic for DIII-D
[DE93-006729] p 2498 N93-24328

PLASMA DIAGNOSTICS
PISCES Program: Plasma-materials interactions and edge-plasma physics research
[DE93-005089] p 2491 N93-22406
Plasmas physics research in the MST toroidal confinement device
[DE93-006502] p 2493 N93-22711
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
[DE93-005833] p 2493 N93-22779
Electron cyclotron emission measurements on the Texas Experimental Tokamak p 2494 N93-23066
Activities report of the Institute of Plasma Research
[ETN-93-93527] p 2495 N93-23258
Laser diagnostics p 2311 N93-23260
Plasma edge diagnostics p 2495 N93-23261
X ray absorption spectroscopy of dense, shock compressed, laser plasma p 2496 N93-23497
Optical diagnostics in supersonic plasma flows: Purging fluid effects
[DE93-006243] p 2497 N93-24042
Poloidal magnetic field profile measurements on the microwave tokamak experiment using far-infrared polarimetry p 2498 N93-24294
An ICRF antenna edge plasma density profile diagnostic for DIII-D
[DE93-006729] p 2498 N93-24328

PLASMA DYNAMICS
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
[NASA-TM-104765] p 2492 N93-22475
Plasma focus p 2496 N93-23264
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403
Motion of charged particles in pulsar magnetospheres p 2550 N93-24161
Nonlinear dynamics research in the former Soviet Union
[PB93-146496] p 2333 N93-24571

PLASMA ELECTRODES
Simple optics description of the plasma sheath and plasma electrode region
[DE93-004851] p 2491 N93-22224
Pulse power requirements for large aperture optical switches based on plasma electrode Pockels cells
[DE93-005824] p 2279 N93-22997

PLASMA EQUILIBRIUM
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
[NASA-TM-104765] p 2492 N93-22475
Equilibria and stability of non-adiabatic Vlasov-Maxwellian plasmas p 2497 N93-23998

PLASMA FOCUS
Activities report of the Institute of Plasma Research
[ETN-93-93527] p 2495 N93-23258
Plasma focus p 2496 N93-23264

PLASMA FREQUENCIES
Experimental, theoretical and computational study of frequency upshift of electromagnetic radiation using plasma techniques
[DE93-005092] p 2260 N93-22407

PLASMA GENERATORS
Plasma technology p 2496 N93-23263

PLASMA HEATING
Influence of alpha particle absorption on fundamental deuterium heating in a fusion plasma
[DE93-006824] p 2492 N93-22513
Plasmas physics research in the MST toroidal confinement device
[DE93-006502] p 2493 N93-22711
Fusion plasma theory. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE93-005129] p 2493 N93-22796
Recent D3-D results --- tokamak reactor
[DE93-004468] p 2496 N93-23690
Analysis of non-thermal electron cyclotron emission during electron cyclotron current drive experiments on the D3-D tokamak p 2498 N93-24187
An ICRF antenna edge plasma density profile diagnostic for DIII-D
[DE93-006729] p 2498 N93-24328
Theoretical studies on plasma heating and confinement
[DE93-007617] p 2499 N93-24452
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

PLASMA INTERACTION EXPERIMENT
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
[FFI-92/7016] p 2398 N93-24081

PLASMA INTERACTIONS
Design and characterization of the Pegasus 1 plasma flow switch
[DE93-003812] p 2276 N93-22322
PISCES Program: Plasma-materials interactions and edge-plasma physics research
[DE93-005089] p 2491 N93-22406
An MHD study of the interaction between the solar wind and the interstellar medium
[NASA-CR-192353] p 2556 N93-23067
Ionospheric plasma flow about a system of electrically biased flat plates
[NASA-CR-191119] p 2194 N93-23131
A modified flow/field model of the solar wind interaction with Mars p 2556 N93-23216
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
[NASA-TM-106084] p 2195 N93-23742

PLASMA JETS
Emission from relativistic jets in blazars p 2536 N93-23900
Evidence for two types of sources creating Halley's coma p 2540 N93-23926
Inexpensive capillary discharge x ray laser driver
[AD-A260388] p 2310 N93-24276

PLASMA LAYERS
Report of the working group on magnetotail/plasma sheet structure
[DE93-003857] p 2391 N93-22077
Space charge layers in a double plasma machine p 2498 N93-24107
Edge effects during DIII-D divertor biasing
[DE93-005847] p 2498 N93-24325

PLASMA OSCILLATIONS
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
[DE93-005833] p 2493 N93-22779

PLASMA PHYSICS
Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis
[DE93-006123] p 2491 N93-22052
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
[DE93-005833] p 2493 N93-22779
Fusion plasma theory. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE93-005129] p 2493 N93-22796
Applications of divertor biasing to the next generation tokamaks
[DE93-005848] p 2494 N93-23023
Activities report of the Institute of Plasma Research
[ETN-93-93527] p 2495 N93-23258
Plasma theory p 2496 N93-23262
Plasma technology p 2496 N93-23263
Equilibria and stability of non-adiabatic Vlasov-Maxwellian plasmas p 2497 N93-23998
Nonlinear dynamics research in the former Soviet Union
[PB93-146496] p 2333 N93-24571

PLASMA PINCH
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
[DE93-005831] p 2493 N93-22869
Plasma focus p 2496 N93-23264

PLASMA PROBES
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
[FFI-92/7016] p 2398 N93-24081

PLASMA PROPULSION
Development of a miniature mass analyzer and associated instrumentation for improved capabilities in the analysis of low energy plasmas from a rocket or satellite platform
[NASA-CR-192453] p 2202 N93-22014

PLASMA PUMPING
Inexpensive capillary discharge x ray laser driver
[AD-A260388] p 2310 N93-24276

PLASMA RADIATION
Plasma treatment of glass surfaces
[AD-D015619] p 2241 N93-24229

PLASMA SHEATHS
PISCES Program: Plasma-materials interactions and edge-plasma physics research
[DE93-005089] p 2491 N93-22406
Design of a large-scale plasma source ion implantation experiment
[DE93-005438] p 2493 N93-22746

PLASMA SPRAYING
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 1: Effect of spray parameters on the performance of several lots of partially stabilized zirconia-yttria powder
[NASA-TP-3295] p 2227 N93-22556
Development of fire protective coatings for GRP composites using plasma deposition technology, phase 2
[DREA-CR-91-453] p 2239 N93-23121

PLASMA TEMPERATURE
Electron cyclotron emission measurements on the Texas Experimental Tokamak p 2494 N93-23066

PLASMA TORCHES
Development of a 100 kW class plasma torch for ash-melting plasma furnaces
[DE93-754079] p 2493 N93-22715

PLASMA TURBULENCE
PISCES Program: Plasma-materials interactions and edge-plasma physics research
[DE93-005089] p 2491 N93-22406
Source mechanisms and radio effects of ionospheric plasma
[AD-A259743] p 2395 N93-23480

PLASMA WAVES
Influence of alpha particle absorption on fundamental deuterium heating in a fusion plasma
[DE93-006824] p 2492 N93-22513
High beta effects and nonlinear evolution of the TAE instability
[DE93-004170] p 2492 N93-22522
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
[DE93-005833] p 2493 N93-22779
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere p 2394 N93-23388
Data compression for the Cassini radio and plasma wave instrument p 2432 N93-24555

PLASMA-PARTICLE INTERACTIONS
Model of Venus ionopause formation p 2554 N93-23354

PLASMAS (PHYSICS)
PISCES Program: Plasma-materials interactions and edge-plasma physics research
[DE93-005089] p 2491 N93-22406
Experimental, theoretical and computational study of frequency upshift of electromagnetic radiation using plasma techniques
[DE93-005092] p 2260 N93-22407
Experimental studies of instabilities in radially imploding plasmas
[DE93-003831] p 2492 N93-22427
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
[DE93-003834] p 2492 N93-22428
Advanced dielectrics for passivation of InSb
[DE93-005353] p 2501 N93-22503
Influence of alpha particle absorption on fundamental deuterium heating in a fusion plasma
[DE93-006824] p 2492 N93-22513
Plasmas physics research in the MST toroidal confinement device
[DE93-006502] p 2493 N93-22711
Development of a 100 kW class plasma torch for ash-melting plasma furnaces
[DE93-754079] p 2493 N93-22715

Photon acceleration via laser-produced ionization fronts
[DE93-005205] p 2480 N93-22719
Design of a large-scale plasma source ion implantation experiment
[DE93-005438] p 2493 N93-22746
The collaborative program of research in engineering sciences
[DE93-005126] p 2257 N93-22768
Radiation magnetohydrodynamic modeling of x ray output from perturbed plasma implosions
[DE93-005454] p 2494 N93-22907
Plasma technology p 2496 N93-23263
Metallic ions and atoms in the upper atmosphere
[AD-A259741] p 2394 N93-23478
Source mechanisms and radio effects of ionospheric plasma
[AD-A259743] p 2395 N93-23480
Nonlinear analysis of relativistic harmonic generation by intense lasers in plasmas
[AD-A260092] p 2497 N93-24052

PLASMONS
A vibrational analysis of Au implanted Al2O3 single crystals: Ion and thermal annealing effects
[DE93-006216] p 2501 N93-22508
The surface plasmon spectroscopy applications in microgravity: The measurement theory and preliminary experimental layout p 2165 N93-24396

PLASTIC FLOW
Using nonlinear acoustics for nondestructive materials characterization and evaluation
[DE93-004447] p 2321 N93-22727

PLASTIC MEMORY
Theory of synaptic plasticity in visual cortex
[AD-A260052] p 2424 N93-23960

PLASTIC PROPERTIES
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
[PB93-142438] p 2439 N93-23436
Theory of synaptic plasticity in visual cortex
[AD-A260322] p 2422 N93-24238
Inelastic nonuniform torsion of steel I-beams
[PB93-118776] p 2333 N93-24589

PLASTIC TAPES
Experimental investigation of consolidation of thermoplastic tape using laser energy
p 2212 N93-23944

PLASTICS
Basic research on macromolecular dynamics
[PB93-138907] p 2240 N93-24142
Compatibility of refrigerants and lubricants with engineering plastics
[DE93-007826] p 2243 N93-24507

PLATES
Witness plate shock velocity study
[DE93-005742] p 2474 N93-22760

PLATES (STRUCTURAL MEMBERS)
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
[NASA-CR-192813] p 2209 N93-23043
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
[NASA-CR-190783] p 2210 N93-23429

PLATINUM
A structural study of charge-density-wave perturbations in mixed-halide MX solids
[DE93-005449] p 2503 N93-22747
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
[DE93-005450] p 2503 N93-22748

PLOTTING
PLTPWR: A versatile tool for greyscale and power spectral display
[DREA-TC-92-306] p 2435 N93-22473

PLUMES
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
[NASA-CR-192454] p 2202 N93-22012
Automating an orbiter approach to Space Station Freedom to minimize plume impingement
p 2149 N93-22305
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
[DE93-005474] p 2500 N93-22342
Base heating methodology improvements, volume 1
[NASA-CR-192455] p 2202 N93-22350
User's manual for the ALS base heating prediction code, volume 2
[NASA-CR-192457] p 2203 N93-22962

POINT DEFECTS
Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344
Structure, stoichiometry and stability in magnetoplumbite and (beta)-alumina type ceramics
[DE93-007303] p 2236 N93-22528

POINT SOURCES
An experimental study of the possible association of deep underground muons with astronomical point sources p 2549 N93-23596
IRAS galaxies in the ROSAT survey
p 2536 N93-23897

POINTING CONTROL SYSTEMS
Space Station Freedom beta gimbal control via sensitivity models
[NASA-TM-106000] p 2182 N93-22551

POLAR CAP ABSORPTION
High Arctic high frequency radio communications and a seven day polar cap absorption event
[DREP-TM-91-18] p 2264 N93-23344

POLAR CAPS
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599

POLAR NAVIGATION
On the navigation of polar orbiting meteorological satellites
[MPIM-75] p 2180 N93-23111

POLAR ORBITS
On the navigation of polar orbiting meteorological satellites
[MPIM-75] p 2180 N93-23111
GLOBSAT/METOC: An alternative approach for a European Earth observation programme from the polar orbit p 2361 N93-23775

POLAR RADIO BLACKOUT
High Arctic high frequency radio communications and a seven day polar cap absorption event
[DREP-TM-91-18] p 2264 N93-23344

POLAR REGIONS
Possible power sources for the Jovian polar infrared hot spots p 2554 N93-23221
ERS-1: The first European Earth observation system
p 2358 N93-23757
A study of high-latitude auroral arcs using radar, optical, and in situ techniques p 2399 N93-24183

POLARIMETERS
Solar maximum mission/ultraviolet spectrometer and polarimeter studies
[NASA-CR-192463] p 2555 N93-23011

POLARIMETRY
Third Stokes parameter emission from a periodic water surface
[NASA-CR-192334] p 2342 N93-22454
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[DLR-FB-91-32] p 2262 N93-22656
Magnetic field structure and collective effects in supernova remnants p 2548 N93-23218
X-EOS: A multi-mode X-band synthetic aperture radar for EOS SAR p 2365 N93-23797
Active and passive remote sensing of ice
[AD-A259765] p 2415 N93-24026
Poloidal magnetic field profile measurements on the microwave tokamak experiment using far-infrared polarimetry p 2498 N93-24294

POLARIZATION (SPIN ALIGNMENT)
Overview of spin physics
[DE93-006412] p 2483 N93-24029

POLARIZATION CHARACTERISTICS
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
[NASA-TM-4443] p 2559 N93-23396

POLARONS
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
[AD-A260001] p 2243 N93-24443
Compositional superlattices based on PtCl/PtBr MX materials
[DE93-003700] p 2513 N93-24496

POLICIES
Post Cold War assessment of US space policy: A task group report
[PB93-139962] p 2532 N93-22900
Science, technology, and the states in America's third century
[ISBN-1-881054-03-9] p 2519 N93-23074
Use of fellowships p 2517 N93-23154
NASA metric transition plan
[NASA-TM-108606] p 2258 N93-23209
Chesapeake Bay Program: Wetlands workgroup
[PB93-136893] p 2385 N93-23266
Federal move to metric: Public Law, DoC and NIST
[PB93-139129] p 2258 N93-23284
Environmental quality
[PB93-139814] p 2387 N93-23440
Total quality implementation guide
[PB93-154524] p 2520 N93-23447
Insurance cover for space ventures
p 2344 N93-23510
Design and analysis of scheduling policies for real-time computer systems
[AD-A259806] p 2448 N93-23641
US data policy for Earth observation from space
p 2373 N93-23852
Ocean governance: A new vision
[PB93-136299] p 2416 N93-24144

POLITICS
Options of air traffic distribution in the Berlin region (Germany)
[DLR-FB-91-37] p 2117 N93-22660
Post Cold War assessment of US space policy: A task group report
[PB93-139962] p 2532 N93-22900

POLLUTION CONTROL
Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237
Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
[PB93-144350] p 2313 N93-22901
Use of new oxygenates as gasoline components
[DE93-752864] p 2244 N93-22968
The Mavale project: Evaluation of potential pollution sources to superficial and subterranean water resources in the Paraiba do Sul Valley, Brazil
[INPE-5318-PRE/1715] p 2385 N93-23105
Chesapeake Bay Program: Wetlands workgroup
[PB93-136893] p 2385 N93-23266
Formation and control of combustion pollutants from gasoline-fueled spark-ignition motor vehicle engines
[PB93-141042] p 2314 N93-23275
Innovative treatment technologies
[PB93-133387] p 2386 N93-23277
New approaches for a second generation supersonic transport propulsion system
[DS-1934] p 2130 N93-23391
Environmental quality
[PB93-139814] p 2387 N93-23440
Taguchi methods applied to oxygen-enriched diesel engine experiments
[DE93-004873] p 2317 N93-23976
Guidelines for estimating and applying rule effectiveness for ozone CO state implementation plan base year inventories
[PB93-131498] p 2389 N93-24163
Direct catalytic decomposition of nitric oxide
[DE93-008107] p 2389 N93-24515
Enabling document for regulations governing compliance extensions for early reductions of hazardous air pollutants
[PB93-147007] p 2390 N93-24584
Evaluation of an EMITEC resistively heated metal monolith catalytic converter on two M100 neat methanol-fueled vehicles
[PB93-141059] p 2320 N93-24628

POLLUTION MONITORING
Development of size-specific data from particulate control technology research reports
[PB93-131456] p 2384 N93-22922
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
[PB93-124618] p 2386 N93-23348
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
[PB93-152031] p 2416 N93-24605

POLLUTION TRANSPORT
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
[PB93-136604] p 2343 N93-23278
Numerical simulations of the transport and diffusion during the 1991 Winter Validation Study along the front range in Colorado
[DE93-002684] p 2396 N93-23674
Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
[OEFZS-4632] p 2375 N93-24456

POLOIDAL FLUX
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
[PB93-146215] p 2499 N93-24606

POLYACETYLENE
Structure and dynamics in low dimensional guest-host solids
[DE93-006498] p 2504 N93-22887

Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
[AD-A260071] p 2224 N93-24314

POLYATOMIC MOLECULES
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE93-006504] p 2480 N93-22712

POLYCRYSTALS
Chemically prepared Pb(Zr,Ti)O3 thin films: The effects of orientation and stress
[DE93-004501] p 2500 N93-22324
Polycrystalline thin films
[DE93-000070] p 2500 N93-22336
Ablation, melting, and smoothing of polycrystalline alumina by pulsed excimer laser radiation
[DE93-005148] p 2227 N93-22496
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
[DE93-005420] p 2505 N93-22976
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
[DE93-004815] p 2230 N93-22991
The Photovoltaic Manufacturing Technology Project, phase 1
[DE92-010597] p 2380 N93-23302
Photovoltaics Performance and Reliability Workshop
[DE93-000017] p 2380 N93-23303

POLYETHYLENES
Applications of fibrous substrates containing insolubilized phase change polymers
p 2320 N93-22181
Fractography applied to polymeric materials. Part 9: Creep and rupture analysis
[DREA-CR-91-470] p 2238 N93-23119
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
[PB93-139087] p 2258 N93-23280

POLYIMIDES
Polyimide from bis(n-isoprenyl)s of aryl diamides
[NASA-CASE-LAR-14330-2-CU] p 2235 N93-22033

POLYMER BLENDS
Use of block copolymer as polymer blend compatibilizer
[AD-A260435] p 2242 N93-24417

POLYMER CHEMISTRY
Comparison of different synthetic routes for sulfonation of polyaniline
[AD-A259662] p 2222 N93-23658
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
[AD-A260001] p 2243 N93-24443

POLYMER MATRIX COMPOSITES
Electronic and ionic transport in processable conducting polymers
[AD-A260223] p 2238 N93-22918
Characterization of mechanical damage mechanisms in ceramic and polymeric matrix composite materials
[AD-A260129] p 2210 N93-23703
Dielectric and dynamic mechanical properties of ATBN-containing thermosets
[DREA-CR-91-444] p 2239 N93-23725

POLYMERIC FILMS
Electronic control of pH at sulfonated polyaniline electrodes
[AD-A260074] p 2222 N93-23963
Electron diffusion coefficients in hydrogels formed of cross-linked redox polymers
[AD-A260163] p 2240 N93-24073

POLYMERIZATION
Polyreactions in microgravity environment
p 2251 N93-22859
Voltammetric characterization of soluble polyacetylene derivatives obtained from the Ring-Opening Metathesis Polymerization (ROMP) of substituted cyclooctatetraenes
[AD-A260071] p 2224 N93-24314

POLYMERS
Polyimide from bis(n-isoprenyl)s of aryl diamides
[NASA-CASE-LAR-14330-2-CU] p 2235 N93-22033
Photoinduced electron transfer in ordered polymers
[DE93-006784] p 2237 N93-22889
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132
Basic research on macromolecular dynamics
[PB93-138907] p 2240 N93-24142
Performance study of the rheometrics melt flow monitor for real-time rheological characterization
[NRC-34372] p 2241 N93-24290
First European tri-service advanced materials workshop: Compressive strength in rigid-rod polymers
[AD-A259997] p 2242 N93-24300
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
[AD-A260001] p 2243 N93-24443

POLYMETHYL METHACRYLATE
Fractography applied to polymeric materials. Part 9: Creep and rupture analysis
[DREA-CR-91-470] p 2238 N93-23119
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062

POLYNOMIALS
Improved deterministic calculational methods for irregularly shaped shields
[DE93-004955] p 2467 N93-22795
The p and h-p versions of the finite element method: Basic principles and properties
[AD-A260237] p 2468 N93-22930
A comparison of polynomial and rational NARMAX models for nonlinear system identification
[RR-444] p 2469 N93-23374

POLYPEPTIDES
Photochemical observation of ion flows in membrane channels
[AD-A259869] p 2219 N93-22731

POLYPROPYLENE
Performance study of the rheometrics melt flow monitor for real-time rheological characterization
[NRC-34372] p 2241 N93-24290

POLYSTYRENE
Study of the alpha and beta mechanical relaxations of PMMA, PS and their copolymers
[ISAL-92-0042] p 2240 N93-24062

POLYURETHANE RESINS
Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
[AD-D015627] p 2241 N93-24221

POLYVINYL CHLORIDE
Fractography applied to polymeric materials. Part 9: Creep and rupture analysis
[DREA-CR-91-470] p 2238 N93-23119

POMERONS
Color sextet quarks and new high-energy interactions
[DE93-004187] p 2478 N93-22059

PONTRYAGIN PRINCIPLE
Time optimal paths for high speed maneuvering
[DE93-006251] p 2458 N93-23338

POPULATION INVERSION
Visible chemical lasers: Reactions of metastable oxygen and the study of the red yoshida reaction
[AD-A260181] p 2308 N93-23315

POROSITY
Sol-gel/rhodamine 6G composite films with tailored microstructures
[DE93-005364] p 2208 N93-22504
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
[DE93-005372] p 2218 N93-22505
Non-proprietary stack research
[DE93-007523] p 2376 N93-22535
Relating porosity and mechanical properties in spray formed alloy 625
[AD-A260341] p 2234 N93-24269
Effects of capillarity on microscopic flow in porous media
[DE93-007626] p 2299 N93-24505

POROUS MATERIALS
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
[DE93-005372] p 2218 N93-22505
High temperature filter materials
[DE93-005018] p 2315 N93-23295
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
[AD-A260525] p 2241 N93-24201
Effects of capillarity on microscopic flow in porous media
[DE93-007626] p 2299 N93-24505

POROUS WALLS
Slotted-wall flow-field measurements in a transonic wind tunnel
[NASA-TM-4280] p 2113 N93-24111

PORPHYRINS
Computer-aided design of molecular catalysts for alkane oxidation using dodeca-substituted iron porphyrins
[DE93-004046] p 2218 N93-22520
Nonlinear optical properties of porphyrin and chlorophyll dimers studied by degenerated four wave mixing
[DE93-006411] p 2419 N93-24028

PORTUGAL
Observing the northeast Atlantic with NOAA-N at the University of Lisbon (Portugal) Space Oceanography Facility p 2362 N93-23779

POSEIDON SATELLITE
TOPEX/POSEIDON joint verification plan
[NASA-CR-192792] p 2413 N93-22804

POSITION (LOCATION)
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
[PB93-139004] p 2256 N93-22079
AR/D image processing system p 2152 N93-22321
GTAW penetration based on electrode tip location versus weld joint center line
[DE93-004910] p 2311 N93-22494
Local Lightning Early Warning System (LLEWS), phase 1
[DE93-006609] p 2403 N93-22595
Fifth fundamental catalogue. Part 2: The FK5 extension - new fundamental stars
[REPT-33(1991)] p 2542 N93-23346
Design and in orbit performance of the ROSAT PSPC
p 2539 N93-23923
Projective structure from two uncalibrated images: Structure from motion and recognition
[AD-A260102] p 2470 N93-24056
Carlsberg meridian catalogue La Palma (Spain). Number 6: Observations of positions of stars and planets 1990
[ISBN-84-7469-052-8] p 2543 N93-24059
Eye movements and visual information processing
[AD-A259955] p 2425 N93-24297

POSITION ERRORS
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318
Large bearing errors observed at a high latitude DF site p 2268 N93-23615

POSITION INDICATORS
Office of Space Flight standard spaceborne Global Positioning System user equipment project
p 2148 N93-22301
A current assessment of single site locating technology p 2267 N93-23608
A new passive SSL technique for HF radiolocation
p 2267 N93-23609
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
Test results of the advanced translator processing system p 2269 N93-23620
Communication interference/jamming and propagation analysis system and its application to radio location
p 2269 N93-23621
Location of emissions by evasion of frequency and gusts by sequential analysis sensor in fast scanning
p 2270 N93-23625

POSITION SENSING
Sample positioning in microgravity
[NASA-CASE-NPO-18448-1-CU] p 2253 N93-24600

POSITIONING
GPS multipath errors in the precision landing environment p 2106 N93-22569
Integrated precision navigation system
p 2120 N93-22789
Mapping the Universe: Statistical measures of the galaxy distribution
[ETN-93-93456] p 2542 N93-23116
Localization and positioning using combinations of model views
[AD-A259734] p 2460 N93-23472
EUTELTRACS: The European land mobile satellite service p 2276 N93-23526
Digital processing for positioning with one satellite
p 2270 N93-23629

POSITIONING DEVICES (MACHINERY)
Sample positioning in microgravity
[NASA-CASE-NPO-18448-1-CU] p 2253 N93-24600

POSITIVE FEEDBACK
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
[DE93-000690] p 2405 N93-23305

POSITRON ANNIHILATION
Study of electroweak interactions
[DE93-007261] p 2484 N93-24510

POSITRONS
Positron studies of defected metals, metallic surfaces
[DE93-006089] p 2499 N93-22051

POSTLAUNCH REPORTS
ROSAT: The German x ray satellite nearly two years in orbit p 2538 N93-23916

POTABLE WATER
Framework for decision making: An EPA perspective
[PB93-134369] p 2518 N93-22904
Photovoltaic evaluation study
[DE93-761330] p 2378 N93-22956

POTASSIUM COMPOUNDS
MHD seed recovery/regeneration, phase 2
[DE93-006008] p 2493 N93-22769
Research in photorefractive crystals
[AD-A260391] p 2513 N93-24425

POTENTIAL ENERGY
Current performance and potential improvements in solar thermal industrial heat
[DE93-000048] p 2377 N93-22927
POTENTIAL FIELDS
Ionospheric plasma flow about a system of electrically biased flat plates
[NASA-CR-191119] p 2194 N93-23131
Goal directed robot navigation in a known indoor environment with unknown stationary and moving obstacles p 2458 N93-23223
POWDER (PARTICLES)
A round-robin for particle electrophoresis standardization
[DE93-003018] p 2217 N93-22400
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 1: Effect of spray parameters on the performance of several lots of partially stabilized zirconia-yttria powder
[NASA-TP-3295] p 2227 N93-22556
Continuous production of granular or powder Ti, Zr, and Hf or their alloy products
[PB93-135051] p 2227 N93-22592
Strength optimization through powder modification
[DE93-005109] p 2237 N93-22718
Microstructure of rapidly-solidified lithium powders
[DE93-004765] p 2229 N93-22880
Friction microprobe investigation of particle layer effects on sliding friction
[DE92-018868] p 2313 N93-22925
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
[AD-A259889] p 2242 N93-24321
POWDER METALLURGY
Pressure-reaction synthesis of titanium composite materials
[PB93-135036] p 2208 N93-22591
Elevated temperature fracture of advanced powder metallurgy aluminum alloy 8009 p 2231 N93-23588
Results on powder injection molding of Ni3Al and application to other intermetallic compositions
[DE93-005681] p 2213 N93-24016
Relating porosity and mechanical properties in spray formed alloy 625
[AD-A260341] p 2234 N93-24269
POWER AMPLIFIERS
A high-power 95 GHz gyro-TWT amplifier
[DE93-002332] p 2277 N93-22425
Space power amplification with active linearly tapered slot antenna array
[NASA-TM-106036] p 2277 N93-22485
Adaptive predistortion linearization of nonlinear power amplifiers
[ISBN-0-315-60483-2] p 2286 N93-24611
POWER BEAMING
An analysis of power beaming for the Moon and Mars
[NASA-CR-191072] p 2182 N93-22554
POWER CONDITIONING
Explosive pulse power for fusion applications
[DE93-003828] p 2491 N93-22076
Monolithic, series connected GaAs photovoltaic power converters for optoelectronic component applications
[DE93-004385] p 2380 N93-23293
Evaluation of a nickel/metal hydride battery for a load conditioner
[DE93-761824] p 2283 N93-24010
Advanced power conditioning for maglev systems
[PB93-150274] p 2320 N93-24586
POWER CONVERTERS
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
[NASA-CR-191065] p 2203 N93-22662
Monolithic, series connected GaAs photovoltaic power converters for optoelectronic component applications
[DE93-004385] p 2380 N93-23293
Heat pipe fatigue test specimen: Metallurgical evaluation
[NASA-CR-189120] p 2381 N93-23360
POWER LINES
Solar-powered light emitting diode power line avoidance marker design
[AD-A259886] p 2381 N93-23983
Suppression of power line harmonic interference in HF surface-wave radar
[AD-A259917] p 2273 N93-24563
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590
POWER REACTORS
Applicability of trends in nuclear safety analysis to space nuclear power systems
[DE93-003169] p 2205 N93-24497
POWER SPECTRA
PLTPWR: A versatile tool for greyscale and power spectral display
[DREA-TC-92-306] p 2435 N93-22473
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
[NASA-TM-107734] p 2133 N93-22675
POWER SUPPLIES
Interagency Advanced Power Group Steering Group meeting minutes
[DE93-005641] p 2382 N93-24324
Mechanical Working Group meeting minutes --- power generation and delivery systems
[DE93-004884] p 2571 N93-24435
POWER SUPPLY CIRCUITS
Evaluation of a nickel/metal hydride battery for a load conditioner
[DE93-761824] p 2283 N93-24010
AC/DC converter
[CA-PATENT-1-306-005] p 2205 N93-24205
POWERED LIFT AIRCRAFT
Design of a portable powered seat lift
p 2429 N93-22190
A full-scale STOVL ejector experiment
[NASA-TM-106019] p 2129 N93-22480
POWERED MODELS
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
[NASA-TM-104224] p 2116 N93-24532
PREAMPLIFIERS
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
[DE93-006679] p 2278 N93-22577
PRECIPITATES
Growth of precipitates in Bi2Sr2CaCu2O8
[DE93-004443] p 2502 N93-22725
PRECIPITATION (CHEMISTRY)
Thematic Mapper land use classification as a remote sensing contribution for hydrologic runoff prediction model
[ESA-TT-1238] p 2342 N93-22461
PRECIPITATION (METEOROLOGY)
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Impact of a Newtonian assimilation and physical initialization on the initialization and prediction in a tropical mesoscale model p 2394 N93-23353
The climate induced variation of the continental biosphere: A model simulation of the last glacial maximum
[AERONAUTICA-ACTA-A-366] p 2389 N93-24089
PRECIPITATION HARDENING
Characterization of doped NiAl by atom probe field ion microscopy
[DE93-005932] p 2228 N93-22692
A study into the effects of electric fields and currents on the aging and quench hardening of steels
[AD-A260228] p 2233 N93-24098
PRECISION
Analysis of automated fatigue crack growth rate data
[DE93-752853] p 2324 N93-22771
Integrated precision navigation system
p 2120 N93-22789
PRECISION GUIDED PROJECTILES
Initial trials results for image stabilisation using a rugged low noise gyroscope p 2255 N93-22021
PRECONDITIONING
A comparative study of preconditioned Lanczos methods for nonsymmetric linear system
[DE93-006453] p 2436 N93-22979
PREDICTION ANALYSIS TECHNIQUES
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
[NASA-TM-107732] p 2108 N93-22457
EXCPACK: A package of codes for electron impact excitation of ions by a distorted wave method
[DE93-006095] p 2479 N93-22525
Predicting structure in nonsymmetric sparse matrix factorizations
[DE93-004119] p 2468 N93-22938
User's manual for the ALS base heating prediction code, volume 2
[NASA-CR-192457] p 2203 N93-22962
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
[NASA-TM-106079] p 2207 N93-23014
Computational modeling of the environment with applications to lake eutrophication
[TKK-1991/1] p 2386 N93-23425
Multiple emitter direction finding from a circular array by single snapshot processing p 2270 N93-23627
Correlation and prediction of snow water equivalent from snow sensors
[PB93-127413] p 2374 N93-23870
Development of code evaluation criteria for assessing predictive capability and performance
[NASA-CR-192623] p 2442 N93-24473
PREDICTIONS
Methods for predicting properties and tailoring salt solutions for industrial processes p 2226 N93-22183
Microcomputer based software for biodynamic simulation p 2429 N93-22191
Predictive sensor method and apparatus
p 2305 N93-22202
Heat transfer simulation with a conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 2251 N93-22863
On wave force analysis using system identification
[RR-450] p 2293 N93-23361
Spray combustion experiments and numerical predictions
[NASA-TM-106069] p 2296 N93-23744
Bayesian prediction of mean square errors with covariates
[AD-A259585] p 2470 N93-24064
An asymptotic theory of supersonic propeller noise
[NASA-CR-191110] p 2477 N93-24070
Molecular properties and fate of organic chemicals
[AD-A260090] p 2207 N93-24412
PREFLIGHT OPERATIONS
Candidate technologies for the Integrated Health Management Program
[NASA-CR-192339] p 2420 N93-22655
PREFORMS
Chemical vapor infiltration with microwave heating
[DE93-005458] p 2243 N93-24445
PRELAUNCH TESTS
Candidate technologies for the Integrated Health Management Program
[NASA-CR-192339] p 2420 N93-22655
PREMIXED FLAMES
Space Station Freedom combustion research
p 2190 N93-22643
Mechanisms and enhancement of flame stabilization
[DE93-006467] p 2219 N93-22709
Action of an acceleration field on premixed methane/air flames p 2226 N93-22838
PREPOLYMERS
Processable precursors to high performance liquid crystalline polymers
[AD-A260466] p 2240 N93-24116
PREPREGS
Gel time measurements on carbon fiber/epoxy resin prepregs
[ICAS-90-4-10-4] p 2210 N93-23400
Continuous fiber thermoplastic prepreg
[NASA-CASE-LAR-14459-1] p 2215 N93-24597
PRESIDENTIAL REPORTS
State of Small Business: A report of the President transmitted to the Congress
[PB93-137073] p 2519 N93-23437
Points of Light movement: The President's report to the Nation
[PB93-139780] p 2532 N93-23679
Publications of the Executive Office of the President, 20 Jan. 1989 - 20 Jan. 1993: Report to the Congress
[PB93-139764] p 2529 N93-24307
PRESSURE
An experimental study of the aerodynamics of a NACA0012 airfoil with a simulated glaze ice accretion, volume 2
[NASA-CR-191007] p 2109 N93-22823
PRESSURE DEPENDENCE
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
[DE93-005115] p 2235 N93-22409
PRESSURE DISTRIBUTION
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
[NASA-TM-4436] p 2110 N93-22876
Theoretical errors on airborne measurements of: Static pressure, impact temperature, air flow angle, air flow speed
[PB93-136406] p 2405 N93-23232
On wave force analysis using system identification
[RR-450] p 2293 N93-23361
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132
Role of acoustics in flame/vortex interactions
[NASA-CR-191429] p 2299 N93-24494
An experimental investigation of a supercritical airfoil at transonic speeds
[NASA-TM-103933] p 2300 N93-24534

An experimental investigation of subsonic flow in a two-dimensional U-duct
[NASA-TM-103931] p 2128 N93-24535

PRESSURE EFFECTS
Pressure-reaction synthesis of titanium composite materials
[PB93-135036] p 2208 N93-22591
Pressure-induced amorphizations of silica analogues: A probe of the relationship between order and disorder
[DE93-007966] p 2237 N93-22730
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854
Galileo's relativity principle, the concept of pressure, and complex characteristics, for the six-equation, one-pressure model
[DE93-005240] p 2515 N93-22952

PRESSURE GRADIENTS
Improved two-equation k-omega turbulence models for aerodynamic flows
[NASA-TM-103975] p 2289 N93-22809
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
[NASA-TM-102211] p 2300 N93-24541

PRESSURE MEASUREMENT
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
[VTT-PUBS-103] p 2326 N93-23120
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
[NASA-TM-104002] p 2128 N93-23175
Theoretical errors on airborne measurements of: Static pressure, impact temperature, air flow angle, air flow speed
[PB93-136406] p 2405 N93-23232
SUMS experiment flight results on STS-35
[NASA-TM-107736] p 2201 N93-23407
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
[NASA-TM-104224] p 2116 N93-24532
Fiber optic microphone having a pressure sensing reflective membrane and a voltage source for calibration purpose
[NASA-CASE-LAR-14402-2-CU] p 2478 N93-24602

PRESSURE OSCILLATIONS
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
[NASA-TM-4436] p 2110 N93-22876
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
[NASA-TM-104002] p 2128 N93-23175
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
[AD-A260149] p 2297 N93-24132
Determination and characteristics of the transition to two-phase slug flow in small channels
[DE93-004250] p 2299 N93-24434

PRESSURE REDUCTION
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2165 N93-24398

PRESSURE VESSELS
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
[DE93-003100] p 2322 N93-22412
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
[VTT-PUBS-103] p 2326 N93-23120

PRESTRESSING
Investigation of azimuthal stresses due to welding and cooldown
[DE93-005530] p 2324 N93-22708
Optimal bolt preload for dynamic loading
[DE92-017527] p 2313 N93-22923

PRETREATMENT
Mean levels in nonlinear analysis and identification
[RR-454] p 2525 N93-23378
Non-chromated surface pretreatments for aluminum
[AD-A260130] p 2232 N93-23704

PRIMATES
Investigation of effects of 60-Hz electric and magnetic fields on operant and social behavior and on the neuroendocrine system of nonhuman primates
[DE93-007678] p 2419 N93-24455

PRIMERS (COATINGS)
Non-chromated surface pretreatments for aluminum
[AD-A260130] p 2232 N93-23704

PRIMITIVE EARTH ATMOSPHERE
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578

PRIMITIVE EQUATIONS
User's guide to the Penn State/NCAR Mesoscale Modeling System
[PB93-126654] p 2391 N93-22380

PRINCIPAL COMPONENTS ANALYSIS
The five-factor personality model and naval aviation candidates
[AD-A260227] p 2425 N93-24319

PRINTED CIRCUITS
Printed wiring assembly cleanliness
[DE93-006040] p 2277 N93-22524

PRIORITIES
Public Congressional forum on space p 2154 N93-23165

PROBABILITY DENSITY FUNCTIONS
Analysis of DGPS MSK receivers in a non-gausian noise environment
[PB93-152866] p 2123 N93-24310

PROBABILITY THEORY
Possibilistic clustering for shape recognition p 2450 N93-22208
On the prior probabilities for two-stage Bayesian estimates
[DE93-006389] p 2472 N93-22593
Probabilistic finite elements for fatigue and fracture analysis
[NASA-CR-191098] p 2326 N93-23053
Change PP plot and continuous sample quantile function
[AD-A259833] p 2472 N93-23460
The meaning and utility of confidence
[AD-A259646] p 2472 N93-23655
Climatological probability of cloud-free line-of-sight
[AD-A260139] p 2407 N93-23706
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
[AD-A260047] p 2472 N93-23711
Mapping methods for computationally efficient and accurate structural reliability
[NASA-TM-105892] p 2330 N93-23745
Quasi-binary decision making using light scattering
[AD-A260470] p 2489 N93-24197
Constant false probability data fusion system
[AD-D015624] p 2304 N93-24219
Probability and statistics applied to the theory of algorithms
[AD-A259956] p 2473 N93-24248
Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
[PB93-152072] p 2514 N93-24647

PROBES
Applications of TEM to interface in materials
[DE93-004776] p 2501 N93-22492

PROBLEM SOLVING
Trajectory optimization based on differential inclusion
[NASA-CR-4501] p 2181 N93-22459
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
[DE93-006816] p 2480 N93-22714
Towards computer-supported creative design based on Altshuller's theory of inventive problem solving
[MEMO-INF-92-49] p 2438 N93-23358
Computational modeling of the environment with applications to lake eutrophication
[TKK-1991/1] p 2386 N93-23425
The impact of computer instruction on the near transfer and far transfer of a general problem-solving strategy p 2527 N93-24094
Center for shape optimization and material layout
[AD-A260087] p 2471 N93-24411

PROCESS CONTROL (INDUSTRY)
Synthesis of nonlinear control strategies from fuzzy logic control algorithms p 2452 N93-22222
Adaptive process control using fuzzy logic and genetic algorithms p 2457 N93-22376
Statistical process control program at a ceramics vendor facility
[DE93-006043] p 2238 N93-23025
Process management: The quality way to improvement
[PB93-154532] p 2321 N93-23445
High reliability residual compressive stress processes. State-of-the-art assessment
[PB93-127751] p 2331 N93-24207

PROCESS HEAT
Solar reforming applications study summary
[DE93-002286] p 2244 N93-22424
Evaluation of diurnal thermal energy storage combined with cogeneration systems
[DE93-004798] p 2378 N93-22966
A review of the experience gained in 10 years operation of Gould's solar industrial process heat system
[DE93-003991] p 2381 N93-23970

PROCESSING
Methods for predicting properties and tailoring salt solutions for industrial processes p 2226 N93-22183

PROCUREMENT
An evaluation of schedule metrics used within aeronautical systems center
[AD-A260113] p 2521 N93-24413

PROCUREMENT MANAGEMENT
NASA contract management
[GAO/HR-93-11] p 2519 N93-23376

PRODUCT DEVELOPMENT
User areas in aircraft cockpit, using methods of rapid prototype development
[MBB-FE-315-S-PUB-0493] p 2426 N93-22389
Computer aided integrated production planning in unit production, as represented in aircraft construction
[MBB-FW-3-S-PUB-0439-A] p 2435 N93-22394
Utility Battery Storage Systems Program Report for FY 1992
[DE93-006459] p 2278 N93-22594
NASA's commercial research plans and opportunities p 2183 N93-22612
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
[DE93-002347] p 2384 N93-22972
Field programmable gate arrays: Evaluation report for space-flight application
[NASA-CR-192796] p 2432 N93-23042
Insurance cover for space ventures p 2344 N93-23510
Image maps p 2348 N93-23537
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
JEM program status p 2155 N93-24339

PRODUCTION ENGINEERING
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
[DE93-006722] p 2442 N93-24327

PRODUCTION PLANNING
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
Computer aided integrated production planning in unit production, as represented in aircraft construction
[MBB-FW-3-S-PUB-0439-A] p 2435 N93-22394
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
[DE93-006722] p 2442 N93-24327

PRODUCTIVITY
Advanced display object selection methods for enhancing user-computer productivity p 2444 N93-22151
Automated fiber placement composite manufacturing: The mission at MSFC's Productivity Enhancement Complex p 2260 N93-22175
Space Station Freedom automation and robotics: An assessment of the potential for increased productivity
[NASA-TM-108714] p 2195 N93-24149
An evaluation of schedule metrics used within aeronautical systems center
[AD-A260113] p 2521 N93-24413

PRODUCTS
Geocoded products of future radar sensors p 2340 N93-22441
Map production and updating using SPOT data and SPOT data derived products p 2348 N93-23536

PROGRAM VERIFICATION (COMPUTERS)
Support measurement and estimating for oracle database applications using Mark 2 function points
[AD-A259686] p 2440 N93-23661
Investigation of proof techniques within the EVES verification technology
[DREO-FR-92-5451-02] p 2440 N93-23730
Soar-mode v5.0 user's manual for Soar release 5.2 and 6.0
[AD-A259914] p 2441 N93-23997
Progressive retry for software error recovery in distributed systems
[AD-A260075] p 2442 N93-24315
Development of code evaluation criteria for assessing predictive capability and performance
[NASA-CR-192623] p 2442 N93-24473
CONVEX mini manual
[NASA-TM-107564-REV] p 2433 N93-24594

PROGRAMMABLE LOGIC DEVICES
Field programmable gate arrays: Evaluation report for space-flight application
[NASA-CR-192796] p 2432 N93-23042

PROGRAMMED INSTRUCTION
Study and development of a multiprocessor interface circuit (thesis annex), volume 2
[ECL-91-11-VOL-2] p 2446 N93-22676
PROGRAMMING ENVIRONMENTS
Advanced software development workstation. Comparison of two object-oriented development methodologies
[NASA-CR-192819] p 2434 N93-22042
Conjunctive programming: An interactive approach to software system synthesis
[NASA-CR-192798] p 2436 N93-22701
PROGRAMMING LANGUAGES
Advanced software development workstation. OOPSLA 1992 Conference. Trip report
[NASA-CR-192811] p 2432 N93-22041
PROJECT MANAGEMENT
Advanced software development workstation. Comparison of two object-oriented development methodologies
[NASA-CR-192819] p 2434 N93-22042
Entry Systems Panel deliberations
p 2176 N93-22105
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Overview of activities of ISY PIE Committee
p 2335 N93-22129
An overview of DOE's wind turbine development programs
[DE93-000044] p 2376 N93-22335
Space Station Furnace Facility preliminary Project Implementation Plan (PIP). Volume 2, appendix 2
[NASA-CR-192474] p 2302 N93-22347
Introduction to Space Station Freedom
p 2182 N93-22608
The ANL electric vehicle battery R/D program for DOE-EHP
[DE93-005689] p 2278 N93-22688
The ANL Electrochemical Program for DOE on electric vehicle R/D
[DE93-005690] p 2279 N93-22689
The collaborative program of research in engineering sciences
[DE93-005126] p 2257 N93-22768
Summary document of tasks performed on the Shuttle-C/NLS contract
[NASA-CR-192483] p 2179 N93-22995
Transportation technology program: Strategic plan
[NASA-TM-108706] p 2152 N93-23032
Organization and management of space grant programs p 2517 N93-23152
NASA reports p 2154 N93-23163
Architecture for human-computer design, management and coordination in a collaborative AEC environment
p 2528 N93-24186
Megaprojects in the sciences
[PB93-140002] p 2475 N93-24308
Electric and hybrid vehicle program; Site Operator Program
[DE93-005239] p 2319 N93-24444
PROJECT PLANNING
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Overview of activities of ISY PIE Committee
p 2335 N93-22129
Development of CPG dish-Stirling systems for remote power applications
[DE93-003251] p 2376 N93-22414
Air traffic operational evaluation plan of the automated surface observing system (ASOS) displays
[DOT/FAA/CT-TN92/36] p 2121 N93-22801
Summary document of tasks performed on the Shuttle-C/NLS contract
[NASA-CR-192483] p 2179 N93-22995
Transportation technology program: Strategic plan
[NASA-TM-108706] p 2152 N93-23032
Biofuels program plan, FY 1992 - 1996
[DE93-000036] p 2245 N93-23048
Public Congressional forum on space
p 2154 N93-23165
NASA's strategic plan for education. A strategy for change, 1993-1998
[NASA-EP-289] p 2517 N93-23174
PROJECT SETI
SETI in Europe p 2429 N93-23908
PROJECTILE CRATERING
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
[DE93-003846] p 2327 N93-23291
PROJECTILES
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
[DE93-003846] p 2327 N93-23291
A multiple armature railgun launcher
[AD-A259768] p 2171 N93-23486
Studies in penetration mechanics
[AD-A260436] p 2332 N93-24304
PROJECTIVE GEOMETRY
3D pose from 3 corresponding points under weak-perspective projection
[AD-A259737] p 2460 N93-23473
Precision geocoding demonstrator system
p 2348 N93-23539
Projective structure from two uncalibrated images: Structure from motion and recognition
[AD-A260102] p 2470 N93-24056
PROJECTS
Ongoing research projects at VTT in 1991
[ISBN-951-38-3771-8] p 2570 N93-23423
The world wide launching campaign for student rockets experimental payloads p 2368 N93-23820
PROMOTION
Definition of a European promotion concept
p 2162 N93-24381
PRONY SERIES
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
[DE93-005607] p 2279 N93-22945
PROP-FAN TECHNOLOGY
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
[NASA-TM-105267] p 2325 N93-23015
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
[NASA-CR-191087] p 2111 N93-23431
PROPAGATION MODES
The influence of propagation on high frequency radiogoniometry and single station location
p 2266 N93-23607
PROPAGATION VELOCITY
Witness plate shock velocity study
[DE93-005742] p 2474 N93-22760
PROPELLANT COMBUSTION
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
[AD-A260249] p 2246 N93-24332
PROPELLANT TANKS
Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841
The study of surface tension tanks from the neutral buoyancy to the space flight p 2248 N93-22842
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
[NASA-CR-184472] p 2258 N93-23176
Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
[NASA-CR-184472] p 2259 N93-23715
PROPELLANT TRANSFER
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation
p 2138 N93-22242
Fluid mechanics applications for the design and test of the surface tension tank OST-2 p 2248 N93-22841
The study of surface tension tanks from the neutral buoyancy to the space flight p 2248 N93-22842
PROPELLER FANS
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
[NASA-TM-105267] p 2325 N93-23015
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
[NASA-CR-191087] p 2111 N93-23431
PROPELLER NOISE
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
[NASA-CR-190801] p 2476 N93-22673
An asymptotic theory of supersonic propeller noise
[NASA-CR-191110] p 2477 N93-24070
PROPELLERS
An asymptotic theory of supersonic propeller noise
[NASA-CR-191110] p 2477 N93-24070
PROPORTIONAL CONTROL
A fuzzy controller with nonlinear control rules is the sum of a global nonlinear controller and a local nonlinear PI-like controller p 2453 N93-22356
PROPORTIONAL COUNTERS
Observation of the extragalactic x ray background
p 2535 N93-23892
Design and in orbit performance of the ROSAT PSPC
p 2539 N93-23923
PROPULSION
Cargo vehicle architecture options
p 2172 N93-22082
Propulsion Systems Panel deliberations
p 2175 N93-22101
Rendezvous strategy impacts on CTV avionics design, system reliability requirements, and available collision avoidance maneuvers p 2139 N93-22248
PROPULSION SYSTEM CONFIGURATIONS
Space Transportation Materials and Structures Technology Workshop. Volume 2: Proceedings
[NASA-CP-3148-VOL-2] p 2172 N93-22081
Lunar transfer vehicle studies p 2173 N93-22087
CSTI Earth-to-orbit propulsion research and technology program overview p 2174 N93-22090
Advanced rocket propulsion p 2174 N93-22091
Space propulsion p 2174 N93-22092
Nuclear concepts/propulsion p 2174 N93-22093
Solid rocket motors p 2174 N93-22094
Propulsion Systems Panel p 2174 N93-22096
Vehicle Systems Panel deliberations
p 2175 N93-22098
Propulsion Systems Panel deliberations
p 2175 N93-22101
Hybrid rocket propulsion p 2175 N93-22102
Solid Propulsion Integrity Program (SPIP) for verifiable enhanced solid rocket motor reliability
p 2176 N93-22104
Intelligent neuroprocessors for in-situ launch vehicle propulsion systems health management
p 2452 N93-22221
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Thruster configurations for maneuvering heavy payloads p 2150 N93-22313
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 1: Draft final
[NASA-CR-192488] p 2177 N93-22348
Base heating methodology improvements, volume 1
[NASA-CR-192455] p 2202 N93-22350
Test facilities for evaluating nuclear thermal propulsion systems
[DE93-002468] p 2202 N93-22411
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 2: Draft final
[NASA-CR-192489] p 2178 N93-22959
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
[NASA-CR-192456] p 2203 N93-22963
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 2: Cryo/aerobrake vehicle
[NASA-CR-192490] p 2179 N93-23251
Computational simulation for concurrent engineering of aerospace propulsion systems
[NASA-TM-106029] p 2330 N93-23746
High resolution measurements of mixing and reaction processes in turbulent flows
[AD-A259952] p 2298 N93-24246
PROPULSION SYSTEM PERFORMANCE
National Launch System: Structures and materials
p 2172 N93-22083
Nuclear concepts/propulsion p 2174 N93-22093
Propulsion Systems Panel p 2174 N93-22096
Vehicle Systems Panel deliberations
p 2175 N93-22098
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 1: Draft final
[NASA-CR-192488] p 2177 N93-22348
Test facilities for evaluating nuclear thermal propulsion systems
[DE93-002468] p 2202 N93-22411
A reactor-pumped laser as primary power for nuclear rocket engines
[DE93-005342] p 2203 N93-22501
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
[NASA-CR-192456] p 2203 N93-22963
New approaches for a second generation supersonic transport propulsion system
[DS-1934] p 2130 N93-23391
Computational simulation for concurrent engineering of aerospace propulsion systems
[NASA-TM-106029] p 2330 N93-23746
High resolution measurements of mixing and reaction processes in turbulent flows
[AD-A259952] p 2298 N93-24246
PROSTHETIC DEVICES
Finite element analysis of a composite artificial ankle
p 2423 N93-22189
PROTECTION
Eumetsat practice for protection of its satellite data
p 2373 N93-23850
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851
Satellite data protection from the point of view of a data user: Preparation for full utilization of remote sensing technology p 2374 N93-23854

International law perspective on establishing a European regulation with regard to the legal protection of the use of satellite remote sensing data p 2374 N93-23855
PROTECTIVE CLOTHING
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
[AD-A259909] p 2427 N93-23995
An innovative method for hand protection from extreme cold using heat pipe
[AD-A259720] p 2428 N93-24128
PROTECTIVE COATINGS
High-power optical coatings for a mega-Joule class ICF laser
[DE93-005821] p 2306 N93-22328
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
[DE93-005472] p 2235 N93-22341
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
[DE93-006742] p 2208 N93-22578
Spacecraft materials and coatings experiments p 2189 N93-22637
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
[DE93-005533] p 2237 N93-22909
Pilot demonstration of cerium oxide coated anodes
[DE93-002507] p 2231 N93-23316
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
[MBB-Z-0444-92-PUB] p 2239 N93-23365
Non-chromated surface pretreatments for aluminum
[AD-A260130] p 2232 N93-23704
Method for bonding a polyurethane molding composition to a cable jacket of an olefin/ester interpolymer
[AD-D015627] p 2241 N93-24221
Superconductivity devices: Commercial use of space
[NASA-CR-192841] p 2513 N93-24483
PROTEIN CRYSTAL GROWTH
Commercial researcher perspective p 2184 N93-22615
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642
Protein crystal growth in microgravity p 2191 N93-22646
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change p 2191 N93-22648
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393
PROTEINS
Apparatus and method for cellulose processing using microwave pretreatment
[NASA-CASE-MSC-21936-1-SB] p 2216 N93-22036
Commercial researcher perspective p 2184 N93-22615
New methods and instrumentation for the characterization of biopolymers using electrospray ionization-mass spectrometry
[DE93-005100] p 2239 N93-23323
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
[AD-A258453] p 2233 N93-23982
PROTOBIOLOGY
Impact contribution of prebiotic reactants to Earth
[NASA-CR-192785] p 2552 N93-24480
PROTOCOL (COMPUTERS)
An application protocol for CAD to CAD transfer of electronic information p 2530 N93-22154
Reactive control and reasoning assistance for scientific laboratory instruments p 2465 N93-22186
Evaluation of distributed computing tools
[DE93-007408] p 2446 N93-22531
Advanced communications technology satellite high burst rate link evaluation terminal communication protocol software user's guide, version 1.0
[NASA-CR-189162] p 2437 N93-23134
LOTOS specification style for OSI
[MEMO-INF-92-46] p 2448 N93-23357
Bipartitioning of LOTOS specifications
[MEMO-INF-92-50] p 2439 N93-23359
Protocol design and implementation using formal methods
[MEMO-INF-92-43] p 2440 N93-23867
TP protocol from specification to implementation
[MEMO-INF-92-42] p 2443 N93-24582
PROTON BEAMS
Overview of spin physics
[DE93-006412] p 2483 N93-24029
PROTON IMPACT
Electron-electron interactions in fast neutral-neutral collisions
[DE93-004841] p 2481 N93-22743
PROTONS
ESTAR, PSTAR, and ASTAR: Computer programs for calculating stopping-power and range tables for electrons, protons, and helium ions
[PB93-146033] p 2481 N93-22898
Electronic control of pH at sulfonated polyaniline electrodes
[AD-A260074] p 2222 N93-23963
PROTOPLASTS
The USO-concept applied to a biological model experiment p 2162 N93-24379
PROTOSTARS
The stability of thick, self-gravitating disks in protostellar systems p 2551 N93-24185
PROTOTYPES
Initial trials results for image stabilisation using a rugged low noise gyroscope p 2255 N93-22021
Advanced software development workstation. Knowledge base design: Design of knowledge base for flight planning application
[NASA-CR-192818] p 2434 N93-22040
Transportable Applications Environment (TAE) Plus: A NASA tool for building and managing graphical user interfaces p 2444 N93-22150
An integrated information retrieval and document management system p 2530 N93-22156
Video conferencing made easy p 2275 N93-22173
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping p 2259 N93-22174
Design of a portable powered seat lift p 2429 N93-22190
Microcomputer based software for biodynamic simulation p 2429 N93-22191
Results of prototype software development for automation of shuttle proximity operations p 2142 N93-22264
User areas in aircraft cockpit, using methods of rapid prototype development
[MBB-FE-315-S-PUB-0493] p 2426 N93-22389
Plan for the evaluation of the prototype Terminal Doppler Weather Radar (TDWR) system
[DOT/FAA/CT-TN92/44] p 2404 N93-23045
Space biology initiative program definition review. Trade study 2: Prototype utilization in the development of space biology hardware p 2418 N93-23082
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
[AD-A260229] p 2310 N93-24320
The actor model
[AD-A260196] p 2442 N93-24469
PROVING
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
ISY sea surface temperature validation test program in Mutsu Bay (Japan) p 2371 N93-23839
PROXIMITY
GN/C translation and rotation control parameters for AR/C (category 2) p 2142 N93-22263
Ground proximity warning system for use with aircraft having degraded performance
[CA-PATENT-1-295-716] p 2118 N93-24200
PSYCHOLOGICAL TESTS
The study of crew coordination and performance in hierarchical team decision making
[AD-A259514] p 2520 N93-23698
Effects on physiology and performance of wearing the aviator NBC ensemble while flying the UH-60 helicopter flight simulator in a controlled heat environment
[AD-A259909] p 2427 N93-23995
PSYCHOMETRICS
International application of the DLR test-system: Continuation of the cooperation with Iberia in pilot selection
[DLR-FB-92-12] p 2425 N93-24104
CogiMir: A study of cognitive functions in microgravity p 2159 N93-24364
PSYCHOPHYSIOLOGY
On the neural substrates leading to the emergence of mental operational structures p 2453 N93-22355
PUBLIC HEALTH
Framework for decision making: An EPA perspective
[PB93-134369] p 2518 N93-22904
PUBLIC LAW
Federal move to metric: Public Law, DoC and NIST
[PB93-139129] p 2258 N93-23284
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
[PB93-144186] p 2478 N93-24649
PUBLIC RELATIONS
Laser disc for Earth environment data set p 2338 N93-22142
Publicity and public relations p 2516 N93-23145
Outreach and public service p 2517 N93-23147
Communications p 2517 N93-23153
PULSAR MAGNETOSPHERES
Motion of charged particles in pulsar magnetospheres p 2550 N93-24161
PULSARS
Gamma ray pulsars and Geminga
[DE93-005452] p 2559 N93-22749
HST imaging of the binary pulsar PSR1913+16 p 2536 N93-23902
PULSE COMPRESSION
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
Application of Costas codes and quadratic congruential codes to digital pulse compression
[DREO-TN-91-31] p 2271 N93-23726
High-resolution free-electron laser spectroscopy p 2309 N93-24191
PULSE DOPPLER RADAR
Rendezvous radar for the orbital maneuvering vehicle p 2145 N93-22283
PULSE RADAR
Structure and utility of blind speed intervals associated with Doppler measurements of range rate
[DOT/FAA/CT-TN92/27] p 2122 N93-23063
PULSE RATE
Theoretical and experimental investigations of coincidences in Poisson distributed pulse trains and spectral distortion caused by pulse pileup
[ISBN-0-315-60449-2] p 2286 N93-24614
PULSED LASER DEPOSITION
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
[DE93-005474] p 2500 N93-22342
Novel materials synthesis using an intense pulsed ion beam
[DE93-005470] p 2506 N93-23314
PULSED LASERS
Excimer laser surface modification: Process and properties
[DE93-003726] p 2306 N93-22044
Excimer laser processing of backside-illuminated CCDS p 2310 N93-22180
Electro-optic frame photography with pulsed ruby illumination
[DE93-005819] p 2306 N93-22327
Ablation, melting, and smoothing of polycrystalline alumina by pulsed excimer laser radiation
[DE93-005148] p 2227 N93-22496
Self-focusing of broadband laser pulses in dispersive media
[DE93-007369] p 2307 N93-22529
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
[DE93-003865] p 2553 N93-22949
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
[DE93-005420] p 2505 N93-22976
Studies of tunable, high power excimer lasers p 2309 N93-23597
Nondestructive evaluation of electrodeposited chromium
[AD-A259884] p 2321 N93-24020
High-resolution free-electron laser spectroscopy p 2309 N93-24191
Sample positioning in microgravity
[NASA-CASE-NPO-18448-1-CU] p 2253 N93-24600
PULSED RADIATION
Theoretical and experimental investigations of coincidences in Poisson distributed pulse trains and spectral distortion caused by pulse pileup
[ISBN-0-315-60449-2] p 2286 N93-24614
PULTRUSION
Automated manufacturing of continuous fibre composite structures for aerospace applications p 2212 N93-23942
Continuous fiber thermoplastic prepreg
[NASA-CASE-LAR-14459-1] p 2215 N93-24597
PUMPS
Solar pumping: An introduction and update on the technology, performance, costs, and economics
[WORLD BANK TP-168] p 2381 N93-23444
PURIFICATION
Gas source molecular beam epitaxial growth of GaN
[AD-A260524] p 2512 N93-24199
PUSHBROOM SENSOR MODES
New images of the Earth in highest resolution: MOMS-02 on the second German Spacelab mission D2 p 2365 N93-23801
Simulation of MOMS-02 stereo band radiometric capability using field spectroscopy data p 2365 N93-23802

PYRANOMETERS
Evaluation of solar radiation measurement systems: EPRI/NREL
[DE93-000020] p 2380 N93-23304
PYRIDINES
Design of a high activity and selectivity alcohol catalyst
[DE93-008100] p 2225 N93-24575
PYROELECTRICITY
Pyroelectric anemometers and kinetic calorimeters
[PB93-141919] p 2303 N93-23230
PYROHELIOMETERS
Evaluation of solar radiation measurement systems: EPRI/NREL
[DE93-000020] p 2380 N93-23304
PYROLYSIS
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
[PB93-132702] p 2222 N93-23347
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom
[NASA-CR-191106] p 2258 N93-23430
The design and construction of an ion trap based system for laser pyrolysis/mass spectrometry of single organic aerosol particles
[AD-A260455] p 2222 N93-24115
PYROLYTIC GRAPHITE
The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
[DE93-006279] p 2501 N93-22510
PYRUVATES
Biotechnical production and use of pyruvic acid with special reference to coenzyme regeneration
[VTT-PUBS-77] p 2419 N93-23369

Q

Q FACTORS
A survey of quality measures for gray-scale image compression p 2431 N93-24550
Q SWITCHED LASERS
Electro-optic frame photography with pulsed ruby illumination
[DE93-005819] p 2306 N93-22327
QUADRUPOLES
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
[FFI-92/7016] p 2398 N93-24081
QUALIFICATIONS
Design and qualification of the SEU/TD Radiation Monitor chip
[NASA-CR-192797] p 2280 N93-23041
QUALITATIVE ANALYSIS
Cosmic-ray-veto detector system
[DE93-004787] p 2559 N93-22707
QUALITY
Relating porosity and mechanical properties in spray formed alloy 625
[AD-A260341] p 2234 N93-24269
QUALITY CONTROL
Printed wiring assembly cleanliness
[DE93-006040] p 2277 N93-22524
Development of size-specific data from particulate control technology research reports
[PB93-131456] p 2384 N93-22922
Total Quality Management: Good enough for government work
[AD-A259847] p 2520 N93-23954
QUANTILES
Change PP plot and continuous sample quantile function
[AD-A259833] p 2472 N93-23460
QUANTITATIVE ANALYSIS
A new index for the crevice corrosion resistance of materials
[AD-A260437] p 2233 N93-24112
QUANTUM CHROMODYNAMICS
Color sextet quarks and new high-energy interactions
[DE93-004187] p 2478 N93-22059
A study of four-jet events and search for double parton interactions at square root of s = 1.8 TeV
[DE93-005973] p 2480 N93-22693
Rigorous QCD predictions for decays of P-wave quarkonia
[DE93-004853] p 2481 N93-22744
Physics from photon and lepton-pair spectra
[DE93-003083] p 2481 N93-22752
Theoretical studies in elementary particle physics
[DE93-005923] p 2481 N93-22883
Particle physics
[DE93-006894] p 2482 N93-22992
The QCD Teraflops Project
[DE93-006386] p 2447 N93-23026
QUANTUM EFFICIENCY
Observation of a charge limit for photocathode electron guns
[DE93-006948] p 2485 N93-24464
QUANTUM ELECTRODYNAMICS
A detailed study of nonperturbative solutions of two-body Dirac equations
[DE93-004794] p 2468 N93-22965
QUANTUM ELECTRONICS
Solid state research
[AD-A259726] p 2509 N93-24024
Quantum mechanics of electrons in crystals with graded composition
[AD-A260294] p 2512 N93-24262
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
[AD-A260184] p 2484 N93-24467
QUANTUM MECHANICS
Electromagnetism from counting
[DE93-006930] p 2261 N93-22582
Review of quantum computation
[DE93-003735] p 2474 N93-22919
Configuration space Faddeev calculations
[DE93-006080] p 2475 N93-23337
Quantum mechanics of electrons in crystals with graded composition
[AD-A260294] p 2512 N93-24262
Anti-gravity: The key to 21st century physics
[DE93-006929] p 2475 N93-24463
QUANTUM THEORY
Quantum theory of multiwave mixing with applications to squeezing in both atomic and semiconductor media
[AD-A259875] p 2514 N93-22732
Summary of the 1992 ACP Winter Conference on Future Trends in Low Temperature Physics
[AD-A259809] p 2508 N93-23643
Investigations in dynamics of gauge theories in theoretical particle physics
[DE93-007260] p 2484 N93-24448
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
[AD-A260184] p 2484 N93-24467
QUANTUM WELLS
Optical studies of laterally confined quantum well structures grown on ex-situ and in-situ patterned substrates
[AD-A260275] p 2511 N93-24167
Ion beam mixing in multi-quantum well structures
[AD-A259772] p 2516 N93-24509
QUARK MODELS
A detailed study of nonperturbative solutions of two-body Dirac equations
[DE93-004794] p 2468 N93-22965
QUARKS
Color sextet quarks and new high-energy interactions
[DE93-004187] p 2478 N93-22059
Charm physics at Fermilab E791
[DE93-006020] p 2480 N93-22543
Inclusive J/psi, psi(2S) and b-quark production in (-p)p collisions at square root of s - 1.8 TeV
[DE93-004739] p 2481 N93-22739
Physics from photon and lepton-pair spectra
[DE93-003083] p 2481 N93-22752
Theoretical studies in elementary particle physics
[DE93-005923] p 2481 N93-22883
A detailed study of nonperturbative solutions of two-body Dirac equations
[DE93-004794] p 2468 N93-22965
QUASARS
Gravitational lenses p 2534 N93-23883
QUENCHING (ATOMIC PHYSICS)
Reduced mass persistent switches for large superconducting magnets in space
[DE93-004782] p 2474 N93-22047
Reconstruction of twist grain boundaries in gold
[DE93-004861] p 2226 N93-22049
QUERY LANGUAGES
An integrated information retrieval and document management system p 2530 N93-22156
A proposal of fuzzy connective with learning function and its application to fuzzy retrieval system p 2450 N93-22211
Parallel evaluation of deductive database queries p 2527 N93-23503
QUINONES
The ground and excited state electronic structures of ruthenium quinones and related species
[AD-A259940] p 2223 N93-24155

R

RADAR
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604
RADAR ANTENNAS
Data selection for fast projection techniques: A comparative study of direction finding performance
[AD-A259916] p 2262 N93-22814
RADAR ASTRONOMY
The Goldstone solar system radar: A science instrument for planetary research
[NASA-CR-192793] p 2261 N93-22478
RADAR CROSS SECTIONS
Focused two-dimensional radar imaging using coherent time domain signals
[ESA-TT-1272] p 2263 N93-23331
Technical Digest. Detection systems and technology, September 1992
[AD-A259812] p 2271 N93-23670
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
Scientific visualization of volumetric radar cross section data
[AD-A259586] p 2272 N93-24065
RADAR DATA
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
[ESA-TT-1245] p 2339 N93-22436
A method for estimating future runway capacity of German airports for single runway systems
[DLR-FB-91-38] p 2132 N93-22666
Suppression of power line harmonic interference in HF surface-wave radar
[AD-A259917] p 2273 N93-24563
RADAR DETECTION
Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682
RADAR EQUIPMENT
Air traffic operational evaluation plan for the prototype Airport Surveillance Radar Wind Shear Processor (ASR-WSP) at Orlando International Airport
[DOT/FAA/CT-TN92/45] p 2404 N93-23064
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
[AD-A259834] p 2343 N93-23461
RADAR GEOLOGY
Geological applications of space SAR data p 2339 N93-22440
Geocoded products of future radar sensors p 2340 N93-22441
RADAR IMAGERY
Geocoded products of future radar sensors p 2340 N93-22441
RLE progress report no. 133, 1 January - 31 December 1990
[NASA-CR-192144] p 2263 N93-23195
Focused two-dimensional radar imaging using coherent time domain signals
[ESA-TT-1272] p 2263 N93-23331
Automatic feature extraction and localization using data fusion of radar and infrared images p 2270 N93-23628
Water regions extraction from radar imagery using a neural network
[AD-A259517] p 2356 N93-23668
Operational geocoding of ERS-1 SAR imagery p 2359 N93-23765
One-class classifier networks for target recognition applications
[DE93-006288] p 2271 N93-24043
Development of laser radar ATR algorithm. Phase 2: Military objects
[AD-A237544] p 2272 N93-24120
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
[AD-A259944] p 2273 N93-24243
RADAR MAPS
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
The ERS-1 radarmaps of Germany and the Antarctic Peninsula p 2352 N93-23562
RADAR MEASUREMENT
An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
[ORAE-R107] p 2133 N93-23114
The vertical profile of reflectivity and errors in radar estimates of rainfall p 2406 N93-23350

Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351
The comparison of satellite radar altimeter derived heights with global digital terrain model heights p 2355 N93-23584
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
A study of high-latitude auroral arcs using radar, optical, and in situ techniques p 2399 N93-24183

RADAR NAVIGATION
Radar seeker based autonomous navigation update system using topography feature matching techniques p 2256 N93-22030
Rendezvous radar for the orbital maneuvering vehicle p 2145 N93-22283

RADAR RANGE
Focused two-dimensional radar imaging using coherent time domain signals
[ESA-TT-1272] p 2263 N93-23331
Development of laser radar ATR algorithm. Phase 2: Military objects
[AD-A237544] p 2272 N93-24120

RADAR RECEPTION
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761

RADAR RESOLUTION
Focused two-dimensional radar imaging using coherent time domain signals
[ESA-TT-1272] p 2263 N93-23331

RADAR SCATTERING
The spatial and temporal characteristics of high frequency auroral backscatter p 2266 N93-23604

RADAR SIGNATURES
Detectability of high power aircraft
[MBB-FE-S-PUB-0490] p 2262 N93-22682

RADAR TARGETS
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
[AD-D015622] p 2272 N93-24232

RADAR TRACKING
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
Multivariable frequency response methods for optimal Kalman-Bucy filters with applications to radar tracking systems p 2255 N93-22024
An investigation of air transportation technology at the Massachusetts Institute of Technology, 1991-1992 p 2105 N93-22562

RADAR TRANSMISSION
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
Electromagnetic radiating source elimination (ERASE) program p 2254 N93-22019

RADIANCE
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment
[AD-A259986] p 2401 N93-24424

RADIANT HEATING
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
[NASA-TP-3257] p 2297 N93-24096

RADIATION ABSORPTION
Anisotropic reflections in mountainous terrain to determine the absorption of solar radiation from satellite data
[ESA-TT-1262] p 2558 N93-24633

RADIATION BELTS
On the dynamics of space plasma
[AD-A259898] p 2497 N93-23987

RADIATION COUNTERS
Physics studies with ICARUS and a hybrid ionization and scintillation fiber detector
[DE93-003034] p 2482 N93-22986
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
[DE93-005457] p 2482 N93-23244
GALLEX: First results and implications for neutrino physics
[DE93-004908] p 2483 N93-23977

RADIATION DAMAGE
Implications of defect clusters formed in cascades on free defect generation and microstructural development
[DE93-005551] p 2500 N93-22344
Damage analysis and fundamental studies for fusion reactor materials development
[DE93-008283] p 2499 N93-24516

RADIATION DETECTORS
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
High energy physics program at Texas A and M University
[DE93-005112] p 2485 N93-23324

RADIATION DOSAGE
P0004-1 quick look
[NASA-CR-192459] p 2193 N93-23009
Design and qualification of the SEU/TD Radiation Monitor chip
[NASA-CR-192797] p 2280 N93-23041

RADIATION EFFECTS
Excimer laser surface modification: Process and properties
[DE93-003726] p 2306 N93-22044
Generalized melting criterion for amorphization
[DE93-005557] p 2226 N93-22345
Laser safety training programs for a large and diverse research and development laboratory
[DE93-006291] p 2307 N93-22546
Postirradiation deformation behavior in ferritic Fe-Cr alloys
[DE93-004833] p 2229 N93-22881
Mechanical properties of martensitic alloy AISI 422
[DE93-004834] p 2229 N93-22882
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
[DE93-005560] p 2230 N93-22943
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
[DE93-005558] p 2230 N93-22977
P0004-1 quick look
[NASA-CR-192459] p 2193 N93-23009
Enhanced vortex pinning and critical current density in proton-irradiated YBa2Cu3O(7-delta) thin films
[DE93-005367] p 2507 N93-23326
Effects of UV-B and global climate change on rice
[PB93-135622] p 2388 N93-23874
Potential human health effects associated with power frequency electric and magnetic fields
[PB93-132678] p 2423 N93-24590

RADIATION HARDENING
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
[DE93-006679] p 2278 N93-22577

RADIATION HAZARDS
Laser safety training programs for a large and diverse research and development laboratory
[DE93-006291] p 2307 N93-22546
P0004-1 quick look
[NASA-CR-192459] p 2193 N93-23009
FALCON remote laser alignment system
[DE93-006448] p 2309 N93-23693

RADIATION MEASUREMENT
Evaluation of solar radiation measurement systems: EPRI/NREL
[DE93-000020] p 2380 N93-23304
Long period pulsation events in electron precipitation and magnetic fields at the South Pole p 2394 N93-23387
Design and implementation of a computer based site operations log for the ARM Program
[DE93-002834] p 2400 N93-24255
DosiMir: Radiation measurements inside the Soviet Space Station Mir, first results p 2160 N93-24371

RADIATION PROTECTION
Applicability of trends in nuclear safety analysis to space nuclear power systems
[DE93-003169] p 2205 N93-24497

RADIATION SHIELDING
Green's function methods in heavy ion shielding
[NASA-TP-3311] p 2485 N93-22488
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
[NASA-TM-4443] p 2559 N93-23396

RADIATION SOURCES
Electromagnetic radiating source elimination (ERASE) program p 2254 N93-22019
Passive (self-powered) fiber-optic sensors
[DE93-005761] p 2486 N93-22762

RADIATION SPECTRA
Theoretical and experimental investigations of coincidences in Poisson distributed pulse trains and spectral distortion caused by pulse pileup
[ISBN-0-315-60449-2] p 2286 N93-24614

RADIATION TRANSPORT
PMC: A shared short-cut to portable parallel power
[DE93-005815] p 2447 N93-22868
Monte Carlo variance reduction approaches for non-Boltzmann tallies
[DE93-005665] p 2467 N93-22910
A local exponential transform method for global variance reduction in Monte Carlo transport problems
[DE92-018992] p 2468 N93-22926
Design and implementation of a computer based site operations log for the ARM Program
[DE93-002834] p 2400 N93-24255

RADIATIVE HEAT TRANSFER
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
[NASA-TM-105914] p 2125 N93-22588
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
[PB93-138915] p 2297 N93-24141

RADIATIVE TRANSFER
Analysis of IUE observations of hydrogen in comets
[NASA-CR-192693] p 2548 N93-23231
Active and passive remote sensing of ice
[AD-A259765] p 2415 N93-24026
Determination of the optical properties of particles for solar heated fluidized beds
[DLR-FB-92-15] p 2490 N93-24641

RADICALS
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
[DE93-005883] p 2235 N93-22422
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
[DE93-007013] p 2218 N93-22515
Photoabsorption and photodissociation of molecules important in the interstellar medium
[NASA-CR-192829] p 2552 N93-24488

RADIO ALTIMETERS
ESA ERS 1 product specification
[ESA-SP-1149] p 2200 N93-23389
The radar altimeter instrument for POEM-1 mission p 2363 N93-23788

RADIO ANTENNAS
High resolution sampled aperture array direction finding at HF p 2267 N93-23611

RADIO ASTRONOMY
Observations and modeling of the dust and gas in an isolated diffuse interstellar cloud p 2549 N93-23722

RADIO COMMUNICATION
High Arctic high frequency radio communications and a seven day polar cap absorption event
[DREP-TM-91-18] p 2264 N93-23344
Airline applications in air-/ground communication using advanced technologies p 2275 N93-23514
Communication interference/jamming and propagation analysis system and its application to radio location p 2269 N93-23621
Airborne system for detection and location of radio interference sources p 2269 N93-23622
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
[AD-A259781] p 2557 N93-23973

RADIO DIRECTION FINDERS
Data selection for fast projection techniques: A comparative study of direction finding performance
[AD-A259916] p 2262 N93-22814
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Bearing determination and bearing quality indication from a goniometric HF DF system p 2268 N93-23617
Angle of arrival characteristics of ionospheric skywave signals p 2268 N93-23618

RADIO EQUIPMENT
Remotely piloted vehicle control and interface system
[AD-D015618] p 2132 N93-24228
Step stress testing of receiver/transmitter units, part 1
[AD-A260182] p 2273 N93-24318

RADIO FREQUENCIES
NTIA Microcomputer Spectrum Analysis Models (MSAM). Version 4.0, August 1992
[PB93-108348] p 2432 N93-23269
Airborne system for detection and location of radio interference sources p 2269 N93-23622
Radio frequency cable to optical fiber cable
[AD-D015620] p 2284 N93-24230
Step stress testing of receiver/transmitter units, part 1
[AD-A260182] p 2273 N93-24318
The process of consensus on EMF: SAB review of the EPA draft document on EMF and cancer
[DE93-007183] p 2273 N93-24466

RADIO FREQUENCY DISCHARGE
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
[NASA-TM-104765] p 2492 N93-22475

RADIO FREQUENCY HEATING
Low frequency RF current drive
[DE93-005130] p 2260 N93-22421
Fusion plasma theory. Task 3: Auxiliary radiofrequency heating of tokamaks
[DE93-005129] p 2493 N93-22796

An ICRF antenna edge plasma density profile diagnostic for DIII-D
[DE93-006729] p 2498 N93-24328
Application of microwave heating for fabrication of silicon nitride ceramics
[DE93-006741] p 2242 N93-24330
Chemical vapor infiltration with microwave heating
[DE93-005458] p 2243 N93-24445

RADIO FREQUENCY IMPEDANCE PROBES
Traceability for radio frequency coaxial line standards
[NPL-DES-114] p 2277 N93-22451

RADIO FREQUENCY INTERFERENCE
Communication interference/jamming and propagation analysis system and its application to radio location
p 2269 N93-23621
Airborne system for detection and location of radio interference sources p 2269 N93-23622

RADIO NAVIGATION
The role of GPS in a future radionavigation mix: Trends in the 1992 US Federal Radionavigation Plan
p 2124 N93-23509
A European radionavigation plan?
p 2124 N93-23513

RADIO OBSERVATION
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
[PB93-141703] p 2558 N93-24175

RADIO RECEIVERS
Simulation of a NC-FSK maximum likelihood receiver for fast Rayleigh fading
[ISBN-0-315-59024-6] p 2274 N93-24627

RADIO RECEPTION
Utilization of a reception network of the Losquet Island retrodiffusion probe in radiogoniometry
p 2269 N93-23619

RADIO SIGNALS
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
[ACTA-POL-SCAND-EL-69] p 2264 N93-23367
Radiolocation Techniques
[AGARD-CP-528] p 2265 N93-23598
Irregular media effects on radiowave signals used in navigation and positioning systems
p 2266 N93-23606
The influence of propagation on high frequency radiogoniometry and single station location
p 2266 N93-23607
A new passive SSL technique for HF radiolocation
p 2267 N93-23609
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Large bearing errors observed at a high latitude DF site p 2268 N93-23615
Communication interference/jamming and propagation analysis system and its application to radio location
p 2269 N93-23621

RADIO SOURCES (ASTRONOMY)
Gamma ray pulsars and Geminga
[DE93-005452] p 2559 N93-22749
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933

RADIO TRACKING
Test results of the advanced translator processing system p 2269 N93-23620

RADIO TRANSMISSION
Source mechanisms and radio effects of ionospheric plasma
[AD-A259743] p 2395 N93-23480
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
A new passive SSL technique for HF radiolocation
p 2267 N93-23609
Utilization of a reception network of the Losquet Island retrodiffusion probe in radiogoniometry
p 2269 N93-23619

RADIO TRANSMITTERS
Propagation characteristics of the ionospheric transmission window relating to long wave radio location issues p 2265 N93-23600
Propagation effects on HF direction finding
p 2265 N93-23602
The influence of propagation on high frequency radiogoniometry and single station location
p 2266 N93-23607
A new passive SSL technique for HF radiolocation
p 2267 N93-23609
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610

RADIO WAVES
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
Data compression for the Cassini radio and plasma wave instrument p 2432 N93-24555

RADIOACTIVE CONTAMINANTS
Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
[OEFZS-4632] p 2375 N93-24456

RADIOACTIVE DECAY
Direct searches for neutrino mass
[DE93-003867] p 2479 N93-22068
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
Meson form-factors and wave-functions with Wilson fermions
[DE93-003859] p 2479 N93-22542
Charm physics at Fermilab E791
[DE93-006020] p 2480 N93-22543
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950
Particle physics
[DE93-006894] p 2482 N93-22992
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
[DE93-005457] p 2482 N93-23244

RADIOACTIVE ISOTOPES
A massive neutrino in nuclear beta decay?
[DE93-004718] p 2479 N93-22333
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
[DE93-004585] p 2217 N93-22339
A massive neutrino in nuclear beta decay?
[DE93-004706] p 2482 N93-22950

RADIOACTIVE MATERIALS
Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237

RADIOACTIVE WASTES
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
[DE93-002162] p 2312 N93-22891

RADIOGONIOMETERS
The influence of propagation on high frequency radiogoniometry and single station location
p 2266 N93-23607
Utilization of a reception network of the Losquet Island retrodiffusion probe in radiogoniometry
p 2269 N93-23619

RADIOGRAPHY
Localized damage development in notched composite plates subjected to compressive loading
[CTN-93-60663] p 2209 N93-23113
Obtaining high-resolution images of ceramic from 3-D x-ray microtomography by region-of-interest reconstruction
[DE93-006796] p 2243 N93-24461

RADIOMETERS
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR
p 2337 N93-22141
MOS-1 p 2340 N93-22442
A bolometric radiometer for investigations in cosmology p 2303 N93-22684
Evaluation of solar radiation measurement systems: EPRI/NREL
[DE93-000020] p 2380 N93-23304
Automatic feature extraction and localization using data fusion of radar and infrared images
p 2270 N93-23628
Earth's mysterious atmosphere. ATLAS 1: Teachers guide with activities
[NASA-EP-282] p 2396 N93-23733
Method for enhancing of the spatial resolution of the passive radiometric systems p 2365 N93-23799
Investigation of aerothermodynamics and optical radiation in the AFE hypersonic flow field
[NASA-CR-192844] p 2114 N93-24475

RADIOMETRIC CORRECTION
Method for enhancing of the spatial resolution of the passive radiometric systems p 2365 N93-23799
Assessment and correction of the impact of topography and atmosphere on remote sensing forest mapping of alpine regions p 2370 N93-23832
Remote sensing experiment FEM: A multisensoral dataset for radiometric and geometric analysis
p 2158 N93-24361

RADIOSONDES
Observed annual and interannual variations in tropospheric water
[PB93-123313] p 2411 N93-24588

RADOMES
Theoretical errors on airborne measurements of: Static pressure, impact temperature, air flow angle, air flow speed
[PB93-136406] p 2405 N93-23232

RAILGUN ACCELERATORS
30 KA, 5000 V solid-state opening switch for inductive energy storage
[AD-A259763] p 2281 N93-23483
A multiple armature railgun launcher
[AD-A259768] p 2171 N93-23486

RAIN
The vertical profile of reflectivity and errors in radar estimates of rainfall p 2406 N93-23350
Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351
Use of Special Sensor Microwave/Imager (SSM/I) for estimation of precipitation features in a semi-arid, mountain region: A case study of southwest Saudi Arabia
p 2407 N93-23721
Dynamic and thermodynamic characteristics of a pre-frontal convective rainband in northern Taiwan determined form Tamex data p 2409 N93-24162
Climatology of station storm rainfall in the continental United States: Parameters of the Bartlett-Lewis and Poisson rectangular pulses models
[NASA-CR-192968] p 2411 N93-24523
Equatorial atmospheric weather regimes: Their structure and role p 2411 N93-24580

RAIN FORESTS
A strategy for monitoring the tropical forest with ERS-1 SAR imagery p 2358 N93-23758
Training courses on application of remote sensing and geographic information systems in monitoring and managing tropical rainforests and natural environment
p 2367 N93-23812

RAMAN SPECTRA
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
[DE93-005450] p 2503 N93-22748
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
[AD-A260381] p 2484 N93-24275
Compositional superlattices based on PtCl/PtBr MX materials
[DE93-003700] p 2513 N93-24496
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
[ECL-91-21] p 2225 N93-24623

RAMAN SPECTROSCOPY
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
[DE93-005450] p 2503 N93-22748
The ground and excited state electronic structures of ruthenium quinones and related species
[AD-A259940] p 2223 N93-24155
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
[AD-A260381] p 2484 N93-24275
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
[ECL-91-21] p 2225 N93-24623

RANDOM ACCESS MEMORY
Self-checking on-line testable static RAM
[NASA-CASE-NPO-17939-1-CU] p 2432 N93-22032

RANDOM PROCESSES
PROMISS user manual, appendix 1
[NASA-CR-192990] p 2333 N93-24530

RANDOM VARIABLES
Transformations of gaussian random fields and a test for independence of a survival time from a covariate
[AD-A260442] p 2472 N93-24114

RANDOM VIBRATION
High-voltage failure mechanisms in liquid-filled, Fluorinert FC-40, capacitors
[DE93-006286] p 2282 N93-23677

RANGE (EXTREMES)
ESTAR, PSTAR, and ASTAR: Computer programs for calculating stopping-power and range tables for electrons, protons, and helium ions
[PB93-146033] p 2481 N93-22898

RANGEFINDING
Radar seeker based autonomous navigation update system using topography feature matching techniques
p 2256 N93-22030
Multi-beam range imager for autonomous operations
p 2310 N93-22160

RANGELANDS
Contribution of remote sensing and GIS for rangeland management in the region of Ouarzazate (Morocco)
p 2367 N93-23814

RAPID QUENCHING (METALLURGY)
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
| DE93-004445 | p 2503 N93-22726
Microstructure of rapidly-solidified lithium powders
| DE93-004765 | p 2229 N93-22880
A study into the effects of electric fields and currents on the aging and quench hardening of steels
| AD-A260228 | p 2233 N93-24098
RAPID TRANSIT SYSTEMS
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903
RARE EARTH COMPOUNDS
High temperature rare earth and Si-Ge thermoelectric materials
| DE93-006913 | p 2513 N93-24462
RAREFIED GAS DYNAMICS
SUMS experiment flight results on STS-35
| NASA-TM-107736 | p 2201 N93-23407
The theory behind the SOCRATES code
| AD-A259987 | p 2196 N93-24298
RAREFIED GASES
Atmospheric transmission of polar meteorites
| ESA-TT-1283 | p 2547 N93-23206
RASTER SCANNING
The promise of raster data processing in digital terrain modelling p 2356 N93-23585
RATES (PER TIME)
A method for estimating future runway capacity of German airports for single runway systems
| DLR-FB-91-38 | p 2132 N93-22666
Analysis of automated fatigue crack growth rate data
| DE93-752853 | p 2324 N93-22771
RATINGS
An environmental rating for heat pump equipment
| DE93-004526 | p 2379 N93-22983
RATIONAL FUNCTIONS
A comparison of polynomial and rational NARMAX models for nonlinear system identification
| RR-444 | p 2469 N93-23374
RAYLEIGH WAVES
A systematic study of the effects of crust and upper mantle structure on regional seismograms
| AD-A260231 | p 2399 N93-24086
RDX
Development of rate expressions for the thermal decomposition of RDX
| DE93-005345 | p 2244 N93-22502
REACTING FLOW
Simulation of a particle-laden combustion flow in an MHD second stage combustor
| DE93-004244 | p 2491 N93-22065
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
| NASA-CR-185677 | p 2109 N93-22802
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481
High resolution measurements of mixing and reaction processes in turbulent flows
| AD-A259952 | p 2298 N93-24246
Hypersonic shock/boundary-layer interaction database
| NASA-CR-177577 | p 2299 N93-24526
REACTION KINETICS
Combustion-related studies using weakly-bonded complexes
| DE93-005250 | p 2217 N93-22415
Development of rate expressions for the thermal decomposition of RDX
| DE93-005345 | p 2244 N93-22502
Investigation of the kinetics of surface-limited thin film growth of SiGe alloys
| DE93-005419 | p 2502 N93-22538
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
| DE93-006742 | p 2208 N93-22578
Mechanisms and enhancement of flame stabilization
| DE93-006467 | p 2219 N93-22709
Analysis of upward flame spread
| DE93-752850 | p 2257 N93-22770
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
| DE93-007258 | p 2219 N93-22824
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
| DE93-005560 | p 2230 N93-22943
Thermodynamic and stochastic theory of hydrodynamic and power-producing processes
| DE93-006891 | p 2515 N93-23028
Design of gasifiers to optimize fuel cell systems
| DE93-000219 | p 2379 N93-23049
Chemical kinetics and photochemical data for use in stratospheric modeling
| NASA-CR-192795 | p 2392 N93-23124
Theory of the dissociation dynamics of small molecules on metal surfaces: Finite temperature studies
| DE93-005870 | p 2482 N93-23298
Spectroscopy and kinetics of combustion gases at high temperatures
| DE93-006892 | p 2221 N93-23340
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
| PB93-132702 | p 2222 N93-23347
Reacting liquid monopropellant sprays: Experiments with high velocity full cone sprays in 33 MPa, 500 C nitrogen
| AD-A259799 | p 2245 N93-23456
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
| ONERA-P-1992-3 | p 2309 N93-24137
High resolution measurements of mixing and reaction processes in turbulent flows
| AD-A259952 | p 2298 N93-24246
Laser excitation and chemi-ionization of combustion species
| AD-A260120 | p 2224 N93-24414
Luminescence and picosecond photo-induced absorption of polyaniline
| AD-A260002 | p 2242 N93-24436
Determination of rates of reaction in the gas-phase in the troposphere. Theory and practice. 5. Rate of indirect photoreaction
| PB93-149334 | p 2402 N93-24569
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
| ECL-91-21 | p 2225 N93-24623
REACTION PRODUCTS
Development of rate expressions for the thermal decomposition of RDX
| DE93-005345 | p 2244 N93-22502
REACTIVITY
Reactive control and reasoning assistance for scientific laboratory instruments p 2465 N93-22186
Selective reactivity, ultrafast energy transfer and the development of chemically pumped visible lasers
| AD-A260123 | p 2309 N93-24071
REACTOR CORES
Automated technologies needed to prevent radioactive materials from reentering the atmosphere p 2137 N93-22237
REACTOR DESIGN
Biases in Monte Carlo eigenvalue calculations
| DE93-004189 | p 2471 N93-22061
Plasma edge diagnostics p 2495 N93-23261
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
| NASA-CR-191080 | p 2204 N93-23876
REACTOR MATERIALS
Evaluation of ceramic materials for an advanced steam-methane reformer
| DE93-005931 | p 2235 N93-22329
Mechanical properties of martensitic alloy AISI 422
| DE93-004834 | p 2229 N93-22882
Tritium permeation model for plasma facing components
| DE93-007044 | p 2499 N93-24465
Damage analysis and fundamental studies for fusion reactor materials development
| DE93-008283 | p 2499 N93-24516
REACTOR SAFETY
Immunizing digital systems against electromagnetic interference
| DE93-005935 | p 2271 N93-24041
Applicability of trends in nuclear safety analysis to space nuclear power systems
| DE93-003169 | p 2205 N93-24497
Analysis of complex systems using neural networks
| DE93-003541 | p 2464 N93-24514
REACTOR TECHNOLOGY
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
| DE93-006816 | p 2480 N93-22714
REAL TIME OPERATION
Advances in automatic electro-optical tracking systems p 2254 N93-22020
Multi-window registration algorithm for automatic detection and tracking of moving targets p 2255 N93-22022
The Missle-Borne Integrated Network Demonstration Program p 2255 N93-22023
Multi-beam range imager for autonomous operations p 2310 N93-22160
Automated real-time software development p 2445 N93-22168
Reactive control and reasoning assistance for scientific laboratory instruments p 2465 N93-22186
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193
Predictive sensor method and apparatus p 2305 N93-22202
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
The real-time operations of the Space Shuttle Orbiter during rendezvous and proximity operations p 2139 N93-22249
A PARC system for terminal docking p 2141 N93-22259
Office of Space Flight standard spaceborne Global Positioning System user equipment project p 2148 N93-22301
Photonic correlator pattern recognition: Application to autonomous docking p 2148 N93-22303
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking p 2151 N93-22316
Demonstration plan for real time receiving and processing of flight data from the space transportation system
| NASA-TM-107725 | p 2152 N93-22468
Real-time transmission of digital video using variable-length coding
| NASA-TM-106092 | p 2261 N93-22483
Occurrence Reporting and Processing System (ORPS) lessons learned: Tools to improve workplace performance
| DE93-005241 | p 2522 N93-22498
Parallel processor for real-time structural control
| DE93-006284 | p 2446 N93-22545
Hazard evaluation and operational cockpit display of ground-measured windshear data
| AIAA PAPER 90-0566 | p 2105 N93-22564
Opportunities and challenges in avionics integration, INS/GPS: A case study p 2119 N93-22782
Flight evaluation of differential GPS aided inertial navigation systems p 2120 N93-22790
Data ingest and objective analysis for the PSU/NCAR modeling system. Programs DATAGRID and RAWINS
| PB93-138519 | p 2393 N93-23252
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
| PB93-118586 | p 2405 N93-23333
Autonomus obstacle avoidance using visual fixation and looming
| PB93-146660 | p 2459 N93-23442
Design and analysis of scheduling policies for real-time computer systems
| AD-A259806 | p 2448 N93-23641
The Oden real time ice monitoring demonstration p 2371 N93-23837
Real-time signal processing systems
| AD-A259548 | p 2272 N93-24084
Modeling and control of flexible manipulators p 2318 N93-24182
Training high performance skills using above real-time training
| NASA-CR-192616 | p 2425 N93-24192
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
| AD-A260229 | p 2310 N93-24320
Operator interface assessment for the sensor fusion flight demonstration program
| AD-A260235 | p 2129 N93-24416
REATTACHED FLOW
The effect of large-scale unsteady motion on a turbulent reattaching shear layer: Application to the supersonic compression ramp p 2114 N93-24215
RECEIVERS
Current performance and potential improvements in solar thermal industrial heat
| DE93-000048 | p 2377 N93-22927
Focal plane arrays for submillimeter waves using two-dimensional electron gas elements: A grant under the Innovative Research Program
| NASA-CR-192271 | p 2263 N93-23062
Testing of a GPS receiver GLOBUS AN 2000 of SEL: A study of selective availability
| DLR-MITT-92-07 | p 2123 N93-24138
Analysis of DGPS MSK receivers in a non-gausian noise environment
| PB93-152866 | p 2123 N93-24310
RECONNAISSANCE SPACECRAFT
A conceptual design analysis of an air launched anti-satellite missile system
| ETN-93-93487 | p 2126 N93-23372

RECONSTRUCTION
Reconstruction of twist grain boundaries in gold
| DE93-004861 | p 2226 N93-22049
RECORDS MANAGEMENT
Occurrence Reporting and Processing System (ORPS) lessons learned: Tools to improve workplace performance
| DE93-005241 | p 2522 N93-22498
Searching the Occurrence Reporting and Processing Systems (ORPS) database
| DE93-005242 | p 2523 N93-22499
RECOVERY
Constraint checking during error recovery
p 2445 N93-22169
RECRYSTALLIZATION
Recrystallization of amorphous and nanocrystalline NdBa2Cu3O(7-x) and GdBa2Cu3O(7-x)
| DE93-004469 | p 2508 N93-23950
RECTANGULAR PANELS
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704
RECTENNAS
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas)
p 2264 N93-23504
Microwave-powered aircraft
| CA-PATENT-1-295-019 | p 2128 N93-24591
RECTIFIERS
Modelling a single phase voltage controlled rectifier using Laplace transforms
| NASA-TM-106005 | p 2474 N93-23016
RECURSIVE FUNCTIONS
Adaptive meshing in solids
| DE93-003238 | p 2287 N93-22331
A novel recursive partitioning criterion
| AD-A259921 | p 2464 N93-24564
REDUCED GRAVITY
NASA PPO microgravity projects support
| NASA-CR-192460 | p 2246 N93-22038
Space Station Furnace Facility preliminary Project Implementation Plan (PIP). Volume 2, appendix 2
| NASA-CR-192474 | p 2302 N93-22347
Space Station Furnace Facility Core. Requirements definition and conceptual design study. Volume 2: Technical report. Appendix 6: Technical summary reports
| NASA-CR-192477 | p 2302 N93-22349
Space Station Freedom Utilization Conference
| NASA-TM-108742 | p 2182 N93-22606
Space Station Freedom Utilization Conference: Executive summary p 2182 N93-22607
Opportunities for research on Space Station Freedom
p 2183 N93-22610
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Commercial researcher perspective
p 2184 N93-22615
Biomedical Monitoring and Countermeasures Facility
p 2186 N93-22624
Gas-Grain Simulation Facility (GGSF)
p 2186 N93-22626
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
Precursor SSF utilization: The MODE experiments
p 2188 N93-22633
Potential pressurized payloads: Fluid and thermal experiments p 2189 N93-22639
Zero-G life support for Space Station Freedom
p 2189 N93-22640
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642
Space Station Freedom combustion research
p 2190 N93-22643
Microgravity fluid physics research in the Space Station Freedom era p 2191 N93-22644
Materials science research in microgravity
p 2191 N93-22645
Protein crystal growth in microgravity
p 2191 N93-22646
Office of Commercial Programs' research activities for Space Station Freedom utilization p 2191 N93-22647
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change
p 2191 N93-22648
Commercial opportunities in bioseparations and physiological testing aboard Space Station Freedom
p 2192 N93-22649
Materials dispersion and biodynamics project research
p 2192 N93-22651
Integration and use of Microgravity Research Facility: Lessons learned by the crystals by vapor transport experiment and Space Experiments Facility programs
p 2193 N93-22652
Fluids in Space
| ESA-SP-353 | p 2246 N93-22830
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
The scientific microgravity fluid mechanics program of ZARM p 2247 N93-22832
Continuous-flow electrophoresis: Hydrodynamics, heat and mass transfer with and without gravity
p 2247 N93-22836
Adsorption kinetics at liquid-liquid interfaces in microgravity conditions. Experimental approach and theoretical background p 2248 N93-22843
Boiling under microgravity conditions
p 2249 N93-22847
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Forced convection boiling and condensation in microgravity: A critical appraisal of the literature
p 2249 N93-22849
Burning characteristics of n-heptane droplets with negligible buoyancy effects p 2226 N93-22854
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation
p 2251 N93-22857
Investigation of hot wire anemometers at very low velocities under microgravity p 2251 N93-22858
Polyreactions in microgravity environment
p 2251 N93-22859
Experimental investigation of the influence of the temperature gradient on the thermocapillary convection in spherical drops under low-gravity
p 2251 N93-22862
Thermocapillary instabilities in the presence of a homogeneous magnetic field p 2252 N93-22865
Materials science on parabolic aircraft: The FY 1987-1989 KC-135 microgravity test program
| NASA-TM-4456 | p 2252 N93-23171
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
Microgravity science and applications: Program tasks and bibliography for FY 1992
| NASA-TM-4469 | p 2253 N93-23428
Proposed ground-based control of accelerometer on Space Station Freedom
| NASA-TM-105960 | p 2201 N93-23738
Usage of small-sized aerospace plane in the infrastructure of space research of the Earth
p 2362 N93-23781
User support for the Spacelab mission D-2
p 2155 N93-24340
LOGION: Operation of a liquid metal ion emitter module under microgravity p 2158 N93-24359
CogiMir: A study of cognitive functions in microgravity
p 2159 N93-24364
AudiMir: Directional hearing at microgravity
p 2159 N93-24365
Optovert: An AustroMir-1991 experiment. Orientational effects from optokinetic stimulation
p 2160 N93-24366
Monitoring of cardiovascular parameters during the AustroMir space flight p 2160 N93-24367
The effect of microgravity on tremor (microvibration)
p 2160 N93-24368
Altered fluid shift dynamics with 6 days in microgravity
p 2160 N93-24369
Influence of microgravity on immune system and genetic information p 2160 N93-24370
Gravity-related phenomena in materials science
p 2161 N93-24372
The Microgravity User Support Center (MUSC)
p 2161 N93-24374
Microgravity Advanced Research and Support (MARS) Center update p 2161 N93-24375
The USO-concept applied to a biological model experiment p 2162 N93-24379
Fluid science users requirements
p 2163 N93-24385
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue
p 2164 N93-24394
Gravity and root morphogenesis p 2166 N93-24403
Development of Arabidopsis thaliana grown under microgravity conditions p 2166 N93-24404
Sample positioning in microgravity
| NASA-CASE-NPO-18448-1-CU | p 2253 N93-24600
REDUNDANT COMPONENTS
Assigning sites to redundant clusters in a distributed storage system
| AD-A260458 | p 2528 N93-24196
REED-SOLOMON CODES
Versatile Reed-Solomon decoders
| ISBN-0-315-64738-8 | p 2274 N93-24626
REENTRY
Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237
REENTRY SHIELDING
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
| NASA-TP-3257 | p 2297 N93-24096
REENTRY VEHICLES
Reentry systems: Material technology needs
p 2176 N93-22108
Flexible thermal protection materials for entry systems
p 2177 N93-22111
Entry systems technology assessment
p 2177 N93-22118
Reusable reentry satellite system specification. Volume 1-9
| NASA-CR-192969 | p 2196 N93-24543
REFERENCE STARS
Carlsberg meridian catalogue La Palma (Spain). Number 6: Observations of positions of stars and planets 1990
| ISBN-84-7469-052-8 | p 2543 N93-24059
REFLECTANCE
Radar seeker based autonomous navigation update system using topography feature matching techniques
p 2256 N93-22030
Time-resolved reflectivity study of solid-phase epitaxial regrowth in relaxed and strained Si(1-x)Ge(x)
| DE93-005154 | p 2506 N93-23312
The vertical profile of reflectivity and errors in radar estimates of rainfall p 2406 N93-23350
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
| AD-A260043 | p 2488 N93-23645
Semiconductor laser with a self-pumped phase conjugate external cavity
| AD-A260028 | p 2310 N93-24323
Anisotropic reflections in mountainous terrain to determine the absorption of solar radiation from satellite data
| ESA-TT-1262 | p 2558 N93-24633
REFLECTOMETERS
An ICRF antenna edge plasma density profile diagnostic for DIII-D
| DE93-006729 | p 2498 N93-24328
REFLEXES
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362
REFRACTIVITY
Optical properties of slags: Data for refractive indices and absorption coefficients
| NPL-DMM(A)-73 | p 2486 N93-22453
Radiolocation of a satellite-borne LOVHF beacon
p 2268 N93-23613
Technical Digest. Detection systems and technology, September 1992
| AD-A259812 | p 2271 N93-23670
Fiber optic interferometer configuration with pump-induced phase carrier
| AD-D015617 | p 2489 N93-24156
Quasi-binary decision making using light scattering
| AD-A260470 | p 2489 N93-24197
Research in photorefractive crystals
| AD-A260391 | p 2513 N93-24425
Journal of research of the National Institute of Standards and Technology, Nov. - Dec. 1992, volume 97, no. 6
| PB93-143923 | p 2571 N93-24570
REFRACTORIES
Silicon nitride containing rare earth silicate intergranular phases
| DE93-006624 | p 2509 N93-24034
Crystal chemistry of ceramic/mineral systems
| AD-A260440 | p 2241 N93-24193
REFRACTORY MATERIALS
Synthesis, processing, and properties of Ti5Si3
| DE93-004465 | p 2229 N93-22820
Crystal chemistry of ceramic/mineral systems
| AD-A260440 | p 2241 N93-24193
Low-temperature deposition of ZrC thin films from a single source precursor
| DE93-007333 | p 2514 N93-24518
REFRIGERANTS
Thermophysical properties
| DE93-006427 | p 2216 N93-22056
Compatibility of refrigerants and lubricants with elastomers
| DE93-006429 | p 2216 N93-22057
COP improvement of refrigerator/freezers, air-conditioners, and heat pumps using nonazeotropic refrigerant mixtures p 2259 N93-22166
Compatibility of refrigerants and lubricants with elastomers
| DE93-007808 | p 2237 N93-22729
Materials compatibility and lubricants research on CFC-refrigerant substitutes
| DE93-006426 | p 2237 N93-22884
Compatibility of refrigerants and lubricants with motor materials
| DE93-006428 | p 2237 N93-22885

Materials compatibility and lubricants research on CFC-refrigerant substitutes
| DE93-007806 | p 2237 N93-22915
Thermophysical properties
| DE93-007807 | p 2220 N93-22916
Heat pump technology: Responding to new opportunities
| DE93-005939 | p 2379 N93-22978
An evaluation of magnetic refrigeration cycles based on how effectively the thermal properties of the refrigerant are utilized p 2258 N93-23170
ARTI refrigerant database
| DE93-006431 | p 2239 N93-23949
Solubility, viscosity and density of refrigerant/lubricant mixtures
| DE93-007809 | p 2243 N93-24506
Compatibility of refrigerants and lubricants with engineering plastics
| DE93-007826 | p 2243 N93-24507

REFRIGERATING
Compatibility of refrigerants and lubricants with elastomers
| DE93-006429 | p 2216 N93-22057
COP improvement of refrigerator/freezers, air-conditioners, and heat pumps using nonazeotropic refrigerant mixtures p 2259 N93-22166
Compatibility of refrigerants and lubricants with elastomers
| DE93-007808 | p 2237 N93-22729
Materials compatibility and lubricants research on CFC-refrigerant substitutes
| DE93-007806 | p 2237 N93-22915
Heat pump technology: Responding to new opportunities
| DE93-005939 | p 2379 N93-22978
An evaluation of magnetic refrigeration cycles based on how effectively the thermal properties of the refrigerant are utilized p 2258 N93-23170

REFRIGERATORS
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
| DE93-005615 | p 2257 N93-22416
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
| PB93-146991 | p 2259 N93-24635

REFUELING
Electron-beam rocket acceleration of hydrogen pellets
| DE93-002822 | p 2171 N93-23685

REGENERATION (ENGINEERING)
MHD seed recovery/regeneration, phase 2
| DE93-006008 | p 2493 N93-22769

REGENERATION (PHYSIOLOGY)
The USO-concept applied to a biological model experiment p 2162 N93-24379

REGOLITH
Lunar science measurements and instruments for resource characterization
| DE93-005436 | p 2553 N93-22905

REGRESSION ANALYSIS
Improving the chi-squared approximation for bivariate normal tolerance regions
| NASA-TP-3304 | p 2472 N93-22670
Support measurement and estimating for oracle database applications using Mark 2 function points
| AD-A259686 | p 2440 N93-23661
When networks disagree: Ensemble methods for hybrid neural networks
| AD-A260121 | p 2460 N93-23701
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
| AD-A260047 | p 2472 N93-23711
PROMISC user manual, appendix 2
| NASA-CR-192989 | p 2332 N93-24529

REGULARITY
On the regularity of elasticity problems with piecewise analytic data
| AD-A260346 | p 2332 N93-24273

REGULATIONS
Framework for decision making: An EPA perspective
| PB93-134369 | p 2518 N93-22904
An environmental rating for heat pump equipment
| DE93-004526 | p 2379 N93-22983
US data policy for Earth observation from space p 2373 N93-23852
International law perspective on establishing a European regulation with regard to the legal protection of the use of satellite remote sensing data p 2374 N93-23855
Enabling document for regulations governing compliance extensions for early reductions of hazardous air pollutants
| PB93-147007 | p 2390 N93-24584

REINFORCING FIBERS
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
| DE93-006420 | p 2214 N93-24030
Continuous fiber thermoplastic prepreg
| NASA-CASE-LAR-14459-1 | p 2215 N93-24597

RELATIVISTIC PLASMAS
Emission from relativistic jets in blazars p 2536 N93-23900

RELATIVISTIC THEORY
Configuration space Faddeev calculations
| DE93-006080 | p 2475 N93-23337

RELATIVITY
Electromagnetism from counting
| DE93-006930 | p 2261 N93-22582
Galileo's relativity principle, the concept of pressure, and complex characteristics, for the six-equation, one-pressure model
| DE93-005240 | p 2515 N93-22952
The two black hole problem in 3+1 general relativity: Analytical approximations and numerical solutions of the initial data p 2548 N93-23212
Anti-gravity: The key to 21st century physics
| DE93-006929 | p 2475 N93-24463

RELAXATION METHOD (MATHEMATICS)
Upwind relaxation method for hypersonic flow simulation
| DLR-FB-91-36 | p 2109 N93-22659

RELIABILITY
Reliability of solid rocket motor cases and nozzles p 2176 N93-22103
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
Rendezvous strategy impacts on CTV avionics design, system reliability requirements, and available collision avoidance maneuvers p 2139 N93-22248
Safety and performance of a long life lithium-thionyl chloride battery
| DE93-005348 | p 2279 N93-22821
Photovoltaics Performance and Reliability Workshop
| DE93-000017 | p 2380 N93-23303
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406

RELIABILITY ANALYSIS
Solid Propulsion Integrity Program (SPIP) for verifiable enhanced solid rocket motor reliability p 2176 N93-22104
Orbiter Autoland reliability analysis
| NASA-TM-4464 | p 2194 N93-23139
Modeling and analysis of software reliability p 2438 N93-23196
Fatigue and reliability analyses for wind turbines
| DE93-004497 | p 2380 N93-23318
Study on the improved reliability and safety of lithium batteries by the use of electrochemical noise measurement, volume 1
| FL-D-22-VOL-1 | p 2282 N93-23501
Study on the improved reliability and safety of lithium batteries by the use of electrochemical noise measurement, volume 2
| FL-D-22-VOL-2 | p 2282 N93-23728
Aircraft engine reliability analysis using lower confidence limit estimate procedures
| AD-A260386 | p 2131 N93-24271
Development of code evaluation criteria for assessing predictive capability and performance
| NASA-CR-192623 | p 2442 N93-24473

RELIABILITY ENGINEERING
High reliability residual compressive stress processes. State-of-the-art assessment
| PB93-127751 | p 2331 N93-24207
Multiobjective optimization of aerospace structures
| AD-A260433 | p 2127 N93-24430

RELIEF MAPS
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
Multisensor data applications for digital landscape models p 2350 N93-23550

REMOTE CONTROL
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
| NASA-TM-108598 | p 2135 N93-22226
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239
A teleoperated unmanned rotorcraft flight test technique p 2132 N93-22369
Payload operations for precursor mission E-1 p 2155 N93-24342
Telescience opportunities in the precursor flights p 2161 N93-24376
Columbus automation testbed: A tool for users p 2164 N93-24390
The Space Robot Technology Experiment (ROTEX) on Spacelab-mission D2 p 2164 N93-24391
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2165 N93-24398
Telescience Testbed Program: A study of software for SIRTF instrument control
| NASA-CR-192764 | p 2442 N93-24476

REMOTE HANDLING
Pipe crawler development for duct elbow removal
| DE93-002169 | p 2313 N93-22892
FALCON remote laser alignment system
| DE93-006448 | p 2309 N93-23693

REMOTE MANIPULATOR SYSTEM
Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware p 2141 N93-22260
Magnetic end effectors for space operations p 2146 N93-22291
Advanced telerobotic control using neural networks p 2455 N93-22364
End effectors and grapple fixtures
| CA-PATENT-1-294-917 | p 2316 N93-23966
Grapple fixture
| CA-PATENT-1-297-519 | p 2317 N93-23967
Space Station Freedom automation and robotics: An assessment of the potential for increased productivity
| NASA-TM-108714 | p 2195 N93-24149

REMOTE SENSING
The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium
| JTN-93-80413 | p 2334 N93-22119
Overview of ISY plan p 2334 N93-22120
Overview of Earth environment data set: MOS-1/MOS-1b data sets p 2334 N93-22121
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Overview of activities of ISY PIE Committee p 2335 N93-22129
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
Microwave remote sensing of ice p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
Vegetation distribution of South East Asia p 2336 N93-22134
Monitoring of growth environment of forest p 2336 N93-22135
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
Upper-air circulation systems p 2337 N93-22138
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR p 2337 N93-22141
Environmental data sets in Canada p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
Environmental data set in Thailand p 2338 N93-22145
Environmental data sets at the University of Alaska p 2338 N93-22146
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
ATTIRE (analytical tools for thermal infrared engineering): A sensor simulation and modeling package p 2305 N93-22203
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
| ESA-TT-1245 | p 2339 N93-22436
The first European remote sensing satellite, ERS-1. A summary of useful load, mission, ground segment, standard products and user service p 2339 N93-22437
Use of remote sensing as part of the technical co-operation with developing countries p 2339 N93-22438
Earth sensing data service p 2339 N93-22439
Geological applications of space SAR data p 2339 N93-22440
MOS-1 p 2340 N93-22442
Vegetation index for Europe p 2340 N93-22443
Water surface temperatures from satellite thermal images p 2340 N93-22444

Distinguishing ice thickness from sea ice surface shape by using NOAA-AVHRR (National Oceanic and Atmosphere Administration Advanced Very High Resolution Radiometer) and SAR data p 2340 N93-22445

Investigations into the dynamics of sea ice in the East Greenland Sea region in May 1988, using NOAA-AVHRR data p 2341 N93-22446

The use of remote sensing data in a statistical ground utilization information system p 2341 N93-22447

Classification of TM data as a contribution to remote sensing for a hydrological run-off model p 2341 N93-22448

Satellite image and reference data investigations for exploration purposes p 2341 N93-22449

Third Stokes parameter emission from a periodic water surface
| NASA-CR-192334 | p 2342 N93-22454

Thematic Mapper land use classification as a remote sensing contribution for hydrologic runoff prediction model
| ESA-TT-1238 | p 2342 N93-22461

A sparse architecture low power gated integrator for use with germanium gamma ray spectrometers in remote geochemistry measurements
| DE93-004769 | p 2303 N93-22491

Investigation of cloud/water vapor motion winds from geostationary satellite
| NASA-CR-192274 | p 2403 N93-22653

Calibration, navigation, and registration of MAMS data for FIFE
| NASA-CR-108397 | p 2342 N93-22699

Sensor-based whole-arm obstacle avoidance utilizing ASIC technology
| DE93-003602 | p 2279 N93-22819

Dual use of distributed remote sensing satellites
| DE93-005442 | p 2193 N93-22906

Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
| DE93-003865 | p 2553 N93-22949

SeaWiFS Technical Report Series. Volume 8: Proceedings of the First SeaWiFS Science Team Meeting
| NASA-TM-104566 | p 2413 N93-23010

Investigation of the applicability of remote sensing techniques for ecological water quality evaluation
| BCRS-91-37 | p 2342 N93-23106

Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
| PB93-136604 | p 2343 N93-23278

Carbon and biogeochemistry
| DE93-001368 | p 2386 N93-23306

Laser range camera data fusion
| DE93-005159 | p 2263 N93-23313

Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351

Ground-based microwave radiometric remote sensing of the tropical atmosphere p 2343 N93-23352

Perception, scene reconstruction and world modeling for unmanned underwater vehicles
| PB93-146983 | p 2459 N93-23443

Asteroid detection and monitoring using a satellite-borne visible scanner
| AD-A259797 | p 2543 N93-23455

Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
| AD-A259834 | p 2343 N93-23461

Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
| ESA-ISY-2 | p 2343 N93-23507

Global Earth observation using modern communications satellite techniques p 2276 N93-23527

Map production and updating using SPOT data and SPOT data derived products p 2348 N93-23536

The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538

Innovative applications of repeated satellite SAR surveys p 2349 N93-23541

Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542

Communications techniques supporting the data management p 2276 N93-23543

Mapping from SPOT data p 2349 N93-23544

System design for ARTEMIS environmental monitoring p 2349 N93-23545

Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546

Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547

X-EOS: A multi-mode X-band synthetic aperture radar for EOS SAR p 2365 N93-23797
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798

REMOTELY PILOTED VEHICLES
A teleoperated unmanned rotorcraft flight test technique p 2132 N93-22369
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV [NASA-CR-189715] p 2476 N93-22813
Workshop on Trajectory Optimization Methods and Applications: Presentations from the 1992 AIAA Atmospheric Flight Mechanics Conference [AD-A259761] p 2126 N93-23482
Remotely piloted vehicle control and interface system [AD-D015618] p 2132 N93-24228

RENDEZVOUS GUIDANCE
New developments in astrodynamics algorithms for autonomous rendezvous p 2144 N93-22279
A navigation and control system for an autonomous rescue vehicle in the space station environment p 2146 N93-22289

RENDEZVOUS SPACECRAFT
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236
Control of a varying thrust spacecraft for autonomous space rendezvous p 2139 N93-22246
An automated rendezvous and capture system design concept for the cargo transfer vehicle and Space Station Freedom p 2146 N93-22287
Piloting decision aid for spacecraft proximity operations p 2147 N93-22295

RENDEZVOUS TRAJECTORIES
Use of automated rendezvous trajectory planning to improve spacecraft operations efficiency p 2146 N93-22292
Spacecraft rendezvous operational considerations affecting vehicle systems design and configuration p 2147 N93-22296

RENORMALIZATION GROUP METHODS
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence [NASA-CR-191421] p 2295 N93-23421

REPLACING
Report to the Chairman, Subcommittee on Defense, Committee on Appropriations, House of Representatives. Intelligence programs: New RC-135 aircraft engines can reduce cost and improve performance [AD-A259283] p 2105 N93-22397

REPORTS
Activities report of Lufthansa German Airlines [ETN-93-93465] p 2117 N93-23004
Activities report of the Norwegian Space Center [ETN-93-93540] p 2570 N93-23107
Annual bibliography, 1989 [ISBN-951-22-0488-6] p 2526 N93-23424
Activities report 1990: Projects and services of the Research Department [ETN-93-93692] p 2571 N93-23426
Research activities and highlights of the University of Maryland's Department of Aerospace Engineering p 2571 N93-24478
NASA scientific and technical publications: A catalog of special publications, reference publications, conference publications, and technical papers, 1991-1992 [NASA-SP-7063(06)] p 2529 N93-24654

REPRODUCTION (COPYING)
Modernization and unification: Strategic goals for NASA STI program [NASA-TM-109186] p 2528 N93-24117

REQUIREMENTS
Autonomous rendezvous and docking operations of unmanned expendable cargo transfer vehicles (e.g. Centaur) with Space Station Freedom p 2140 N93-22252
Delivery of information from Earth observation satellites p 2350 N93-23549
Fluid science users requirements p 2163 N93-24385
Columbus payload requirements in human physiology p 2163 N93-24386

RESCUE OPERATIONS
Advanced Crew Rescue Vehicle/Personnel Launch System p 2173 N93-22085
TALON and CRADLE: Systems for the rescue of tumbling spacecraft and astronauts p 2142 N93-22268
A navigation and control system for an autonomous rescue vehicle in the space station environment p 2146 N93-22289
Soft-ground arresting system for commercial aircraft [DOT/FAA/CT-TN93/4] p 2133 N93-22797
Group Task Force on Satellite Rescue and Repair [NASA-TM-108713] p 2193 N93-23040

RESEARCH
Ongoing research projects at VTT in 1991 [ISBN-951-38-3771-8] p 2570 N93-23425
Activities report 1990: Projects and services of the Research Department [ETN-93-93692] p 2571 N93-23426
Innovation: Key to the future [NASA-TM-103599] p 2571 N93-24095
Penetration mechanics research in the former Soviet Union [PB93-146488] p 2259 N93-24495
In the national interest: The Federal Government and research-intensive universities [PB93-140135] p 2518 N93-24583

RESEARCH AIRCRAFT
A neural based intelligent flight control system for the NASA F-15 flight research aircraft p 2132 N93-22368

RESEARCH AND DEVELOPMENT
The role of university research in aviation safety and competitiveness: Testimony to the US Congress [NIAR-92-3] p 2116 N93-22379

| PB93-127751 | p 2331 N93-24207

RESIN MATRIX COMPOSITES

Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
| DS-2024 | p 2208 N93-22603
The characterization of impact properties of composites p 2213 N93-23945
Damage in laminated composites due to low velocity impact p 2213 N93-23947
A process model for control of resin volume fraction in filament wound composite laminates p 2213 N93-23948

RESIN TRANSFER MOLDING

Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
| DS-2024 | p 2208 N93-22603

RESINS

Resin transfer molding: An answer to the problem of the industrialization of composites. Application to nacelles and thrust reverse parts
| DS-2024 | p 2208 N93-22603

RESISTANCE HEATING

Evaluation of resistively heated fuel injection technology to reduce cold start emissions and assist starting/driveaway of a methanol-fueled vehicle
| PB93-144350 | p 2313 N93-22901

RESISTORS

NIST mesurement service for DC standard resistors
| PB93-139079 | p 2280 N93-23205

RESOLUTION

Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
| NASA-TM-105986 | p 2129 N93-22599
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541

RESONANCE

Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
| ETN-93-93421 | p 2278 N93-22679
Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
| DE93-005450 | p 2503 N93-22748
The ground and excited state electronic structures of ruthenium quinones and related species
| AD-A259940 | p 2223 N93-24155

RESONANT FREQUENCIES

Modal identification experiment p 2188 N93-22635
Oscillations of finite liquid columns p 2250 N93-22855
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
| DE93-005382 | p 2325 N93-22975
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
| AD-A260119 | p 2329 N93-23700
Accurate evaluation of the real and imaginary material constants for a piezoelectric resonator in the radial mode
| DREA-CR-91-451 | p 2508 N93-23727

RESONANT VIBRATION

Damping measurements from an operating wind turbine: Preliminary results and procedures
| DE93-005357 | p 2377 N93-22873
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
| DE93-005382 | p 2325 N93-22975
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198

RESONATORS

Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
Pyroshock simulation for satellite components using a tunable resonant fixture
| DE93-005338 | p 2322 N93-22500
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784

RESOURCES MANAGEMENT

Aircraft accident report: Air Transport International, Inc., flight 805, Douglas DC-8-63, N794AL. Loss of control and crash, Swanton, Ohio, 15 February 1992
| PB92-910406 | p 2117 N93-23086
International cooperation and commitments in the ISY and beyond p 2154 N93-23164
Application of remote sensing and GIS. Technology to natural resources management: Selecting rice fields in Vietnam p 2353 N93-23569
Integration of remote sensing and GIS data for a multiscale study of the Po river basin p 2353 N93-23570
Status report on renewable energy in the States
| DE93-000032 | p 2381 N93-23671
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
| ESA-ISY-1-VOL-3 | p 2356 N93-23748
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
| ESA-ISY-4 | p 2154 N93-24336

RESPIRATION

Improved inhalation technology for setting safe exposure levels for workplace chemicals p 2423 N93-22164
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
| DE93-006091 | p 2386 N93-23301
A linear, time-varying simulation of the respiratory tract system
| DE93-004515 | p 2421 N93-24009
Monitoring of cardiovascular parameters during the AustroMir space flight p 2160 N93-24367

RESPIRATORY SYSTEM

A linear, time-varying simulation of the respiratory tract system
| DE93-004515 | p 2421 N93-24009

RETINA

Multidimensional signal coding in the visual system
| AD-A259836 | p 2488 N93-23696
Computer based analysis and synthesis of retinal function
| AD-A260514 | p 2423 N93-24420

RETROFITTING

Retrofitting of GPS into existing navigation suites p 2120 N93-22788

RETROREFLECTION

Optical phase measuring sensors for automated rendezvous and capture p 2146 N93-22290

RETROREFLECTORS

Approach range and velocity determination using laser sensors and retroreflector targets p 2147 N93-22297
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315

REUSABLE LAUNCH VEHICLES

Thermal protection systems for all-weather reusable launch vehicles p 2176 N93-22109

Subsonic aerodynamic characteristics of a proposed advanced manned launch system orbiter configuration
|NASA-TM-4439| p 2108 N93-22558

REUSABLE SPACECRAFT
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
Reusable reentry satellite system specification. Volume 1-9
|NASA-CR-192969| p 2196 N93-24543

REVERSE ENGINEERING
Update of GRASP/Ada reverse engineering tools for Ada
|NASA-CR-192465| p 2436 N93-22798
Automated program recognition by graph parsing
|AD-A259609| p 2441 N93-24125

REVIEWING
Overview of ISY plan p 2334 N93-22120
Sandia combustion research technical review, 1992
|DE93-006399| p 2220 N93-23027

REVOLVING
GJOIN: A program for merging two or more GENESIS databases
|DE93-007709| p 2523 N93-22914

REYNOLDS NUMBER
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
|DE93-005251| p 2293 N93-23300

REYNOLDS STRESS
Collaborative testing of turbulence models
|AD-A260277| p 2298 N93-24259
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
|NASA-TM-102211| p 2300 N93-24541

RHEOLOGY
Performance study of the rheometrics melt flow monitor for real-time rheological characterization
|NRC-34372| p 2241 N93-24290

RHEOMETERS
Performance study of the rheometrics melt flow monitor for real-time rheological characterization
|NRC-34372| p 2241 N93-24290

RHODAMINE
Ultrasensitive detection of single molecules in flowing sample streams by laser-induced fluorescence
|DE93-005457| p 2482 N93-23244

RICE
Effects of UV-B and global climate change on rice
|PB93-135622| p 2388 N93-23874

RIDING QUALITY
Semi-active suspension for automotive application
|MEMT-17| p 2316 N93-23377

RIGID STRUCTURES
Dynamic response and stability of semi-rigid frames
p 2327 N93-23199
First European tri-service advanced materials workshop: Compressive strength in rigid-rod polymers
|AD-A259997| p 2242 N93-24300
Suspension device for low-frequency structures
|NASA-CASE-LAR-14272-1-CU| p 2169 N93-24598

RING WINGS
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
|NASA-CR-190801| p 2476 N93-22673

RISK
Failure environment analysis tool applications
p 2322 N93-22170
Risk management in fly-by-wire systems
|NASA-TM-104757| p 2180 N93-22703
Insurance cover for space ventures
p 2344 N93-23510
The space debris environment for remote sensing satellites p 2199 N93-23809

RIVER BASINS
Global Climate Change Response Program: A mid-course evaluation
|PB93-146355| p 2387 N93-23427
Integration of remote sensing and GIS data for a multiscale study of the Po river basin
p 2353 N93-23570

RIVERS
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
|NASA-CR-192772| p 2413 N93-22700
Global Climate Change Response Program: A mid-course evaluation
|PB93-146355| p 2387 N93-23427

ROADS
Expanded geodetic control along the primary road system by use of satellite surveying technology
|PB93-127090| p 2343 N93-23257

ROBOT ARMS
ROBOSIM: An intelligent simulator for robotic systems
p 2465 N93-22161
US automated rendezvous and capture capabilities review. Remote umbilical system abstract
p 2138 N93-22239
Autonomus obstacle avoidance using visual fixation and looming
|PB93-146660| p 2459 N93-23442
A capacitance-based proximity sensor for whole arm obstacle avoidance
|DE93-006773| p 2463 N93-24331
Reliable vision-guided grasping
|NASA-CR-193197| p 2464 N93-24603

ROBOT CONTROL
A macro-micro robot for precise force applications
p 2465 N93-22158
A fault-tolerant intelligent robotic control system
p 2465 N93-22159
Autonomous vehicle motion control, approximate maps, and fuzzy logic p 2452 N93-22219
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
|NASA-TM-108598| p 2135 N93-22226
US automated rendezvous and capture capabilities review. Remote umbilical system abstract
p 2138 N93-22239
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation
p 2138 N93-22242
Autonomous rendezvous and capture system design
p 2138 N93-22244
Advanced telerobotic control using neural networks
p 2455 N93-22364
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
|DE93-002162| p 2312 N93-22891
Force reflecting hand controller
|NASA-CASE-NPO-17851-1-CU| p 2314 N93-23078
Adaptive control of a flexible manipulator
p 2458 N93-23201
Goal directed robot navigation in a known indoor environment with unknown stationary and moving obstacles p 2458 N93-23223
A passivity approach to controller-observer design for robots
|MEMO-1050| p 2459 N93-23355
Autonomus obstacle avoidance using visual fixation and looming
|PB93-146660| p 2459 N93-23442
Nonlinear adaptive control of electro-mechanical systems p 2461 N93-23716
Force distribution formulation and analysis for multiple-contact power grasp p 2461 N93-23718
Modeling and control of flexible manipulators
p 2318 N93-24182
Transformational planning of reactive behavior
|AD-A260350| p 2463 N93-24270
The Space Robot Technology Experiment (ROTEX) on Spacelab-mission D2 p 2164 N93-24391
A global path planning approach for redundant manipulators
|NASA-CR-193017| p 2320 N93-24656

ROBOT DYNAMICS
A fuzzy logic controller for an autonomous mobile robot p 2452 N93-22220
US automated rendezvous and capture capabilities review. Remote umbilical system abstract
p 2138 N93-22239
A berthing and fastening strategy for orbital replacement units p 2151 N93-22317
Adaptive control of a flexible manipulator
p 2458 N93-23201
Goal directed robot navigation in a known indoor environment with unknown stationary and moving obstacles p 2458 N93-23223
Time optimal paths for high speed maneuvering
|DE93-006251| p 2458 N93-23338
Localization and positioning using combinations of model views
|AD-A259734| p 2460 N93-23472
Kinematics and dynamics of robotic systems with multiple closed loops p 2318 N93-24218
A capacitance-based proximity sensor for whole arm obstacle avoidance
|DE93-006773| p 2463 N93-24331

ROBOT SENSORS
A capacitance-based proximity sensor for whole arm obstacle avoidance
|DE93-006773| p 2463 N93-24331
The Space Robot Technology Experiment (ROTEX) on Spacelab-mission D2 p 2164 N93-24391
Reliable vision-guided grasping
|NASA-CR-193197| p 2464 N93-24603
Vision-guided gripping of a cylinder
|NASA-CR-193199| p 2465 N93-24657

ROBOTICS
A fault-tolerant intelligent robotic control system
p 2465 N93-22159
Multi-beam range imager for autonomous operations
p 2310 N93-22160
ROBOSIM: An intelligent simulator for robotic systems
p 2465 N93-22161
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
Automatic rendezvous system testing at the Flight Robotics Laboratory p 2150 N93-22312
Sensor-based whole-arm obstacle avoidance utilizing ASIC technology
|DE93-003602| p 2279 N93-22819
Automatic code generation for distributed robotic systems
|DE93-005779| p 2447 N93-22996
Annual progress report, 1990-1991
|CTN-93-60695| p 2570 N93-23115
Advancing automation and robotics technology for the Space Station Freedom and for the U.S. Economy
|NASA-TM-103895| p 2430 N93-23240
A passivity approach to controller-observer design for robots
|MEMO-1050| p 2459 N93-23355
Activities report 1990: Projects and services of the Research Department
|ETN-93-93692| p 2571 N93-23426
Space Station Freedom automation and robotics: An assessment of the potential for increased productivity
|NASA-TM-108714| p 2195 N93-24149
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension
p 2318 N93-24184
Kinematics and dynamics of robotic systems with multiple closed loops p 2318 N93-24218
The strategic role of automation and robotics for Columbus utilization p 2164 N93-24389
Columbus automation testbed: A tool for users
p 2164 N93-24390
The Space Robot Technology Experiment (ROTEX) on Spacelab-mission D2 p 2164 N93-24391
Activities of the Institute for Information Technology
|NRC-35023| p 2571 N93-24648
A global path planning approach for redundant manipulators
|NASA-CR-193017| p 2320 N93-24656
Petri net controllers for distributed robotic systems
|NASA-CR-193196| p 2320 N93-24658

ROBOTS
A macro-micro robot for precise force applications
p 2465 N93-22158
A fault-tolerant intelligent robotic control system
p 2465 N93-22159
ROBOSIM: An intelligent simulator for robotic systems
p 2465 N93-22161
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
|DE93-002162| p 2312 N93-22891
Pipe crawler development for duct elbow removal
|DE93-002169| p 2313 N93-22892
Automatic code generation for distributed robotic systems
|DE93-005779| p 2447 N93-22996
Force reflecting hand controller
|NASA-CASE-NPO-17851-1-CU| p 2314 N93-23078
Petri net controllers for distributed robotic systems
|NASA-CR-193196| p 2320 N93-24658

ROBUSTNESS (MATHEMATICS)
Multi-window registration algorithm for automatic detection and tracking of moving targets
p 2255 N93-22022
Image based tracking approaches to AR/C at the Johnson Space Center p 2140 N93-22256
Robustness
|NASA-TP-3336| p 2181 N93-22458
Synthesis of robust controllers p 2107 N93-22573
Identification for robust control: What is the best approach?
|MEMT-16| p 2458 N93-23060
The robustness of feed-forward neural networks: A preliminary investigation p 2461 N93-23717
On positive invariance and constrained control of linear multivariable systems
|LAAS-92223| p 2462 N93-23862

ROCKET ENGINE CASES
Reliability of solid rocket motor cases and nozzles
p 2176 N93-22103
Ultrasonic inspection of filament wound graphite epoxy cylinders
|AD-A260361| p 2321 N93-24173

ROCKET ENGINE DESIGN
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
| NASA-CR-192454 | p 2202 N93-22012
Solid rocket motors p 2174 N93-22094
ROCKET EXHAUST
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
| NASA-CR-192454 | p 2202 N93-22012
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Base heating methodology improvements, volume 1
| NASA-CR-192455 | p 2202 N93-22350
User's manual for the ALS base heating prediction code, volume 2
| NASA-CR-192457 | p 2203 N93-22962
Preliminary base heating environments for a generalized ALS LO2/LH2 launch vehicle, appendix 1 and 2
| NASA-CR-192456 | p 2203 N93-22963
Terminology and assessment methods of solid propellant rocket exhaust signatures
| AGARD-AR-287 | p 2204 N93-22998
ROCKET LAUNCHING
Activities report of the Norwegian Space Center
| ETN-93-93540 | p 2570 N93-23107
The world wide launching campaign for student rockets experimental payloads p 2368 N93-23820
ROCKET NOZZLES
NLS cycle 1 and NLS 2 base heating technical notes. Appendix 3: Preliminary cycle 1 NLS base heating environments. Cycle 1 NLS base heating environments. NLS 2 650K STME base heating environments
| NASA-CR-192454 | p 2202 N93-22012
ROCKET SOUNDING
Interpretation of measurements from the quadrupole probe on the NEED-2 rocket
| FFI-92/7016 | p 2398 N93-24081
ROCKET TEST FACILITIES
Space chemical propulsion test facilities at NASA Lewis Research Center
| NASA-TM-106050 | p 2204 N93-23405
ROCKET THRUST
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382
ROCKET VEHICLES
The world wide launching campaign for student rockets experimental payloads p 2368 N93-23820
ROCKET-BORNE INSTRUMENTS
The Missle-Borne Integrated Network Demonstration Program p 2255 N93-22023
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189
ROCKY MOUNTAINS (NORTH AMERICA)
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
| PB93-129864 | p 2392 N93-22894
RODENTS
Cytokines and immune surveillance in humans
| NASA-CR-192728 | p 2447 N93-22828
RODS
Development and production of sandwich rods with load transmitting elements carrying high tension and compression loads
| DLR-FB-91-33 | p 2208 N93-22657
Variational theory of deformations of curved, twisted, and extensible elastic rods
| AD-A260331 | p 2332 N93-24266
ROLL
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
| NASA-CR-192349 | p 2110 N93-23108
ROLL FORMING
Effects of rolling on the ductility of 80 percent tungsten heavy alloy
| DE93-004840 | p 2232 N93-23972
ROOT-MEAN-SQUARE ERRORS
Influence due to satellite attitude jitter on estimation of Digital Elevation Model (DEM) p 2350 N93-23551
ROSAT MISSION
ROSAT all sky survey observations of IRAS galaxies
| MPE-PREPRINT-220 | p 2542 N93-22462
The ROSAT all-sky x ray survey p 2533 N93-23880
ROSAT observations of supernova remnants and the interstellar medium p 2534 N93-23884
X ray morphology and the mass of clusters of galaxies p 2534 N93-23887
ROSAT observations of active galactic nuclei p 2534 N93-23888
Observation of the extragalactic x ray background p 2535 N93-23892
IRAS galaxies in the ROSAT survey p 2535 N93-23897
Extragalactic radio sources in the ROSAT survey p 2536 N93-23899
Soft x ray emission from supergiant x ray binaries detected on the ROSAT all-sky survey p 2537 N93-23907
The ROSAT archive p 2538 N93-23915
ROSAT: The German x ray satellite nearly two years in orbit p 2538 N93-23916
Design and in orbit performance of the ROSAT PSPC p 2539 N93-23923
The ROSAT standard analysis software system p 2445 N93-23930
EXSAS: The interactive analysis system for ROSAT data p 2541 N93-23934
ROSS ICE SHELF
A nitrate signal of solar flares in polar snow and ice
| AD-A260559 | p 2558 N93-24284
ROTARY STABILITY
Stability and stability degree of a cracked flexible rotor supported on journal bearings
| ILR-MITT-268(1991) | p 2313 N93-23020
ROTARY WING AIRCRAFT
A teleoperated unmanned rotorcraft flight test technique p 2132 N93-22369
Advanced Rotorcraft Transmission (ART) program
| NASA-CR-191057 | p 2311 N93-22466
An integrated Rotorcraft Avionics/Controls Architecture to support advanced controls and low-altitude guidance flight research
| NASA-TM-103983 | p 2134 N93-24493
ROTARY WINGS
Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
| NASA-CR-177611 | p 2113 N93-24058
Stability of elastically tailored rotor systems
| AD-A260550 | p 2132 N93-24241
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
| NASA-TM-102643 | p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
| NASA-TM-102644 | p 2116 N93-24528
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
| NASA-TM-101599 | p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
| NASA-TM-101598 | p 2116 N93-24540
ROTATING BODIES
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198
Neural networks for the monitoring of rotating machinery
| DE93-003549 | p 2464 N93-24503
ROTATING CYLINDERS
Thermal convection in rotating systems and the band structure of the major planets p 2164 N93-24393
Three-dimensional turbulent boundary layer flow over a spinning cylinder
| NASA-TM-102240 | p 2300 N93-24533
ROTATING DISKS
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406
ROTATING FLUIDS
On the nonlinear interfacial instability of rotating core-annular flow
| NASA-CR-191432 | p 2289 N93-22811
ROTATING LIQUIDS
Marangoni convection in a spinning liquid column
| LRT-WE-9-FB-13-1991 | p 2289 N93-22678
Zero sound experiments in superfluid He3
| ISBN-951-22-0841-5 | p 2476 N93-23005
ROTATING MATTER
Neutron stars, strange stars, and the nuclear equation of state
| DE93-004704 | p 2550 N93-23952
ROTATING PLASMAS
The University of Wisconsin-Madison Torsatron/Stellarator Laboratory program
| DE93-005922 | p 2492 N93-22419
ROTATION
Suspension device for low-frequency structures
| NASA-CASE-LAR-14272-1-CU | p 2169 N93-24598
ROTOR AERODYNAMICS
Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
| NASA-CR-177611 | p 2113 N93-24058
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
ROTOR BLADES
Wake-induced unsteady stagnation region heat transfer measurements p 2295 N93-23591
ROTOR BLADES (TURBOMACHINERY)
Blade Assessment for Ice Impact (BLASIM). User's manual, version 1.0
| NASA-CR-191075 | p 2331 N93-24102
ROTOR BODY INTERACTIONS
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
| NASA-CR-192303 | p 2126 N93-23186
ROTOR DYNAMICS
Stability and stability degree of a cracked flexible rotor supported on journal bearings
| ILR-MITT-268(1991) | p 2313 N93-23020
Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
| NASA-CR-177611 | p 2113 N93-24058
ROTORS
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
| NASA-TM-105978 | p 2130 N93-23013
Stability and stability degree of a cracked flexible rotor supported on journal bearings
| ILR-MITT-268(1991) | p 2313 N93-23020
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
| NASA-CR-192303 | p 2126 N93-23186
Stability of elastically tailored rotor systems
| AD-A260550 | p 2132 N93-24241
ROUTES
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
| AD-A259293 | p 2119 N93-22398
ERS-1 SAR ice routing of l'Astrolabe through the Northeast passage p 2358 N93-23759
ROVING VEHICLES
Fuzzy logic path planning system for collision avoidance by an autonomous rover vehicle p 2451 N93-22217
Knowledge-based vision techniques for the autonomous land vehicle program
| AD-A259801 | p 2459 N93-23457
RUBBER
Method and apparatus for cleaning rubber deposits from airport runways and roadways
| NASA-CASE-LAR-14483-1 | p 2256 N93-22035
RUBY
Electro-optic frame photography with pulsed ruby illumination
| DE93-005819 | p 2306 N93-22327
RUBY LASERS
Electro-optic frame photography with pulsed ruby illumination
| DE93-005819 | p 2306 N93-22327
RUNGE-KUTTA METHOD
IMP: A performance code p 2139 N93-22245
RUNWAYS
A method for estimating future runway capacity of German airports for single runway systems
| DLR-FB-91-38 | p 2132 N93-22666
Scene correlation for INS aiding in flight-test systems: Runway-referenced flight-tests with on-board sensors only p 2121 N93-22792
Soft-ground arresting system for commercial aircraft
| DOT/FAA/CT-TN93/4 | p 2133 N93-22797
An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
| ORAE-R107 | p 2133 N93-23114
Geogrid reinforced base courses for flexible pavements for light aircraft: Test section construction, behavior under traffic, laboratory tests, and design criteria
| DOT/FAA/RD-92/25 | p 2134 N93-23128

Aircraft accident report: United Airlines flight 585, Boeing 737-291, N999UA, uncontrolled collision with terrain for undetermined reasons, 4 miles south of Colorado Springs Municipal Airport, Colorado Springs, Colorado, 3 March 1991
| PB92-910407 | p 2117 N93-23191
Multipath runway exits and taxiways
| DOT/FAA/CT-92/19 | p 2134 N93-23217

RUSTING
Rust transformation/rust compatible primers p 2244 N93-22182

RUTHENIUM COMPOUNDS
The ground and excited state electronic structures of ruthenium quinones and related species
| AD-A259940 | p 2223 N93-24155

S

S WAVES
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
| AD-A259659 | p 2396 N93-23657
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24006

SABOT PROJECTILES
Concept definition study for an extremely large aerophysics range facility
| NASA-CR-4491 | p 2133 N93-22987

SACCADIC EYE MOVEMENTS
Eye movements and visual information processing
| AD-A259955 | p 2425 N93-24297

SAFETY
Often overlooked electrical hazards common in many lasers
| DE93-003856 | p 2307 N93-22430
Safety and performance of a long life lithium-thionyl chloride battery
| DE93-005348 | p 2279 N93-22821
Practical problems related to flammability and combustion in space p 2226 N93-22839
Sneak analysis applied to process systems
| DE93-752866 | p 2257 N93-22970
FY 1991 safety program status report
| NASA-TM-108707 | p 2257 N93-23136
Maritime satellite communication and navigation p 2275 N93-23508
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810
The 111th Meeting for Research of Safety Engineering
| DE93-753679 | p 2388 N93-24046

SAFETY DEVICES
Optical analysis of lenslet arrays
| AD-A260126 | p 2488 N93-23702
Acoustic emission of structural materials exposed to open flames
| PB93-138980 | p 2477 N93-23951

SAFETY FACTORS
Solid rocket motors p 2174 N93-22094
Improved inhalation technology for setting safe exposure levels for workplace chemicals p 2423 N93-22164
Often overlooked electrical hazards common in many lasers
| DE93-003856 | p 2307 N93-22430

SAFETY MANAGEMENT
FY 1991 safety program status report
| NASA-TM-108707 | p 2257 N93-23136
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study. Appendix 3: Environment analysis
| NASA-CR-192475 | p 2199 N93-23224

SALINITY
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
| NASA-CR-192805 | p 2414 N93-23138

SALYUT SPACE STATION
Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620

SAMPLERS
Active Hydrazine Vapor Sampler (AHVS) p 2225 N93-22165
A wideband parallel sampling system
| ISBN-0-315-60463-8 | p 2286 N93-24617

SAMPLES
Analysis of acid precipitation samples collected by state agencies
| PB93-144152 | p 2386 N93-23276

SAMPLING
Active Hydrazine Vapor Sampler (AHVS) p 2225 N93-22165
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
| PB93-136422 | p 2413 N93-22893
Arctic Contaminants Research Program: Research Plan
| PB93-135630 | p 2387 N93-23439
Mini-satellite exploration of very near Earth space fuel objects
| DE93-005253 | p 2195 N93-24057
Survey of aviation medical examiners: Information and attitudes about the pre-employment and pre-appointment drug testing program
| DOT/FAA/AM-92/15 | p 2422 N93-24088
NOAA/CMDL atmospheric methane data from shipboard flask sampling
| PB93-136489 | p 2389 N93-24226
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
| PB93-144186 | p 2478 N93-24649

SAN JOAQUIN VALLEY (CA)
NRC Twin Otter operations in the 1991 California ozone deposition experiment
| NRC-LTR-FR-118 | p 2383 N93-22472

SANDS
Test requirements for coal-tar mixtures on airport pavements
| DOT/FAA/RD-92-27 | p 2134 N93-23137

SANDWICH STRUCTURES
Development and production of sandwich rods with load transmitting elements carrying high tension and compression loads
| DLR-FB-91-33 | p 2208 N93-22657
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017

SAPPHIRE
High performance sapphire windows p 2310 N93-22198
Ablation, melting, and smoothing of polycrystalline alumina by pulsed excimer laser radiation
| DE93-005148 | p 2227 N93-22496
Substrate surface structure effects on microstructure of epitaxial films
| DE93-005562 | p 2504 N93-22944

SARSAT
Digital processing for positioning with one satellite p 2270 N93-23629

SATELLITE ALTIMETRY
TOPEX/POSEIDON joint verification plan
| NASA-CR-192792 | p 2413 N93-22804
The comparison of satellite radar altimeter derived heights with global digital terrain model heights p 2355 N93-23584

SATELLITE ANTENNAS
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas) p 2264 N93-23504

SATELLITE ATMOSPHERES
Space exploration of planetary and satellite atmospheres p 2535 N93-23890

SATELLITE ATTITUDE CONTROL
A Star Pattern Recognition Sensor (SPRS) of high accuracy: A contribution to new possibilities of autonomous attitude determination p 2201 N93-23532

SATELLITE COMMUNICATION
Advanced communications technology satellite high burst rate link evaluation terminal communication protocol software user's guide, version 1.0
| NASA-CR-189162 | p 2437 N93-23134
Common Carrier Earth Station Application
| PB93-111722 | p 2263 N93-23268
Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
| ESA-ISY-2 | p 2343 N93-23507
Maritime satellite communication and navigation p 2275 N93-23508
Collection and Distribution of Ecological Data by Satellite: CDEDS p 2344 N93-23511
Collection and distribution of ecological data by satellite pilot projects as demonstration of the concept p 2344 N93-23512
The Canadian mobile satellite system p 2275 N93-23515
Fully automatic transmission of information via HF and comparison to satellite transmission p 2275 N93-23516
Land mobile satellite communications systems and services p 2275 N93-23517
The future role of satellite communications in an improved air traffic management p 2275 N93-23518
Financial alternatives for global satellite navigation p 2124 N93-23519
Mobile satellite communications in the 1990's p 2275 N93-23520
Personal communications satellite service system p 2275 N93-23521
SkyFix: A better position through the use of INMARSAT and GPS p 2124 N93-23522
OSI applied to aeronautical satellite mobile communications in EURATN p 2276 N93-23525
Satellite navigation in agriculture p 2124 N93-23528
Towards global satellite navigation p 2124 N93-23529
COMLINE p 2276 N93-23530
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
| DREO-CR-041LM | p 2271 N93-23729

SATELLITE CONFIGURATIONS
Personal communications satellite service system p 2275 N93-23521

SATELLITE CONTROL
Space time neural networks for tether operations in space p 2456 N93-22370

SATELLITE DESIGN
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
| DE93-005382 | p 2325 N93-22975
EUROAVIA Design Workshop 1991: Organization and lessons learned p 2199 N93-23821

SATELLITE DOPPLER POSITIONING
Effects of cloud cover on satellite positioning
| AD-A260032 | p 2409 N93-24252

SATELLITE GROUND SUPPORT
Advanced communications technology satellite high burst rate link evaluation terminal communication protocol software user's guide, version 1.0
| NASA-CR-189162 | p 2437 N93-23134

SATELLITE IMAGERY
The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium
| JTN-93-80413 | p 2334 N93-22119
Overview of Earth environment data set: MOS-1/MOS-1b data sets p 2334 N93-22121
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Observation system for sea surface temperature validation test in Mutsu Bay p 2334 N93-22123
Monitoring of Kuroshio current using the data of VTIR obtained by MOS-1 and MOS-1b p 2334 N93-22124
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Observation in the East China Sea p 2335 N93-22126
Estimation of partial cloud cover within a pixel p 2335 N93-22127
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128
Overview of activities of ISY PIE Committee p 2335 N93-22129
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
Microwave remote sensing of ice p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
Vegetation distribution of South East Asia p 2336 N93-22134
Monitoring of growth environment of forest p 2336 N93-22135
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
Upper-air circulation systems p 2337 N93-22138
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR p 2337 N93-22141
Laser disc for Earth environment data set p 2338 N93-22142
Environmental data sets in Canada p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
Environmental data set in Thailand p 2338 N93-22145
Environmental data sets at the University of Alaska p 2338 N93-22146
Environmental data sets for International Space Year activities in Australia p 2338 N93-22147
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
Earth sensing data service p 2339 N93-22439
MOS-1 p 2340 N93-22442
Water surface temperatures from satellite thermal images p 2340 N93-22444

The use of remote sensing data in a statistical ground utilization information system p 2341 N93-22447
Satellite image and reference data investigations for exploration purposes p 2341 N93-22449
Investigation of cloud/water vapor motion winds from geostationary satellite
| NASA-CR-192274 | p 2403 N93-22653
Calibration, navigation, and registration of MAMS data for FIFE
| NASA-CR-108397 | p 2342 N93-22699
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
| NASA-CR-192772 | p 2413 N93-22700
The Mavale project: Evaluation of potential pollution sources to superficial and subterranean water resources in the Paraiba do Sul Valley, Brazil
| INPE-5318-PRE/1715 | p 2385 N93-23105
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
| PB93-136604 | p 2343 N93-23278
Surface radar studies of rain estimation in correlation with infrared and visible techniques of INSAT and GOES-E geostationary satellites p 2406 N93-23351
Map production and updating using SPOT data and SPOT data derived products p 2348 N93-23536
Image maps p 2348 N93-23537
The production of satellite image maps: Experiments at the Technical University of Berlin p 2348 N93-23538
Comparison of mapping with different satellite images p 2348 N93-23540
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
System design for ARTEMIS environmental monitoring p 2349 N93-23545
Multisensor data applications for digital landscape models p 2350 N93-23550
Data for map algebra p 2350 N93-23553
Image treatment and geographical information systems at the service of the Common Agricultural Policy p 2351 N93-23555
Estimation of runoff and erosion using GIS integrating DEM, LANDSAT data, and terrain hydrological data p 2351 N93-23558
Remote sensing landslide hazard mapping using GIS technology in Colombian Andes p 2351 N93-23559
Extraction of information from satellite imagery to a GIS for environmental monitoring of the mining areas in northeastern Estonia p 2352 N93-23560
Remote sensing applied to mapping and other purposes: STADIS project, a practical example in Tunisia p 2352 N93-23561
Satellite image mosaics from automatic scene re-navigation p 2352 N93-23563
The use of multiple linked self-organised artificial neural networks for classification of remotely sensed images p 2353 N93-23565
Neural network methods for analysis of remotely-sensed satellite data p 2353 N93-23566
Remote sensing and land use in the region of Tuscany (Italy). A new methodology for the integration of very heterogeneous data p 2353 N93-23567
Integration of remote sensing and GIS data for a multiscale study of the Po river basin p 2353 N93-23570
Use of satellite data and GIS for evaluating urban environment p 2354 N93-23572
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
The analysis of remotely sensed data with neural networks p 2355 N93-23579
TM-SPOT multitemporal analysis on areas devasted by fire p 2355 N93-23580
Microscale geomorphological analysis in middle Italy using airborne and satellite remote sensing techniques p 2355 N93-23581
The creation of a DEM from SPOT data p 2355 N93-23582
Realistic landscape visualization based on satellite images p 2355 N93-23583
Use of Special Sensor Microwave/Imager (SSM/I) for estimation of precipitation features in a semi-arid, mountain region: A case study of southwest Saudi Arabia p 2407 N93-23721
ERS-1 SAR ice routing of l'Astrolabe through the Northeast passage p 2358 N93-23759
Operational geocoding of ERS-1 SAR imagery p 2359 N93-23765
SPOT 4 image ground segment p 2360 N93-23768
The SPOT system development program: SPOT AVAL p 2360 N93-23769
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770
High resolution stereo images from the Space Station Mir p 2365 N93-23800
Cartography of hazards from geological instabilities: Volcanic regions in Peru p 2368 N93-23815
Applicability of satellite remote sensing for slope instability hazard zonation p 2368 N93-23817
Study of the cultivated land losses around Tunis p 2368 N93-23819
Space technologies in French education p 2369 N93-23824
Remote sensing satellite and thematic applications in high schools and elementary schools in France p 2370 N93-23829
Satellite-images in secondary education in Baden-Wuerttemberg (Germany) p 2370 N93-23830
Inter-comparison of satellite derived passive microwave ice products p 2371 N93-23836
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851
HST imaging of the binary pulsar PSR1913+16 p 2536 N93-23902
Modeling of cloud/radiation processes for tropical anvils
| AD-A260203 | p 2410 N93-24470
Compression through decomposition into browse and residual images p 2430 N93-24546
Applications of wavelet-based compression to multidimensional Earth science data p 2430 N93-24547

SATELLITE INSTRUMENTS

TOPEX/POSEIDON joint verification plan
| NASA-CR-192792 | p 2413 N93-22804
ORFEUS: Scientific targets and optical performance p 2537 N93-23905
Analysis of the results of the first year of operation of the Munich Dust Counter p 2537 N93-23910
Precipitating auroral electron flux characteristics based on UV data obtained by the AIRS experiment onboard the polar BEAR satellite
| AD-A260015 | p 2401 N93-24301
Instrumentation for hypersonic aerodynamics research with tethered satellites
| NASA-CR-191435 | p 2442 N93-24539

SATELLITE NAVIGATION SYSTEMS

DGPS for space and return p 2146 N93-22286
On the navigation of polar orbiting meteorological satellites
| MPIM-75 | p 2180 N93-23111
NAVSAT: An application of GPS and GLONASS for the civil user community p 2124 N93-23534
On-line health monitoring: An integrity improvement for the civil use of GPS and GLONASS p 2125 N93-23535
Testing of a GPS receiver GLOBUS AN 2000 of SEL: A study of selective availability
| DLR-MITT-92-07 | p 2123 N93-24138

SATELLITE NETWORKS

Expanded geodetic control along the primary road system by use of satellite surveying technology
| PB93-127090 | p 2343 N93-23257
Common Carrier Earth Station Application
| PB93-111722 | p 2263 N93-23268
The Canadian mobile satellite system p 2275 N93-23515
Mobile satellite communications in the 1990's p 2275 N93-23520
Personal communications satellite service system p 2275 N93-23521
SkyFix: A better position through the use of INMARSAT and GPS p 2124 N93-23522
Global Earth observation using modern communications satellite techniques p 2276 N93-23527
NAVSAT: An application of GPS and GLONASS for the civil user community p 2124 N93-23534
Final report on the first step in distributed remote sensing
| DE93-007936 | p 2375 N93-24520

SATELLITE OBSERVATION

The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium
| JTN-93-80413 | p 2334 N93-22119
Overview of ISY plan p 2334 N93-22120
Overview of Earth environment data set: MOS-1/MOS-1b data sets p 2334 N93-22121
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Observation system for sea surface temperature validation test in Mutsu Bay p 2334 N93-22123
Monitoring of Kuroshio current using the data of VTIR obtained by MOS-1 and MOS-1b p 2334 N93-22124
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Observation in the East China Sea p 2335 N93-22126
Estimation of partial cloud cover within a pixel p 2335 N93-22127
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128
Overview of activities of ISY PIE Committee p 2335 N93-22129
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
Microwave remote sensing of ice p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
Vegetation distribution of South East Asia p 2336 N93-22134
Monitoring of growth environment of forest p 2336 N93-22135
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
Upper-air circulation systems p 2337 N93-22138
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Data set for fisheries: Why can fishing grounds be monitored by data set of MOS-1b VTIR p 2337 N93-22141
Laser disc for Earth environment data set p 2338 N93-22142
Environmental data sets in Canada p 2338 N93-22143
ESA Earthnet activities related to the global environmental data network p 2338 N93-22144
Environmental data set in Thailand p 2338 N93-22145
Environmental data sets at the University of Alaska p 2338 N93-22146
Environmental data sets for International Space Year activities in Australia p 2338 N93-22147
The Brazilian contributions for the International Space Year, 1992 p 2338 N93-22148
Use of remote sensing as part of the technical co-operation with developing countries p 2339 N93-22438
Earth sensing data service p 2339 N93-22439
Water surface temperatures from satellite thermal images p 2340 N93-22444
TOPEX/POSEIDON joint verification plan
| NASA-CR-192792 | p 2413 N93-22804
SeaWiFS Technical Report Series. Volume 8: Proceedings of the First SeaWiFS Science Team Meeting
| NASA-TM-104566 | p 2413 N93-23010
Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
| ESA-ISY-2 | p 2343 N93-23507
Global Earth observation using modern communications satellite techniques p 2276 N93-23527
System design for ARTEMIS environmental monitoring p 2349 N93-23545
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546
Delivery of information from Earth observation satellites p 2350 N93-23549
NASDA's Earth observation satellite program p 2357 N93-23751
Satellite-borne Earth observations in the framework of German global change research p 2357 N93-23755
ERS-1: The first European Earth observation system p 2358 N93-23757
The SPOT program p 2360 N93-23766
The SPOT 4 satellite and beyond p 2360 N93-23767
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770
The scientific program of the Priroda project p 2360 N93-23771
GLOBSAT/METOC: An alternative approach for a European Earth observation programme from the polar orbit p 2361 N93-23775
Observing the northeast Atlantic with NOAA-N at the University of Lisbon (Portugal) Space Oceanography Facility p 2362 N93-23779
The International Space Year programme p 2366 N93-23803

Monitoring desertification in Patagonia/Argentina, using satellite data for sustainable environmental management p 2367 N93-23813
Space technologies in French education p 2369 N93-23824
Computer-based lessons in satellite oceanography: An academic network for teachers and students p 2369 N93-23825
Development of data sets for the ISY sea surface temperature: MOS-1/MOS-1b data sets p 2371 N93-23838
ISY sea surface temperature validation test program in Mutsu Bay (Japan) p 2371 N93-23839
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851
International law perspective on establishing a European regulation with regard to the legal protection of the use of satellite remote sensing data p 2374 N93-23855
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries |PB93-149409| p 2374 N93-24309
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment |AD-A259986| p 2401 N93-24424
Assessment of spaceborne lidar for meteorological analyses |AD-A260026| p 2410 N93-24517
Final report on the first step in distributed remote sensing |DE93-007936| p 2375 N93-24520

SATELLITE ORBITS
Precise GPS-based tracking of remote sensing satellites p 2122 N93-23587

SATELLITE ORIENTATION
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318
Influence due to satellite attitude jitter on estimation of Digital Elevation Model (DEM) p 2350 N93-23551

SATELLITE PERTURBATION
Space time neural networks for tether operations in space p 2456 N93-22370

SATELLITE POWER TRANSMISSION
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas) p 2264 N93-23504

SATELLITE SOUNDING
The Second International Conference on Japanese Earth Observation Programs: Proceedings of Pre ISY International Symposium |JTN-93-80413| p 2334 N93-22119
Overview of ISY plan p 2334 N93-22120
Overview on activities of ISY GSST Working Group in Japan p 2334 N93-22122
Upper-air circulation systems p 2337 N93-22138
A satellite-based Radar Wind Sounder (RAWS) p 2406 N93-23384

SATELLITE TEMPERATURE
Researches and developments on typical thermal technologies for space applications p 2248 N93-22845

SATELLITE TRACKING
Precise GPS-based tracking of remote sensing satellites p 2122 N93-23587

SATELLITE-BORNE INSTRUMENTS
The first European remote sensing satellite, ERS-1. A summary of useful load, mission, ground segment, standard products and user service p 2339 N93-22437
Inner Magnetosphere Imager (IMI) instrument heritage |NASA-CR-4498| p 2391 N93-22685
Flight project data book, 1991 |NASA-TM-108656| p 2154 N93-23385
ESA ERS 1 product specification |ESA-SP-1149| p 2200 N93-23389
NASA's upper atmosphere research satellite: A program to study global ozone change p 2357 N93-23750
Meteosat second generation: A look to the future p 2357 N93-23753
Cooperation with Europe in NOAA operational satellite programs p 2357 N93-23754
Meteosat second generation enhanced visible-IR imager SEVIRI and its environmental monitoring potential p 2362 N93-23780
Broadband imaging spectrometer technology and its use potential for environmental change mission p 2364 N93-23791
SAX overview p 2540 N93-23927
INTEGRAL: International Gamma Ray Astrophysics Laboratory p 2170 N93-23932

SATELLITE-BORNE PHOTOGRAPHY
Comparison of mapping with different satellite images p 2348 N93-23540

SATELLITE-BORNE RADAR
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541

SATURN (PLANET)
Cassini/Huygens: A mission to Saturn and Titan p 2539 N93-23918

SAUDI ARABIA
Use of Special Sensor Microwave/Imager (SSM/I) for estimation of precipitation features in a semi-arid, mountain region: A case study of southwest Saudi Arabia p 2407 N93-23721

SAWS
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom |DE93-002162| p 2312 N93-22891

SCALARS
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows |DE93-004122| p 2287 N93-22071
AR/D image processing system p 2152 N93-22321
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications |NASA-CR-192348| p 2263 N93-23215
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence |NASA-CR-191421| p 2295 N93-23421
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea |AD-A260363| p 2409 N93-24239
FESDIF: Finite Element Scalar Diffraction theory code |DE93-007222| p 2475 N93-24447

SCALE EFFECT
Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts |DE93-003845| p 2323 N93-22516

SCALE MODELS
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration |NASA-TM-107729| p 2327 N93-23235
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane |NASA-TM-102642| p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane |NASA-TM-102643| p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane |NASA-TM-102645| p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane |NASA-TM-102644| p 2116 N93-24528
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40 |NASA-TM-101599| p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35 |NASA-TM-101598| p 2116 N93-24540

SCALING LAWS
The design of scalable software libraries for distributed memory concurrent computers |DE93-003612| p 2434 N93-22332
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866

SCANNERS
Applications of TEM to interface in materials |DE93-004776| p 2501 N93-22492
Vibration Pattern Imager (VPI): A control and data acquisition system for scanning laser vibrometers |NASA-TM-107721| p 2476 N93-22553
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride |AD-A260043| p 2488 N93-23645
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360

SCANNING ELECTRON MICROSCOPY
Copper/solder intermetallic growth studies |AD-A259856| p 2232 N93-23955

SCANNING TUNNELING MICROSCOPY
The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy |DE93-006279| p 2501 N93-22510

SCATTERING
On using scattering statistics for ultra wideband electromagnetic target classification and identification |DE93-003809| p 2260 N93-22433
Applications of TEM to interface in materials |DE93-004776| p 2501 N93-22492
Physical and direct methods in crystallography p 2393 N93-23249
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
Least squares surface approximation to scattered data using multiquadric functions |AD-A259804| p 2469 N93-23640
Laser spectroscopy of stimulated scattering in collisionally broadened group 2A metal vapors |AD-A260532| p 2223 N93-24278

SCATTERING COEFFICIENTS
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates p 2395 N93-23493
Determination of the optical properties of particles for solar heated fluidized beds |DLR-FB-92-15| p 2490 N93-24641

SCATTERING CROSS SECTIONS
Inclusive J/psi, psi(2S) and b-quark production in (-p)p collisions at square root of s - 1.8 TeV |DE93-004739| p 2481 N93-22739
Electromagnetic scattering cross sections from the bodies of revolution, volume 1 |DREV-CR-645| p 2264 N93-23342
Determination of the optical properties of particles for solar heated fluidized beds |DLR-FB-92-15| p 2490 N93-24641

SCATTERING FUNCTIONS
Scattering centre analysis of simple metallic objects |ESA-TT-1250| p 2274 N93-24619

SCATTEROMETERS
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
An advanced scatterometer for the European polar platform p 2363 N93-23787

SCENE ANALYSIS
Perception, scene reconstruction and world modeling for unmanned underwater vehicles |PB93-146983| p 2459 N93-23443
Satellite image mosaics from automatic scene re-navigation p 2352 N93-23563
The use of multiple linked self-organised artificial neural networks for classification of remotely sensed images p 2353 N93-23565
Meteo Disc: Satellite cloud motion presentation by interactively controlled video disc for research, teaching, and training p 2371 N93-23835
Towards infrared image understanding p 2488 N93-24000

SCHEDULES
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
Space Station Freedom research capabilities p 2183 N93-22609
An evaluation of schedule metrics used within aeronautical systems center |AD-A260113| p 2521 N93-24413

SCHEDULING
Video conferencing made easy p 2275 N93-22173
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping p 2259 N93-22174
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
Isomorphic routing on a toroidal mesh |NASA-CR-191430| p 2437 N93-23058
Design and analysis of scheduling policies for real-time computer systems |AD-A259806| p 2448 N93-23641
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping |DE93-006722| p 2442 N93-24327

SCHMIDT TELESCOPES
ASCHOT: Astrophysical Schmidt Orbital Telescope p 2539 N93-23919

SCHOOLS
Development of interactive multimedia applications p 2530 N93-22171
Pre-college education p 2516 N93-23142
Space support forum p 2153 N93-23160
Remote sensing of the Earth: A pilot program in German schools p 2369 N93-23822

SCHOTTKY DIODES
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
| DE93-000049 | p 2377 N93-22750
SCIENCE
Space support forum p 2153 N93-23160
SCIENTIFIC SATELLITES
EUROAVIA Design Workshop 1991: Organization and lessons learned p 2199 N93-23821
Preparation for analysis of data from the langmuir probe instrument on the CRRES satellite
| AD-A260534 | p 2201 N93-24280
SCIENTISTS
An on-orbit viewpoint of life sciences research p 2187 N93-22629
Underrepresented groups p 2517 N93-23146
Pipeline issues p 2517 N93-23148
Focusing educational initiatives p 2517 N93-23150
Learning to meet the science and technology challenge
| PB93-139996 | p 2520 N93-23680
SCINTILLATING FIBERS
Physics studies with ICARUS and a hybrid ionization and scintillation fiber detector
| DE93-003034 | p 2482 N93-22986
SCINTILLATION
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
| DE93-004585 | p 2217 N93-22339
SCINTILLATION COUNTERS
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
| DE93-004585 | p 2217 N93-22339
Cosmic-ray-veto detector system
| DE93-004787 | p 2559 N93-22707
Physics studies with ICARUS and a hybrid ionization and scintillation fiber detector
| DE93-003034 | p 2482 N93-22986
Drift scintillation meter for the defense meteorological satellite program
| AD-A259993 | p 2410 N93-24299
SCREW DISLOCATIONS
Data-parallel Langevin dynamics simulations
| DE93-003836 | p 2445 N93-22434
SEA BREEZE
Coupling an ocean wave model to an atmospheric general circulation model
| MPIM-72 | p 2395 N93-23632
SEA ICE
Sea ice and glacier in the Antarctic from passive microwave observation p 2336 N93-22130
Drifting ice in the Sea of Okhotsk p 2336 N93-22131
Microwave remote sensing of ice p 2336 N93-22132
Observation in Arctic p 2336 N93-22133
Distinguishing ice thickness from sea ice surface shape by using NOAA-AVHRR (National Oceanic and Atmosphere Administration Advanced Very High Resolution Radiometer) and SAR data p 2340 N93-22445
Investigations into the dynamics of sea ice in the East Greenland Sea region in May 1988, using NOAA-AVHRR data p 2341 N93-22446
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
| NASA-CR-192772 | p 2413 N93-22700
Report of the Sea Ice Thickness Workshop
| AD-A259696 | p 2414 N93-23663
ERS-1: The first European Earth observation system p 2358 N93-23757
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761
Early results on the use of ERS-1 SAR data for real-time sea ice monitoring in Canadian waters p 2359 N93-23762
Inter-comparison of satellite derived passive microwave ice products p 2371 N93-23836
The Oden real time ice monitoring demonstration p 2371 N93-23837
Active and passive remote sensing of ice
| AD-A259765 | p 2415 N93-24026
SEA SURFACE TEMPERATURE
Observation system for sea surface temperature validation test in Mutsu Bay p 2334 N93-22123
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Observation in the East China Sea p 2335 N93-22126
Estimation of partial cloud cover within a pixel p 2335 N93-22127
Elimination of absorption effect of atmospheric gases and stratospheric aerosol by combined use of IR and microwave data p 2335 N93-22128
Water surface temperatures from satellite thermal images p 2340 N93-22444
The program of oceanological experiments within the Priroda project p 2361 N93-23773
Observing the northeast Atlantic with NOAA-N at the University of Lisbon (Portugal) Space Oceanography Facility p 2362 N93-23779
Development of data sets for the ISY sea surface temperature: MOS-1/MOS-1b data sets p 2371 N93-23838
ISY sea surface temperature validation test program in Mutsu Bay (Japan) p 2371 N93-23839
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries
| PB93-149409 | p 2374 N93-24309
SEA TRUTH
Observation system for sea surface temperature validation test in Mutsu Bay p 2334 N93-22123
Observation in the East China Sea p 2335 N93-22126
Estimation of partial cloud cover within a pixel p 2335 N93-22127
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
SEA WATER
Measurements of surface ocean carbon dioxide partial pressure during WOCE
| DE93-006890 | p 2412 N93-22580
Oceanic CO measurements for the WOCE Hydrological Survey in the Pacific Ocean: Shipboard Alkalinity analyses during 1991 and 1992
| DE93-006900 | p 2412 N93-22581
Active and passive remote sensing of ice
| AD-A259765 | p 2415 N93-24026
SEALERS
Non-chromated surface pretreatments for aluminum
| AD-A260130 | p 2232 N93-23704
SEALS (STOPPERS)
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
| NASA-TM-105939 | p 2206 N93-22590
SEARCH RADAR
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
| AD-D015622 | p 2272 N93-24232
SEASAT SATELLITES
Geological applications of space SAR data p 2339 N93-22440
SEASONS
An assessment of permafrost conditions at three DND airports in Arctic Canada as they pertain to future planning and operations
| ORAE-R107 | p 2133 N93-23114
SEATS
Design of a portable powered seat lift p 2429 N93-22190
Microcomputer based software for biodynamic simulation p 2429 N93-22191
SECONDARY EMISSION
Design of a large-scale plasma source ion implantation experiment
| DE93-005438 | p 2493 N93-22746
SECONDARY ION MASS SPECTROMETRY
High resolution studies of atoms and small molecules
| DE93-004340 | p 2481 N93-22758
SEDIMENTS
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
| PB93-129864 | p 2392 N93-22894
Estimation of runoff and erosion using GIS integrating DEM, LANDSAT data, and terrain hydrological data p 2351 N93-23558
A direct mathematical approach to optimize the age-depth relation of deep-sea sediment cores
| MPIM-77 | p 2414 N93-23636
Observing the northeast Atlantic with NOAA-N at the University of Lisbon (Portugal) Space Oceanography Facility p 2362 N93-23779
Orbital tuning of marine sedimentary cores: An automatic procedure based on a general linear model
| MPIM-79 | p 2415 N93-23856
SEEDS
P0004-1 quick look
| NASA-CR-192459 | p 2193 N93-23009
SEEING (ASTRONOMY)
Light extinction in the atmosphere
| DE93-005034 | p 2397 N93-23978
The liquid crystal polarimeter for solid-state imaging of solar vector magnetic fields
| AD-A260029 | p 2483 N93-24251
SEISMIC WAVES
A comparison of deconvolution techniques
| DE93-007407 | p 2391 N93-22530
A systematic study of the effects of crust and upper mantle structure on regional seismograms
| AD-A260231 | p 2399 N93-24086
Develop an x-windows tool to compute Gaussian beam synthetic seismograms
| AD-A260034 | p 2400 N93-24253
Test and evaluation of neural network applications for seismic signal discrimination
| AD-A260030 | p 2401 N93-24440
A semi-empirical analysis of strong-motion peaks in terms of seismic source, propagation path, and local site conditions
| PB93-150266 | p 2402 N93-24629
SEISMOGRAMS
A comparison of deconvolution techniques
| DE93-007407 | p 2391 N93-22530
A systematic study of the effects of crust and upper mantle structure on regional seismograms
| AD-A260231 | p 2399 N93-24086
Develop an x-windows tool to compute Gaussian beam synthetic seismograms
| AD-A260034 | p 2400 N93-24253
SEISMOGRAPHS
A comparison of deconvolution techniques
| DE93-007407 | p 2391 N93-22530
SEISMOLOGY
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24008
Assessment of regional earthquake hazards and risk along the Wasatch Front, Utah
| PB93-115657 | p 2400 N93-24214
Test and evaluation of neural network applications for seismic signal discrimination
| AD-A260030 | p 2401 N93-24440
SELECTION
Advanced display object selection methods for enhancing user-computer productivity p 2444 N93-22151
Mir 1992 operations and crew training p 2157 N93-24352
SELENIDES
Polycrystalline thin films
| DE93-000070 | p 2500 N93-22336
Research on high efficiency, large-area CuInSe2-based thin-film modules
| DE93-000077 | p 2513 N93-24433
SELF FOCUSING
Self-focusing of broadband laser pulses in dispersive media
| DE93-007369 | p 2307 N93-22529
SELF ORGANIZING SYSTEMS
Determining the number of hidden units in multi-layer perceptrons using F-ratios p 2451 N93-22214
A new approach for designing self-organizing systems and application to adaptive control p 2451 N93-22215
A self growing binary tree neural network for the identification of multiclass systems
| RR-451 | p 2459 N93-23362
The use of multiple linked self-organised artificial neural networks for classification of remotely sensed images p 2353 N93-23565
Neural network methods for analysis of remotely-sensed satellite data p 2353 N93-23566
SELF TESTS
Self-checking on-line testable static RAM
| NASA-CASE-NPO-17939-1-CU | p 2432 N93-22032
SEMANTICS
Natural Language Processing Systems Evaluation Workshop
| RL-TR-91-362 | p 2437 N93-23091
An ontology of knowledge graphs
| MEMO-1049 | p 2441 N93-24063
Interpretation as abduction
| AD-A259608 | p 2425 N93-24227
SEMICIRCULAR CANALS
Micromotional studies of utricular and canal afferents
| NASA-CR-192703 | p 2417 N93-22800
Neural processing of gravity information
| NASA-CR-192766 | p 2419 N93-23233
SEMICONDUCTING FILMS
Nitride semiconductors for ultraviolet detection
| AD-A259545 | p 2510 N93-24040
SEMICONDUCTOR DEVICES
Simulation of electronic transport in semiconductor heterolayer devices
| AD-A260122 | p 2502 N93-22548
Monte Carlo modeling of solid-state photoswitches
| DE93-005829 | p 2280 N93-22999
Electrical characterization of conducting polymers and polymeric semiconductor devices
| ACTA-POL-SCAND-PH-178 | p 2238 N93-23006
Focal plane arrays for submillimeter waves using two-dimensional electron gas elements: A grant under the Innovative Research Program
| NASA-CR-192271 | p 2263 N93-23062

Amorphous diffusion barriers for electronic device applications
| ETN-93-93476 | p 2281 N93-23366
Millimeter-wave applications of semiconductor dielectric waveguides with plasma layers (surface or buried) generated from semiconductor lasers
| AD-A260484 | p 2510 N93-24134
Optical studies of laterally confined quantum well structures grown on ex-situ and in-situ patterned substrates
| AD-A260275 | p 2511 N93-24167
Electronics and electrical engineering laboratory technical publication announcements covering laboratory programs, April to June 1992, with 1992/1993 EEEL events calendar
| PB93-147163 | p 2284 N93-24225
Quantum mechanics of electrons in crystals with graded composition
| AD-A260294 | p 2512 N93-24262

SEMICONDUCTOR LASERS
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture p 2139 N93-22250
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315
High power diode pumped solid state lasers
| DE93-005818 | p 2307 N93-22691
Quantum theory of multiwave mixing with applications to squeezing in both atomic and semiconductor media
| AD-A259875 | p 2514 N93-22732
P+ contacts on GaAs for semiconductor lasers
| AD-A260207 | p 2309 N93-24003
Nitride semiconductors for ultraviolet detection
| AD-A259545 | p 2510 N93-24040
Millimeter-wave applications of semiconductor dielectric waveguides with plasma layers (surface or buried) generated from semiconductor lasers
| AD-A260484 | p 2510 N93-24134
Nonlinear optics and turbulence
| AD-A259950 | p 2489 N93-24244
Semiconductor laser with a self-pumped phase conjugate external cavity
| AD-A260028 | p 2310 N93-24323

SEMICONDUCTORS (MATERIALS)
A massive neutrino in nuclear beta decay?
| DE93-004718 | p 2479 N93-22333
Metallization and insulization during impact
| DE93-004708 | p 2500 N93-22420
Electronic structure studies of YBa2Cu3O(x)(6.2 less than equal to x less than or equal to 6.9) using angle resolved photoemission
| DE93-004811 | p 2501 N93-22493
Simulation of electronic transport in semiconductor heterolayer devices
| AD-A260122 | p 2502 N93-22548
Utilization criteria of rapid disconnectable power semiconductors in quasi resonant inverters
| ETN-93-93421 | p 2278 N93-22679
A massive neutrino in nuclear beta decay?
| DE93-004706 | p 2482 N93-22950
Time-resolved reflectivity study of solid-phase epitaxial regrowth in relaxed and strained Si(1-x)Ge(x)
| DE93-005154 | p 2506 N93-23312
Process toward a comprehensive control system for molecular beam epitaxy
| AD-A259724 | p 2507 N93-23468
New 3-5 cell design approaches for very high efficiency
| DE92-010558 | p 2381 N93-23697
Cavities in He-implanted Si: Internal surface science
| DE93-005340 | p 2509 N93-24012
Solid state research
| AD-A259726 | p 2509 N93-24024
Nitride semiconductors for ultraviolet detection
| AD-A259545 | p 2510 N93-24040
Joint services electronics program. Basic research in electronics (JSEP)
| AD-A259598 | p 2283 N93-24068
Report of the Gordon Research Conference on Point Defects, Line Defects, and Interfaces in Semiconductors
| AD-A259546 | p 2510 N93-24083
Formation of defect-free metal/semiconductor contacts
| AD-A259604 | p 2284 N93-24151

SENSITIVITY
On-line process analysis innovation: DiComp (tm) shunting dielectric sensor technology p 2287 N93-22200
The sensitivity in eddy current testing of austenitic material
| VTT-JULK-758 | p 2231 N93-23368
A figure of merit for Transit-Time-Limited time-derivative electromagnetic field sensors
| AD-A260016 | p 2273 N93-24459

SENSORIMOTOR PERFORMANCE
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362

SENSORS
Advances in Guidance and Control of Precision Guided Weapons
| AGARD-CP-524 | p 2254 N93-22018
On-line process analysis innovation: DiComp (tm) shunting dielectric sensor technology p 2287 N93-22200
A modular, programmable measurement system for physiological and spaceflight applications p 2305 N93-22201
Predictive sensor method and apparatus p 2305 N93-22202
TRAC based sensing for autonomous rendezvous p 2140 N93-22253
Integrated and Multi-Function Navigation
| AGARD-CP-525 | p 2119 N93-22780
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
| NASA-TM-104002 | p 2128 N93-23175
Correlation and prediction of snow water equivalent from snow sensors
| PB93-127413 | p 2374 N93-23870
Microelectronic and micromechanical sensors and actuators in CMOS technology: A novel scheme toward s regularization and integration
| ISBN-0-315-60192-2 | p 2305 N93-24609
The SSIMT: A CMOS based magnetic sensor
| ISBN-0-315-60334-8 | p 2305 N93-24610

SENSORY PERCEPTION
Virtual reality applications to automated rendezvous and capture p 2141 N93-22261

SEPARATED FLOW
Navier-Stokes analysis of airfoils with leading edge ice accretions
| NASA-CR-191008 | p 2109 N93-22822
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
| AD-A260118 | p 2113 N93-23714
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
| NASA-TP-3247 | p 2113 N93-24118
Separated flow past smooth slender bodies p 2298 N93-24213
An oscillating three-dimensional wing experiment: Compressibility, sweep, rate, waveform, and geometry effects on unsteady separation and dynamic stall
| AD-A260530 | p 2114 N93-24224
An investigation of the fundamental cause of asymmetric separated flow
| AD-A260295 | p 2114 N93-24263

SEQUENCING
The WG sequences: Quasi perfect binary sequences p 2271 N93-23631

SEQUENTIAL ANALYSIS
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
| AD-A260047 | p 2472 N93-23711

SERIES EXPANSION
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
| DE93-005607 | p 2279 N93-22945

SEROTONIN
Study of SCN neurochemistry using in vivo microdialysis in the conscious brain: Correlation with circadian activity rhythms
| AD-A259803 | p 2421 N93-23459

SERVICE LIFE
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
100-kW class applied-field MPD thruster component wear
| NASA-TM-106023 | p 2203 N93-22482
Development of a 100 kW class plasma torch for ash-melting plasma furnaces
| DE93-754079 | p 2493 N93-22715
Life cycle testing of desiccant core samples
| PB93-127058 | p 2220 N93-23098
High temperature filter materials
| DE93-005018 | p 2315 N93-23295
Photovoltaics Performance and Reliability Workshop
| DE93-000017 | p 2380 N93-23303
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
| NASA-TM-104748 | p 2243 N93-24474

SERVICES
Earth sensing data service p 2339 N93-22439
Communications techniques supporting the data management p 2276 N93-23543
Meteosat operational programme current missions and services p 2357 N93-23752
SPOT 4 image ground segment p 2360 N93-23768
Definition of a European promotion concept p 2162 N93-24381

SERVOMECHANISMS
Sample positioning in microgravity
| NASA-CASE-NPO-18448-1-CU | p 2253 N93-24600
Reliable vision-guided grasping
| NASA-CR-193197 | p 2464 N93-24603
Vision-guided gripping of a cylinder
| NASA-CR-193199 | p 2465 N93-24657

SERVOMOTORS
Fuzzy control of small servo motors p 2453 N93-22357

SET THEORY
Inverting sets and the packing problem
| DE93-003822 | p 2466 N93-22075
Application of fuzzy set and Dempster-Shafer theory to organic geochemistry interpretation p 2450 N93-22212
Certain and possible rules for decision making using rough set theory extended to fuzzy sets p 2454 N93-22359

SEXTANTS
Silicon accelerometer for AHRS and hybrid navigation systems p 2120 N93-22786

SEYFERT GALAXIES
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
X ray spectral structure of the Seyfert 2 galaxy NGC 5506 p 2536 N93-23898

SHADOWS
Shadow technique for improved inversion of lidar data to cirrus and contrail optical depth
| ESA-TT-1263 | p 2405 N93-23332

SHAFTS (MACHINE ELEMENTS)
Stability and stability degree of a cracked flexible rotor supported on journal bearings
| ILR-MITT-268(1991) | p 2313 N93-23020
Wrench for installing an electrical connector
| AD-D015625 | p 2318 N93-24220
Suspension device for low-frequency structures
| NASA-CASE-LAR-14272-1-CU | p 2169 N93-24598

SHAPE CONTROL
Vibration control experiments on a 12-meter cantilever truss structure
| AD-A259764 | p 2328 N93-23484

SHAPES
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
Sensory sensitivities and discriminations and their roles in aviation
| AD-A259742 | p 2424 N93-23479
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
| NASA-CR-191422 | p 2211 N93-23877
Application and development of wavelet analysis
| AD-A260389 | p 2489 N93-24240
Center for shape optimization and material layout
| AD-A260087 | p 2471 N93-24411

SHEAR FLOW
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows
| DE93-004122 | p 2287 N93-22071
Tests of random flight and closure models in predicting turbulent scalar transport
| DE93-004123 | p 2288 N93-22521

SHEAR LAYERS
Improved two-equation k-omega turbulence models for aerodynamic flows
| NASA-TM-103975 | p 2289 N93-22809
Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592
The effect of large-scale unsteady motion on a turbulent reattaching shear layer: Application to the supersonic compression ramp p 2114 N93-24215

SHEAR PROPERTIES
Friction microprobe investigation of particle layer effects on sliding friction
| DE92-018868 | p 2313 N93-22925
Dielectric and dynamic mechanical properties of ATBN-containing thermosets
| DREA-CR-91-444 | p 2239 N93-23725
Performance study of the rheometrics melt flow monitor for real-time rheological characterization
| NRC-34372 | p 2241 N93-24290

SHEAR STRESS
Development of an interfacial test system for the determination of interfacial properties in fiber reinforced ceramic composites
| DE93-006743 | p 2236 N93-22579
Improved two-equation k-omega turbulence models for aerodynamic flows
| NASA-TM-103975 | p 2289 N93-22809
Surface acoustic wave sensors and piezoelectric actuators for investigations of transitional and turbulent flows
| AD-A260482 | p 2290 N93-22932

Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
| NASA-CR-192805 | p 2414 N93-23138
The effect of current-induced stress perturbation on large- and meso-scale air-sea interactions
p 2393 N93-23207
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
| NASA-TM-102211 | p 2300 N93-24541
Inelastic nonuniform torsion of steel I-beams
| PB93-118776 | p 2333 N93-24589

SHELLS (STRUCTURAL FORMS)
Adaptive hierarchic modeling of plates and shells with a-posteriori error estimation
| AD-A259941 | p 2332 N93-24242

SHIELDING
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
| DE93-006932 | p 2182 N93-22583

SHIPS
Oceanic CO measurements for the WOCE Hydrological Survey in the Pacific Ocean: Shipboard Alkalinity analyses during 1991 and 1992
| DE93-006900 | p 2412 N93-22581
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
| PB93-142362 | p 2122 N93-23652

SHIPYARDS
Measurements of surface ocean carbon dioxide partial pressure during WOCE
| DE93-006890 | p 2412 N93-22580

SHOCK ABSORBERS
Energy dissipator
| NASA-CASE-MSC-21555-1 | p 2314 N93-23075

SHOCK FRONTS
Numerical studies for the RAM accelerator
| AD-A259949 | p 2224 N93-24423

SHOCK HEATING
Witness plate shock velocity study
| DE93-005742 | p 2474 N93-22760

SHOCK LAYERS
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow
p 2114 N93-24209

SHOCK RESISTANCE
Factors influencing the thermal shock behavior of ceramics
| DE93-005762 | p 2236 N93-22690

SHOCK TUBES
Comprehensive mechanisms for combustion chemistry: An experimental and numerical study with emphasis on applied sensitivity analysis
| DE93-007258 | p 2219 N93-22824
Investigation of critical C/H/N/O reactions in NOx formation and removal in natural gas combustion
| PB93-132702 | p 2222 N93-23347

SHOCK TUNNELS
Shock tunnel studies of scramjet phenomena, supplement 6
| NASA-CR-191428 | p 2289 N93-22817

SHOCK WAVE INTERACTION
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
| NASA-TM-106056 | p 2466 N93-22664
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow
p 2114 N93-24209
Hypersonic shock/boundary-layer interaction database
| NASA-CR-177577 | p 2299 N93-24526
Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
| NASA-TM-103909 | p 2300 N93-24537
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
| NASA-TM-103838 | p 2300 N93-24542

SHOCK WAVE PROPAGATION
Witness plate shock velocity study
| DE93-005742 | p 2474 N93-22760
Effects of UGTs on the ionosphere
| DE93-000793 | p 2392 N93-22806

SHOCK WAVES
Chinese research on shock physics
| PB93-134450 | p 2474 N93-22080
Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
| NASA-TM-107726 | p 2108 N93-22552
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
| NASA-TM-106056 | p 2466 N93-22664
Restoring monotonicity of slowly-moving shocks computed with Godunov-type schemes
| CRANFIELD-AERO-9207 | p 2297 N93-24075

SHORAN
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
| PB93-142362 | p 2122 N93-23652
Aids to Navigation Service Force Mix 2000 Project. Volume 3: Analysis of multi-mission requirements and development of planning factors for the Replacement Buoy Tender Fleet
| PB93-142370 | p 2123 N93-24489

SHOT PEENING
High reliability residual compressive stress processes. State-of-the-art assessment
| PB93-127751 | p 2331 N93-24207

SHROUDED PROPELLERS
Aeroacoustic diffraction and dissipation by a short propeller cowl in subsonic flight
| NASA-CR-190801 | p 2476 N93-22673

SHUTTLE IMAGING RADAR
Geological applications of space SAR data
p 2339 N93-22440

SIERRA NEVADA MOUNTAINS (CA)
Correlation and prediction of snow water equivalent from snow sensors
| PB93-127413 | p 2374 N93-23870

SIGNAL ANALYSIS
Location of emissions by evasion of frequency and gusts by sequential analysis sensor in fast scanning
p 2270 N93-23625

SIGNAL ANALYZERS
Data selection for fast projection techniques: A comparative study of direction finding performance
| AD-A259916 | p 2262 N93-22814
Technical Digest. Detection systems and technology, September 1992
| AD-A259812 | p 2271 N93-23670
Pattern classifier for health monitoring of helicopter gearboxes
| NASA-TM-106099 | p 2316 N93-23741

SIGNAL DETECTION
Optimal three-dimensional matched filter processing for detection of point-like moving objects in clutter
| AD-A259727 | p 2487 N93-23469
Systematic bearing errors of HF signals observed over a North-South propagation path p 2268 N93-23614
Test and evaluation of neural network applications for seismic signal discrimination
| AD-A260030 | p 2401 N93-24440

SIGNAL DETECTORS
Surface acoustic wave sensors and piezoelectric actuators for investigations of transitional and turbulent flows
| AD-A260482 | p 2290 N93-22932
Test and evaluation of neural network applications for seismic signal discrimination
| AD-A260030 | p 2401 N93-24440

SIGNAL ENCODING
Real-time transmission of digital video using variable-length coding
| NASA-TM-106092 | p 2261 N93-22483
Application of Costas codes and quadratic congruential codes to digital pulse compression
| DREO-TN-91-31 | p 2271 N93-23726
Wavelet encoding and variable resolution progressive transmission p 2431 N93-24548

SIGNAL FADING
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
| DREO-CR-041LM | p 2271 N93-23729
Simulation of a NC-FSK maximum likelihood receiver for fast Rayleigh fading
| ISBN-0-315-59024-6 | p 2274 N93-24627

SIGNAL MEASUREMENT
A modular, programmable measurement system for physiological and spaceflight applications
p 2305 N93-22201
The influence of propagation on high frequency radiogoniometry and single station location
p 2266 N93-23607
Measurements of the direction of arrival of an oblique chirp sounder signal p 2268 N93-23616

SIGNAL PROCESSING
Advances in Guidance and Control of Precision Guided Weapons
| AGARD-CP-524 | p 2254 N93-22018
Automated system for analyzing the activity of individual neurons p 2423 N93-22163
A modular, programmable measurement system for physiological and spaceflight applications
p 2305 N93-22201
LADAR vision technology for automated rendezvous and capture p 2141 N93-22258
On using scattering statistics for ultra wideband electromagnetic target classification and identification
| DE93-003809 | p 2260 N93-22433
Vibration Pattern Imager (VPI): A control and data acquisition system for scanning laser vibrometers
| NASA-TM-107721 | p 2476 N93-22553
Chinese research on underwater acoustics
| PB93-134468 | p 2476 N93-23229
Effect of code augmentation or truncation on the signals produced by a time-integrating correlator
| AD-A259802 | p 2264 N93-23458
A vector signal processing approach to color
| AD-A259499 | p 2487 N93-23465
Optimal three-dimensional matched filter processing for detection of point-like moving objects in clutter
| AD-A259727 | p 2487 N93-23469
Radiolocation Techniques
| AGARD-CP-528 | p 2265 N93-23598
Detection of active emitters using triangulation and trilateration techniques: Theory and practice
p 2267 N93-23612
Test results of the advanced translator processing system p 2269 N93-23620
Multidimensional signal coding in the visual system
| AD-A259836 | p 2488 N93-23696
Design of an imaging spectrometer processing chain for space application p 2364 N93-23792
Joint services electronics program. Basic research in electronics (JSEP)
| AD-A259598 | p 2283 N93-24068
Real-time signal processing systems
| AD-A259548 | p 2272 N93-24084
A method for skew-free distribution of digital signals using matched variable delay lines
| AD-A260171 | p 2272 N93-24133
Constant false probability data fusion system
| AD-D015624 | p 2304 N93-24219
Electronics and electrical engineering laboratory technical publication announcements covering laboratory programs, April to June 1992, with 1992/1993 EEEL events calendar
| PB93-147163 | p 2284 N93-24225
Feature-oriented signal processing under nonlinear partial differential equations
| AD-A259951 | p 2470 N93-24245
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
| AD-A260229 | p 2310 N93-24320
Test and evaluation of neural network applications for seismic signal discrimination
| AD-A260030 | p 2401 N93-24440
The 1993 Space and Earth Science Data Compression Workshop
| NASA-CP-3191 | p 2430 N93-24544
Optimum space-time processing in non-stationary environments
| ISBN-0-315-56985-9 | p 2274 N93-24620
VLSI architectural synthesis for DSP custom applications
| ISBN-0-315-57793-2 | p 2433 N93-24621

SIGNAL TO NOISE RATIOS
Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware
p 2141 N93-22260
Angle of arrival characteristics of ionospheric skywave signals p 2268 N93-23618
Analysis of DGPS MSK receivers in a non-gausian noise environment
| PB93-152866 | p 2123 N93-24310
The detection and amplification processes in low light level cameras with CCD and image intensifier
| FFI-92/7017 | p 2490 N93-24646

SIGNAL TRANSMISSION
Electromagnetic radiating source elimination (ERASE) program p 2254 N93-22019
Real-time transmission of digital video using variable-length coding
| NASA-TM-106092 | p 2261 N93-22483
Irregular media effects on radiowave signals used in navigation and positioning systems
p 2266 N93-23606
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Systematic bearing errors of HF signals observed over a North-South propagation path p 2268 N93-23614
Large bearing errors observed at a high latitude DF site p 2268 N93-23615

SIGNATURE ANALYSIS
Intelligent neuroprocessors for in-situ launch vehicle propulsion systems health management
p 2452 N93-22221
Detectability of high power aircraft
|MBB-FE-S-PUB-0490| p 2262 N93-22682
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
|NASA-CR-189715| p 2476 N93-22813
Pattern classifier for health monitoring of helicopter gearboxes
|NASA-TM-106099| p 2316 N93-23741
SIGNATURES
Cosmic-ray-veto detector system
|DE93-004787| p 2559 N93-22707
A prompt start: Implementing the framework convention on climate change
|DE93-005062| p 2383 N93-22716
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
|NASA-CR-189715| p 2476 N93-22813
Terminology and assessment methods of solid propellant rocket exhaust signatures
|AGARD-AR-287| p 2204 N93-22998
A proposed neutral line signature
|NASA-CR-192335| p 2393 N93-23211
Airborne studies of ocean-particle-cloud interactions
|AD-A259874| p 2415 N93-23958
SIGNS AND SYMPTOMS
Evoked brain potentials as indicators of a central nervous impairment in a simulated saturation dive to 560 m
|DLR-FB-92-14| p 2422 N93-24093
SILICA GEL
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
|DE93-005372| p 2218 N93-22505
Life cycle testing of desiccant core samples
|PB93-127058| p 2220 N93-23098
SILICA GLASS
Gas separation with glass membranes
|DE93-000217| p 2219 N93-22871
SILICATES
Sol-gel/rhodamine 6G composite films with tailored microstructures
|DE93-005364| p 2208 N93-22504
Isotope tracer studies of diffusion in silicates and of geological transport processes using actinide elements
|DE93-006902| p 2392 N93-23029
Silicon nitride containing rare earth silicate intergranular phases
|DE93-006624| p 2509 N93-24034
SILICIDES
Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
|DE93-004204| p 2499 N93-22064
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
|DE93-005472| p 2235 N93-22341
SILICON
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
|DE93-004784| p 2303 N93-22706
Silicon accelerometer for AHRS and hybrid navigation systems p 2120 N93-22786
Amorphous diffusion barriers for electronic device applications
|ETN-93-93476| p 2281 N93-23366
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
|NASA-TM-106057| p 2283 N93-23743
Cavities in He-implanted Si: Internal surface science
|DE93-005340| p 2509 N93-24012
Spectroscopic ellipsometry and interference reflectometry measurements of CVD silicon grown on oxidized silicon
|DE93-005767| p 2509 N93-24017
Solute binding at void surfaces in silicon and germanium
|DE93-001504| p 2233 N93-24048
Chemical vapor infiltration with microwave heating
|DE93-005458| p 2243 N93-24445
SILICON ALLOYS
Investigation of the kinetics of surface-limited thin film growth of SiGe alloys
|DE93-005419| p 2502 N93-22538
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
|DE93-000049| p 2377 N93-22750
Time-resolved reflectivity study of solid-phase epitaxial regrowth in relaxed and strained Si(1-x)Ge(x)
|DE93-005154| p 2506 N93-23312
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
|DE93-000071| p 2508 N93-23673
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
|DE93-004476| p 2508 N93-23691
High temperature rare earth and Si-Ge thermoelectric materials
|DE93-006913| p 2513 N93-24462
SILICON CARBIDES
Evaluation of ceramic materials for an advanced steam-methane reformer
|DE93-005931| p 2235 N93-22329
Structure, mechanical properties, and oxidation behavior of nanolayered MoSi2/SiC coatings
|DE93-005472| p 2235 N93-22341
Influence of fiber coatings on the oxidation of fiber-reinforced SiC composites
|DE93-006742| p 2208 N93-22578
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
|DE93-006420| p 2214 N93-24030
Metrologic support for the DARPA/NRL-XRL Mask Program: Ellipsometric analyses of SiC thin films on Si
|PB93-152098| p 2225 N93-24632
Effects of processing parameters on the microstructure of a 30 w/o SiCw-2080 aluminum composite
|NRC-IAR-CR-20| p 2216 N93-24651
SILICON DIOXIDE
Pressure-induced amorphizations of silica analogues: A probe of the relationship between order and disorder
|DE93-007966| p 2237 N93-22730
SILICON FILMS
Thin silicon solar cells
|DE93-007420| p 2376 N93-22532
Growth mechanisms and characterization of hydrogenated amorphous-silicon-alloy films
|DE93-000071| p 2508 N93-23673
SILICON NITRIDES
A round-robin for particle electrophoresis standardization
|DE93-003018| p 2217 N93-22400
Strength optimization through powder modification
|DE93-005109| p 2237 N93-22718
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
|DE93-006745| p 2325 N93-22896
Solid-particle erosion of in-situ reinforced Si3Ni4
|DE92-014868| p 2209 N93-22911
The effect of UV light on Ir absorption in chemically vapor deposited a-SiN(x):H films
|DE93-004502| p 2486 N93-22941
Fabrication and properties of Si3N4 with rare earth apatite grain boundary phases
|DE93-005752| p 2505 N93-23037
The mechanical properties of a novel Si3N4-amorphous Si3N4 composite
|DE93-005473| p 2210 N93-23246
Evaluation of tensile static, dynamic, and cyclic fatigue behavior for a HIPed silicon nitride at elevated temperatures
|DE93-005149| p 2210 N93-23311
Boundary film for structural ceramic materials
|DE93-004871| p 2240 N93-23975
Silicon nitride containing rare earth silicate intergranular phases
|DE93-006624| p 2509 N93-24034
Application of microwave heating for fabrication of silicon nitride ceramics
|DE93-006741| p 2242 N93-24330
Obtaining high-resolution images of ceramic from 3-D x-ray microtomography by region-of-interest reconstruction
|DE93-006796| p 2243 N93-24461
SIMD (COMPUTERS)
Contact-impact simulations on massively parallel SIMD supercomputers
|DE93-004188| p 2445 N93-22060
Efficiently modeling neural networks on massively parallel computers p 2453 N93-22353
Data-parallel Langevin dynamics simulations
|DE93-003836| p 2445 N93-22434
Efficiently modeling neural networks on massively parallel computers
|DE93-003787| p 2447 N93-22937
Isomorphic routing on a toroidal mesh
|NASA-CR-191430| p 2437 N93-23058
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
|DE93-005461| p 2447 N93-23245
SIMILARITY NUMBERS
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866
SIMPLIFICATION
Interpretation as abduction
|AD-A259608| p 2425 N93-24227
SIMULATED ANNEALING
Probability and statistics applied to the theory of algorithms
|AD-A259956| p 2473 N93-24248
SIMULATION
Neighboring suboptimal control for vehicle guidance
p 2171 N93-22011
National Launch System: Structures and materials
p 2172 N93-22083
ATTIRE (analytical tools for thermal infrared engineering): A sensor simulation and modeling package
p 2305 N93-22203
Simulation of electronic transport in semiconductor heterolayer devices
|AD-A260122| p 2502 N93-22548
Opportunities and challenges in avionics integration, INS/GPS: A case study p 2119 N93-22782
Smoke movement in a corridor-hybrid model, simple model, and comparison with experiments
|PB93-146678| p 2259 N93-23435
Training high performance skills using above real-time training
|NASA-CR-192616| p 2425 N93-24192
Suspension device for low-frequency structures
|NASA-CASE-LAR-14272-1-CU| p 2169 N93-24598
SIMULATORS
Visual system performance for driving simulators
|MBB-FE-521-S-PUB-0497| p 2132 N93-22393
Icing cloud simulator for use in helicopter engine induction system ice protection testing
|DOT/FAA/CT-TN92/43| p 2133 N93-23087
Developing a neural network to act as a noise filter
|AD-A259515| p 2460 N93-23699
Automated program recognition by graph parsing
|AD-A259609| p 2441 N93-24125
Training high performance skills using above real-time training
|NASA-CR-192616| p 2425 N93-24192
SINGLE CRYSTALS
High performance sapphire windows
p 2310 N93-22198
Correlations between surface structure and catalytic activity/selectivity
|DE93-005884| p 2217 N93-22423
A vibrational analysis of Au implanted Al2O3 single crystals: Ion and thermal annealing effects
|DE93-006216| p 2501 N93-22508
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
|DE93-004854| p 2503 N93-22745
A structural study of charge-density-wave perturbations in mixed-halide MX solids
|DE93-005449| p 2503 N93-22747
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films
p 2505 N93-23100
Growth and characterization of isotopically enriched Ge-70 and Ge-74 single crystals
|DE93-004697| p 2510 N93-24050
Heteroepitaxial diamond growth
|AD-A259623| p 2510 N93-24127
Diamond homoepitaxy by chemical vapor deposition
|AD-A260551| p 2512 N93-24281
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292
SINGLE EVENT UPSETS
Design and qualification of the SEU/TD Radiation Monitor chip
|NASA-CR-192797| p 2280 N93-23041
SINGLE SIDEBAND TRANSMISSION
A current assessment of single site locating technology p 2267 N93-23608
SINGLE STAGE TO ORBIT VEHICLES
Advanced Manned Launch System
p 2172 N93-22084
Single stage to orbit/SDIO p 2173 N93-22086
Advanced rocket propulsion p 2174 N93-22091
New launch technologies and American competitiveness p 2153 N93-23157
An overview of aeroelasticity studies for the National Aerospace Plane
|NASA-TM-107728| p 2111 N93-23422
SINGLE-PHASE FLOW
COMMIX-1AR/P: A three-dimensional transient single-phase computer program for thermal hydraulic analysis of single and multicomponent systems
|DE93-006044| p 2289 N93-22694
SINGULARITY (MATHEMATICS)
Numerical treatment of vertex singularities and intensity factors for mixed boundary value problems for the Laplace equation in R3
|AD-A260107| p 2469 N93-23713
SINKS
Impact contribution of prebiotic reactants to Earth
|NASA-CR-192785| p 2552 N93-24480

SINTERING
Silicon nitride containing rare earth silicate intergranular phases
| DE93-006624 | p 2509 N93-24034
Application of microwave heating for fabrication of silicon nitride ceramics
| DE93-006741 | p 2242 N93-24330
SIZE DETERMINATION
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
| AD-A260288 | p 2411 N93-24568
SKY SURVEYS (ASTRONOMY)
ROSAT all sky survey observations of IRAS galaxies
| MPE-PREPRINT-220 | p 2542 N93-22462
The ROSAT all-sky x ray survey p 2533 N93-23880
ROSAT observations of active galactic nuclei p 2534 N93-23888
IRAS galaxies in the ROSAT survey p 2536 N93-23897
Extragalactic radio sources in the ROSAT survey p 2536 N93-23899
Soft x ray emission from supergiant x ray binaries detected on the ROSAT all-sky survey p 2537 N93-23907
SKY WAVES
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601
Angle of arrival characteristics of ionospheric skywave signals p 2268 N93-23618
SLABS
Cosmic-ray-veto detector system
| DE93-004787 | p 2559 N93-22707
Nonlinear analysis of relativistic harmonic generation by intense lasers in plasmas
| AD-A260092 | p 2497 N93-24052
SLAGS
Optical properties of slags: Data for refractive indices and absorption coefficients
| NPL-DMM(A)-73 | p 2486 N93-22453
SLENDER BODIES
An approximate method for estimating the lifting characteristics of thin bodies of non-circular cross-section
| CRANFIELD-AERO-9006 | p 2108 N93-22395
Upwind relaxation method for hypersonic flow simulation
| DLR-FB-91-36 | p 2109 N93-22659
Separated flow past smooth slender bodies p 2298 N93-24213
SLIDING
Development of an interfacial test system for the determination of interfacial properties in fiber reinforced ceramic composites
| DE93-006743 | p 2236 N93-22579
SLIDING FRICTION
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
| NASA-TM-105939 | p 2206 N93-22590
Friction microprobe investigation of particle layer effects on sliding friction
| DE92-018868 | p 2313 N93-22925
Experimental and analytical study of a hybrid isolation system using friction controllable sliding bearings
| PB93-150282 | p 2320 N93-24595
SLOT ANTENNAS
Space power amplification with active linearly tapered slot antenna array
| NASA-TM-106036 | p 2277 N93-22485
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
| NASA-TM-106057 | p 2283 N93-23743
Log-periodic slot antenna
| CA-PATENT-1-296-421 | p 2272 N93-24203
SLOTS
Slotted-wall flow-field measurements in a transonic wind tunnel
| NASA-TM-4280 | p 2113 N93-24111
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
| NASA-TP-3247 | p 2113 N93-24118
SLUSH
Inter-comparison of satellite derived passive microwave ice products p 2371 N93-23836
SMALL SCIENTIFIC SATELLITES
Concept of a small satellite for URM p 2199 N93-23922
SMART STRUCTURES
Smart electromagnetic structures: The neural antenna
| AD-A260469 | p 2262 N93-22931
SMOKE
Comparison of full scale fire tests and a computer fire model of several smoke ejection experiments
| PB93-139087 | p 2258 N93-23280
Smoke movement in a corridor-hybrid model, simple model, and comparison with experiments
| PB93-146678 | p 2259 N93-23435
SMOOTHING
Ablation, melting, and smoothing of polycrystalline alumina by pulsed excimer laser radiation
| DE93-005148 | p 2227 N93-22496
SNEAK CIRCUIT ANALYSIS
Sneak analysis applied to process systems
| DE93-752866 | p 2257 N93-22970
SNOW
Correlation and prediction of snow water equivalent from snow sensors
| PB93-127413 | p 2374 N93-23870
A nitrate signal of solar flares in polar snow and ice
| AD-A260559 | p 2558 N93-24284
SNOW COVER
A snow cover model for global climatic simulations
| MPIM-85 | p 2388 N93-23861
SOBOLEV SPACE
On the regularity of elasticity problems with piecewise analytic data
| AD-A260346 | p 2332 N93-24273
SOCIAL FACTORS
Points of Light movement: The President's report to the Nation
| PB93-139780 | p 2532 N93-23679
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
| PB93-152031 | p 2416 N93-24605
SOCIOLOGY
Points of Light movement: The President's report to the Nation
| PB93-139780 | p 2532 N93-23679
SODIUM SULFATES
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
| AD-A258453 | p 2233 N93-23982
SODIUM SULFUR BATTERIES
Variable pressure insulating jackets for high-temperature batteries
| DE93-006404 | p 2283 N93-24027
SODIUM VAPOR
Development of a laser-induced fluorescence system for application to rocket plumes
| AD-A259760 | p 2205 N93-24025
SOFTWARE ENGINEERING
Advanced software development workstation. OOPSLA 1992 Conference. Trip report
| NASA-CR-192811 | p 2432 N93-22041
Development of interactive multimedia applications p 2530 N93-22171
Learning characteristics of a space-time neural network as a tether skiprope observer p 2197 N93-22176
The design of scalable software libraries for distributed memory concurrent computers
| DE93-003612 | p 2434 N93-22332
Exploratory research for the development of a computer aided software design environment with the software technology program
| NASA-CR-192821 | p 2434 N93-22385
User areas in aircraft cockpit, using methods of rapid prototype development
| MBB-FE-315-S-PUB-0493 | p 2426 N93-22389
Computer aided integrated production planning in unit production, as represented in aircraft construction
| MBB-FW-3-S-PUB-0439-A | p 2435 N93-22394
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Special approach/docking testcase results
| NASA-CR-192294 | p 2180 N93-22683
Conjunctive programming: An interactive approach to software system synthesis
| NASA-CR-192798 | p 2436 N93-22701
Software engineering: What do experiments need?
| DE93-004767 | p 2436 N93-22740
Mission requirements and applications of integrated and multi-function navigation systems p 2119 N93-22781
Update of GRASP/Ada reverse engineering tools for Ada
| NASA-CR-192465 | p 2436 N93-22798
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Attitude control results
| NASA-CR-192291 | p 2458 N93-23084
Proceedings: DOD Software Technology Strategy public forum p 2437 N93-23092
Modeling and analysis of software reliability p 2438 N93-23196
A new process for acquiring software architecture
| AD-A259487 | p 2439 N93-23463
Support measurement and estimating for oracle database applications using Mark 2 function points
| AD-A259686 | p 2440 N93-23661
Software design specification for the Manufacturing Optimization (MO) system
| AD-A259707 | p 2440 N93-23666
Academic legitimacy of the software engineering discipline
| AD-A260241 | p 2441 N93-24223
Progressive retry for software error recovery in distributed systems
| AD-A260075 | p 2442 N93-24315
DataMir: A PC-based computer system for application at Space Station Mir p 2158 N93-24358
Activities of the Institute for Information Technology
| NRC-35023 | p 2571 N93-24648
SOFTWARE RELIABILITY
Modeling and analysis of software reliability p 2438 N93-23196
PASCAL subroutines for standard test problems in unconstrained minimization
| MATHS-REPT-A-155 | p 2441 N93-24076
Development of code evaluation criteria for assessing predictive capability and performance
| NASA-CR-192623 | p 2442 N93-24473
SOFTWARE REUSE
A NASA-wide approach toward cost-effective, high-quality software through reuse
| NASA-CP-10115 | p 2435 N93-22601
Conjunctive programming: An interactive approach to software system synthesis
| NASA-CR-192798 | p 2436 N93-22701
PMC: A shared short-cut to portable parallel power
| DE93-005815 | p 2447 N93-22868
Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
| NASA-CR-192820 | p 2523 N93-23031
SOFTWARE TOOLS
Computer Aided Control System Design (CACSD) p 2107 N93-22572
A NASA-wide approach toward cost-effective, high-quality software through reuse
| NASA-CP-10115 | p 2435 N93-22601
Knowledge base methodology: Methodology for first Engineering Script Language (ESL) knowledge base
| NASA-CR-192820 | p 2523 N93-23031
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
| NASA-CR-184472 | p 2258 N93-23176
Investigation of proof techniques within the EVES verification technology
| DREO-FR-92-5451-02 | p 2440 N93-23730
Application and development of wavelet analysis
| AD-A260389 | p 2489 N93-24240
Develop an x-windows tool to compute Gaussian beam synthetic seismograms
| AD-A260034 | p 2400 N93-24253
COMPASS: A computerized payload operations support system for Columbus p 2161 N93-24377
Flowfield computer graphics
| NASA-CR-193029 | p 2444 N93-24655
SOIL EROSION
Estimation of runoff and erosion using GIS integrating DEM, LANDSAT data, and terrain hydrological data p 2351 N93-23558
SOIL MECHANICS
Horizontal stress in-situ by cone penetrometers and related studies
| AD-A260503 | p 2401 N93-24418
SOIL MOISTURE
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation p 2407 N93-23495
Use of Special Sensor Microwave/Imager (SSM/I) for estimation of precipitation features in a semi-arid, mountain region: A case study of southwest Saudi Arabia p 2407 N93-23721
SOIL SCIENCE
Vineyard cadastre monitoring using remote sensed data in an integrated GIS p 2351 N93-23556
Horizontal stress in-situ by cone penetrometers and related studies
| AD-A260503 | p 2401 N93-24418
SOILS
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803
Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
| OEFZS-4632 | p 2375 N93-24456
SOL-GEL PROCESSES
High-power optical coatings for a mega-Joule class ICF laser
| DE93-005821 | p 2306 N93-22328
Sol-gel/rhodamine 6G composite films with tailored microstructures
| DE93-005364 | p 2208 N93-22504

Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
| DE93-005372 | p 2218 N93-22505
Metallo-organic solution deposition of ferroelectric PZT films
| AD-A260127 | p 2502 N93-22549
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
| AD-A260525 | p 2241 N93-24201

SOLAR ACTIVITY
Solar-geophysical data number 578, October 1992. Part 1: (Prompt reports). Data for September, August 1992 and late data
| PB93-134013 | p 2556 N93-23227
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
| PB93-138469 | p 2556 N93-23334
Chaotic dynamics of the solar cycle
| AD-A260039 | p 2557 N93-23644
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175
Solar-geophysical data number 580, December 1992. Part 1: (Prompt reports). Data for November, October 1992, and late data
| PB93-150332 | p 2558 N93-24335

SOLAR ACTIVITY EFFECTS
Solar maximum mission/ultraviolet spectrometer and polarimeter studies
| NASA-CR-192463 | p 2555 N93-23011
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
| AD-A259781 | p 2557 N93-23973
Remote sensing of inner heliospheric plasmas
| AD-A260337 | p 2558 N93-24268

SOLAR ARRAYS
Automating an orbiter approach to Space Station Freedom to minimize plume impingement
p 2149 N93-22305
Interagency Advanced Power Group Solar Photovoltaic Panel Fall Meeting minutes
| DE93-006188 | p 2376 N93-22330
Space Station Freedom beta gimbal control via sensitivity models
| NASA-TM-106000 | p 2182 N93-22551
Lightweight solar concentrator structures, phase 2
| NASA-CR-191068 | p 2203 N93-22674
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
| NASA-TM-106084 | p 2195 N93-23742

SOLAR ATMOSPHERE
Observation of impulsive acoustic events and the excitation of solar oscillations
| AD-A259788 | p 2557 N93-23454
The liquid crystal polarimeter for solid-state imaging of solar vector magnetic fields
| AD-A260029 | p 2483 N93-24251

SOLAR CELLS
Interagency Advanced Power Group Solar Photovoltaic Panel Fall Meeting minutes
| DE93-006188 | p 2376 N93-22330
Polycrystalline thin films
| DE93-000070 | p 2500 N93-22336
Thin silicon solar cells
| DE93-007420 | p 2376 N93-22532
Battery compatibility with photovoltaic charge controllers
| DE93-005373 | p 2377 N93-22537
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
| DE93-000049 | p 2377 N93-22750
In-situ characterization of growth and interfaces in a-Si:H devices
| DE93-000051 | p 2504 N93-22928
Photovoltaic evaluation study
| DE93-761330 | p 2378 N93-22956
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
| DE93-000050 | p 2505 N93-22969
Monolithic, series connected GaAs photovoltaic power converters for optoelectronic component applications
| DE93-004385 | p 2380 N93-23293
The Photovoltaic Manufacturing Technology Project, phase 1
| DE92-010597 | p 2380 N93-23302
Photovoltaics Performance and Reliability Workshop
| DE93-000017 | p 2380 N93-23303
Solar pumping: An introduction and update on the technology, performance, costs, and economics
| WORLD BANK TP-168 | p 2381 N93-23444
New 3-5 cell design approaches for very high efficiency
| DE92-010558 | p 2381 N93-23697
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
| NASA-TM-106084 | p 2195 N93-23742
Solar collector manufacturing activity 1991
| DE93-006559 | p 2382 N93-24032
Basic studies of 3-5 high efficiency cell components
| DE92-010563 | p 2382 N93-24432
Research on high efficiency, large-area CuInSe2-based thin-film modules
| DE93-000077 | p 2513 N93-24433

SOLAR COLLECTORS
Lightweight solar concentrator structures, phase 2
| NASA-CR-191068 | p 2203 N93-22674
Current performance and potential improvements in solar thermal industrial heat
| DE93-000048 | p 2377 N93-22927
A summary of recent activities at the National Solar Thermal Test Facility
| DE92-040969 | p 2379 N93-22967
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017
The Photovoltaic Manufacturing Technology Project, phase 1
| DE92-010597 | p 2380 N93-23302
Photovoltaics Performance and Reliability Workshop
| DE93-000017 | p 2380 N93-23303
A review of the experience gained in 10 years operation of Gould's solar industrial process heat system
| DE93-003991 | p 2381 N93-23970
Solar collector manufacturing activity 1991
| DE93-006559 | p 2382 N93-24032

SOLAR CONVECTION (ASTRONOMY)
Observation of impulsive acoustic events and the excitation of solar oscillations
| AD-A259788 | p 2557 N93-23454

SOLAR COOLING
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
| DE93-005795 | p 2376 N93-22417

SOLAR CORONA
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
| PB93-138469 | p 2556 N93-23334
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
SUMER: Solar Ultraviolet Measurements of Emitted Radiation p 2541 N93-23931
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189

SOLAR CYCLES
Global solar intensity oscillations near solar maximum p 2557 N93-23492
Chaotic dynamics of the solar cycle
| AD-A260039 | p 2557 N93-23644

SOLAR DYNAMIC POWER SYSTEMS
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139

SOLAR ELECTRIC PROPULSION
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 4: Solar electric propulsion vehicle
| NASA-CR-192492 | p 2178 N93-22993

SOLAR ENERGY
Solar reforming applications study summary
| DE93-002286 | p 2244 N93-22424
Photovoltaic evaluation study
| DE93-761330 | p 2378 N93-22956
Solar pumping: An introduction and update on the technology, performance, costs, and economics
| WORLD BANK TP-168 | p 2381 N93-23444
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139

SOLAR ENERGY CONVERSION
Solar pumping: An introduction and update on the technology, performance, costs, and economics
| WORLD BANK TP-168 | p 2381 N93-23444
A review of the experience gained in 10 years operation of Gould's solar industrial process heat system
| DE93-003991 | p 2381 N93-23970

SOLAR FLARES
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
| AD-A259781 | p 2557 N93-23973
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175
A nitrate signal of solar flares in polar snow and ice
| AD-A260559 | p 2558 N93-24284
Solar-geophysical data number 580, December 1992. Part 1: (Prompt reports). Data for November, October 1992, and late data
| PB93-150332 | p 2558 N93-24335
Solar-geophysical data number 580, December 1992. Part 2: (Comprehensive reports). Data for June 1992, and miscellaneous
| PB93-150340 | p 2558 N93-24558

SOLAR FURNACES
A summary of recent activities at the National Solar Thermal Test Facility
| DE92-040969 | p 2379 N93-22967

SOLAR GENERATORS
Solar reforming applications study summary
| DE93-002286 | p 2244 N93-22424
Current performance and potential improvements in solar thermal industrial heat
| DE93-000048 | p 2377 N93-22927
A summary of recent activities at the National Solar Thermal Test Facility
| DE92-040969 | p 2379 N93-22967
Solar pumping: An introduction and update on the technology, performance, costs, and economics
| WORLD BANK TP-168 | p 2381 N93-23444

SOLAR HEATING
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
| DE93-005795 | p 2376 N93-22417
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106

SOLAR INSTRUMENTS
NASA Marshall Space Flight Center Solar Observatory Report, July to December 1992
| NASA-TM-108396 | p 2542 N93-22665

SOLAR MAGNETIC FIELD
Solar-geophysical data number 578, October 1992. Part 1: (Prompt reports). Data for September, August 1992 and late data
| PB93-134013 | p 2556 N93-23227
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175
The liquid crystal polarimeter for solid-state imaging of solar vector magnetic fields
| AD-A260029 | p 2483 N93-24251

SOLAR MAXIMUM MISSION
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Special approach/docking testcase results
| NASA-CR-192294 | p 2180 N93-22683
Solar maximum mission/ultraviolet spectrometer and polarimeter studies
| NASA-CR-192463 | p 2555 N93-23011

SOLAR NEUTRINOS
Physics studies with ICARUS and a hybrid ionization and scintillation fiber detector
| DE93-003034 | p 2482 N93-22986
GALLEX: First results and implications for neutrino physics
| DE93-004908 | p 2483 N93-23977

SOLAR OBSERVATORIES
NASA Marshall Space Flight Center Solar Observatory Report, July to December 1992
| NASA-TM-108396 | p 2542 N93-22665

SOLAR OSCILLATIONS
The source of five-minute period photospheric umbral oscillations p 2548 N93-23214
Observation of impulsive acoustic events and the excitation of solar oscillations
| AD-A259788 | p 2557 N93-23454
Global solar intensity oscillations near solar maximum p 2557 N93-23492

SOLAR PHYSICS
Solar-geophysical data number 578, October 1992. Part 1: (Prompt reports). Data for September, August 1992 and late data
| PB93-134013 | p 2556 N93-23227

Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
| PB93-138469 | p 2556 N93-23334
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175
Solar-geophysical data number 580, December 1992. Part 1: (Prompt reports). Data for November, October 1992, and late data
| PB93-150332 | p 2558 N93-24335
European Space Science and Space Station Freedom p 2163 N93-24387
Solar-geophysical data number 580, December 1992. Part 2: (Comprehensive reports). Data for June 1992, and miscellaneous
| PB93-150340 | p 2558 N93-24558

SOLAR PLANETARY INTERACTIONS
Sensitivity of modeled Cretaceous climate to insolation forcing created by varying Earth-Sun orbital relationships p 2411 N93-24578

SOLAR POWER SATELLITES
An analysis of power beaming for the Moon and Mars
| NASA-CR-191072 | p 2182 N93-22554

SOLAR PROMINENCES
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150

SOLAR RADIATION
ICRCCM. Phase 2: Verification and calibration of radiation codes in climate models
| DE93-005114 | p 2402 N93-22408
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
| NASA-CR-192772 | p 2413 N93-22700
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
Evaluation of solar radiation measurement systems: EPRI/NREL
| DE93-000020 | p 2380 N93-23304
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
| AD-A259781 | p 2557 N93-23973
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150
Design and implementation of a computer based site operations log for the ARM Program
| DE93-002834 | p 2400 N93-24255
Anisotropic reflections in mountainous terrain to determine the absorption of solar radiation from satellite data
| ESA-TT-1262 | p 2558 N93-24633
Multiple molecular scattering and albedo action on the solar spectral irradiance in the region of the UVB (less than or equal to 320 nm): A preliminary inventory
| AERONOMICA-ACTA-A-363-1991 | p 2558 N93-24637

SOLAR RADIO BURSTS
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150
Solar-geophysical data number 580, December 1992. Part 2: (Comprehensive reports). Data for June 1992, and miscellaneous
| PB93-150340 | p 2558 N93-24558

SOLAR RADIO EMISSION
Solar-geophysical data number 578, October 1992. Part 1: (Prompt reports). Data for September, August 1992 and late data
| PB93-134013 | p 2556 N93-23227
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175

SOLAR REFLECTORS
Current performance and potential improvements in solar thermal industrial heat
| DE93-000048 | p 2377 N93-22927

SOLAR ROTATION
Global solar intensity oscillations near solar maximum p 2557 N93-23492

SOLAR SYSTEM
Studies of extra-solar OORT clouds and the Kuiper disk
| NASA-CR-192759 | p 2555 N93-22476
The Goldstone solar system radar: A science instrument for planetary research
| NASA-CR-192793 | p 2261 N93-22478
Solar system observations with HST p 2534 N93-23889

SOLAR SYSTEM EVOLUTION
Studies of extra-solar OORT clouds and the Kuiper disk
| NASA-CR-192759 | p 2555 N93-22476
Chaotic evolution of the solar system
| AD-A260055 | p 2550 N93-23961

SOLAR TERRESTRIAL INTERACTIONS
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
| PB93-138469 | p 2556 N93-23334
The German space science programme p 2536 N93-23903

SOLAR THERMAL PROPULSION
Development of CPG dish-Stirling systems for remote power applications
| DE93-003251 | p 2376 N93-22414

SOLAR WIND
An MHD study of the interaction between the solar wind and the interstellar medium
| NASA-CR-192353 | p 2556 N93-23067
Nonlinear dynamical modeling and prediction of the terrestrial magnetospheric activity p 2392 N93-23135
A modified flow/field model of the solar wind interaction with Mars p 2556 N93-23216
The solar wind control of reconnection at the dayside magnetopause p 2556 N93-23236
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921
SUMER: Solar Ultraviolet Measurements of Emitted Radiation p 2541 N93-23931
Solar-geophysical data number 580, December 1992. Part 2: (Comprehensive reports). Data for June 1992, and miscellaneous
| PB93-150340 | p 2558 N93-24558

SOLAR X-RAYS
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
Environmental conditions responsible for solar activity
| AD-A259703 | p 2557 N93-23664
Solar-geophysical data number 579, November 1992. Part 2: (Comprehensive reports). Data for May 1992 and miscellaneous
| PB93-141711 | p 2558 N93-24150

SOLDERED JOINTS
High resolution three-dimensional solder joint measurement system evaluation
| DE93-005840 | p 2437 N93-23000
Copper/solder intermetallic growth studies
| AD-A259856 | p 2232 N93-23955

SOLDERING
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
| DE93-006041 | p 2230 N93-23024
Infrared vacuum soldering process for thick-film hybrid microcircuits
| DE93-007483 | p 2285 N93-24451

SOLDERS
High resolution three-dimensional solder joint measurement system evaluation
| DE93-005840 | p 2437 N93-23000
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
| DE93-006041 | p 2230 N93-23024

SOLENOIDS
A solenoid with a low input power and a fast switching time
| DLR-FB-91-39 | p 2278 N93-22661
H(-) beam neutralization measurements in a solenoidal beam transport system
| DE93-005460 | p 2481 N93-22908

SOLID ELECTROLYTES
Proceedings of the Fourth Annual Fuel Cells Contractors Review Meeting
| DE92-001290 | p 2378 N93-22934
Methane conversion by solid electrolyte membranes
| PB93-127041 | p 2222 N93-23994
Recent progress in zirconia-based fuel cells for power generation
| DE93-003488 | p 2383 N93-24513

SOLID MECHANICS
On the solution of fluid flow and solid deformation interaction problems p 2291 N93-23178
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
| PB93-142438 | p 2439 N93-23436

SOLID PROPELLANT ROCKET ENGINES
Solid rocket motors p 2174 N93-22094
Reliability of solid rocket motor cases and nozzles p 2176 N93-22103
Solid Propulsion Integrity Program (SPIP) for verifiable enhanced solid rocket motor reliability p 2176 N93-22104
A summary of laboratory testing performed to characterize and select an elastomeric O-ring material to be used in the redesigned solid rocket motors of the space transportation system
| NASA-TM-108395 | p 2236 N93-22557
Terminology and assessment methods of solid propellant rocket exhaust signatures
| AGARD-AR-287 | p 2204 N93-22998
Spirit 2 vehicle: (A26.780). Post flight report
| AD-A259991 | p 2172 N93-24250

SOLID PROPELLANTS
Terminology and assessment methods of solid propellant rocket exhaust signatures
| AGARD-AR-287 | p 2204 N93-22998

SOLID SOLUTIONS
Using nonlinear acoustics for nondestructive materials characterization and evaluation
| DE93-004447 | p 2321 N93-22727

SOLID STATE
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Application of 10 GeV electron driven x ray laser in gamma ray laser research
| DE93-003775 | p 2308 N93-22773
30 KA, 5000 V solid-state opening switch for inductive energy storage
| AD-A259763 | p 2281 N93-23483
Light-activated solid-state opening switch
| AD-A259770 | p 2281 N93-23487
Active microparticle media
| AD-A259722 | p 2487 N93-23639
Solid state research
| AD-A259726 | p 2509 N93-24024
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
| AD-A259889 | p 2242 N93-24321

SOLID STATE DEVICES
Application of a SAW device for measuring rate of gas flow
| PB93-124931 | p 2292 N93-23253

SOLID STATE LASERS
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture p 2139 N93-22250
High-power optical coatings for a mega-Joule class ICF laser
| DE93-005821 | p 2306 N93-22328
High power diode pumped solid state lasers
| DE93-005818 | p 2307 N93-22691

SOLID SURFACES
In-situ characterization of growth and interfaces in a-Si:H devices
| DE93-000051 | p 2504 N93-22928

SOLID WASTES
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
| DE93-002162 | p 2312 N93-22891

SOLID-SOLID INTERFACES
Formation of defect-free metal/semiconductor contacts
| AD-A259604 | p 2284 N93-24151

SOLIDIFICATION
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044
Space Station Furnace Facility Core. Requirements definition and conceptual design study. Volume 2: Technical report. Appendix 6: Technical summary reports
| NASA-CR-192477 | p 2302 N93-22349
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642

Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
|DE93-004445| p 2503 N93-22726
Microstructure of rapidly-solidified lithium powders
|DE93-004765| p 2229 N93-22880
Space Station Furnace Facility. Experiment/Facility Requirements Document (E/FRD), volume 2, appendix 5
|NASA-CR-192476| p 2200 N93-23241
Thermodynamically-consistent phase-field models for solidification
|PB93-139012| p 2515 N93-24005

SOLIDS
Adaptive meshing in solids
|DE93-003238| p 2287 N93-22331
Towards a first-principles thermodynamics of solids
|DE93-002544| p 2514 N93-22426
Ion and electron beam processing of condensed molecular solids to form thin films
|DE93-007273| p 2504 N93-22955
Computer simulation of atomic collision processes in solids
|DE93-005106| p 2483 N93-23310

SOLITARY WAVES
Plasma theory p 2496 N93-23262
Optical and magnetic signatures of localized excitations in pernigraniline: Role of neutral solitons
|AD-A260001| p 2243 N93-24443

SOLUBILITY
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
|DE93-005115| p 2235 N93-22409
Natural and Marangoni convection in two superposed immiscible liquid layers with horizontal heating p 2247 N93-22835
A method of measuring the interfacial tension of two liquids of the same mass volume: The cylindrical method p 2251 N93-22860
A gel-permeation chromatography study of electrochemically synthesized Poly(3-alkylthiophenes)
|AD-A259864| p 2239 N93-23957
Experimental and theoretical studies of reverse micelles in dense gases
|PB93-141901| p 2222 N93-24143
Molecular properties and fate of organic chemicals
|AD-A260090| p 2207 N93-24412
Solubility, viscosity and density of refrigerant/lubricant mixtures
|DE93-007809| p 2243 N93-24506

SOLUTES
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
|NASA-TM-106079| p 2207 N93-23014
Solute binding at void surfaces in silicon and germanium
|DE93-004504| p 2233 N93-24048
Molecular properties and fate of organic chemicals
|AD-A260090| p 2207 N93-24412

SOLVATION
Studies of the formation chemical reactivity and properties of small clusters application to an understanding of aerosol formation and heterogeneous chemistry
|DE93-005920| p 2221 N93-23309
The study of polyether solvation mechanisms using UV/visible spectroscopy
|AD-A260355| p 2241 N93-24170
The role of the dipole-dipole interaction in the solvation of monoatomic monovalent ions on the basis of the mean spherical approximation
|AD-A260284| p 2483 N93-24234

SOLVENTS
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
|DE93-005115| p 2235 N93-22409
Printed wiring assembly cleanliness
|DE93-006040| p 2277 N93-22524
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
|NASA-TM-106079| p 2207 N93-23014
Experimental and theoretical studies of reverse micelles in dense gases
|PB93-141901| p 2222 N93-24143
A simple model for the dielectric behaviour of polar solvents in the mean spherical approximation
|AD-A260283| p 2483 N93-24261
Use of high-energy radiation for degradation of environmental pollutants
|PB93-149995| p 2390 N93-24636

SONAR
Chinese research on underwater acoustics
|PB93-134468| p 2476 N93-23229
Evaluation of the Bathyscan sweep survey system
|AD-A260162| p 2415 N93-23708

SONIC BOOMS
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
|NASA-CR-189715| p 2476 N93-22813

SOOT
Contribution to the study of soot formation in combustion environments by optical methods based on light diffusion
|ECL-91-26| p 2218 N93-22697
Droplet combustion characteristics under microgravity and normal-gravity conditions p 2252 N93-23179
Photoacoustic determination of the single-scattering albedo of carbonaceous particulates p 2395 N93-23493

SORPTION
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
|DE93-005883| p 2235 N93-22422
High performance nanocomposite desiccation materials
|PB93-127025| p 2223 N93-24210

SOUND FIELDS
A multiple scales approach to sound generation by vibrating bodies
|NASA-CR-191414| p 2294 N93-23409
Motion measurement of acoustically levitated object
|NASA-CASE-NPO-18191-1-CU| p 2135 N93-24601

SOUND GENERATORS
A multiple scales approach to sound generation by vibrating bodies
|NASA-CR-191414| p 2294 N93-23409

SOUND PROPAGATION
Chinese research on underwater acoustics
|PB93-134468| p 2476 N93-23229

SOUND TRANSMISSION
Zero sound experiments in superfluid He3
|ISBN-951-22-0841-5| p 2476 N93-23005

SOUND WAVES
Interaction of externally-driven acoustic waves with compressible convection
|DE93-003800| p 2476 N93-22775
An asymptotic theory of supersonic propeller noise
|NASA-CR-191110| p 2477 N93-24070
An analytical study of some problems in partial differential equations with applications to fluid dynamics and wave propagation
|AD-A260351| p 2470 N93-24169

SOUNDING
Evaluation of the Bathyscan sweep survey system
|AD-A260162| p 2415 N93-23708

SOUTH CAROLINA
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
|PB93-110955| p 2519 N93-23286

SOUTH DAKOTA
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
|PB93-110997| p 2521 N93-24557

SOUTHEAST ASIA
Vegetation distribution of South East Asia p 2336 N93-22134

SOUTHERN OSCILLATION
On the space-time structure of ENSO
|MPIM-74| p 2407 N93-23634

SOVIET SPACECRAFT
Earth resources and ecological spacecraft p 2361 N93-23777

SOYUZ SPACECRAFT
Flight experiences on board Space Station Mir p 2157 N93-24355

SPACE BASED RADAR
A satellite-based Radar Wind Sounder (RAWS) p 2406 N93-23384
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798

SPACE CHARGE
Simple optics description of the plasma sheath and plasma electrode region
|DE93-004851| p 2491 N93-22224
H(-) beam neutralization measurements in a solenoidal beam transport system
|DE93-005460| p 2481 N93-22908
Studies of the longitudinal instability with an electron beam
|DE93-006513| p 2282 N93-23695
Space charge layers in a double plasma machine p 2498 N93-24107
Observation of a charge limit for photocathode electron guns
|DE93-006948| p 2485 N93-24464

SPACE COMMERCIALIZATION
Ten-year space launch technology plan
|NASA-TM-108701| p 2135 N93-22204
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation p 2138 N93-22242
NASA's commercial research plans and opportunities p 2183 N93-22612
Office of Commercial Programs' research activities for Space Station Freedom utilization p 2191 N93-22647
Commercial opportunities in bioseparations and physiological testing aboard Space Station Freedom p 2192 N93-22649
Consortium for materials development in space interaction with Space Station Freedom p 2192 N93-22650
Integration and use of Microgravity Research Facility: Lessons learned by the crystals by vapor transport experiment and Space Experiments Facility programs p 2193 N93-22652
Post Cold War assessment of US space policy: A task group report
|PB93-139962| p 2532 N93-22900
Outlook for the U.S. Space Program p 2153 N93-23159
Insurance cover for space ventures p 2344 N93-23510
The SPOT system development program: SPOT AVAL p 2360 N93-23769
The Marinfosec study: Use of ERS-1 for cruise and sailing boats p 2276 N93-23810
United Kingdom Earth observation programme p 2373 N93-23848
The contribution of the Italian Space Agency to the establishment of space services for the changing Earth p 2373 N93-23849
Conditions of access to Earth observation data: Legal aspects p 2373 N93-23853
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
Definition of a European promotion concept p 2162 N93-24381
Superconductivity devices: Commercial use of space
|NASA-CR-192841| p 2513 N93-24483

SPACE COMMUNICATION
The Goldstone solar system radar: A science instrument for planetary research
|NASA-CR-192793| p 2261 N93-22478

SPACE DEBRIS
Whipple bumper shield results and CTH simulations at velocities in excess of 10 km/s
|DE93-006932| p 2182 N93-22583
Repeatability and uncertainty analyses of NASA/MSFC light gas gun test data
|NASA-CR-192496| p 2325 N93-23012
Impact experiments into multiple-mesh targets: Concept development of a lightweight collisional bumper
|NASA-TM-104764| p 2194 N93-23247
The space debris environment for remote sensing satellites p 2199 N93-23809
Orbiting space debris: Dangers, measurement and mitigation
|AD-A260533| p 2196 N93-24279

SPACE ENVIRONMENT SIMULATION
Apparatus for simulating an exoatmospheric structure
|NASA-CASE-MSC-21975-1| p 2169 N93-22016
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
|NASA-TM-106021| p 2206 N93-22605
Ionospheric plasma flow about a system of electrically biased flat plates
|NASA-CR-191119| p 2194 N93-23131

SPACE EXPLORATION
Advanced Crew Rescue Vehicle/Personnel Launch System p 2173 N93-22085
Nuclear concepts/propulsion p 2174 N93-22093
Thermal protection materials at NASA Ames Research Center p 2177 N93-22114
Multi-beam range imager for autonomous operations p 2310 N93-22160
Autonomous prealignment of a docking mechanism p 2137 N93-22238
IMP: A performance code p 2139 N93-22245
Transportation systems analyses, volume 2
|NASA-CR-192486| p 2177 N93-22386
Opportunities for research on Space Station Freedom p 2183 N93-22610
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
|NASA-CR-192494| p 2179 N93-23007
Transportation systems analyses. Volume 1: Executive summary
|NASA-CR-192485| p 2179 N93-23008

Transportation technology program: Strategic plan
| NASA-TM-108706 | p 2152 N93-23032
Geochemical mapping of the lunar surface using laser-induced ion mass spectrometry from landers and rovers
| DE93-003849 | p 2554 N93-23292
Flight project data book, 1991
| NASA-TM-108656 | p 2154 N93-23385
Space research as a tool to acquaint children and young people with science and technology
p 2370 N93-23831
Horizon 2000 and European national programmes
p 2534 N93-23885
Space exploration of planetary and satellite atmospheres p 2535 N93-23890
Cassini/Huygens: A mission to Saturn and Titan
p 2539 N93-23918

SPACE FLIGHT
A modular, programmable measurement system for physiological and spaceflight applications
p 2305 N93-22201
Applicability of relative GPS to automated rendezvous between the space shuttle and space station
p 2138 N93-22241
Space research as a tool to acquaint children and young people with science and technology
p 2370 N93-23831
Physiological experiments within the project AustroMir
p 2157 N93-24354
Flight experiences on board Space Station Mir
p 2157 N93-24355
CogiMir: A study of cognitive functions in microgravity
p 2159 N93-24364
Monitoring of cardiovascular parameters during the AustroMir space flight p 2160 N93-24367
Influence of microgravity on immune system and genetic information p 2160 N93-24370

SPACE FLIGHT FEEDING
A proposal to demonstrate production of salad crops in the Space Station Mockup Facility with particular attention to space, energy, and labor constraints
| NASA-CR-192815 | p 2419 N93-23169

SPACE HABITATS
Space transfer concepts and analysis for exploration missions
| NASA-CR-192482 | p 2178 N93-22705
First Lunar Outpost support study
| NASA-CR-192843 | p 2153 N93-23054

SPACE INFRARED TELESCOPE FACILITY
Telescience Testbed Program: A study of software for SIRTF instrument control
| NASA-CR-192764 | p 2442 N93-24476

SPACE LAW
Ten-year space launch technology plan
| NASA-TM-108701 | p 2135 N93-22204
Post Cold War assessment of US space policy: A task group report
| PB93-139962 | p 2532 N93-22900
Orbiting space debris: Dangers, measurement and mitigation
| AD-A260533 | p 2196 N93-24279
Future of the US space industrial base: A task group report
| PB93-139954 | p 2522 N93-24585

SPACE MAINTENANCE
A berthing and fastening strategy for orbital replacement units p 2151 N93-22317

SPACE MISSIONS
Development of interactive multimedia applications
p 2530 N93-22171
On-orbit operational scenarios, tools and techniques
p 2143 N93-22271
Employing lighting techniques during on-orbit operations p 2151 N93-22319
A reactor-pumped laser as primary power for nuclear rocket engines
| DE93-005342 | p 2203 N93-22501
Space technology research plans
p 2184 N93-22613
Spacecraft materials and coatings experiments
p 2189 N93-22637
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
| NASA-TM-107558 | p 2178 N93-22669
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Special approach/docking testcase results
| NASA-CR-192294 | p 2180 N93-22683
Transportation technology program: Strategic plan
| NASA-TM-108706 | p 2152 N93-23032
International cooperation and commitments in the ISY and beyond p 2154 N93-23164
COSPAR/SAFISY panel of experts on space science scientific program for the ISY p 2366 N93-23804
User support for the Spacelab mission D-2
p 2155 N93-24340
Columbus precursor Spacelab missions
p 2155 N93-24341
Payload operations for precursor mission E-1
p 2155 N93-24342
The Eureca concept and missions
p 2156 N93-24343
Selection of astronauts for European space missions
p 2156 N93-24345
French Mir missions p 2156 N93-24348
The effect of missions and payload performance on the configuration of an orbital injection system design
p 2156 N93-24349
The joint Austro-Soviet space project Austromir-91
p 2157 N93-24353
User support for the Columbus precursor missions
p 2162 N93-24380

SPACE NAVIGATION
Applicability of relative GPS to automated rendezvous between the space shuttle and space station
p 2138 N93-22241
Autonomous rendezvous and capture system design
p 2138 N93-22244
On-orbit demonstration of automated closure and capture using ESA-developed proximity operations technologies and an existing, serviceable NASA Explorer Platform spacecraft p 2142 N93-22266
Space Shuttle Program: Automatic rendezvous, proximity operations, and capture (category 3)
p 2143 N93-22269
An autonomous rendezvous and docking system using cruise missile technologies p 2143 N93-22272
Optical correlators for automated rendezvous and capture p 2143 N93-22273
Automatic rendezvous and capture system development in a manned environment p 2143 N93-22274
Performance capabilities of a Phase One Automatic Rendezvous and Capture System p 2144 N93-22275
Relative navigation requirements for automatic rendezvous and capture systems p 2144 N93-22276
Automated rendezvous and capture system
p 2144 N93-22277
Onboard navigation rendezvous expert system
p 2144 N93-22280
Autonomous docking ground demonstration (category 3) p 2145 N93-22282

SPACE PERCEPTION
Apparent opacity affects perception of structure from motion
| AD-A260099 | p 2488 N93-24054

SPACE PLASMAS
Nonlinear dynamical modeling and prediction of the terrestrial magnetospheric activity p 2392 N93-23135
The formation, structure, and evolution of plasmoids
p 2547 N93-23210
Solar-geophysical data number 578, October 1992. Part 2: (Comprehensive reports). Data for April 1992 and miscellaneous
| PB93-134021 | p 2556 N93-23243
Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
| NASA-TM-106084 | p 2195 N93-23742
Observation of the extragalactic x ray background
p 2535 N93-23892
Energetic particle acceleration and propagation in the heliosphere p 2539 N93-23921
The cold ionized shell around the old nova DQ Herculis p 2543 N93-23964
On the dynamics of space plasma
| AD-A259898 | p 2497 N93-23987
Remote sensing of inner heliospheric plasmas
| AD-A260337 | p 2558 N93-24268

SPACE PLATFORMS
MSFC Three Point Docking Mechanism design review
| NASA-CR-192462 | p 2181 N93-22013
Single stage to orbit/SDIO p 2173 N93-22086
Transportation technology program: Strategic plan
| NASA-TM-108706 | p 2152 N93-23032

SPACE POWER REACTORS
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
| NASA-CR-191065 | p 2203 N93-22662
Lunar electric power systems utilizing the SP-100 reactor coupled to dynamic conversion systems
| NASA-CR-191023 | p 2377 N93-22879
Applicability of trends in nuclear safety analysis to space nuclear power systems
| DE93-003169 | p 2205 N93-24497

SPACE PROBES
Cassini/Huygens: A mission to Saturn and Titan
p 2539 N93-23918

SPACE PROCESSING
Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620
Materials science research in microgravity
p 2191 N93-22645
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change
p 2191 N93-22648
Commercial opportunities in bioseparations and physiological testing aboard Space Station Freedom
p 2192 N93-22649
Materials dispersion and biodynamics project research
p 2192 N93-22651
Space Station Furnace Facility. Volume 2: Appendix 1: Contract End Item specification (CEI), part 1
| NASA-CR-192473 | p 2303 N93-23083
Space Station Furnace Facility. Volume 3: Program cost estimate
| NASA-CR-192478 | p 2200 N93-23237
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study
| NASA-CR-192472 | p 2200 N93-23238
Space Station Furnace Facility. Experiment/Facility Requirements Document (E/FRD), volume 2, appendix 5
| NASA-CR-192476 | p 2200 N93-23241
Gravity-related phenomena in materials science
p 2161 N93-24372
Control of the concentration gradient during crystal growth from solution p 2165 N93-24395
The surface plasmon spectroscopy applications in microgravity: The measurement theory and preliminary experimental layout p 2165 N93-24396

SPACE PROGRAMS
Space technology research plans
p 2184 N93-22613
The Eighth National Space Symposium
| ISBN-0-9616962-5-7 | p 2153 N93-23156
Outlook for the U.S. Space Program
p 2153 N93-23159
Industry perspectives p 2154 N93-23162
Public Congressional forum on space
p 2154 N93-23165
Environment Observation and Climate Modelling Through International Space Projects. Navigation and Mobile Communications. Image Processing, GIS, and Space-Assisted Mapping
| ESA-ISY-2 | p 2343 N93-23507
Insurance cover for space ventures
p 2344 N93-23510
Environment Observation and Climate Modelling Through International Space Projects. Volume 3: Earth Observation Space Programmes, SAFISY Activities, Strategies of International Organisations, Legal Aspects
| ESA-ISY-1-VOL-3 | p 2356 N93-23748
The scientific program of the Priroda project
p 2360 N93-23771
The program of oceanological experiments within the Priroda project p 2361 N93-23773
Remarks and proposals to adapt some Earth observations space programmes in the period of transition of the countries of central/eastern Europe; focused on Romania p 2362 N93-23778
MOMS-02P: A modular optical system for Earth land cover observation in the multisensor environment of the Priroda/Mir mission p 2365 N93-23796
The International Space Year programme
p 2366 N93-23803
COSPAR/SAFISY panel of experts on space science scientific program for the ISY p 2366 N93-23804
NOAA participation in ISY Earth science and other activities p 2366 N93-23805
German contributions to the International Space Year ISY 1992 p 2366 N93-23806
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
Programmes and strategy for the World Meteorological Organization with respect to Earth observation from space p 2372 N93-23842
Earth observation programmes and plans of the Commission of the European Communities (CEC)
p 2372 N93-23843
Mission to Planet Earth p 2372 N93-23845
NASDA's Earth observing programs and the contribution to resolving global environment programs
p 2372 N93-23846
Canadian Earth observation program
p 2373 N93-23847
Columbus programme overview p 2155 N93-24337
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338

SPACE RENDEZVOUS
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
Control of a varying thrust spacecraft for autonomous space rendezvous p 2139 N93-22246
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture
p 2139 N93-22250
A comparison of laser based ranging systems for AR/C category 1: Hardware p 2144 N93-22278

Autonomous rendezvous targeting techniques for national launch system application p 2145 N93-22284
DGPS for space and return p 2146 N93-22286
An automated rendezvous and capture system design concept for the cargo transfer vehicle and Space Station Freedom p 2146 N93-22287
Supervised autonomous rendezvous and docking systems technology evaluations p 2146 N93-22288
Magnetic end effectors for space operations p 2146 N93-22291
Piloting decision aid for spacecraft proximity operations p 2147 N93-22295
Spacecraft rendezvous operational considerations affecting vehicle systems design and configuration p 2147 N93-22296
Simulation models for autonomous rendezvous and capture p 2149 N93-22304
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318
Near-earth object interception workshop summary [DE93-003793] p 2546 N93-22403

SPACE SHUTTLE MAIN ENGINE

Turbulence modelling of flow fields in thrust chambers [NASA-CR-192466] p 2202 N93-22382
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade [NASA-CR-190782] p 2327 N93-23125
Development of code evaluation criteria for assessing predictive capability and performance [NASA-CR-192623] p 2442 N93-24473

SPACE SHUTTLE MISSIONS

Space Station Freedom research capabilities p 2183 N93-22609
Commercial researcher perspective p 2184 N93-22615
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798

SPACE SHUTTLE ORBITERS

Entry Systems Panel deliberations p 2176 N93-22105
Thermal protection system of the Space Shuttle's orbiter p 2176 N93-22107
The real-time operations of the Space Shuttle Orbiter during rendezvous and proximity operations p 2139 N93-22249
Automated rendezvous and proximity operations p 2141 N93-22257
Onboard navigation rendezvous expert system p 2144 N93-22280
Automating an orbiter approach to Space Station Freedom to minimize plume impingement p 2149 N93-22305
Spacecraft materials and coatings experiments p 2189 N93-22637
Summary document of tasks performed on the Shuttle-C/NLS contract [NASA-CR-192483] p 2179 N93-22995
Orbiter Autoland reliability analysis [NASA-TM-4464] p 2194 N93-23139
From Ship to Shuttle: NASA Orbiter Naming Program, September 1988 - May 1989 [NASA-EP-276] p 2179 N93-23732

SPACE SHUTTLE PAYLOADS

NASA PPO microgravity projects support [NASA-CR-192460] p 2246 N93-22038
Demonstration plan for real time receiving and processing of flight data from the space transportation system [NASA-TM-107725] p 2152 N93-22468
Flight project data book, 1991 [NASA-TM-108656] p 2154 N93-23385

SPACE SHUTTLES

Advanced Manned Launch System p 2172 N93-22084
Advanced Crew Rescue Vehicle/Personnel Launch System p 2173 N93-22085
Lunar transfer vehicle studies p 2173 N93-22087
Methods and means used in programming intelligent searches of technical documents p 2530 N93-22155
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
Applicability of relative GPS to automated rendezvous between the space shuttle and space station p 2138 N93-22241
Space Shuttle Program: Automatic rendezvous, proximity operations, and capture (category 3) p 2143 N93-22269
CTV rendezvous techniques p 2143 N93-22270
On-orbit operational scenarios, tools and techniques p 2143 N93-22271
Space Station Freedom research capabilities p 2183 N93-22609
An on-orbit viewpoint of life sciences research p 2187 N93-22629
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54 [NASA-TM-107558] p 2178 N93-22669
Task Analysis of Shuttle Entry and Landing Activities [NASA-TM-104761] p 2178 N93-22702
Risk management in fly-by-wire systems [NASA-TM-104757] p 2180 N93-22703
Debris/ice/TPS assessment and integrated photographic analysis of Shuttle Mission STS-53 [NASA-TM-107556] p 2179 N93-23085
Space transportation: The content and uses of Shuttle cost estimates. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives [GAO/NSIAD-93-115] p 2531 N93-23097
SUMS experiment flight results on STS-35 [NASA-TM-107738] p 2201 N93-23407
Characterizing the uncertainty in holddown post load measurements [NASA-TP-3332] p 2304 N93-23731
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students [NASA-EP-285] p 2399 N93-24148

SPACE SIMULATORS

MSFC Three Point Docking Mechanism design review [NASA-CR-192462] p 2181 N93-22013

SPACE STATION FREEDOM

Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Applicability of relative GPS to automated rendezvous between the space shuttle and space station p 2138 N93-22241
Autonomous rendezvous and docking operations of unmanned expendable cargo transfer vehicles (e.g. Centaur) with Space Station Freedom p 2140 N93-22252
Automated rendezvous and proximity operations p 2141 N93-22257
A PARC system for terminal docking p 2141 N93-22259
Results of prototype software development for automation of shuttle proximity operations p 2142 N93-22264
CTV rendezvous techniques p 2143 N93-22270
On-orbit operational scenarios, tools and techniques p 2143 N93-22271
Collision avoidance for CTV: Requirements and capabilities p 2147 N93-22294
Proposed CTV design reference missions in support of Space Station Freedom p 2148 N93-22300
Automating an orbiter approach to Space Station Freedom to minimize plume impingement p 2149 N93-22305
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
The MSFC space station/space operations mechanism test bed p 2149 N93-22309
Space Station Furnace Facility preliminary Project Implementation Plan (PIP). Volume 2, appendix 2 [NASA-CR-192474] p 2302 N93-22347
Space Station Furnace Facility Core. Requirements definition and conceptual design study. Volume 2: Technical report. Appendix 6: Technical summary reports [NASA-CR-192477] p 2302 N93-22349
Space Station Freedom beta gimbal control via sensitivity models [NASA-TM-106000] p 2182 N93-22551
Space Station Freedom Utilization Conference [NASA-TM-108742] p 2182 N93-22606
Space Station Freedom Utilization Conference: Executive summary p 2182 N93-22607
Introduction to Space Station Freedom p 2182 N93-22608
Space Station Freedom research capabilities p 2183 N93-22609
Opportunities for research on Space Station Freedom p 2183 N93-22610
How to get on board Space Station Freedom p 2183 N93-22611
NASA's commercial research plans and opportunities p 2183 N93-22612
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Commercial researcher perspective p 2184 N93-22615
Japanese plan for SSF utilization p 2184 N93-22616
Canadian Space Agency Space Station Freedom utilization plans p 2185 N93-22617
European research plans p 2185 N93-22618
Space life sciences perspectives for Space Station Freedom p 2185 N93-22619
Remarks by NASA administrator Daniel S. Goldin p 2167 N93-22621
Life sciences utilization of Space Station Freedom p 2185 N93-22622
Life sciences recruitment objectives p 2186 N93-22623
Biomedical Monitoring and Countermeasures Facility p 2186 N93-22624
Gravitational Biology Facility on Space Station: Meeting the needs of space biology p 2186 N93-22625
Gas-Grain Simulation Facility (GGSF) p 2186 N93-22626
Research opportunities with the Centrifuge Facility p 2187 N93-22627
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
Crew health p 2187 N93-22630
Space Station Freedom as an engineering experiment station: An overview p 2187 N93-22631
Precursor Space Station Freedom experiments p 2188 N93-22632
Utilization of Space Station Freedom for technology research p 2188 N93-22634
Modal identification experiment p 2188 N93-22635
Selected OAST/OSSA space experiment activities in support of Space Station Freedom p 2189 N93-22636
Spacecraft materials and coatings experiments p 2189 N93-22637
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
Potential pressurized payloads: Fluid and thermal experiments p 2189 N93-22639
Zero-G life support for Space Station Freedom p 2189 N93-22640
WP-2 attached payload accommodations p 2190 N93-22641
Research objectives, opportunities, and facilities for microgravity science p 2190 N93-22642
Space Station Freedom combustion research p 2190 N93-22643
Microgravity fluid physics research in the Space Station Freedom era p 2191 N93-22644
Protein crystal growth in microgravity p 2191 N93-22646
Office of Commercial Programs' research activities for Space Station Freedom utilization p 2191 N93-22647
Commercial opportunities in bioseparations and physiological testing aboard Space Station Freedom p 2192 N93-22649
Consortium for materials development in space interaction with Space Station Freedom p 2192 N93-22650
Materials dispersion and biodynamics project research p 2192 N93-22651
Space transfer concepts and analysis for exploration missions [NASA-CR-192482] p 2178 N93-22705
Space Station Freedom Utilization Conference. Executive summary [NASA-TM-108709] p 2193 N93-23001
Transportation systems analyses. Volume 1: Executive summary [NASA-CR-192485] p 2179 N93-23008
Space Station Furnace Facility. Volume 2: Appendix 1: Contract End Item specification (CEI), part 1 [NASA-CR-192473] p 2303 N93-23083
A proposal to demonstrate production of salad crops in the Space Station Mockup Facility with particular attention to space, energy, and labor constraints [NASA-CR-192815] p 2419 N93-23169
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study. Appendix 3: Environment analysis [NASA-CR-192475] p 2199 N93-23224
Space Station Furnace Facility. Volume 1: Requirements definition and conceptual design study, executive summary [NASA-CR-192471] p 2199 N93-23225
Space Station Furnace Facility. Volume 3: Program cost estimate [NASA-CR-192478] p 2200 N93-23237
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study [NASA-CR-192472] p 2200 N93-23238
Advancing automation and robotics technology for the Space Station Freedom and for the U.S. Economy [NASA-TM-103895] p 2430 N93-23240
Space Station Furnace Facility. Experiment/Facility Requirements Document (E/FRD), volume 2, appendix 5 [NASA-CR-192476] p 2200 N93-23241
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom [NASA-CR-191106] p 2258 N93-23430
Proposed ground-based control of accelerometer on Space Station Freedom [NASA-TM-105960] p 2201 N93-23738

Space Station Freedom automation and robotics: An assessment of the potential for increased productivity
|NASA-TM-108714| p 2195 N93-24149
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
European Space Science and Space Station Freedom p 2163 N93-24387
Attached payload issues p 2163 N93-24388
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
|NASA-TM-104748| p 2243 N93-24474

Flight project data book, 1991
|NASA-TM-108656| p 2154 N93-23385
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
|ESA-ISY-4| p 2154 N93-24336
Mir 1992: Scientific program and payload p 2157 N93-24351
Technical management and test procedures for AustroMir-1991 p 2158 N93-24357
Columbus payload requirements in human physiology p 2163 N93-24386
European Space Science and Space Station Freedom p 2163 N93-24387
Attached payload issues p 2163 N93-24388
Italian payload development status for Columbus p 2164 N93-24392

SPACE STATION POLAR PLATFORMS
Cooperation with Europe in NOAA operational satellite programs p 2357 N93-23754
Observations of atmospheric chemistry on the first European polar platform p 2361 N93-23776
The first mission of the ESA Earth observation polar platform p 2362 N93-23783
The European polar platform and its Earth observation mission p 2363 N93-23784
Medium Resolution Imaging Spectrometer (MERIS) p 2363 N93-23785
An advanced scatterometer for the European polar platform p 2363 N93-23787
The radar altimeter instrument for POEM-1 mission p 2363 N93-23788
The Advanced Synthetic Aperture Radar (ASAR) for POEM-1 p 2363 N93-23789
The design of the ESA Multiband Imaging Microwave Radiometer MIMR p 2364 N93-23790

SPACE STATION POWER SUPPLIES
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
|NASA-CR-192348| p 2263 N93-23215
AC/DC converter
|CA-PATENT-1-306-005| p 2205 N93-24205

SPACE STATION STRUCTURES
Utilization of Space Station Freedom for technology research p 2188 N93-22634

SPACE STATIONS
Advanced Crew Rescue Vehicle/Personnel Launch System p 2173 N93-22085
Lunar transfer vehicle studies p 2173 N93-22087
An automated system for spacecraft proximity operations p 2136 N93-22230
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
The role of smart systems in rendezvous, close proximity operations and docking maneuvers p 2150 N93-22310
An on-orbit viewpoint of life sciences research p 2187 N93-22629
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
|NASA-TM-107729| p 2327 N93-23235
Common Carrier Earth Station Application
|PB93-111722| p 2263 N93-23268

SPACE TOOLS
Reliable vision-guided grasping
|NASA-CR-193197| p 2464 N93-24603

SPACE TRANSPORTATION
Space Transportation Materials and Structures Technology Workshop. Volume 2: Proceedings
|NASA-CP-3148-VOL-2| p 2172 N93-22081
Cargo vehicle architecture options p 2172 N93-22082
Lunar transfer vehicle studies p 2173 N93-22087
Mars transfer vehicle studies p 2173 N93-22088
CSTI Earth-to-orbit propulsion research and technology program overview p 2174 N93-22090
Propulsion Systems Panel deliberations p 2175 N93-22101
Thermal protection systems for space transportation vehicles p 2177 N93-22113
Some materials perspectives for space transportation systems p 2177 N93-22115
Ten-year space launch technology plan
|NASA-TM-108701| p 2135 N93-22204
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
|NASA-CR-192494| p 2179 N93-23007
Transportation systems analyses. Volume 1: Executive summary
|NASA-CR-192485| p 2179 N93-23008
Transportation technology program: Strategic plan
|NASA-TM-108706| p 2152 N93-23032
Activities report of the Norwegian Space Center
|ETN-93-93540| p 2570 N93-23107
Saenger: A space transportation system for the 21st century
|ETN-93-93696| p 2126 N93-23363

SPACE TRANSPORTATION SYSTEM
National Launch System: Structures and materials p 2172 N93-22083
Some materials perspectives for space transportation systems p 2177 N93-22115
Ten-year space launch technology plan
|NASA-TM-108701| p 2135 N93-22204
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
|NASA-TM-108598| p 2135 N93-22226
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
Transportation systems analyses, volume 2
|NASA-CR-192486| p 2177 N93-22386
Demonstration plan for real time receiving and processing of flight data from the space transportation system
|NASA-TM-107725| p 2152 N93-22468
A summary of laboratory testing performed to characterize and select an elastomeric O-ring material to be used in the redesigned solid rocket motors of the space transportation system
|NASA-TM-108395| p 2236 N93-22557
Subsonic aerodynamic characteristics of a proposed advanced manned launch system orbiter configuration
|NASA-TM-4439| p 2108 N93-22558
Future of the US Space Launch capability: A task group report
|PB93-139947| p 2171 N93-22899
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
|NASA-CR-192656| p 2152 N93-23033

SPACE TRANSPORTATION SYSTEM FLIGHTS
Space assembled entry systems certification p 2176 N93-22106
Thermal protection system of the Space Shuttle's orbiter p 2176 N93-22107
Methods and means used in programming intelligent searches of technical documents p 2530 N93-22155
Wireless infrared communications for space and terrestrial applications p 2275 N93-22177
Results of prototype software development for automation of shuttle proximity operations p 2142 N93-22264
Proposed CTV design reference missions in support of Space Station Freedom p 2148 N93-22300
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Translational controller results
|NASA-CR-192320| p 2457 N93-22396
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
|NASA-TM-107558| p 2178 N93-22669
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Special approach/docking testcase results
|NASA-CR-192294| p 2180 N93-22683
Space transportation: The content and uses of Shuttle cost estimates. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
|GAO/NSIAD-93-115| p 2531 N93-23097

SPACEBORNE ASTRONOMY
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
|ESA-ISY-3| p 2533 N93-23878
Status and early results of the Hipparcos astrometry project p 2533 N93-23879
The ROSAT all-sky x ray survey p 2533 N93-23880
Overview of first observations with the French telescope Sigma on board Granat p 2533 N93-23881
Gravitational lenses p 2534 N93-23883
ROSAT observations of supernova remnants and the interstellar medium p 2534 N93-23884
Horizon 2000 and European national programmes p 2534 N93-23885
Active galactic nuclei: The view from space p 2534 N93-23886
ROSAT observations of active galactic nuclei p 2534 N93-23888
Solar system observations with HST p 2534 N93-23889
Data analysis and archives in astronomy: A perspective view p 2535 N93-23896
X ray spectral structure of the Seyfert 2 galaxy NGC 5506 p 2536 N93-23898
HST imaging of the binary pulsar PSR1913+16 p 2536 N93-23902
Ground-based optical support for gamma ray satellite activities p 2170 N93-23909
The Infrared Space Observatory (ISO) p 2170 N93-23912
The ROSAT archive p 2538 N93-23915
ROSAT observations in star forming regions p 2538 N93-23917
ASCHOT: Astrophysical Schmidt Orbital Telescope p 2539 N93-23919
Design and in orbit performance of the ROSAT PSPC p 2539 N93-23923
FIRST: Far Infrared and Submillimeter Space Telescope p 2540 N93-23924
Evidence for two types of sources creating Halley's coma p 2540 N93-23926
SAX overview p 2540 N93-23927
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO p 2540 N93-23929
INTEGRAL: International Gamma Ray Astrophysics Laboratory p 2170 N93-23932
EXSAS: The interactive analysis system for ROSAT data p 2541 N93-23934

SPACEBORNE EXPERIMENTS
NASA PPO microgravity projects support
|NASA-CR-192460| p 2246 N93-22038
Space Station Furnace Facility preliminary Project Implementation Plan (PIP). Volume 2, appendix 2
|NASA-CR-192474| p 2302 N93-22347
Preliminary OARE absolute acceleration measurements on STS-50
|NASA-TM-107724| p 2182 N93-22587
Japanese plan for SSF utilization p 2184 N93-22616
Space life sciences perspectives for Space Station Freedom p 2185 N93-22619
Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620
Life sciences utilization of Space Station Freedom p 2185 N93-22622

SPACECRAFT
Mars transfer vehicle studies p 2173 N93-22088
Mini-satellite exploration of very near Earth space fuel objects
| DE93-005253 | p 2195 N93-24057

SPACECRAFT CHARGING
Electrostatic charging of spacecraft in geosynchronous orbit
| DRA-TM-SPACE-389 | p 2181 N93-22489
LOGION: Operation of a liquid metal ion emitter module under microgravity p 2158 N93-24359

SPACECRAFT COMPONENTS
Design manual for two-phase components of spacecraft thermal management systems
| AD-A260027 | p 2196 N93-24439

SPACECRAFT CONFIGURATIONS
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
| NASA-CR-192491 | p 2178 N93-22960
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 5: Nuclear electric propulsion vehicle
| NASA-CR-192493 | p 2178 N93-22990
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 4: Solar electric propulsion vehicle
| NASA-CR-192492 | p 2178 N93-22993
Concept of a small satellite for URM p 2199 N93-23922
The effect of missions and payload performance on the configuration of an orbital injection system design p 2156 N93-24349

SPACECRAFT CONSTRUCTION MATERIALS
Space Transportation Materials and Structures Technology Workshop. Volume 2: Proceedings
| NASA-CP-3148-VOL-2 | p 2172 N93-22081
Spacecraft materials and coatings experiments p 2189 N93-22637
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
NASA-UVA Light Aerospace Alloy and Structures Technology Program: LA(2)ST
| NASA-CR-192354 | p 2230 N93-23193
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
| NASA-TM-104748 | p 2243 N93-24474
Research projects
| NRC-LTR-ST-1883 | p 2571 N93-24652

SPACECRAFT CONTROL
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
| NASA-TM-108598 | p 2135 N93-22226
Demonstration of automated proximity and docking technology p 2135 N93-22227
Cargo transfer vehicle RCS propellant contamination issues p 2136 N93-22228
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
An automated system for spacecraft proximity operations p 2136 N93-22230
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
A strongly goal-directed close-range vision system for spacecraft docking p 2136 N93-22232
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
Autonomous prealignment of a docking mechanism p 2137 N93-22238
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation p 2138 N93-22242
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
Autonomous rendezvous and capture system design p 2138 N93-22244
CTV rendezvous techniques p 2143 N93-22270
Space Station Freedom beta gimbal control via sensitivity models
| NASA-TM-106000 | p 2182 N93-22551
Nonlinear attitude control of spacecraft and momentum management of control moment gyros p 2195 N93-23506
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956
Design manual for two-phase components of spacecraft thermal management systems
| AD-A260027 | p 2196 N93-24439

SPACECRAFT DESIGN
Demonstration of automated proximity and docking technology p 2135 N93-22227
An automated system for spacecraft proximity operations p 2136 N93-22230
Spacecraft rendezvous operational considerations affecting vehicle systems design and configuration p 2147 N93-22296
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 1: Draft final
| NASA-CR-192488 | p 2177 N93-22348
Space Station Freedom research capabilities p 2183 N93-22609
Utilization of Space Station Freedom for technology research p 2188 N93-22634
Multidisciplinary optimization of a controlled space structure using 150 design variables
| NASA-CR-4502 | p 2125 N93-22799
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 2: Draft final
| NASA-CR-192489 | p 2178 N93-22959
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
| NASA-CR-192491 | p 2178 N93-22960
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 5: Nuclear electric propulsion vehicle
| NASA-CR-192493 | p 2178 N93-22990
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 4: Solar electric propulsion vehicle
| NASA-CR-192492 | p 2178 N93-22993
Preliminary analysis techniques for ring and stringer stiffened cylindrical shells
| NASA-TM-108399 | p 2326 N93-23104
Space Station Furnace Facility. Volume 2: Requirements definition and conceptual design study. Appendix 3: Environment analysis
| NASA-CR-192475 | p 2199 N93-23224
Space Station Furnace Facility. Volume 1: Requirements definition and conceptual design study, executive summary
| NASA-CR-192471 | p 2199 N93-23225
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 2: Cryo/aerobrake vehicle
| NASA-CR-192490 | p 2179 N93-23251
JEM program status p 2155 N93-24339
The Eureca concept and missions p 2156 N93-24343
Design manual for two-phase components of spacecraft thermal management systems
| AD-A260027 | p 2196 N93-24439
Reusable reentry satellite system specification. Volume 1-9
| NASA-CR-192969 | p 2196 N93-24543

SPACECRAFT DOCKING
MSFC Three Point Docking Mechanism design review
| NASA-CR-192462 | p 2181 N93-22013
Multi-beam range imager for autonomous operations p 2310 N93-22160
NASA Automated Rendezvous and Capture Review. A compilation of the abstracts
| NASA-TM-108598 | p 2135 N93-22226
Demonstration of automated proximity and docking technology p 2135 N93-22227
Hybrid neural network and fuzzy logic approaches for rendezvous and capture in space p 2136 N93-22229
An automated system for spacecraft proximity operations p 2136 N93-22230
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
A strongly goal-directed close-range vision system for spacecraft docking p 2136 N93-22232
Manned versus unmanned rendezvous and capture p 2137 N93-22234
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
Autonomous prealignment of a docking mechanism p 2137 N93-22238
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239
Autonomous rendezvous and docking: A commercial approach to on-orbit technology validation p 2138 N93-22242
Real-time simulations for automated rendezvous and capture p 2138 N93-22243
Autonomous rendezvous and capture system design p 2138 N93-22244
Laser docking sensor engineering model p 2139 N93-22247
Autonomous rendezvous and docking operations of unmanned expendable cargo transfer vehicles (e.g. Centaur) with Space Station Freedom p 2140 N93-22252
TRAC based sensing for autonomous rendezvous p 2140 N93-22253
Flight Support System (FSS) docking and umbilical services systems p 2140 N93-22254
Automated rendezvous and proximity operations p 2141 N93-22257
A PARC system for terminal docking p 2141 N93-22259
Design and fabrication of an autonomous rendezvous and docking sensor using off-the-shelf hardware p 2141 N93-22260

Results of prototype software development for automation of shuttle proximity operations
p 2142 N93-22264
Soviet automated rendezvous and docking system overview p 2142 N93-22265
On-orbit demonstration of automated closure and capture using ESA-developed proximity operations technologies and an existing, serviceable NASA Explorer Platform spacecraft p 2142 N93-22266
Video guidance sensor for autonomous capture
p 2142 N93-22267
Space Shuttle Program: Automatic rendezvous, proximity operations, and capture (category 3)
p 2143 N93-22269
CTV rendezvous techniques p 2143 N93-22270
An autonomous rendezvous and docking system using cruise missile technologies p 2143 N93-22272
Automatic rendezvous and capture system development in a manned environment p 2143 N93-22274
Performance capabilities of a Phase One Automatic Rendezvous and Capture System p 2144 N93-22275
Relative navigation requirements for automatic rendezvous and capture systems p 2144 N93-22276
Automated rendezvous and capture system
p 2144 N93-22277
An overview of autonomous rendezvous and docking system technology development at General Dynamics
p 2145 N93-22281
Autonomous docking ground demonstration (category 3) p 2145 N93-22282
Supervised autonomous rendezvous and docking systems technology evaluations p 2146 N93-22288
An integrated autonomous rendezvous and docking system architecture using Centaur modern avionics
p 2147 N93-22293
Automated rendezvous and docking with video imagery p 2148 N93-22298
Six degree of freedom simulation system for evaluating automated rendezvous and docking spacecraft
p 2148 N93-22299
The development of an autonomous rendezvous and docking simulation using rapid integration and prototyping technology p 2148 N93-22302
Photonic correlator pattern recognition: Application to autonomous docking p 2148 N93-22303
Simulation models for autonomous rendezvous and capture p 2149 N93-22304
Contact dynamics testing of automated three point docking mechanism p 2149 N93-22306
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307
Proximity operations considerations affecting spacecraft design p 2149 N93-22308
The MSFC space station/space operations mechanism test bed p 2149 N93-22309
The role of smart systems in rendezvous, close proximity operations and docking maneuvers
p 2150 N93-22310
Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper)
p 2150 N93-22311
Automatic rendezvous system testing at the Flight Robotics Laboratory p 2150 N93-22312
Electro-optical rendezvous and docking sensors
p 2150 N93-22314
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking
p 2151 N93-22316
A berthing and fastening strategy for orbital replacement units p 2151 N93-22317
Fully autonomous navigation for the NASA cargo transfer vehicle p 2151 N93-22318
Employing lighting techniques during on-orbit operations p 2151 N93-22319
Methods for modeling contact dynamics of capture mechanisms p 2151 N93-22320
AR/D image processing system p 2152 N93-22321
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Translational controller results
|NASA-CR-192320| p 2457 N93-22396
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Special approach/docking testcase results
|NASA-CR-192294| p 2180 N93-22683
Application of fuzzy logic-neural network based reinforcement learning to proximity and docking operations: Attitude control results
|NASA-CR-192291| p 2458 N93-23084
Ionospheric plasma flow about a system of electrically biased flat plates
|NASA-CR-191119| p 2194 N93-23131

SPACECRAFT ELECTRONIC EQUIPMENT
Field programmable gate arrays: Evaluation report for space-flight application
|NASA-CR-192796| p 2432 N93-23042
SPACECRAFT ENVIRONMENTS
Thermodynamical behaviour of supercritical oxygen in the Hermes spaceplane environmental conditions
p 2249 N93-22850
DosiMir: Radiation measurements inside the Soviet Space Station Mir, first results p 2160 N93-24371
SPACECRAFT GUIDANCE
Neighboring suboptimal control for vehicle guidance
p 2171 N93-22011
Autonomous rendezvous and capture system design
p 2138 N93-22244
On-orbit demonstration of automated closure and capture using ESA-developed proximity operations technologies and an existing, serviceable NASA Explorer Platform spacecraft p 2142 N93-22266
Space Shuttle Program: Automatic rendezvous, proximity operations, and capture (category 3)
p 2143 N93-22269
CTV rendezvous techniques p 2143 N93-22270
An autonomous rendezvous and docking system using cruise missile technologies p 2143 N93-22272
Optical correlators for automated rendezvous and capture p 2143 N93-22273
Automatic rendezvous and capture system development in a manned environment p 2143 N93-22274
Performance capabilities of a Phase One Automatic Rendezvous and Capture System p 2144 N93-22275
Relative navigation requirements for automatic rendezvous and capture systems p 2144 N93-22276
Automated rendezvous and capture system
p 2144 N93-22277
A comparison of laser based ranging systems for AR/C category 1: Hardware p 2144 N93-22278
New developments in astrodynamics algorithms for autonomous rendezvous p 2144 N93-22279
Onboard navigation rendezvous expert system
p 2144 N93-22280
An overview of autonomous rendezvous and docking system technology development at General Dynamics
p 2145 N93-22281
Autonomous docking ground demonstration (category 3) p 2145 N93-22282
Rendezvous radar for the orbital maneuvering vehicle
p 2145 N93-22283
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
|NASA-CR-185171| p 2205 N93-24536
SPACECRAFT INSTRUMENTS
Preliminary OARE absolute acceleration measurements on STS-50
|NASA-TM-107724| p 2182 N93-22587
GEOTAIL Spacecraft historical data report
|NASA-TM-108710| p 2194 N93-23168
Observations of atmospheric chemistry on the first European polar platform p 2361 N93-23776
The first mission of the ESA Earth observation polar platform p 2362 N93-23783
The European polar platform and its Earth observation mission p 2363 N93-23784
Medium Resolution Imaging Spectrometer (MERIS)
p 2363 N93-23785
An advanced scatterometer for the European polar platform p 2363 N93-23787
The radar altimeter instrument for POEM-1 mission
p 2363 N93-23788
The Advanced Synthetic Aperture Radar (ASAR) for POEM-1 p 2363 N93-23789
The design of the ESA Multiband Imaging Microwave Radiometer MIMR p 2364 N93-23790
Global ozone monitoring experiment
p 2364 N93-23793
IASI (Infrared Atmospheric Sounding Interferometer): Programme objectives and status p 2364 N93-23794
Millimeter wave Atmospheric Sounder (MAS)
p 2364 N93-23795
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798
Simulation of MOMS-02 stereo band radiometric capability using field spectroscopy data
p 2365 N93-23802
Canadian Earth observation program
p 2373 N93-23847
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
|ESA-ISY-3| p 2533 N93-23878
The Infrared Space Observatory (ISO)
p 2170 N93-23912
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO
p 2540 N93-23929
Remote sensing of inner heliospheric plasmas
|AD-A260337| p 2558 N93-24268
Drift scintillation meter for the defense meteorological satellite program
|AD-A259993| p 2410 N93-24299
LOGION: Operation of a liquid metal ion emitter module under microgravity p 2158 N93-24359
Migmas/A: Test of a scanning ion microscope onboard the Soviet Space Station Mir p 2158 N93-24360
Remote sensing experiment FEM: A multisensoral dataset for radiometric and geometric analysis
p 2158 N93-24361
European Space Science and Space Station Freedom
p 2163 N93-24387
SPACECRAFT LANDING
Task Analysis of Shuttle Entry and Landing Activities
|NASA-TM-104761| p 2178 N93-22702
Orbiter Autoland reliability analysis
|NASA-TM-4464| p 2194 N93-23139
SPACECRAFT LAUNCHING
Advanced Manned Launch System
p 2172 N93-22084
Advanced Crew Rescue Vehicle/Personnel Launch System p 2173 N93-22085
Single stage to orbit/SDIO p 2173 N93-22086
Ten-year space launch technology plan
|NASA-TM-108701| p 2135 N93-22204
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-54
|NASA-TM-107558| p 2178 N93-22669
Future of the US Space Launch capability: A task group report
|PB93-139947| p 2171 N93-22899
Characterizing the uncertainty in holddown post load measurements
|NASA-TP-3332| p 2304 N93-23731
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
|NASA-TM-101641| p 2180 N93-24522
Reusable reentry satellite system specification. Volume 1-9
|NASA-CR-192969| p 2196 N93-24543
SPACECRAFT MAINTENANCE
Six-Degree-of-Freedom Test Facility
p 2136 N93-22231
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
Flight Support System (FSS) docking and umbilical services systems p 2140 N93-22254
Research and technology goals and objectives for Integrated Vehicle Health Management (IVHM)
|NASA-CR-192656| p 2152 N93-23033
SPACECRAFT MANEUVERS
Constraint checking during error recovery
p 2445 N93-22169
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking
p 2151 N93-22316
SPACECRAFT MODELS
Space Station Freedom beta gimbal control via sensitivity models
|NASA-TM-106000| p 2182 N93-22551
Modal identification experiment p 2188 N93-22635
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
|NASA-TM-107729| p 2327 N93-23235
Design manual for two-phase components of spacecraft thermal management systems
|AD-A260027| p 2196 N93-24439
SPACECRAFT MODULES
National launch system overview with focus on cargo transfer vehicle p 2137 N93-22236
Japanese plan for SSF utilization
p 2184 N93-22616
SPACECRAFT ORBITS
Electrostatic charging of spacecraft in geosynchronous orbit
|DRA-TM-SPACE-389| p 2181 N93-22489
SPACECRAFT POWER SUPPLIES
Automated technologies needed to prevent radioactive materials from reentering the atmosphere
p 2137 N93-22237
Modelling a single phase voltage controlled rectifier using Laplace transforms
|NASA-TM-106005| p 2474 N93-23016
Solar concentrators for advanced solar-dynamic power systems in space
|NASA-CR-187148| p 2204 N93-23017
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 3: Space power and thermal management
|NASA-TM-108652| p 2519 N93-23109

Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
| NASA-TM-106084 | p 2195 N93-23742
Mechanical Working Group meeting minutes --- power generation and delivery systems
| DE93-004884 | p 2571 N93-24435

SPACECRAFT PROPULSION
CSTI Earth-to-orbit propulsion research and technology program overview p 2174 N93-22090
Advanced rocket propulsion p 2174 N93-22091
Space propulsion p 2174 N93-22092
Thruster configurations for maneuvering heavy payloads p 2150 N93-22313
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 1: Draft final
| NASA-CR-192488 | p 2177 N93-22348
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document. Volume 1: Major trades. Book 2: Draft final
| NASA-CR-192489 | p 2178 N93-22959
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 3: Nuclear thermal rocket vehicle
| NASA-CR-192491 | p 2178 N93-22960
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 5: Nuclear electric propulsion vehicle
| NASA-CR-192493 | p 2178 N93-22990
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 4: Solar electric propulsion vehicle
| NASA-CR-192492 | p 2178 N93-22993
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 2: Cryo/aerobrake vehicle
| NASA-CR-192490 | p 2179 N93-23251
Cycle O(CY1991) NLS trade studies and analyses report. Book 2, part 2: Propulsion
| NASA-CR-184472 | p 2259 N93-23715
Development of arcjet and ion propulsion for spacecraft stationkeeping
| NASA-TM-106102 | p 2204 N93-23747
PROMISS user manual, appendix 1
| NASA-CR-192990 | p 2333 N93-24530

SPACECRAFT RADIATORS
Liquid droplet radiator: Design concepts and development logic p 2247 N93-22834
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139

SPACECRAFT RECOVERY
TALON and CRADLE: Systems for the rescue of tumbling spacecraft and astronauts p 2142 N93-22268
DGPS for space and return p 2146 N93-22286
An automated rendezvous and capture system design concept for the cargo transfer vehicle and Space Station Freedom p 2146 N93-22287
Advanced underwater lift device
| NASA-CR-185709 | p 2169 N93-22877
Group Task Force on Satellite Rescue and Repair
| NASA-TM-108713 | p 2193 N93-23040

SPACECRAFT REENTRY
Entry Systems Panel p 2175 N93-22097
Entry Systems Panel deliberations p 2176 N93-22105
Reentry systems: Material technology needs p 2176 N93-22108
Flexible thermal protection materials for entry systems p 2177 N93-22111
Subsonic aerodynamic characteristics of a proposed advanced manned launch system orbiter configuration
| NASA-TM-4439 | p 2108 N93-22558

SPACECRAFT SHIELDING
Propulsion Systems Panel p 2174 N93-22096
Space assembled entry systems certification p 2176 N93-22106
Thermal protection system of the Space Shuttle's orbiter p 2176 N93-22107
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
New approach to the interaction of cosmic rays with nuclei in spacecraft shielding and the human body
| DE93-006263 | p 2559 N93-22544
Impact experiments into multiple-mesh targets: Concept development of a lightweight collisional bumper
| NASA-TM-104764 | p 2194 N93-23247
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
| NASA-TM-104748 | p 2243 N93-24474

SPACECRAFT STRUCTURES
Apparatus for simulating an exoatmospheric structure
| NASA-CASE-MSC-21975-1 | p 2169 N93-22016
A modal test of a space-truss for structural parameter identification
| DE93-004043 | p 2323 N93-22518
System identification of the JPL micro-precision interferometer truss
| DE93-004044 | p 2323 N93-22519
Precursor SSF utilization: The MODE experiments p 2188 N93-22633
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
Multidisciplinary optimization of a controlled space structure using 150 design variables
| NASA-CR-4502 | p 2125 N93-22799
Research projects
| NRC-LTR-ST-1883 | p 2571 N93-24652

SPACECRAFT TEMPERATURE
Engineering aspects of two-phase flow systems for heat transport p 2247 N93-22833
Liquid droplet radiator: Design concepts and development logic p 2247 N93-22834
Researches and developments on typical thermal technologies for space applications p 2248 N93-22845
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866

SPACECRAFT TRACKING
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239
Automated target recognition and tracking using an optical pattern recognition neural network p 2138 N93-22240
Experimental validation of docking and capture using space robotics testbeds p 2149 N93-22307

SPACECRAFT TRAJECTORIES
An automated system for spacecraft proximity operations p 2136 N93-22230
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
| NASA-CR-185171 | p 2205 N93-24536

SPACECREWS
Employing lighting techniques during on-orbit operations p 2151 N93-22319
Biomedical Monitoring and Countermeasures Facility p 2186 N93-22624
An on-orbit viewpoint of life sciences research p 2187 N93-22629
Crew health p 2187 N93-22630
Orbiter Autoland reliability analysis
| NASA-TM-4464 | p 2194 N93-23139
Selection of astronauts for European space missions p 2156 N93-24345
The European astronauts training programme p 2156 N93-24346
Training concept for crew, end user, and ground centre personnel in the Columbus utilisation programme p 2162 N93-24382

SPACELAB
MIRAGE: The data acquisition, analysis, and display system p 2530 N93-22193
Space Station Freedom research capabilities p 2183 N93-22609
Opportunities for research on Space Station Freedom p 2183 N93-22610
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
| NASA-EP-285 | p 2399 N93-24148
Columbus precursor Spacelab missions p 2155 N93-24341
Payload operations for precursor mission E-1 p 2155 N93-24342
The Space Robot Technology Experiment (ROTEX) on Spacelab-mission D2 p 2164 N93-24391

SPACELAB PAYLOADS
User support for the Spacelab mission D-2 p 2155 N93-24340
The strategic role of automation and robotics for Columbus utilization p 2164 N93-24389
Development of Arabidopsis thaliana grown under microgravity conditions p 2166 N93-24404

SPALLATION
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
| DE93-003825 | p 2325 N93-22872

SPALLING
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
| DE93-005533 | p 2237 N93-22909

SPARK IGNITION
Controlling chaos in spark-ignition engines
| DE93-005754 | p 2312 N93-22761
Formation and control of combustion pollutants from gasoline-fueled spark-ignition motor vehicle engines
| PB93-141042 | p 2314 N93-23275

SPATIAL DISTRIBUTION
Analysis of IUE observations of hydrogen in comets
| NASA-CR-192693 | p 2548 N93-23231
Prototype for a regional data management system, a step towards a regional land use project p 2353 N93-23571
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
Normal modes of the atmosphere as estimated by principal oscillation patterns and derived from quasi-geostrophic theory
| MPIM-81 | p 2397 N93-23857
ROSAT observations in star forming regions p 2538 N93-23917
Ultrafast frequency agile optical materials: Organically doped sol-gel glasses
| AD-A260525 | p 2241 N93-24201

SPATIAL FILTERING
Adaptive filters for monitoring localized brain activity from surface potential time series
| DE93-003795 | p 2420 N93-22774
Optimum space-time processing in non-stationary environments
| ISBN-0-315-56985-9 | p 2274 N93-24620

SPATIAL RESOLUTION
Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
| NASA-TM-107726 | p 2108 N93-22552
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
Method for enhancing of the spatial resolution of the passive radiometric systems p 2365 N93-23799

SPECIFIC HEAT
Experimental studies of critical behavior of systems with quenched disorder
| DE93-005090 | p 2228 N93-22717
Thermophysical properties
| DE93-007807 | p 2220 N93-22916
Low-temperature specific heat of several high-temperature superconductors in the superconducting and mixed states p 2507 N93-23397
Magnetic response of certain curved graphitic geometries
| DE93-003694 | p 2243 N93-24500

SPECIFIC IMPULSE
Development of arcjet and ion propulsion for spacecraft stationkeeping
| NASA-TM-106102 | p 2204 N93-23747

SPECIFICATIONS
Space Generic Open Avionics Architecture (SGOAA) standard specification
| NASA-CR-188245 | p 2199 N93-23003
LOTOS specification style for OSI
| MEMO-INF-92-46 | p 2448 N93-23357
Bipartitioning of LOTOS specifications
| MEMO-INF-92-50 | p 2439 N93-23359
ESA ERS 1 product specification
| ESA-SP-1149 | p 2200 N93-23389
Reusable reentry satellite system specification. Volume 1-9
| NASA-CR-192969 | p 2196 N93-24543
Variable speed gas engine-driven air compressor system
| PB93-147353 | p 2319 N93-24561
Raster graphics: A tutorial and implementation guide
| PB93-145233 | p 2443 N93-24562
TP protocol from specification to implementation
| MEMO-INF-92-42 | p 2443 N93-24582

SPECIMEN GEOMETRY
Crack deflection at bi-material interfaces
| DE93-003712 | p 2332 N93-24479

SPECIMENS
Survey of aviation medical examiners: Information and attitudes about the pre-employment and pre-appointment drug testing program
| DOT/FAA/AM-92/15 | p 2422 N93-24088

SPECTRA
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
| NASA-TM-103900 | p 2467 N93-22829

SPECTRAL BANDS
Study of high spatial resolution narrow spectral band ultraviolet images of the earth's atmosphere
| AD-A260035 | p 2400 N93-24254

SPECTRAL LINE WIDTH
The liquid crystal polarimeter for solid-state imaging of solar vector magnetic fields
| AD-A260029 | p 2483 N93-24251
Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
| PB93-152072 | p 2514 N93-24647
SPECTRAL METHODS
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
| AD-A260149 | p 2297 N93-24132
SPECTRAL SIGNATURES
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
SPECTRAL THEORY
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
| NASA-TM-107734 | p 2133 N93-22675
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
| DE93-005251 | p 2293 N93-23300
SPECTROGRAPHS
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189
SPECTROHELIOGRAPHS
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189
SPECTROMETERS
New methods and instrumentation for the characterization of biopolymers using electrospray ionization-mass spectrometry
| DE93-005100 | p 2239 N93-23323
Earth's mysterious atmosphere. ATLAS 1: Teachers guide with activities
| NASA-EP-282 | p 2396 N93-23733
Global ozone monitoring experiment p 2364 N93-23793
SPECTROPHOTOMETRY
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
| NASA-TM-106021 | p 2206 N93-22605
Review of results from the Hopkins Ultraviolet Telescope aboard the Astro-1 mission p 2535 N93-23891
The x ray transient GS2023+338: The 0(sup d).24 and 6(sup d).5 modulations p 2536 N93-23901
SPECTROSCOPIC ANALYSIS
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
| DE93-004585 | p 2217 N93-22339
Plasma focus p 2496 N93-23264
Organic Optoelectronic Materials: A Topical Workshop
| AD-A259695 | p 2488 N93-23662
Experimental and theoretical study of the iodine-singlet oxygen reaction for use in a high power chemical laser (COIL)
| ONERA-P-1992-3 | p 2309 N93-24137
SPECTROSCOPY
Spectroscopy of highly-ionized atoms using position-sensitive detection
| DE93-002914 | p 2482 N93-22985
MIPAS: Michelson Interferometer for Passive Atmospheric Sounding for POEM-1 p 2363 N93-23786
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295
The surface plasmon spectroscopy applications in microgravity: The measurement theory and preliminary experimental layout p 2165 N93-24396
SPECTRUM ANALYSIS
A massive neutrino in nuclear beta decay?
| DE93-004718 | p 2479 N93-22333
Data selection for fast projection techniques: A comparative study of direction finding performance
| AD-A259916 | p 2262 N93-22814
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
| NASA-TM-103900 | p 2467 N93-22829
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
| PB93-136422 | p 2413 N93-22893
A massive neutrino in nuclear beta decay?
| DE93-004706 | p 2482 N93-22950
NTIA Microcomputer Spectrum Analysis Models (MSAM). Version 4.0, August 1992
| PB93-108348 | p 2432 N93-23269
Spectral evolution during a complex gamma ray burst observed with BATSE p 2537 N93-23906
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175
SPEECH RECOGNITION
A low-delay backward-adaptive CELP speech coder
| ISBN-0-315-60461-1 | p 2274 N93-24618
SPHERES
Contact-impact simulations on massively parallel SIMD supercomputers
| DE93-004188 | p 2445 N93-22060
The role of the dipole-dipole interaction in the solvation of monoatomic monovalent ions on the basis of the mean spherical approximation
| AD-A260284 | p 2483 N93-24234
Phase transitions at the fluid-solid interface in a model for the adsorption of hard spheres
| AD-A260304 | p 2223 N93-24235
Effect of triplet correlations on the adsorption of a dense fluid onto a crystalline surface
| AD-A260306 | p 2223 N93-24236
SPHERICAL COORDINATES
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
| NASA-CR-185677 | p 2109 N93-22802
SPHERICAL SHELLS
The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
| DE93-000796 | p 2392 N93-22807
A nonlinear dynamic spherical membrane model
| AD-A259633 | p 2112 N93-23654
Thermal convection in rotating systems and the band structure of the major planets p 2164 N93-24393
SPHERICAL WAVES
Spherical wave reflection and transmission p 2487 N93-23499
The single-gap hollow spherical dipole in non-conducting media
| AD-A260017 | p 2273 N93-24460
SPHEROMAKS
Theoretical studies on plasma heating and confinement
| DE93-007617 | p 2499 N93-24452
SPIN RESONANCE
A mechanism for capture into resonance
| PB93-145761 | p 2469 N93-23648
SPIN STABILIZATION
Apparatus for simulating an exoatmospheric structure
| NASA-CASE-MSC-21975-1 | p 2169 N93-22016
SPIRAL GALAXIES
The formation of enhanced, low-ionization emission in galactic halos p 2551 N93-24180
SPLINE FUNCTIONS
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension p 2318 N93-24184
SPLINES
Optimal design of composite hip implants using NASA technology p 2423 N93-22188
SPOILERS
A two-dimensional spoiler of arbitrary chordwise position in a low speed flow p 2127 N93-24211
SPONTANEOUS EMISSION
Self-amplified spontaneous emission for short wavelength coherent radiation
| DE93-004724 | p 2307 N93-22490
SPOT (FRENCH SATELLITE)
Map production and updating using SPOT data and SPOT data derived products p 2348 N93-23536
Image maps p 2348 N93-23537
Comparison of mapping with different satellite images p 2348 N93-23540
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
Mapping from SPOT data p 2349 N93-23544
The creation of a DEM from SPOT data p 2355 N93-23582
The SPOT program p 2360 N93-23766
The SPOT 4 satellite and beyond p 2360 N93-23767
SPOT 4 image ground segment p 2360 N93-23768
The SPOT system development program: SPOT AVAL p 2360 N93-23769
Protection of SPOT data and derived products under private agreements, the law and international conventions p 2373 N93-23851
SPRAYED COATINGS
Development of fire protective coatings for GRP composites using plasma deposition technology, phase 2
| DREA-CR-91-453 | p 2239 N93-23121
SPRAYERS
Structure of confined laminar spray diffusion flames: Numerical investigation
| NASA-TM-106038 | p 2288 N93-22596
Spray combustion experiments and numerical predictions
| NASA-TM-106069 | p 2296 N93-23744
Aircraft fire protection system
| CA-PATENT-1-296-970 | p 2118 N93-24592
SPREAD F
On the hierarchy of processes contributing to equatorial spread F p 2395 N93-23595
The longitudinal occurrence of equatorial F layer irregularities p 2266 N93-23605
SPRINGS (ELASTIC)
SPRING2: Helical compression spring geometry generator program manual
| DREA-TC-92-314 | p 2438 N93-23345
SPUTTERING
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
| DE93-004191 | p 2499 N93-22062
Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
| DE93-004204 | p 2499 N93-22064
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
| DE93-004815 | p 2230 N93-22991
High-temperature Au implantation into Ni-Be and Ni-Si alloys
| DE93-005555 | p 2505 N93-23022
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
| MBB-Z-0444-92-PUB | p 2239 N93-23365
SQUALLS
The structure and energetics of Amazon squall lines p 2404 N93-23166
STABILITY
Hamiltonian structure of the Vlasov-Einstein system and the problem of stability for spherical relativistic star clusters
| DE93-006180 | p 2546 N93-22507
Structure, stoichiometry and stability in magnetoplumbite and (beta)-alumina type ceramics
| DE93-007303 | p 2236 N93-22528
Stable, high-efficiency amorphous silicon solar cells with low hydrogen content
| DE93-000049 | p 2377 N93-22750
The asymptotic spectra of banded Toeplitz and quasi-Toeplitz matrices
| NASA-TM-103900 | p 2467 N93-22829
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864
Stability and instability of thermocapillary convection in models of the float-zone crystal-growth process
| NASA-CR-192695 | p 2252 N93-23122
Phase stability and electronic structure of transition-metal aluminides
| DE93-003584 | p 2234 N93-24499
STABILITY DERIVATIVES
System identification and model reduction using modulating function techniques
| NASA-CR-192807 | p 2438 N93-23248
STABILITY TESTS
An improved CAMRAD model for aeroelastic stability analysis of the XV-15 with advanced technology blades
| NASA-TM-4448 | p 2125 N93-22486
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897
STABILIZATION
Initial trials results for image stabilisation using a rugged low noise gyroscope p 2255 N93-22021
Mechanisms and enhancement of flame stabilization
| DE93-006467 | p 2219 N93-22709
STAGNATION FLOW
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
| NASA-CR-185677 | p 2109 N93-22802
STAGNATION POINT
Wake-induced unsteady stagnation region heat transfer measurements p 2295 N93-23591
STAINLESS STEELS
Investigation of azimuthal stresses due to welding and cooldown
| DE93-005530 | p 2324 N93-22708
Prediction of the quality of resistance welds by computer based color image analysis
| DE93-002402 | p 2312 N93-22818
Formability of type 304 stainless steel sheet
| DE92-018619 | p 2229 N93-22924
Damage analysis and fundamental studies for fusion reactor materials development
| DE93-008283 | p 2499 N93-24516
Corrosion fatigue of iron-chromium-nickel alloys: Fracture mechanics, microstructure and chemistry
| DE93-007971 | p 2234 N93-24566

STANDARDIZATION
Guideline requirements for serviceable spacecraft grasping/berthing/docking interfaces based on simulations and flight experience (survey paper) p 2150 N93-22311
A round-robin for particle electrophoresis standardization
|DE93-003018| p 2217 N93-22400
Space biology initiative program definition review. Trade study 6: Space Station Freedom/spacelab modules compatibility
|EEI-89-236| p 2418 N93-23081
Federal move to metric: Public Law, DoC and NIST
|PB93-139129| p 2258 N93-23284
A comprehensive glossary of weather terms for storm spotters
|PB93-128940| p 2407 N93-23649
Modernization and unification: Strategic goals for NASA STI program
|NASA-TM-109186| p 2528 N93-24117
Raster graphics: A tutorial and implementation guide
|PB93-145233| p 2443 N93-24562
STANDARDS
A comparison of national standards for the performance evaluation of coordinate measuring machines in terms of length-based dimensional quantities
|PB93-139004| p 2256 N93-22079
The df: A proposed data format standard
|NASA-TM-4467| p 2430 N93-22810
Specifications, tolerances, and other technical requirements for weighing and measuring devices as adopted by the 77th National Conference on Weights and Measures, 1992
|PB93-130474| p 2257 N93-22895
Space Generic Open Avionics Architecture (SGOAA) standard specification
|NASA-CR-188245| p 2199 N93-23003
NIST mesurement service for DC standard resistors
|PB93-139079| p 2280 N93-23205
The 77th National Conference on Weights and Measures
|PB93-130466| p 2258 N93-23270
European Telecommunications Standards Institute. Apreliminary analysis
|PB93-138824| p 2263 N93-23271
A European radionavigation plan? p 2124 N93-23513
The future role of satellite communications in an improved air traffic management p 2275 N93-23518
STANDING WAVES
Motion measurement of acoustically levitated object
|NASA-CASE-NPO-18191-1-CU| p 2135 N93-24601
STAR CLUSTERS
The optical counterparts of the x ray binaries in NGC 6712 and 47 Tucanae p 2538 N93-23914
STAR DISTRIBUTION
ROSAT observations in star forming regions p 2538 N93-23917
STAR FORMATION
The stellar populations of early-type galaxies in groups and clusters p 2549 N93-23491
ROSAT observations in star forming regions p 2538 N93-23917
STAR FORMATION RATE
Multiwavelength analysis of starburst galaxies p 2539 N93-23920
STARBURST GALAXIES
Multiwavelength analysis of starburst galaxies p 2539 N93-23920
STARS
Fifth fundamental catalogue. Part 2: The FK5 extension - new fundamental stars
|REPT-33(1991)| p 2542 N93-23346
STATE ESTIMATION
Identification of systems from non-uniformly sampled data
|RR-452| p 2472 N93-23375
STATE VECTORS
Complex principal oscillation pattern analysis
|MPIM-86| p 2468 N93-23061
STATIC PRESSURE
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
|NASA-TM-4436| p 2110 N93-22876
Theoretical errors on airborne measurements of: Static pressure, impact temperature, air flow angle, air flow speed
|PB93-136406| p 2405 N93-23232
Horizontal stress in-situ by cone penetrometers and related studies
|AD-A260503| p 2401 N93-24418
STATIC TESTS
Emergency vehicle alert system, phase 2
|NASA-CR-192464| p 2260 N93-22455
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
|NASA-TP-3257| p 2297 N93-24096
STATIONKEEPING
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture p 2139 N93-22250
Development of arcjet and ion propulsion for spacecraft stationkeeping
|NASA-TM-106102| p 2204 N93-23747
STATISTICAL ANALYSIS
Fault detection and isolation p 2106 N93-22568
Mapping the Universe: Statistical measures of the galaxy distribution
|ETN-93-93456| p 2542 N93-23116
Microwave line-of-sight channel measurements, channel modelling, and application of channel models to digital radio performance prediction
|ACTA-POL-SCAND-EL-69| p 2264 N93-23367
Digital processing for positioning with one satellite p 2270 N93-23629
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
|PB93-136497| p 2396 N93-23650
Methods for analyzing extreme events under climate change
|PB93-146827| p 2387 N93-23651
The meaning and utility of confidence
|AD-A259646| p 2472 N93-23655
1991 CRC octane number requirement survey
|AD-A259821| p 2245 N93-23667
When networks disagree: Ensemble methods for hybrid neural networks
|AD-A260121| p 2460 N93-23701
Three dimensional object recognition using an unsupervised neural network: Understanding the distinguishing features
|AD-A260048| p 2461 N93-23712
The IUE archive(s) p 2535 N93-23895
Bayesian prediction of mean square errors with covariates
|AD-A259585| p 2470 N93-24064
Quasi-binary decision making using light scattering
|AD-A260470| p 2489 N93-24197
An evaluation of schedule metrics used within aeronautical systems center
|AD-A260113| p 2521 N93-24413
New Micro- and macroscopic models of contact and friction
|AD-A259925| p 2319 N93-24442
STATISTICAL CORRELATION
Generation of covariance data among values from a single set of experiments
|DE93-004192| p 2522 N93-22435
Correlation and prediction of snow water equivalent from snow sensors
|PB93-127413| p 2374 N93-23870
STATISTICAL DECISION THEORY
Quasi-binary decision making using light scattering
|AD-A260470| p 2489 N93-24197
STATISTICAL DISTRIBUTIONS
Improving the chi-squared approximation for bivariate normal tolerance regions
|NASA-TP-3304| p 2472 N93-22670
Quasi-binary decision making using light scattering
|AD-A260470| p 2489 N93-24197
STATISTICAL TESTS
Change PP plot and continuous sample quantile function
|AD-A259833| p 2472 N93-23460
STATISTICAL WEATHER FORECASTING
Preliminary results from the analysis of wind component error, July data
|AD-A259654| p 2408 N93-24022
STATORS
Wake-induced unsteady stagnation region heat transfer measurements p 2295 N93-23591
STEADY FLOW
Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
|NASA-TM-107726| p 2108 N93-22552
An investigation of the fundamental cause of asymmetric separated flow
|AD-A260296| p 2114 N93-24263
STEADY STATE
Simulation of a particle-laden combustion flow in an MHD second stage combustor
|DE93-004244| p 2491 N93-22065
COMMIX-1AR/P: A three-dimensional transient single-phase computer program for thermal hydraulic analysis of single and multicomponent systems
|DE93-006044| p 2289 N93-22694
STEAM FLOW
Evaluation of ceramic materials for an advanced steam-methane reformer
|DE93-005931| p 2235 N93-22329
STEAM TURBINES
High-pressure ceramic air heater for indirectly fired gas turbine applications
|DE93-005022| p 2315 N93-23296
STEEL STRUCTURES
Inelastic nonuniform torsion of steel I-beams
|PB93-118776| p 2333 N93-24589
STEELS
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
|DE93-003100| p 2322 N93-22412
Postirradiation deformation behavior in ferritic Fe-Cr alloys
|DE93-004833| p 2229 N93-22881
Grain boundary chemistry effects on environment-induced crack growth of iron-based alloys
|DE93-005039| p 2232 N93-23980
STELLAR ACTIVITY
Gamma ray bursts from extragalactic sources p 2535 N93-23893
STELLAR ATMOSPHERES
Model atmospheres for low temperature, helium-rich white dwarfs: Problems with the equation of state p 2546 N93-23065
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae p 2547 N93-23208
STELLAR COMPOSITION
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae p 2547 N93-23208
STELLAR CORONAS
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae p 2547 N93-23208
STELLAR EVOLUTION
Endpoints of stellar evolution: The incidence of stellar mass black holes in the galaxy p 2533 N93-23882
Multiwavelength analysis of starburst galaxies p 2539 N93-23920
STELLAR MAGNETIC FIELDS
Motion of charged particles in pulsar magnetospheres p 2550 N93-24161
STELLAR MASS
Multiwavelength analysis of starburst galaxies p 2539 N93-23920
STELLAR MASS EJECTION
Environmental conditions responsible for solar activity
|AD-A259703| p 2557 N93-23664
STELLAR MODELS
Model atmospheres for low temperature, helium-rich white dwarfs: Problems with the equation of state p 2546 N93-23065
Chaotic dynamics of the solar cycle
|AD-A260039| p 2557 N93-23644
Gamma ray bursts from extragalactic sources p 2535 N93-23893
The stability of thick, self-gravitating disks in protostellar systems p 2551 N93-24185
STELLAR MOTIONS
Fifth fundamental catalogue. Part 2: The FK5 extension - new fundamental stars
|REPT-33(1991)| p 2542 N93-23346
STELLAR ORBITS
The x ray transient GS2023+338: The 0(sup d).24 and 6(sup d).5 modulations p 2536 N93-23901
STELLAR PARALLAX
Status and early results of the Hipparcos astrometry project p 2533 N93-23879
STELLAR SPECTRA
Stellar lyman alpha emission and the local interstellar medium
|NASA-CR-192635| p 2541 N93-22381
Nitrogen to carbon abundance ratios determined from emission lines originating in transition layers between stellar chromospheres and coronae p 2547 N93-23208
EUV spectral features of active binaries p 2536 N93-23904
A2163: An exceptionally hot cluster of galaxies p 2538 N93-23913
The cold ionized shell around the old nova DQ Herculis p 2543 N93-23964
STELLAR SPECTROPHOTOMETRY
Standardization work for the calibration of intensities of celestial objects
|NASA-CR-192831| p 2543 N93-23502

STELLAR SYSTEMS
The two black hole problem in 3 + 1 general relativity: Analytical approximations and numerical solutions of the initial data p 2548 N93-23212
Fifth fundamental catalogue. Part 2: The FK5 extension - new fundamental stars
| REPT-33(1991) | p 2542 N93-23346
The stellar populations of early-type galaxies in groups and clusters p 2549 N93-23491
STELLAR TEMPERATURE
A2163: An exceptionally hot cluster of galaxies p 2538 N93-23913
The kinematics of stars and gas in the galactic disk p 2550 N93-23991
STELLAR WINDS
The radiation gasdynamics of planetary nebulae p 2547 N93-23133
GX301-2/WRA9777 revisited: Probing the stellar wind through x ray optical data p 2537 N93-23911
STELLARATORS
The University of Wisconsin-Madison Torsatron/Stellarator Laboratory program
| DE93-005922 | p 2492 N93-22419
A high performance spectral code for nonlinear MHD stability
| DE93-004541 | p 2494 N93-22984
STEPPES
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574
STEREOPHOTOGRAPHY
Electro-optic frame photography with pulsed ruby illumination
| DE93-005819 | p 2306 N93-22327
Remote sensing landslide hazard mapping using GIS technology in Colombian Andes p 2351 N93-23559
High resolution stereo images from the Space Station Mir p 2365 N93-23800
New images of the Earth in highest resolution: MOMS-02 on the second German Spacelab mission D2 p 2365 N93-23801
Microtopography of manganese crusts
| PB93-120830 | p 2398 N93-23996
STEREOSCOPIC VISION
A strongly goal-directed close-range vision system for spacecraft docking p 2136 N93-22232
STEREOSCOPY
Development of optical three-dimensional measurement techniques for fluid dynamics p 2294 N93-23398
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data p 2350 N93-23552
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
MOMS-02P: A modular optical system for Earth land cover observation in the multisensor environment of the Priroda/Mir mission p 2365 N93-23796
Simulation of MOMS-02 stereo band radiometric capability using field spectroscopy data p 2365 N93-23802
STIFFNESS
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
| NASA-CR-190783 | p 2210 N93-23429
Joint flexibility effects on the dynamic response of structures. Part 1: Deterministic analysis
| AD-A260487 | p 2331 N93-24135
Improved dynamic stiffness (system modeling), state-of-the-art review
| PB93-127744 | p 2331 N93-24208
STIMULATED EMISSION
Self-amplified spontaneous emission for short wavelength coherent radiation
| DE93-004724 | p 2307 N93-22490
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
| DE93-006504 | p 2480 N93-22712
New analysis of KrF picosecond pulse experiment
| DE93-003805 | p 2308 N93-23290
STIRLING CYCLE
Dynamic analysis of Free-Piston Stirling Engine/Linear Alternator-load system-experimentally validated
| NASA-TM-106034 | p 2473 N93-22559
Heat pipe heat transport system for the Stirling Space Power Converter (SSPC)
| NASA-CR-191065 | p 2203 N93-22662
Lunar electric power systems utilizing the SP-100 reactor coupled to dynamic conversion systems
| NASA-CR-191023 | p 2377 N93-22879
Heat pipe fatigue test specimen: Metallurgical evaluation
| NASA-CR-189120 | p 2381 N93-23360
STIRLING ENGINES
Development of CPG dish-Stirling systems for remote power applications
| DE93-003251 | p 2376 N93-22414
Lunar electric power systems utilizing the SP-100 reactor coupled to dynamic conversion systems
| NASA-CR-191023 | p 2377 N93-22879
STOCHASTIC PROCESSES
Synthesis of robust controllers p 2107 N93-22573
Large scale control and distributed computing systems under stochastic structural perturbations
| AD-A260501 | p 2447 N93-22933
Thermodynamic and stochastic theory of hydrodynamic and power-producing processes
| DE93-006891 | p 2515 N93-23028
A stochastic learning algorithm for layered neural networks
| DE93-003555 | p 2458 N93-23288
A comparison of polynomial and rational NARMAX models for nonlinear system identification
| RR-444 | p 2469 N93-23374
Identification of systems from non-uniformly sampled data
| RR-452 | p 2472 N93-23375
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
| AD-A260047 | p 2472 N93-23711
Joint services electronics program. Basic research in electronics (JSEP)
| AD-A259598 | p 2283 N93-24068
Learning optimal control using learning automata
| MATHS-REPT-A-176 | p 2462 N93-24078
Deterministic methods in stochastic optimal control
| AD-A260478 | p 2462 N93-24100
Probability and statistics applied to the theory of algorithms
| AD-A259956 | p 2473 N93-24248
Research in stochastic processes and their applications
| AD-A260174 | p 2473 N93-24317
Stochastic inflation and inflationary density fluctuations p 2473 N93-24457
STOICHIOMETRY
Electronic structure studies of YBa2Cu3O(x)(6.2 less than equal to x less than or equal to 6.9) using angle resolved photoemission
| DE93-004811 | p 2501 N93-22493
Structure, stoichiometry and stability in magnetoplumbite and (beta)-alumina type ceramics
| DE93-007303 | p 2236 N93-22528
Biological production of hydrogen
| DE93-002604 | p 2219 N93-22736
A structural study of charge-density-wave perturbations in mixed-halide MX solids
| DE93-005449 | p 2503 N93-22747
STOKES FLOW
Surface tension and buoyancy driven Stokes flow in cavities p 2250 N93-22856
STOPPING POWER
ESTAR, PSTAR, and ASTAR: Computer programs for calculating stopping-power and range tables for electrons, protons, and helium ions
| PB93-146033 | p 2481 N93-22898
STORAGE STABILITY
A dual output pressure, high reliability, long storage life gas delivery vessel assembly p 2320 N93-22199
STORAGE TANKS
Built-up Al-Li structures for cryogenic tank and dry bay applications p 2175 N93-22099
Thermodynamical behaviour of supercritical oxygen in the Hermes spaceplane environmental conditions p 2249 N93-22850
STORM DAMAGE
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
STORMS (METEOROLOGY)
A statistical characterization of Denver-area microbursts
| DOT/FAA/NR-92/13 | p 2404 N93-23094
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
| PB93-118586 | p 2405 N93-23333
A comprehensive glossary of weather terms for storm spotters
| PB93-128940 | p 2407 N93-23649
STRAIN DISTRIBUTION
Formability of type 304 stainless steel sheet
| DE92-018619 | p 2229 N93-22924
STRAIN ENERGY METHODS
Variational theory of deformations of curved, twisted, and extensible elastic rods
| AD-A260331 | p 2332 N93-24266
STRAIN ENERGY RELEASE RATE
Crack deflection at bi-material interfaces
| DE93-003712 | p 2332 N93-24479
STRAIN GAGES
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
| NASA-TM-105961 | p 2231 N93-23418
Characterizing the uncertainty in holddown post load measurements
| NASA-TP-3332 | p 2304 N93-23731
Effect of reinforcement and fiber-matrix interface on dynamic fracture of fiber-reinforced composite materials p 2214 N93-24181
STRAIN MEASUREMENT
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
| DE93-003806 | p 2208 N93-22432
Moire interferometry at high temperatures p 2328 N93-23380
Measurement of three-dimensional crack tip deformation by digital image processing p 2329 N93-23590
STRAIN RATE
Microparticle impacts at ultrahigh velocities and their relation to macroparticle impacts
| DE93-003845 | p 2323 N93-22516
Massively parallel molecular dynamics simulations of two-dimensional materials at high strain rates
| DE93-003825 | p 2325 N93-22872
STRAKES
Flight investigation of the effect of tail boom strakes on helicopter directional control
| NASA-TP-3278 | p 2108 N93-22654
STRAPDOWN INERTIAL GUIDANCE
An integrated autonomous rendezvous and docking system architecture using Centaur modern avionics p 2147 N93-22293
STRATEGY
Programmes and strategy for the World Meteorological Organization with respect to Earth observation from space p 2372 N93-23842
STRATIGRAPHY
Regional geology of the low-permeability, gas-bearing Cleveland Formation, western Anadarko Basin, Texas Panhandle: Lithologic and depositional facies, structure, and sequence stratigraphy
| PB93-132769 | p 2394 N93-23255
STRATOSPHERE
Global warming impacts of CFC alternative technologies: Combining fluorocarbon and CO2 effects
| DE93-002347 | p 2384 N93-22972
The atmospheric effects of stratospheric aircraft
| NASA-RP-1293 | p 2385 N93-23057
MIPAS: Michelson Interferometer for Passive Atmospheric Sounding for POEM-1 p 2363 N93-23786
STREAM FUNCTIONS (FLUIDS)
Marangoni convection in a spinning liquid column
| LRT-WE-9-FB-13-1991 | p 2289 N93-22678
STREAMS
Measuring variation in ecosystem sensitivity to stress
| AD-A259521 | p 2387 N93-23450
STRESS (PHYSIOLOGY)
Stress resistance as a diagnostic category in air traffic controller selection
| DLR-FB-92-13 | p 2422 N93-24092
Cardiovascular stress test with non-invasive techniques p 2165 N93-24399
STRESS (PSYCHOLOGY)
The impact on organization structure on team decision making under stress and uncertainty
| AD-A259831 | p 2519 N93-23434
Stress resistance as a diagnostic category in air traffic controller selection
| DLR-FB-92-13 | p 2422 N93-24092
STRESS ANALYSIS
Stress calculation for the Sandia 34-meter wind turbine using the local circulation method and turbulent wind
| DE93-004480 | p 2375 N93-22045
Pretransformation strain modulations in proper ferroelastics
| DE93-005468 | p 2226 N93-22340
Investigation of azimuthal stresses due to welding and cooldown
| DE93-005530 | p 2324 N93-22708
Optimal bolt preload for dynamic loading
| DE92-017527 | p 2313 N93-22923
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
| NASA-CR-192813 | p 2209 N93-23043
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
| VTT-PUBS-103 | p 2326 N93-23120
A nonlinear dynamic spherical membrane model
| AD-A259633 | p 2112 N93-23654
Step stress testing of receiver/transmitter units, part 1
| AD-A260182 | p 2273 N93-24318
Horizontal stress in-situ by cone penetrometers and related studies
| AD-A260503 | p 2401 N93-24418

STRESS CONCENTRATION
PS1 satellite refrigerator heat exchanger: Failure of the LN2 heat exchanger to low pressure helium
|DE93-005616| p 2257 N93-22416
surf3d: A 3-D finite-element program for the analysis of surface and corner cracks in solids subjected to mode-1 loadings
|NASA-TM-107710| p 2329 N93-23735
STRESS CORROSION CRACKING
Fracture properties of 7010 and 7050 aluminium alloys under inert and aggressive environmental conditions
|DLR-FB-91-35| p 2228 N93-22658
STRESS CYCLES
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
|DE93-003253| p 2324 N93-22721
STRESS DISTRIBUTION
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
|DE93-003100| p 2322 N93-22412
Advanced reinforcement systems for intermetallic applications
|NASA-CR-4488| p 2209 N93-22875
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
|NASA-CR-191422| p 2211 N93-23877
Two-parameter fracture mechanics theory and applications
|AD-A259907| p 2330 N93-23993
STRESS INTENSITY FACTORS
Numerical treatment of vertex singularities and intensity factors for mixed boundary value problems for the Laplace equation in R3
|AD-A260107| p 2469 N93-23713
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
|DE93-004716| p 2330 N93-24051
STRESS MEASUREMENT
Chemically prepared Pb(Zr,Ti)O3 thin films: The effects of orientation and stress
|DE93-004501| p 2500 N93-22324
Residual stress measurements in continuous fiber titanium matrix composites
|DE93-003733| p 2232 N93-23686
Characterizing the uncertainty in holddown post load measurements
|NASA-TP-3332| p 2304 N93-23731
STRESS RELAXATION
Viscoelastic properties of 3-D braided PEEK/graphite composites p 2214 N93-24103
Basic research on macromolecular dynamics
|PB93-138907| p 2240 N93-24142
STRESS-STRAIN DIAGRAMS
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
|MBB-Z-0444-92-PUB| p 2239 N93-23365
STRESS-STRAIN RELATIONSHIPS
Pretransformation strain modulations in proper ferroelastics
|DE93-005468| p 2226 N93-22340
Mesomechanical model for fibre composites: The role of the interface
|AD-A260195| p 2215 N93-24468
Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
|PB93-152072| p 2514 N93-24647
STRETCHING
Formability of type 304 stainless steel sheet
|DE92-018619| p 2229 N93-22924
STRINGS
Aprepro: An algebraic preprocessor for parameterizing finite element analyses
|DE93-006989| p 2466 N93-22527
STRONTIUM FLUORIDES
Aspects of photoionization of impurities and electron transfer in ionic crystals
|DE93-008544| p 2513 N93-24511
STRONTIUM OXIDES
Critical current enhancement by neutron irradiation of rapidly textured BiSr2CaCu2O8
|DE93-004453| p 2503 N93-22728
STRONTIUM TITANATES
Experimental studies of critical behavior of systems with quenched disorder
|DE93-005090| p 2228 N93-22717
STRUCTURAL ANALYSIS
Propulsion Systems Panel p 2174 N93-22096
Microstatic study of the behavior of granular media
|ECL-90-31| p 2236 N93-22460
Coupled multi-disciplinary composites behavior simulation
|NASA-TM-106011| p 2322 N93-22481
Structure of molten iron chloride
|DE93-004814| p 2219 N93-22742
Gas separation with glass membranes
|DE93-000217| p 2219 N93-22871
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
|NASA-TM-105267| p 2325 N93-23015
Probabilistic finite elements for fatigue and fracture analysis
|NASA-CR-191098| p 2326 N93-23053
High Temperature Composite Analyzer (HITCAN) programmer's manual. Version 1.0
|NASA-TM-106004| p 2326 N93-23056
Integrated analysis and design of thick composite structures for optimal passive damping characteristics
|NASA-CR-190783| p 2210 N93-23429
Numerical treatment of vertex singularities and intensity factors for mixed boundary value problems for the Laplace equation in R3
|AD-A260107| p 2469 N93-23713
Mapping methods for computationally efficient and accurate structural reliability
|NASA-TM-105892| p 2330 N93-23745
Use of the conventional and tangent derivative boundary integral equations for the solution of problems in linear elasticity p 2331 N93-24121
On the regularity of elasticity problems with piecewise analytic data
|AD-A260346| p 2332 N93-24273
Multiobjective optimization of aerospace structures
|AD-A260433| p 2127 N93-24430
STRUCTURAL DESIGN
Orbiter lessons learned: A guide to future vehicle development p 2175 N93-22100
Automating an orbiter approach to Space Station Freedom to minimize plume impingement p 2149 N93-22305
A modal test of a space-truss for structural parameter identification
|DE93-004043| p 2323 N93-22518
Composite passive damping struts for large precision structures
|NASA-CASE-NPO-17914-1-CU| p 2333 N93-24596
STRUCTURAL DESIGN CRITERIA
Evaluation of hole sizes in structures requiring EVA services as a means to prevent gloved-hand finger entrapment
|NASA-TM-104767| p 2426 N93-23129
STRUCTURAL ENGINEERING
Space Transportation Materials and Structures Technology Workshop. Volume 2: Proceedings
|NASA-CP-3148-VOL-2| p 2172 N93-22081
Vehicle Systems Panel deliberations p 2175 N93-22098
Propulsion Systems Panel deliberations p 2175 N93-22101
NASA-UVA Light Aerospace Alloy and Structures Technology Program: LA(2)ST
|NASA-CR-192354| p 2230 N93-23193
Adaptive hierarchic modeling of plates and shells with a-posteriori error estimation
|AD-A259941| p 2332 N93-24242
STRUCTURAL FAILURE
Compression strength failure mechanisms in unidirectional composite laminates containing a hole
|NASA-CR-192813| p 2209 N93-23043
The consequence of joint failures p 2212 N93-23941
STRUCTURAL PROPERTIES (GEOLOGY)
Applicability of satellite remote sensing for slope instability hazard zonation p 2368 N93-23817
STRUCTURAL RELIABILITY
Mapping methods for computationally efficient and accurate structural reliability
|NASA-TM-105892| p 2330 N93-23745
Multiobjective optimization of aerospace structures
|AD-A260433| p 2127 N93-24430
STRUCTURAL STABILITY
Control design variable linking for optimization of structural/control systems
|NASA-CR-4493| p 2125 N93-22827
Stability analysis and modeling of rotating flexible structures p 2475 N93-23198
Dynamic response and stability of semi-rigid frames p 2327 N93-23199
STRUCTURAL STRAIN
X ray absorption fine structure strain determination in thin films p 2326 N93-23072
STRUCTURAL VIBRATION
Coupled multi-disciplinary composites behavior simulation
|NASA-TM-106011| p 2322 N93-22481
System identification of the JPL micro-precision interferometer truss
|DE93-004044| p 2323 N93-22519
Precursor SSF utilization: The MODE experiments p 2188 N93-22633
Modal identification experiment p 2188 N93-22635
Damping measurements from an operating wind turbine: Preliminary results and procedures
|DE93-005357| p 2377 N93-22873
The effects of delamination on the vibrational characteristics of composite structural elements p 2210 N93-23202
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
|AD-A260119| p 2329 N93-23700
Pattern classifier for health monitoring of helicopter gearboxes
|NASA-TM-106099| p 2316 N93-23741
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956
Luminescence and picosecond photo-induced absorption of polyaniline
|AD-A260002| p 2242 N93-24436
Neural networks for the monitoring of rotating machinery
|DE93-003549| p 2464 N93-24503
STRUCTURED PROGRAMMING
Engineering data integration: Problems and solutions
|PNR-90999| p 2525 N93-23370
STRUTS
Composite passive damping struts for large precision structures
|NASA-CASE-NPO-17914-1-CU| p 2333 N93-24596
Reliable vision-guided grasping
|NASA-CR-193197| p 2464 N93-24603
STUDENTS
Pipeline issues p 2517 N93-23148
Space support forum p 2153 N93-23160
From Ship to Shuttle: NASA Orbiter Naming Program, September 1988 - May 1989
|NASA-EP-276| p 2179 N93-23732
The world wide launching campaign for student rockets experimental payloads p 2368 N93-23820
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
|NASA-EP-285| p 2399 N93-24148
STURM-LIOUVILLE THEORY
Solution of a class of Sturm-Liouville problems using the Galerkin method with global basis functions
|DE93-005156| p 2474 N93-23692
SUBDUCTION (GEOLOGY)
The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
|DE93-000796| p 2392 N93-22807
SUBJECTS
AGRICOLA subject category codes with scope notes (modified AGRIS)
|PB93-152643| p 2528 N93-24202
SUBMILLIMETER WAVES
FIRST: Far Infrared and Submillimeter Space Telescope p 2540 N93-23924
SUBROUTINES
Extending compile-time reverse mode and exploiting partial separability in ADIFOR
|DE93-004668| p 2467 N93-22776
PASCAL subroutines for standard test problems in unconstrained minimization
|MATHS-REPT-A-155| p 2441 N93-24076
A user's manual for software GPR92
|MATHS-REPT-A-175| p 2444 N93-24642
SUBSONIC FLOW
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
|AD-A260118| p 2113 N93-23714
Analysis of a high speed civil transport configuration at subsonic flow conditions using a Navier-Stokes solver
|NASA-CR-4490| p 2127 N93-24108
An experimental investigation of subsonic flow in a two-dimensional U-duct
|NASA-TM-103931| p 2128 N93-24535
SUBSONIC SPEED
Linear payout systems for dispensing fiber-optic data links from precision-guided munitions or high-performance aircraft/missles p 2255 N93-22026
Conceptual design study of a variable cycle engine for a supersonic business jet
|ETN-93-93486| p 2130 N93-23371
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
|NASA-CR-191087| p 2111 N93-23431
SUBSONIC WIND TUNNELS
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
|NASA-TM-104224| p 2116 N93-24532
SUBSTITUTES
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems
|DE93-005115| p 2235 N93-22409

Far-infrared and resonance Raman spectroscopy and isotopic substitution studies of halogen-bridged platinum chain solids
| DE93-005450 | p 2503 N93-22748
Materials compatibility and lubricants research on CFC-refrigerant substitutes
| DE93-007806 | p 2237 N93-22915

SUBSTRATES
Applications of fibrous substrates containing insolubilized phase change polymers
p 2320 N93-22181
Homolytic activation of hydrocarbons and hydrogen by persistent radicals
| DE93-007013 | p 2218 N93-22515
Dynamics of a metal overlayer on metallic substrates: High temperature effects
| DE93-006382 | p 2227 N93-22547
Lightweight solar concentrator structures, phase 2
| NASA-CR-191068 | p 2203 N93-22674
Substrate surface structure effects on microstructure of epitaxial films
| DE93-005562 | p 2504 N93-22944
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
| DE93-005350 | p 2505 N93-22974
Sequential deposition of copper on solid gold (111): A statistical model
| AD-A260269 | p 2234 N93-24233
Chemical vapor infiltration with microwave heating
| DE93-005458 | p 2243 N93-24445
Superconductivity devices: Commercial use of space
| NASA-CR-192841 | p 2513 N93-24483
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
| DE93-007392 | p 2485 N93-24565

SUCCESS PROJECT
Statistical process control program at a ceramics vendor facility
| DE93-006043 | p 2238 N93-23025

SUDDEN IONOSPHERIC DISTURBANCES
Solar-geophysical data number 579, November 1992. Part 1: (Prompt reports). Data for October, September 1992, and late data
| PB93-141703 | p 2558 N93-24175

SUGARS
Apparatus and method for cellulose processing using microwave pretreatment
| NASA-CASE-MSC-21936-1-SB | p 2216 N93-22036

SULFIDES
High temperature rare earth and Si-Ge thermoelectric materials
| DE93-006913 | p 2513 N93-24462

SULFONATES
Comparison of different synthetic routes for sulfonation of polyaniline
| AD-A259662 | p 2222 N93-23658

SULFUR DIOXIDES
SO2 on Venus: A final cross-calibration with Pioneer Venus
| NASA-CR-192273 | p 2554 N93-23096
Scenario development for the northeast United States 500 millibar height field p 2408 N93-23968

SUMMER
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period
p 2405 N93-23219

SUN
Atmospheric detectives: Atlas 2 teacher's guide with activities. For use with middle-school students
| NASA-EP-285 | p 2399 N93-24148

SUNSPOTS
The source of five-minute period photospheric umbral oscillations p 2548 N93-23214
Chaotic dynamics of the solar cycle
| AD-A260039 | p 2557 N93-23644

SUPERCOMPUTERS
Contact-impact simulations on massively parallel SIMD supercomputers
| DE93-004188 | p 2445 N93-22060
Network storage service usage characteristics
| DE93-003998 | p 2446 N93-22755
PMC: A shared short-cut to portable parallel power
| DE93-005815 | p 2447 N93-22868
The QCD Teraflops Project
| DE93-006386 | p 2447 N93-23026
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
| PB93-118586 | p 2405 N93-23333
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
| PB93-142438 | p 2439 N93-23436
CONVEX mini manual
| NASA-TM-107564-REV | p 2433 N93-24594

SUPERCONDUCTING CAVITY RESONATORS
An infrared free electron laser system for the proposed Chemical Dynamics Research Laboratory at LBL based on a 500 MHz superconducting linac
| DE93-004723 | p 2307 N93-22346
Field profile and loading measurements on higher order modes in a two cell 500 MHz superconducting structure
| DE93-004771 | p 2308 N93-22921

SUPERCONDUCTING DEVICES
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
| DE93-004784 | p 2303 N93-22706
Practical superconductor development for electrical power applications
| DE93-007785 | p 2286 N93-24519

SUPERCONDUCTING FILMS
Processing and microstructural development of Ag-clad Bi-Sr-Ca-Cu-O tapes
| DE93-004201 | p 2500 N93-22078
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
| DE93-005474 | p 2500 N93-22342
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
| DE93-003792 | p 2504 N93-22808
Physical properties of ultrathin films of high-temperature superconductors p 2506 N93-23197
Enhanced vortex pinning and critical current density in proton-irradiated YBa2Cu3O(7-delta) thin films
| DE93-005367 | p 2507 N93-23326
High temperature superconducting compounds
| AD-A259926 | p 2284 N93-24129
Practical superconductor development for electrical power applications
| DE93-007785 | p 2286 N93-24519

SUPERCONDUCTING MAGNETS
Reduced mass persistent switches for large superconducting magnets in space
| DE93-004782 | p 2474 N93-22047
A high-power 95 GHz gyro-TWT amplifier
| DE93-002332 | p 2277 N93-22425
Investigation of azimuthal stresses due to welding and cooldown
| DE93-005530 | p 2324 N93-22708
A comparison of the Space Station version of ASTROMAG with two free-flyer versions
| DE93-004695 | p 2193 N93-22777

SUPERCONDUCTIVITY
Midwest Superconductivity Consortium
| DE93-006146 | p 2276 N93-22054
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
| NASA-CR-191089 | p 2277 N93-22479
Synchrotron studies of narrow band materials
| DE93-006981 | p 2502 N93-22526
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
| DE93-004854 | p 2503 N93-22745
Field profile and loading measurements on higher order modes in a two cell 500 MHz superconducting structure
| DE93-004771 | p 2308 N93-22921
Superconductivity and flux pinning in Nd(1 + x)Ba(2-x)Cu(3)O(7 + delta)
| DE93-004444 | p 2505 N93-23052
Quantum Monte Carlo simulation on Hubbard model for high temperature superconductivity
p 2507 N93-23395
Low-temperature specific heat of several high-temperature superconductors in the superconducting and mixed states p 2507 N93-23397
Macroscopic models of superconductivity
p 2508 N93-23500
Magnetic anisotropy in the high transition temperature superconductor YBa2Cu3O(7-delta)
p 2509 N93-23985
High temperature superconducting compounds
| AD-A259926 | p 2284 N93-24129
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
| NASA-CR-192697 | p 2511 N93-24146
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 2
| NASA-CR-192698 | p 2511 N93-24147
Study of the model of hole superconductivity in multiple band cases and its application to transition metals
p 2511 N93-24195
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259520 | p 2285 N93-24302
Superconductivity devices: Commercial use of space
| NASA-CR-192841 | p 2513 N93-24483

SUPERCONDUCTORS
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
| NASA-CR-192697 | p 2511 N93-24146
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 2
| NASA-CR-192698 | p 2511 N93-24147
Study of the model of hole superconductivity in multiple band cases and its application to transition metals
p 2511 N93-24195
Applicability of superconducting interconnection technology for high speed IC's and systems
| AD-A259520 | p 2285 N93-24302
Analytical results for the electromagnetic response of a composite superconducting wire in parallel fields
| MEMO-1059 | p 2287 N93-24625

SUPERCRITICAL AIRFOILS
An experimental investigation of a supercritical airfoil at transonic speeds
| NASA-TM-103933 | p 2300 N93-24534

SUPERFLUIDITY
Galileo's relativity principle, the concept of pressure, and complex characteristics, for the six-equation, one-pressure model
| DE93-005240 | p 2515 N93-22952
Zero sound experiments in superfluid He3
| ISBN-951-22-0841-5 | p 2476 N93-23005

SUPERGIANT STARS
GX301-2/WRA9777 revisited: Probing the stellar wind through x ray optical data p 2537 N93-23911

SUPERHIGH FREQUENCIES
ROWS wave spectral data collected in SAXON-FPN, November 1990
| NASA-TM-104582 | p 2412 N93-22387
Study of a plasma-filled X-band backward wave oscillator p 2281 N93-23498
X-EOS: A multi-mode X-band synthetic aperture radar for EOS SAR p 2365 N93-23797
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798

SUPERLATTICES
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices
| DE93-004191 | p 2499 N93-22062
Magnetic decoupling in sputtered Fe/Si superlattices and multilayers
| DE93-004204 | p 2499 N93-22064
Computer simulation of the anomalous elastic behavior of thin films and superlattices
| DE93-004154 | p 2504 N93-22939
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
| DE93-005420 | p 2505 N93-22976
Compositional superlattices based on PtCl/PtBr MX materials
| DE93-003700 | p 2513 N93-24496

SUPERNOVA REMNANTS
Magnetic field structure and collective effects in supernova remnants p 2548 N93-23218
ROSAT observations of supernova remnants and the interstellar medium p 2534 N93-23884

SUPERSONIC BOUNDARY LAYERS
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
| NASA-TM-106056 | p 2466 N93-22664

SUPERSONIC COMBUSTION
An extended supersonic combustion model for the dynamic analysis of hypersonic vehicles
| NASA-CR-192716 | p 2225 N93-24472

SUPERSONIC COMBUSTION RAMJET ENGINES
Shock tunnel studies of scramjet phenomena, supplement 6
| NASA-CR-191428 | p 2289 N93-22817
Experimental and numerical investigation of hydrogen combustion in a supersonic flow p 2223 N93-24212
An extended supersonic combustion model for the dynamic analysis of hypersonic vehicles
| NASA-CR-192716 | p 2225 N93-24472

SUPERSONIC FLIGHT
Conceptual design study of a variable cycle engine for a supersonic business jet
| ETN-93-93486 | p 2130 N93-23371

SUPERSONIC FLOW
Combustion-related studies using weakly-bonded complexes
| DE93-005250 | p 2217 N93-22415
Optical diagnostics in supersonic plasma flows: Purging fluid effects
| DE93-006243 | p 2497 N93-24042
An asymptotic theory of supersonic propeller noise
| NASA-CR-191110 | p 2477 N93-24070
Experimental and numerical investigation of hydrogen combustion in a supersonic flow p 2223 N93-24212
Numerical studies for the RAM accelerator
| AD-A259949 | p 2224 N93-24423

SUPERSONIC INLETS
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
| NASA-TP-3247 | p 2113 N93-24118

SUPERSONIC JET FLOW
Transverse injection of liquid and gaseous fuels into subsonic/supersonic flow
| AD-A259771 | p 2111 N93-23476
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
| AD-A260381 | p 2484 N93-24275
SUPERSONIC SPEED
Numerical prediction of transition of the F-16 wing at supersonic speeds
| NASA-CR-192706 | p 2111 N93-23392
SUPERSONIC TRANSPORTS
The atmospheric effects of stratospheric aircraft
| NASA-RP-1293 | p 2385 N93-23057
New approaches for a second generation supersonic transport propulsion system
| DS-1934 | p 2130 N93-23391
Analysis of a high speed civil transport configuration at subsonic flow conditions using a Navier-Stokes solver
| NASA-CR-4490 | p 2127 N93-24108
SUPERSYMMETRY
Search for exotic particles at CDF
| DE93-004421 | p 2480 N93-22687
SUPPORT SYSTEMS
Operator Performance Support System (OPSS) p 2429 N93-22195
Flight Support System (FSS) docking and umbilical services systems p 2140 N93-22254
The ASLOTS concept: An interactive, adaptive decision support concept for Final Approach Spacing of Aircraft (FASA). FAA-NASA Joint University Program p 2105 N93-22563
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
| PB93-142362 | p 2122 N93-23652
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
| ESA-ISY-4 | p 2154 N93-24336
User support for the Spacelab mission D-2 p 2155 N93-24340
The refined decentralized concept and development support p 2162 N93-24378
User support for the Columbus precursor missions p 2162 N93-24380
An evaluation of schedule metrics used within aeronautical systems center
| AD-A260113 | p 2521 N93-24413
Treatment of human-computer interface in a decision support system
| DE93-002281 | p 2428 N93-24502
SURFACE ACOUSTIC WAVE DEVICES
Surface acoustic wave sensors and piezoelectric actuators for investigations of transitional and turbulent flows
| AD-A260482 | p 2290 N93-22932
Application of a SAW device for measuring rate of gas flow
| PB93-124931 | p 2292 N93-23253
SURFACE COOLING
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
| NASA-TM-106083 | p 2294 N93-23404
SURFACE CRACKS
surf3d: A 3-D finite-element program for the analysis of surface and corner cracks in solids subjected to mode-1 loadings
| NASA-TM-107710 | p 2329 N93-23735
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
| DE93-004716 | p 2330 N93-24051
SURFACE DEFECTS
The sensitivity in eddy current testing of austenitic material
| VTT-JULK-758 | p 2231 N93-23368
SURFACE DIFFUSION
Reaction/separation process for enhanced methane conversion
| PB93-150985 | p 2246 N93-24634
SURFACE DISTORTION
Laser surface treatment: Numerical simulation of thermocapillary flow and free surface deformation p 2251 N93-22857
SURFACE ENERGY
Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
| DE93-002164 | p 2402 N93-22337
SURFACE FINISHING
Rust transformation/rust compatible primers p 2244 N93-22182
SURFACE LAYERS
Advanced dielectrics for passivation of InSb
| DE93-005353 | p 2501 N93-22503
SURFACE NAVIGATION
Goal directed robot navigation in a known indoor environment with unknown stationary and moving obstacles p 2458 N93-23223
Maritime satellite communication and navigation p 2275 N93-23508
The role of GPS in a future radionavigation mix: Trends in the 1992 US Federal Radionavigation Plan p 2124 N93-23509
Financial alternatives for global satellite navigation p 2124 N93-23519
Satellite navigation in agriculture p 2124 N93-23528
Towards global satellite navigation p 2124 N93-23529
An integrated car navigation system using a single processor for GPS signal processing, positioning, map display, and reporting p 2124 N93-23533
ERS-1 SAR ice routing of l'Astrolabe through the Northeast passage p 2358 N93-23759
The Oden real time ice monitoring demonstration p 2371 N93-23837
Aids to Navigation Service Force Mix 2000 Project. Volume 3: Analysis of multi-mission requirements and development of planning factors for the Replacement Buoy Tender Fleet
| PB93-142370 | p 2123 N93-24489
SURFACE PROPERTIES
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044
Electrostatic charging of spacecraft in geosynchronous orbit
| DRA-TM-SPACE-389 | p 2181 N93-22489
Design of a large-scale plasma source ion implantation experiment
| DE93-005438 | p 2493 N93-22746
Chemistry of bimetallic and alloy surfaces
| DE93-006893 | p 2230 N93-22981
Workshop on chemical weathering on Mars, part 2
| NASA-CR-192261 | p 2554 N93-23192
Electrolyte electroreflectance and automatic scanning ellipsometry characterization of mercury cadmium telluride
| AD-A260043 | p 2488 N93-23645
New Micro- and macroscopic models of contact and friction
| AD-A259925 | p 2319 N93-24442
Anisotropic reflections in mountainous terrain to determine the absorption of solar radiation from satellite data
| ESA-TT-1262 | p 2558 N93-24633
SURFACE REACTIONS
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
| DE93-005917 | p 2479 N93-22418
The surface interaction of oxygen with a gamma TiAl
| DE93-003847 | p 2227 N93-22517
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
| NASA-TM-106014 | p 2236 N93-22560
Substrate surface structure effects on microstructure of epitaxial films
| DE93-005562 | p 2504 N93-22944
Chemistry of bimetallic and alloy surfaces
| DE93-006893 | p 2230 N93-22981
Formation of defect-free metal/semiconductor contacts
| AD-A259604 | p 2284 N93-24151
SURFACE ROUGHNESS
Microtopography of manganese crusts
| PB93-120830 | p 2398 N93-23996
SURFACE ROUGHNESS EFFECTS
Wetting hysteresis of tin on silica solid surfaces of controlled periodic roughness p 2251 N93-22861
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
SURFACE TEMPERATURE
Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
| DE93-002164 | p 2402 N93-22337
Dynamics of a metal overlayer on metallic substrates: High temperature effects
| DE93-006382 | p 2227 N93-22547
Theory of the dissociation dynamics of small molecules on metal surfaces: Finite temperature studies
| DE93-005870 | p 2482 N93-23298
The climate induced variation of the continental biosphere: A model simulation of the last glacial maximum
| AERONAUTICA-ACTA-A-366 | p 2389 N93-24089
SURFACE TREATMENT
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044
High performance sapphire windows p 2310 N93-22198
Plasma technology p 2496 N93-23263
Plasma treatment of glass surfaces
| AD-D015619 | p 2241 N93-24229
SURFACE VEHICLES
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903
SURFACE WATER
Third Stokes parameter emission from a periodic water surface
| NASA-CR-192334 | p 2342 N93-22454
Development of membrane film fiber optic based sensors for the remote monitoring of the quality of surface and groundwater
| PB93-150001 | p 2375 N93-24638
SURFACE WAVES
Direct numerical simulations and hydrodynamic stability problems in the upper oceanic mixed layer p 2414 N93-23490
Suppression of power line harmonic interference in HF surface-wave radar
| AD-A259917 | p 2273 N93-24563
SURFACES
Representation and recognition of free-form surfaces
| AD-A259883 | p 2441 N93-24019
SURFACTANTS
Experimental and theoretical studies of reverse micelles in dense gases
| PB93-141901 | p 2222 N93-24143
SURVEILLANCE
Radiolocation Techniques
| AGARD-CP-528 | p 2265 N93-23598
SURVEYS
Oceanic CO measurements for the WOCE Hydrological Survey in the Pacific Ocean: Shipboard Alkalinity analyses during 1991 and 1992
| DE93-006900 | p 2412 N93-22581
Local Lightning Early Warning System (LLEWS), phase 1
| DE93-006609 | p 2403 N93-22595
Future trends in power generation cost by power resource
| DE93-761825 | p 2378 N93-22957
Investigation and study scenarios to introduce CO2 fixation technologies in the energy sector
| DE93-761912 | p 2378 N93-22958
Survey of data from the continuous sites of the 1990 Atlanta ozone precursor study
| PB93-124618 | p 2386 N93-23348
1991 CRC octane number requirement survey
| AD-A259821 | p 2245 N93-23667
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24006
Survey of aviation medical examiners: Information and attitudes about the pre-employment and pre-appointment drug testing program
| DOT/FAA/AM-92/15 | p 2422 N93-24088
Technology transfer from NASA to targeted industries, volume 2
| NASA-CR-192758 | p 2533 N93-24484
Applicability of trends in nuclear safety analysis to space nuclear power systems
| DE93-003169 | p 2205 N93-24497
Aircraft overflight study recommended plan: Detailed sampling, data collection and data analysis plans for the visitor survey and the dose-response survey
| PB93-144186 | p 2478 N93-24649
SUSPENSION SYSTEMS (VEHICLES)
Semi-active suspension for automotive application
| MEMT-17 | p 2316 N93-23377
SWEDISH SPACE PROGRAM
The Swedish ISY projects: A joint national contribution p 2366 N93-23807
SWEPT WINGS
Swept wing attachment line contamination fence
| NASA-CASE-LAR-13400-1 | p 2107 N93-22015
Numerical prediction of transition of the F-16 wing at supersonic speeds
| NASA-CR-192706 | p 2111 N93-23392
An oscillating three-dimensional wing experiment: Compressibility, sweep, rate, waveform, and geometry effects on unsteady separation and dynamic stall
| AD-A260530 | p 2114 N93-24224
SWITCHES
Reduced mass persistent switches for large superconducting magnets in space
| DE93-004782 | p 2474 N93-22047
Design and characterization of the Pegasus 1 plasma flow switch
| DE93-003812 | p 2276 N93-22322
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
| DE93-003834 | p 2492 N93-22428

Pulse power requirements for large aperture optical switches based on plasma electrode Pockels cells
| DE93-005824 | p 2279 N93-22997
30 KA, 5000 V solid-state opening switch for inductive energy storage
| AD-A259763 | p 2281 N93-23483
Light-activated solid-state opening switch
| AD-A259770 | p 2281 N93-23487

SWITCHING
A solenoid with a low input power and a fast switching time
| DLR-FB-91-39 | p 2278 N93-22661
Monte Carlo modeling of solid-state photoswitches
| DE93-005829 | p 2280 N93-22999
Taming chaotic circuits
| AD-A259495 | p 2439 N93-23449

SWITCHING CIRCUITS
Monte Carlo modeling of solid-state photoswitches
| DE93-005829 | p 2280 N93-22999
Light-activated solid-state opening switch
| AD-A259770 | p 2281 N93-23487

SYMBOLS
Effectiveness of feature and classifier algorithms in character recognition systems
| PB93-147197 | p 2525 N93-23272

SYMMETRICAL BODIES
3D object recognition: Symmetry and virtual views
| AD-A259738 | p 2460 N93-23474

SYMMETRY
Transversely polarized source cladding for an optical fiber
| NASA-CASE-LAR-14652-1-SB | p 2486 N93-22039
Fundamental symmetry tests with antihydrogen
| DE93-005467 | p 2479 N93-22541
Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
| PB93-152072 | p 2514 N93-24647

SYNAPSES
Theory of synaptic plasticity in visual cortex
| AD-A260322 | p 2422 N93-24238

SYNCHRONISM
Digital processing for positioning with one satellite
p 2270 N93-23629
The actor model
| AD-A260196 | p 2442 N93-24469

SYNCHRONOUS SATELLITES
Meteosat second generation: A look to the future
p 2357 N93-23753

SYNCHROTRON RADIATION
Pressure-induced amorphizations of silica analogues: A probe of the relationship between order and disorder
| DE93-007966 | p 2237 N93-22730
Studies of cosmic dusts using synchrotron radiation
p 2549 N93-23390

SYNCHROTRONS
Synchrotron studies of narrow band materials
| DE93-006981 | p 2502 N93-22526

SYNOPTIC METEOROLOGY
Studies of baroclinic flow
| AD-A259739 | p 2414 N93-23475
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
| AD-A259922 | p 2407 N93-23710
A snow cover model for global climatic simulations
| MPIM-85 | p 2388 N93-23861
An investigation of the ERICA IOP-5A cyclone
| AD-A260214 | p 2408 N93-24097

SYNTAX
Natural Language Processing Systems Evaluation Workshop
| RL-TR-91-362 | p 2437 N93-23091

SYNTHESIS (CHEMISTRY)
Polyimide from bis(n-isoprenyl)s of aryl diamides
| NASA-CASE-LAR-14330-2-CU | p 2235 N93-22033
Comparison of different synthetic routes for sulfonation of polyaniline
| AD-A259662 | p 2222 N93-23658
Processable precursors to high performance liquid crystalline polymers
| AD-A260466 | p 2240 N93-24116
Organosilicon compounds and polymers and silicon ceramics
| AD-A260056 | p 2242 N93-24408
Design of a high activity and selectivity alcohol catalyst
| DE93-008100 | p 2225 N93-24575

SYNTHESIZERS
Step stress testing of receiver/transmitter units, part 1
| AD-A260182 | p 2273 N93-24318

SYNTHETIC APERTURE RADAR
Proceedings of Sixth User Seminar of the German Remote Sensing Data Centre of the German Aerospace Research Establishment (DLR)
| ESA-TT-1245 | p 2339 N93-22436
Geological applications of space SAR data
p 2339 N93-22440
Geocoded products of future radar sensors
p 2340 N93-22441
Distinguishing ice thickness from sea ice surface shape by using NOAA-AVHRR (National Oceanic and Atmosphere Administration Advanced Very High Resolution Radiometer) and SAR data
p 2340 N93-22445
RLE progress report no. 133, 1 January - 31 December 1990
| NASA-CR-192144 | p 2263 N93-23195
Focused two-dimensional radar imaging using coherent time domain signals
| ESA-TT-1272 | p 2263 N93-23331
ESA ERS 1 product specification
| ESA-SP-1149 | p 2200 N93-23389
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
Feature detection using ERS-1 SAR data
p 2356 N93-23586
Water regions extraction from radar imagery using a neural network
| AD-A259517 | p 2356 N93-23668
ERS-1 SAR ice routing of l'Astrolabe through the Northeast passage p 2358 N93-23759
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 2358 N93-23760
Demonstration of ERS-1 SAR sea ice mapping in the Baltic Sea p 2359 N93-23761
Early results on the use of ERS-1 SAR data for real-time sea ice monitoring in Canadian waters
p 2359 N93-23762
Operational geocoding of ERS-1 SAR imagery
p 2359 N93-23765
The SPOT program p 2360 N93-23766
The Advanced Synthetic Aperture Radar (ASAR) for POEM-1 p 2363 N93-23789
X-EOS: A multi-mode X-band synthetic aperture radar for EOS SAR p 2365 N93-23797
X-SAR: The German/Italian contribution to realizing a multifrequency synthetic aperture radar for remote sensing from space p 2365 N93-23798
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
| AD-A259944 | p 2273 N93-24243

SYNTHETIC APERTURES
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
| DLR-FB-91-32 | p 2262 N93-22656

SYNTHETIC FIBERS
Finite element analysis of a composite artificial ankle
p 2423 N93-22189

SYNTHETIC FUELS
Biological conversion of synthesis gas
| DE93-006359 | p 2245 N93-24044

SYNTHETIC RESINS
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
| AD-A259889 | p 2242 N93-24321

SYSTEM FAILURES
A fault-tolerant intelligent robotic control system
p 2465 N93-22159
Failure environment analysis tool applications
p 2322 N93-22170
Assigning sites to redundant clusters in a distributed storage system
| AD-A260458 | p 2528 N93-24196
Aircraft engine reliability analysis using lower confidence limit estimate procedures
| AD-A260386 | p 2131 N93-24271

SYSTEM IDENTIFICATION
System identification of the JPL micro-precision interferometer truss
| DE93-004044 | p 2323 N93-22519
Identification for robust control: What is the best approach?
| MEMT-16 | p 2458 N93-23060
An analytic modeling and system identification study of rotor/fuselage dynamics at hover
| NASA-CR-192303 | p 2126 N93-23186
System identification and model reduction using modulating function techniques
| NASA-CR-192807 | p 2438 N93-23248
On wave force analysis using system identification
| RR-450 | p 2293 N93-23361
A self growing binary tree neural network for the identification of multiclass systems
| RR-451 | p 2459 N93-23362
A comparison of polynomial and rational NARMAX models for nonlinear system identification
| RR-444 | p 2469 N93-23374
Identification of systems from non-uniformly sampled data
| RR-452 | p 2472 N93-23375
Mean levels in nonlinear analysis and identification
| RR-454 | p 2525 N93-23378
Use of system identification techniques for improving airframe finite element models using test data
| NASA-CR-192699 | p 2128 N93-24481

SYSTEMS ANALYSIS
System evaluation of a fiber optic guided missile with a simple guidance addition to improve system effectiveness p 2255 N93-22025
Thermal protection materials at NASA Ames Research Center p 2177 N93-22114
Transportation systems analyses, volume 2
| NASA-CR-192486 | p 2177 N93-22386
Utility Battery Storage Systems Program Report for FY 1992
| DE93-006459 | p 2278 N93-22594
High resolution three-dimensional solder joint measurement system evaluation
| DE93-005840 | p 2437 N93-23000
Transportation systems analyses. Volume 1: Executive summary
| NASA-CR-192485 | p 2179 N93-23008
Control and analysis of a single-link flexible beam with experimental verification
| DE93-003756 | p 2314 N93-23289
Mean levels in nonlinear analysis and identification
| RR-454 | p 2525 N93-23378
Payload operations p 2163 N93-24384

SYSTEMS ENGINEERING
System concept for an advanced stand-off weapon
p 2256 N93-22029
A three channel telemetry system
p 2180 N93-22162
Knowledge From Pictures (KFP) p 2465 N93-22187
Results of prototype software development for automation of shuttle proximity operations
p 2142 N93-22264
An automated rendezvous and capture system design concept for the cargo transfer vehicle and Space Station Freedom p 2146 N93-22287
Spacecraft rendezvous operational considerations affecting vehicle systems design and configuration
p 2147 N93-22296
Transportation systems analyses, volume 2
| NASA-CR-192486 | p 2177 N93-22386
Robustness
| NASA-TP-3336 | p 2181 N93-22458
Utility Battery Storage Systems Program Report for FY 1992
| DE93-006459 | p 2278 N93-22594
Opportunities and challenges in avionics integration, INS/GPS: A case study p 2119 N93-22782
Engineering aspects of two-phase flow systems for heat transport p 2247 N93-22833
Liquid droplet radiator: Design concepts and development logic p 2247 N93-22834
Researches and developments on typical thermal technologies for space applications
p 2248 N93-22845
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866
Characteristics of identifying linear dynamic models from impulse response data using Prony analysis
| DE93-005607 | p 2279 N93-22945
Automatic code generation for distributed robotic systems
| DE93-005779 | p 2447 N93-22996
Transportation systems analyses. Volume 1: Executive summary
| NASA-CR-192485 | p 2179 N93-23008
Proceedings: DOD Software Technology Strategy public forum p 2437 N93-23092
NASA metric transition plan
| NASA-TM-108606 | p 2258 N93-23209
A leakage canceller for a single antenna radar
| ETN-93-93495 | p 2264 N93-23379
Meteosat second generation: A look to the future
p 2357 N93-23753
ERS-1: The first European Earth observation system
p 2358 N93-23757
The SPOT program p 2360 N93-23766
Database management systems in engineering
| PB93-138964 | p 2527 N93-23869
Automated program recognition by graph parsing
| AD-A259609 | p 2441 N93-24125
Improved dynamic stiffness (system modeling), state-of-the-art review
| PB93-127744 | p 2331 N93-24208
A version and configuration model for software evolution
| AD-A260557 | p 2441 N93-24283
Flight experiences on board Space Station Mir
p 2157 N93-24355

Center for shape optimization and material layout
| AD-A260087 | p 2471 N93-24411
Variable speed gas engine-driven air compressor system
| PB93-147353 | p 2319 N93-24561

SYSTEMS INTEGRATION
The Missile-Borne Integrated Network Demonstration Program p 2255 N93-22023
System concept for an advanced stand-off weapon p 2256 N93-22029
Use of satellite data and GIS for evaluating urban environment p 2354 N93-23572
Activities of the Institute for Information Technology
| NRC-35023 | p 2571 N93-24648

SYSTEMS MANAGEMENT
Intelligent neuroprocessors for in-situ launch vehicle propulsion systems health management p 2452 N93-22221
Automated tools for testing computer system vulnerability
| PB93-146025 | p 2433 N93-23273

SYSTEMS SIMULATION
Computational simulation for concurrent engineering of aerospace propulsion systems
| NASA-TM-106029 | p 2330 N93-23746

SYSTEMS STABILITY
Improved dynamic stiffness (system modeling), state-of-the-art review
| PB93-127744 | p 2331 N93-24208
Stability of elastically tailored rotor systems
| AD-A260550 | p 2132 N93-24241

T

T TAURI STARS
ROSAT observations in star forming regions p 2538 N93-23917

TABLES (DATA)
ESTAR, PSTAR, and ASTAR: Computer programs for calculating stopping-power and range tables for electrons, protons, and helium ions
| PB93-146033 | p 2481 N93-22898

TABULATION PROCESSES
Support measurement and estimating for oracle database applications using Mark 2 function points
| AD-A259686 | p 2440 N93-23661

TAIL ASSEMBLIES
Attenuation of empennage buffet response through active control of damping using piezoelectric material
| NASA-TM-107736 | p 2110 N93-23034

TAKEOFF
Optimization of flight trajectories in a 3D model of windshear flow field p 2110 N93-23203

TANTALUM COMPOUNDS
Research in photorefractive crystals
| AD-A260391 | p 2513 N93-24425

TARGET ACQUISITION
The Missile-Borne Integrated Network Demonstration Program p 2255 N93-22023
On using scattering statistics for ultra wideband electromagnetic target classification and identification
| DE93-003809 | p 2260 N93-22433
Perception, scene reconstruction and world modeling for unmanned underwater vehicles
| PB93-146983 | p 2459 N93-23443
A current assessment of single site locating technology p 2267 N93-23608
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
High resolution sampled aperture array direction finding at HF p 2267 N93-23611
Localization system based on data merging of images and inertia p 2269 N93-23623
Technical Digest. Detection systems and technology, September 1992
| AD-A259812 | p 2271 N93-23670
Operator interface assessment for the sensor fusion flight demonstration program
| AD-A260235 | p 2129 N93-24416

TARGET RECOGNITION
On using scattering statistics for ultra wideband electromagnetic target classification and identification
| DE93-003809 | p 2260 N93-22433
Localization system based on data merging of images and inertia p 2269 N93-23623
One-class classifier networks for target recognition applications
| DE93-006288 | p 2271 N93-24043
Development of laser radar ATR algorithm. Phase 2: Military objects
| AD-A237544 | p 2272 N93-24120
Distance metric between 3D models and 2D images for recognition and classification
| AD-A260069 | p 2463 N93-24313

TARGETS
TRAC based sensing for autonomous rendezvous p 2140 N93-22253
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
| DE93-003846 | p 2327 N93-23291
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601
Topics in stochastic systems, failure time models change-point problems, and sequential analysis
| AD-A260047 | p 2472 N93-23711
Studies in penetration mechanics
| AD-A260436 | p 2332 N93-24304
Multiobjective optimization of aerospace structures
| AD-A260433 | p 2127 N93-24430
Investigation of serendipitious WFC sources
| NASA-CR-192774 | p 2544 N93-24458

TARS
Test requirements for coal-tar mixtures on airport pavements
| DOT/FAA/RD-92-27 | p 2134 N93-23137

TASK PLANNING (ROBOTICS)
A fuzzy logic controller for an autonomous mobile robot p 2452 N93-22220
Path planning for manipulators
| DE93-004050 | p 2457 N93-22756
Transformational planning of reactive behavior
| AD-A260350 | p 2463 N93-24270

TAYLOR INSTABILITY
Asymptotic behavior of modulated Taylor-Couette flows with a crystalline inner cylinder
| PB93-139061 | p 2290 N93-22897
Laser driven hydrodynamic instability experiments
| DE93-005822 | p 2308 N93-23330
Experimental determination of the hydrodynamic instability growth rates in indirect and direct drive ICF
| DE93-006278 | p 2496 N93-23676

TAYLOR SERIES
CFD-based approximation concepts for aerodynamic design optimization with application to a 2-D scramjet vehicle p 2126 N93-23505

TEAMS
The study of crew coordination and performance in hierarchical team decision making
| AD-A259514 | p 2520 N93-23698

TEARING
Plasmas physics research in the MST toroidal confinement device
| DE93-006502 | p 2493 N93-22711

TEARING MODES (PLASMAS)
Structure and dynamics of the magnetopause p 2400 N93-24296

TECHNICAL WRITING
Technical report writing
| NASA-TM-105419 | p 2523 N93-23002
Writer's guide for technical procedures
| DE93-007746 | p 2529 N93-24573

TECHNOLOGY ASSESSMENT
Versatile attack weapon p 2256 N93-22027
Department of Energy new technology
| DE92-041170 | p 2522 N93-22058
Entry systems technology assessment p 2177 N93-22118
Supervised autonomous rendezvous and docking systems technology evaluations p 2146 N93-22288
Air traffic operational evaluation plan of the automated surface observing system (ASOS) displays
| DOT/FAA/CT-TN92/36 | p 2121 N93-22801
Summary of activities of the Life Cycle Costing Workshop conducted by the Environmental Restoration Program of Oak Ridge National Laboratory
| DE93-000823 | p 2531 N93-22935
Space Station Freedom Utilization Conference. Executive summary
| NASA-TM-108709 | p 2193 N93-23001
Parallel processing research in the former Soviet Union
| PB93-134435 | p 2447 N93-23204
Computational simulation for concurrent engineering of aerospace propulsion systems
| NASA-TM-106029 | p 2330 N93-23746
Improved dynamic stiffness (system modeling), state-of-the-art review
| PB93-127744 | p 2331 N93-24208
Penetration mechanics research in the former Soviet Union
| PB93-146488 | p 2259 N93-24495
Summary from a study group on neural networks at NDRE
| FFI-92/7015 | p 2465 N93-24640

TECHNOLOGY TRANSFER
Department of Energy new technology
| DE92-041170 | p 2522 N93-22058
Technology 2002: The Third National Technology Transfer Conference and Exposition, volume 2
| NASA-CP-3189-VOL-2 | p 2560 N93-22149
Space technology research plans p 2184 N93-22613
Commercial researcher perspective p 2184 N93-22615
The collaborative program of research in engineering sciences
| DE93-005126 | p 2257 N93-22768
Photovoltaic evaluation study
| DE93-761330 | p 2378 N93-22956
Technology utilization and American competitiveness p 2153 N93-23158
NASA's Education Program Inventory FY 91
| NASA-EP-284 | p 2518 N93-23250
The SPOT system development program: SPOT AVAL p 2360 N93-23769
Centres for space science and technology education: A United Nations initiative p 2369 N93-23826
ANL's electric vehicle battery activities for USABC
| DE93-005691 | p 2319 N93-24446
Technology transfer from NASA to targeted industries, volume 1
| NASA-CR-192757 | p 2532 N93-24482
Technology transfer from NASA to targeted industries, volume 2
| NASA-CR-192758 | p 2533 N93-24484

TECHNOLOGY UTILIZATION
Design of a portable powered seat lift p 2429 N93-22190
Proceedings of the Third International Workshop on Neural Networks and Fuzzy Logic, volume 2
| NASA-CP-10111-VOL-2 | p 2449 N93-22206
Intelligent systems technology infrastructure for integrated systems p 2145 N93-22285
The role of university research in aviation safety and competitiveness: Testimony to the US Congress
| NIAR-92-3 | p 2116 N93-22379
How to get on board Space Station Freedom p 2183 N93-22611
OSSA Space Station Freedom science utilization plans p 2184 N93-22614
Commercial researcher perspective p 2184 N93-22615
Utilization of Space Station Freedom for technology research p 2188 N93-22634
Selected OAST/OSSA space experiment activities in support of Space Station Freedom p 2189 N93-22636
Researches and developments on typical thermal technologies for space applications p 2248 N93-22845
Technology and the 21st Century government organization
| DE93-002506 | p 2519 N93-22982
Space Station Freedom Utilization Conference. Executive summary
| NASA-TM-108709 | p 2193 N93-23001
Science, technology, and the states in America's third century
| ISBN-1-881054-03-9 | p 2519 N93-23074
The Eighth National Space Symposium
| ISBN-0-9616962-5-7 | p 2153 N93-23156
Technology utilization and American competitiveness p 2153 N93-23158
Outlook for the U.S. Space Program p 2153 N93-23159
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
| DE93-003846 | p 2327 N93-23291
Remarks and proposals to adapt some Earth observations space programmes in the period of transition of the countries of central/eastern Europe; focused on Romania p 2362 N93-23778
Space technologies in French education p 2369 N93-23824
Satellite data protection from the point of view of a data user: Preparation for full utilization of remote sensing technology p 2374 N93-23854
Innovation: Key to the future
| NASA-TM-103599 | p 2571 N93-24095
Information handling as task layer of Columbus user support p 2163 N93-24383
Summary from a study group on neural networks at NDRE
| FFI-92/7015 | p 2465 N93-24640

TECTONICS
The 3-D numerical investigation of the mantle dynamics associated with the breakup of Pangea
| DE93-000796 | p 2392 N93-22807
Assessment of regional earthquake hazards and risk along the Wasatch Front, Utah
| PB93-115657 | p 2400 N93-24214

TEFLON (TRADEMARK)
Beta cloth durability assessment for Space Station Freedom (SSF) Multi-Layer Insulation (MLI) blanket covers
| NASA-TM-104748 | p 2243 N93-24474

TELECOMMUNICATION
A new technology for manufacturing scheduling derived from space system operations p 2260 N93-22196
Activities report of the Norwegian Space Center
| ETN-93-93540 | p 2570 N93-23107
European Telecommunications Standards Institute. Apreliminary analysis
| PB93-138824 | p 2263 N93-23271
New method of modelling the mesoscale structure of the ionosphere with a single sensor. Impact on HF radio-location p 2266 N93-23603
Digital processing for positioning with one satellite p 2270 N93-23629
Progressive retry for software error recovery in distributed systems
| AD-A260075 | p 2442 N93-24315

TELECONFERENCING
VideoMir: Satellite video conferencing during the AustroMir spaceflight p 2158 N93-24356

TELEMETRY
A three channel telemetry system p 2180 N93-22162
Telescience opportunities in the precursor flights p 2161 N93-24376
Data compression for the Cassini radio and plasma wave instrument p 2432 N93-24555

TELEOPERATORS
Autonomous rendezvous and capture system design p 2138 N93-22244
Modified impedance control for robotic saw cutting: Simulation and implementation in three degrees of freedom
| DE93-002162 | p 2312 N93-22891
Force reflecting hand controller
| NASA-CASE-NPO-17851-1-CU | p 2314 N93-23078

TELEROBOTICS
Autonomous rendezvous and capture system design p 2138 N93-22244
Advanced telerobotic control using neural networks p 2455 N93-22364
Vision-guided gripping of a cylinder
| NASA-CR-193199 | p 2465 N93-24657

TELESCOPES
NASA Marshall Space Flight Center Solar Observatory Report, July to December 1992
| NASA-TM-108396 | p 2542 N93-22665
Activities report of the European Southern Observatory
| ETN-93-93459 | p 2542 N93-23118
Optical analysis of lenslet arrays
| AD-A260126 | p 2488 N93-23702

TELEVISION CAMERAS
Study of high spatial resolution narrow spectral band ultraviolet images of the earth's atmosphere
| AD-A260035 | p 2400 N93-24254

TELEVISION SYSTEMS
Employing lighting techniques during on-orbit operations p 2151 N93-22319
AR/D image processing system p 2152 N93-22321
Imaging technique for welding studies
| DE93-006449 | p 2316 N93-23694

TEMPERATE REGIONS
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
| AD-A259922 | p 2407 N93-23710

TEMPERATURE CONTROL
Potential pressurized payloads: Fluid and thermal experiments p 2189 N93-22639
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change p 2191 N93-22648
Engineering aspects of two-phase flow systems for heat transport p 2247 N93-22833
Liquid droplet radiator: Design concepts and development logic p 2247 N93-22834
Researches and developments on typical thermal technologies for space applications p 2248 N93-22845
First results of a Freon 12 capillary pumped loop p 2249 N93-22846
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 3: Space power and thermal management
| NASA-TM-108652 | p 2519 N93-23109
Design manual for two-phase components of spacecraft thermal management systems
| AD-A260027 | p 2196 N93-24439

TEMPERATURE DEPENDENCE
Application of neutron diffraction technology to the determination of residual strain in engineering composites
| DE93-004249 | p 2207 N93-22066
Development of rate expressions for the thermal decomposition of RDX
| DE93-005345 | p 2244 N93-22502
Dynamics of a metal overlayer on metallic substrates: High temperature effects
| DE93-006382 | p 2227 N93-22547
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change p 2191 N93-22648
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
| DE93-006745 | p 2325 N93-22896

TEMPERATURE DISTRIBUTION
Sea surface temperature: Observation in off-shore of Sanriku p 2335 N93-22125
Observation in the East China Sea p 2335 N93-22126
Structure of confined laminar spray diffusion flames: Numerical investigation
| NASA-TM-106038 | p 2288 N93-22596
Heat transfer simulation with a conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 2251 N93-22863
Summary of experimental heat-transfer results from the turbine hot section facility
| NASA-TP-3250 | p 2290 N93-23059
Water temperature characteristics of lakes subjected to climate change
| PB93-135648 | p 2385 N93-23265
Convective heat transfer from discrete heat sources in a liquid filled vertical channel
| AD-A260556 | p 2298 N93-24282

TEMPERATURE EFFECTS
Flexible thermal protection materials for entry systems p 2177 N93-22111
Dynamics of a metal overlayer on metallic substrates: High temperature effects
| DE93-006382 | p 2227 N93-22547
Fracture toughness (K(sub Ic) and gamma wof) of a HIPed Si3N4 at elevated temperatures
| DE93-006745 | p 2325 N93-22896
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
| NASA-TM-105978 | p 2130 N93-23013
High-temperature Au implantation into Ni-Be and Ni-Si alloys
| DE93-005555 | p 2505 N93-23022
Smoke movement in a corridor-hybrid model, simple model, and comparison with experiments
| PB93-146678 | p 2259 N93-23435
Thermally induced micromechanical stresses in ceramic/ceramic composites
| DE93-004860 | p 2239 N93-23974
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
| DE93-006420 | p 2214 N93-24030
High temperature deformation characteristics of discontinuous fiber reinforced composites
| DE93-004466 | p 2214 N93-24047
Stardust: Studies in microgravity of condensation and agglomeration of cosmic dust analogue p 2164 N93-24394

TEMPERATURE GRADIENTS
Marangoni convection in a spinning liquid column
| LRT-WE-9-FB-13-1991 | p 2289 N93-22678
Factors influencing the thermal shock behavior of ceramics
| DE93-005762 | p 2236 N93-22690
Experimental investigation of the influence of the temperature gradient on the thermocapillary convection in spherical drops under low-gravity p 2251 N93-22862
Thermally induced micromechanical stresses in ceramic/ceramic composites
| DE93-004860 | p 2239 N93-23974
High resolution digital thermometer
| PAT-APPL-7-831-603 | p 2304 N93-24172
Chemical vapor infiltration with microwave heating
| DE93-005458 | p 2243 N93-24445
Role of acoustics in flame/vortex interactions
| NASA-CR-191429 | p 2299 N93-24494

TEMPERATURE MEASUREMENT
A modular, programmable measurement system for physiological and spaceflight applications p 2305 N93-22201
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326
Techniques for improving the accuracy of cyrogenic temperature measurement in ground test programs
| NASA-TM-105996 | p 2302 N93-22484
Passive (self-powered) fiber-optic sensors
| DE93-005761 | p 2486 N93-22762
Summary of experimental heat-transfer results from the turbine hot section facility
| NASA-TP-3250 | p 2290 N93-23059
Development of a laser-induced fluorescence system for application to rocket plumes
| AD-A259760 | p 2205 N93-24025
High resolution digital thermometer
| PAT-APPL-7-831-603 | p 2304 N93-24172
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295

TEMPERATURE PROBES
A thermal type probe for low velocity measurements p 2165 N93-24397

TEMPERATURE PROFILES
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
| NASA-CR-192349 | p 2110 N93-23108
Nondestructive evaluation of electrodeposited chromium
| AD-A259884 | p 2321 N93-24020

TEMPERATURE SENSORS
Techniques for improving the accuracy of cyrogenic temperature measurement in ground test programs
| NASA-TM-105996 | p 2302 N93-22484
Passive (self-powered) fiber-optic sensors
| DE93-005761 | p 2486 N93-22762
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
| PB93-136422 | p 2413 N93-22893

TEMPLATES
Porous materials by design. Plasma oxidation of hydrocarbon templates in polysilsesquioxanes
| DE93-005372 | p 2218 N93-22505
Sequential deposition of copper on solid gold (111): A statistical model
| AD-A260269 | p 2234 N93-24233

TEMPORAL RESOLUTION
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Land use mapping from multitemporal satellite images and ancillary data, using a neural network paradigm p 2354 N93-23576
TM-SPOT multitemporal analysis on areas devasted by fire p 2355 N93-23580

TENNESSEE
Small business profiles, 1992. Region 4: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
| PB93-110955 | p 2519 N93-23286

TENSILE PROPERTIES
Mechanical properties of martensitic alloy AISI 422
| DE93-004834 | p 2229 N93-22882
Evaluation of tensile static, dynamic, and cyclic fatigue behavior for a HIPed silicon nitride at elevated temperatures
| DE93-005149 | p 2210 N93-23311
Elevated temperature fracture of advanced powder metallurgy aluminum alloy 8009 p 2231 N93-23588
Effects of rolling on the ductility of 80 percent tungsten heavy alloy
| DE93-004840 | p 2232 N93-23972
Effect of high-temperature loading on mechanical properties of Nicalon fibers and Nicalon fiber/SiC matrix composites
| DE93-006420 | p 2214 N93-24030
Viscoelastic properties of 3-D braided PEEK/graphite composites p 2214 N93-24103

TENSILE STRENGTH
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
| DE93-004104 | p 2226 N93-22069
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites
| DE93-005881 | p 2207 N93-22410
Development and production of sandwich rods with load transmitting elements carrying high tension and compression loads
| DLR-FB-91-33 | p 2208 N93-22657
Postirradiation deformation behavior in ferritic Fe-Cr alloys
| DE93-004833 | p 2229 N93-22881

TENSILE STRESS
Factors influencing the thermal shock behavior of ceramics
| DE93-005762 | p 2236 N93-22690

TENSILE TESTS
A new method of impact tension testing of adhesively-bonded joints p 2212 N93-23939

TERMINAL BALLISTICS
Studies in penetration mechanics
|AD-A260436| p 2332 N93-24304
TERMINOLOGY
Terminology and assessment methods of solid propellant rocket exhaust signatures
|AGARD-AR-287| p 2204 N93-22998
A comprehensive glossary of weather terms for storm spotters
|PB93-128940| p 2407 N93-23649
TERMS
A comprehensive glossary of weather terms for storm spotters
|PB93-128940| p 2407 N93-23649
TERRAIN
Radar seeker based autonomous navigation update system using topography feature matching techniques p 2256 N93-22030
Use of geodetic methods in detecting terrain movements with special reference to the Global Positioning System
|ISBN-0-315-69179-4| p 2393 N93-23190
Aircraft accident report: United Airlines flight 585, Boeing 737-291, N999UA, uncontrolled collision with terrain for undetermined reasons, 4 miles south of Colorado Springs Municipal Airport, Colorado Springs, Colorado, 3 March 1991
|PB92-910407| p 2117 N93-23191
NTIA Terrain Data Base System Documentation (Program DUMPTERS, Extract and Ternd). Version 4.0, October 1992
|PB93-108330| p 2343 N93-23254
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Multisensor data applications for digital landscape models p 2350 N93-23550
Semi-automatic derivation of digital elevation models from stereoscopic 3-line scanner data p 2350 N93-23552
A Digital Landscape Model for Europe (DLME) p 2351 N93-23554
The creation of a DEM from SPOT data p 2355 N93-23582
Realistic landscape visualization based on satellite images p 2355 N93-23583
The comparison of satellite radar altimeter derived heights with global digital terrain model heights p 2355 N93-23584
The promise of raster data processing in digital terrain modelling p 2356 N93-23585
TERRAIN ANALYSIS
Image interpretation for landforms using expert systems and terrain analysis p 2342 N93-23213
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
Operational geocoding of ERS-1 SAR imagery p 2359 N93-23765
TERRESTRIAL PLANETS
Space exploration of planetary and satellite atmospheres p 2535 N93-23890
TEST CHAMBERS
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
|NASA-TM-107734| p 2133 N93-22675
A computer simulation of a hyperbaric chamber environment
|AD-A260137| p 2134 N93-23705
TEST FACILITIES
Six-Degree-of-Freedom Test Facility p 2136 N93-22231
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
Test facilities for evaluating nuclear thermal propulsion systems
|DE93-002468| p 2202 N93-22411
Closed Ecological Life Support Systems (CELSS) Test Facility p 2187 N93-22628
Potential pressurized payloads: Fluid and thermal experiments p 2189 N93-22639
Method of measuring nighttime U-values using the Mobile Window Thermal Test (MoWiTT) Facility
|DE93-004778| p 2404 N93-22964
A summary of recent activities at the National Solar Thermal Test Facility
|DE92-040969| p 2379 N93-22967
Pyroshock simulation for satellite components using a tunable resonant fixture, phase 1
|DE93-005382| p 2325 N93-22975
Concept definition study for an extremely large aerophysics range facility
|NASA-CR-4491| p 2133 N93-22987
TEST STANDS
Autonomous rendezvous and capture development infrastructure p 2137 N93-22235
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
|NASA-TM-105830| p 2312 N93-22826
30 KA, 5000 V solid-state opening switch for inductive energy storage
|AD-A259763| p 2281 N93-23483
Combined convective radiative heat transfer enhancement in an advanced gas-fired surface combustor heater
|PB93-138915| p 2297 N93-24141
Columbus automation testbed: A tool for users p 2164 N93-24390
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2165 N93-24398
Telescience Testbed Program: A study of software for SIRTF instrument control
|NASA-CR-192764| p 2442 N93-24476
TEST VEHICLES
Development of test procedures for hybrid/electric vehicles
|DE93-005179| p 2316 N93-23336
TESTING TIME
Learning characteristics of a space-time neural network as a tether skiprope observer p 2197 N93-22176
TETHERED SATELLITES
Space time neural networks for tether operations in space p 2456 N93-22370
Instrumentation for hypersonic aerodynamics research with tethered satellites
|NASA-CR-191435| p 2442 N93-24539
TETHERING
Learning characteristics of a space-time neural network as a tether skiprope observer p 2197 N93-22176
The Data Egg: A new solution to text entry barriers p 2530 N93-22192
Relative motion pinwheel
|AD-D015629| p 2123 N93-24222
TETHERLINES
Space time neural networks for tether operations in space p 2456 N93-22370
TEXAS
Small business profiles, 1992. Region 6: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
|PB93-110971| p 2520 N93-24159
TEXTS
The Data Egg: A new solution to text entry barriers p 2530 N93-22192
Aprepro: An algebraic preprocessor for parameterizing finite element analyses
|DE93-006989| p 2466 N93-22527
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
|PB93-129864| p 2392 N93-22894
Advanced information processing
|AD-A260245| p 2529 N93-24258
TEXTURES
Valency of different information categories and its importance for the effectiveness of image analysis by the visual system and automatic systems p 2354 N93-23577
Microstructure and texture control of fatigue in hydrogen and marine environments
|AD-A259808| p 2231 N93-23642
THAILAND
Environmental data set in Thailand p 2338 N93-22145
Monitoring of deforestation: Results of the Bangkok conference p 2367 N93-23811
THEMATIC MAPPERS (LANDSAT)
Thematic Mapper land use classification as a remote sensing contribution for hydrologic runoff prediction model
|ESA-TT-1238| p 2342 N93-22461
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
TM-SPOT multitemporal analysis on areas devasted by fire p 2355 N93-23580
Assessment and correction of the impact of topography and atmosphere on remote sensing forest mapping of alpine regions p 2370 N93-23832
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
|DLR-FB-92-10| p 2374 N93-24140
THEMATIC MAPPING
Classification of TM data as a contribution to remote sensing for a hydrological run-off model p 2341 N93-22448
The Mavale project: Evaluation of potential pollution sources to superficial and subterranean water resources in the Paraiba do Sul Valley, Brazil
|INPE-5318-PRE/1715| p 2385 N93-23105
System design for ARTEMIS environmental monitoring p 2349 N93-23545
Image treatment and geographical information systems at the service of the Common Agricultural Policy p 2351 N93-23555
Assessment of actual land use by means of an integrated LIS p 2353 N93-23568
TM-SPOT multitemporal analysis on areas devasted by fire p 2355 N93-23580
Remote sensing satellite and thematic applications in high schools and elementary schools in France p 2370 N93-23829
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
|DLR-FB-92-10| p 2374 N93-24140
THEOREMS
Fundamental symmetry tests with antihydrogen
|DE93-005467| p 2479 N93-22541
Rigorous QCD predictions for decays of P-wave quarkonia
|DE93-004853| p 2481 N93-22744
Relationships between bankruptcy games and minimum cost spanning tree games
|MEMO-1058| p 2469 N93-23356
Towards computer-supported creative design based on Altshuller's theory of inventive problem solving
|MEMO-INF-92-49| p 2438 N93-23358
Taming chaotic circuits
|AD-A259495| p 2439 N93-23449
Convergence rates of approximation by translates
|AD-A260100| p 2470 N93-24055
THEORETICAL PHYSICS
Theoretical models of neutron emission in fission
|DE93-005482| p 2485 N93-22343
Investigations in dynamics of gauge theories in theoretical particle physics
|DE93-007260| p 2484 N93-24448
Anti-gravity: The key to 21st century physics
|DE93-006929| p 2475 N93-24463
THERMAL ANALYSIS
Thermal protection systems for aerobrakes p 2176 N93-22110
COMMIX-1AR/P: A three-dimensional transient single-phase computer program for thermal hydraulic analysis of single and multicomponent systems
|DE93-006044| p 2289 N93-22694
Method of measuring nighttime U-values using the Mobile Window Thermal Test (MoWiTT) Facility
|DE93-004778| p 2404 N93-22964
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
|NASA-CR-190782| p 2327 N93-23125
Gel time measurements on carbon fiber/epoxy resin prepregs
|ICAS-90-4-10-4| p 2210 N93-23400
Methodology development for thermal analysis of space power microwave rectifying antennas (rectennas) p 2264 N93-23504
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 1
|NASA-CR-192697| p 2511 N93-24146
Coupled structural, thermal, phase-change and electromagnetic analysis for superconductors, volume 2
|NASA-CR-192698| p 2511 N93-24147
THERMAL CONDUCTIVITY
Materials compatibility and lubricants research on CFC-refrigerant substitutes
|DE93-007806| p 2237 N93-22915
Thermophysical properties
|DE93-007807| p 2220 N93-22916
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
|PB93-146991| p 2259 N93-24635
THERMAL CONTROL COATINGS
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 1: Effect of spray parameters on the performance of several lots of partially stabilized zirconia-yttria powder
|NASA-TP-3295| p 2227 N93-22556
THERMAL CYCLING TESTS
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
|DE93-006041| p 2230 N93-23024
Life cycle testing of desiccant core samples
|PB93-127058| p 2220 N93-23098
THERMAL DECOMPOSITION
Development of rate expressions for the thermal decomposition of RDX
|DE93-005345| p 2244 N93-22502

The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
| DE93-004800 | p 2220 N93-22989
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
| AD-A260249 | p 2246 N93-24332
Photopromoted and thermal decomposition of nitric oxide by metal oxides
| AD-A259766 | p 2224 N93-24422

THERMAL DIFFUSIVITY
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 1: Effect of spray parameters on the performance of several lots of partially stabilized zirconia-yttria powder
| NASA-TP-3295 | p 2227 N93-22556
Thermal diffusivity measurement of diamond materials
| AD-A260431 | p 2238 N93-22947

THERMAL EMISSION
Third Stokes parameter emission from a periodic water surface
| NASA-CR-192334 | p 2342 N93-22454

THERMAL ENERGY
Solar reforming applications study summary
| DE93-002286 | p 2244 N93-22424
Evaluation of diurnal thermal energy storage combined with cogeneration systems
| DE93-004798 | p 2378 N93-22966
Heat pipe fatigue test specimen: Metallurgical evaluation
| NASA-CR-189120 | p 2381 N93-23360
A review of the experience gained in 10 years operation of Gould's solar industrial process heat system
| DE93-003991 | p 2381 N93-23970

THERMAL EXPANSION
Advanced reinforcement systems for intermetallic applications
| NASA-CR-4488 | p 2209 N93-22875
Moire interferometry at high temperatures p 2328 N93-23380
Crystal chemistry of ceramic/mineral systems
| AD-A260440 | p 2241 N93-24193

THERMAL FATIGUE
Evaluation of tensile static, dynamic, and cyclic fatigue behavior for a HIPed silicon nitride at elevated temperatures
| DE93-005149 | p 2210 N93-23311

THERMAL INSULATION
Reentry systems: Material technology needs p 2176 N93-22108
Flexible thermal protection materials for entry systems p 2177 N93-22111
Thermal protection systems for space transportation vehicles p 2177 N93-22113
Rigid fibrous ceramics for entry systems p 2177 N93-22117
Variable pressure insulating jackets for high-temperature batteries
| DE93-006404 | p 2283 N93-24027

THERMAL PROTECTION
Entry Systems Panel deliberations p 2176 N93-22105
Space assembled entry systems certification p 2176 N93-22106
Thermal protection system of the Space Shuttle's orbiter p 2176 N93-22107
Reentry systems: Material technology needs p 2176 N93-22108
Thermal protection systems for all-weather reusable launch vehicles p 2176 N93-22109
Thermal protection systems for aerobrakes p 2176 N93-22110
Flexible thermal protection materials for entry systems p 2177 N93-22111
Ceramic matrix composites (continuous fiber reinforced) thermal protection systems p 2177 N93-22112
Thermal protection systems for space transportation vehicles p 2177 N93-22113
Thermal protection materials at NASA Ames Research Center p 2177 N93-22114
Some materials perspectives for space transportation systems p 2177 N93-22115
Materials and structures technologies for hypersonics p 2177 N93-22116
Rigid fibrous ceramics for entry systems p 2177 N93-22117
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
| NASA-TP-3257 | p 2297 N93-24096

THERMAL RADIATION
Water surface temperatures from satellite thermal images p 2340 N93-22444
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
| NASA-TM-105914 | p 2125 N93-22588
Transient radiation properties of strongly radiating turbulent flames p 2221 N93-23181

THERMAL RESISTANCE
Factors influencing the thermal shock behavior of ceramics
| DE93-005762 | p 2236 N93-22690
Advanced insulations for refrigerator/freezers: The potential for new shell design incorporating polymer barrier construction
| PB93-146991 | p 2259 N93-24635

THERMAL SHOCK
Factors influencing the thermal shock behavior of ceramics
| DE93-005762 | p 2236 N93-22690
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
| VTT-PUBS-103 | p 2326 N93-23120

THERMAL STABILITY
Ultra-stable, low phase noise dielectric resonator stabilized oscillators for military and commercial systems p 2287 N93-22179
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels data sets
| AD-A260220 | p 2220 N93-22917
Broadband erbium-doped fiber sources for the fiber-optic gyrscope p 2304 N93-23723
Combustion and heat transfer studies utilizing advanced diagnostics: Fuels research
| AD-A260249 | p 2246 N93-24332
Gas separations using ceramic membranes
| DE93-003204 | p 2225 N93-24498

THERMAL STRESSES
High performance sapphire windows p 2310 N93-22198
Finite-element pre-analyses for pressurized thermoshock tests. Vessel 1: Tests 4, 5, and 6
| VTT-PUBS-103 | p 2326 N93-23120
Thermally induced micromechanical stresses in ceramic/ceramic composites
| DE93-004860 | p 2239 N93-23974

THERMISTORS
High resolution digital thermometer
| PAT-APPL-7-831-603 | p 2304 N93-24172

THERMOCHEMISTRY
Reaction and diffusion in turbulent combustion
| DE93-006185 | p 2216 N93-22055
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382

THERMOCLINES
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
| PB93-136422 | p 2413 N93-22893
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
| NASA-CR-192805 | p 2414 N93-23138

THERMOCOUPLES
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326

THERMODYNAMIC CYCLES
Evaluation of diurnal thermal energy storage combined with cogeneration systems
| DE93-004798 | p 2378 N93-22966

THERMODYNAMIC PROPERTIES
Thermophysical properties
| DE93-006427 | p 2216 N93-22056
Methods for predicting properties and tailoring salt solutions for industrial processes p 2226 N93-22183
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
| DE93-003806 | p 2208 N93-22432
Thermophysical properties
| DE93-007807 | p 2220 N93-22916
Thermal diffusivity measurement of diamond materials
| AD-A260431 | p 2238 N93-22947
Time-reversible Maxwell's demon
| AD-A260170 | p 2460 N93-23709
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139

THERMODYNAMICS
Towards a first-principles thermodynamics of solids
| DE93-002544 | p 2514 N93-22426
Theories of elastoplasticity coupled with continuum damage mechanics
| DE93-007426 | p 2323 N93-22534
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
| NASA-CR-192772 | p 2413 N93-22700
The scientific microgravity fluid mechanics program of ZARM p 2247 N93-22832
Thermodynamical behaviour of supercritical oxygen in the Hermes spaceplane environmental conditions p 2249 N93-22850
Thermodynamic and stochastic theory of hydrodynamic and power-producing processes
| DE93-006891 | p 2515 N93-23028
Materials science on parabolic aircraft: The FY 1987-1989 KC-135 microgravity test program
| NASA-TM-4456 | p 2252 N93-23171

THERMOELECTRIC MATERIALS
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
| DE93-004476 | p 2508 N93-23691
High temperature rare earth and Si-Ge thermoelectric materials
| DE93-006913 | p 2513 N93-24462

THERMOELECTRICITY
A solid state approach to the production of kilogram quantities of Si80Ge20 thermoelectric alloys
| DE93-004476 | p 2508 N93-23691

THERMOGRAPHY
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326
Passive (self-powered) fiber-optic sensors
| DE93-005761 | p 2486 N93-22762

THERMOLUMINESCENCE
DosiMir: Radiation measurements inside the Soviet Space Station Mir, first results p 2160 N93-24371

THERMOMECHANICAL TREATMENT
Improved techniques for thermomechanical testing in support of deformation modeling
| NASA-TM-105944 | p 2323 N93-22555

THERMOMETERS
High resolution digital thermometer
| PAT-APPL-7-831-603 | p 2304 N93-24172

THERMOPHYSICAL PROPERTIES
Thermophysical properties
| DE93-006427 | p 2216 N93-22056
Materials compatibility and lubricants research on CFC-refrigerant substitutes
| DE93-006426 | p 2237 N93-22884
Thermophysical properties
| DE93-007807 | p 2220 N93-22916

THERMOPLASTIC RESINS
Continuous fiber thermoplastic prepreg
| NASA-CASE-LAR-14459-1 | p 2215 N93-24597

THERMOSETTING RESINS
Dielectric and dynamic mechanical properties of ATBN-containing thermosets
| DREA-CR-91-444 | p 2239 N93-23725

THICK FILMS
Conductive paints
| DE93-006511 | p 2236 N93-22713
Infrared vacuum soldering process for thick-film hybrid microcircuits
| DE93-007483 | p 2285 N93-24451
Superconductivity devices: Commercial use of space
| NASA-CR-192841 | p 2513 N93-24483
Atomic scale stitching of beryllium coatings to carbon substrates using 200-keV carbon ions
| DE93-007392 | p 2485 N93-24565

THICKNESS
Advanced reinforcement systems for intermetallic applications
| NASA-CR-4488 | p 2209 N93-22875
Text and references to accompany 'Map Showing the Thickness and Character of Quaternary Sediments in the Glaciated United States East of the Rocky Mountains'
| PB93-129864 | p 2392 N93-22894
Report of the Sea Ice Thickness Workshop
| AD-A259696 | p 2414 N93-23663

THIN FILMS
Sputter-deposition and characterization of molybdenum disulfide thin films
| DE93-004801 | p 2235 N93-22048
Chemically prepared Pb(Zr,Ti)O3 thin films: The effects of orientation and stress
| DE93-004501 | p 2500 N93-22324
Polycrystalline thin films
| DE93-000070 | p 2500 N93-22336
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
| DE93-005474 | p 2500 N93-22342
Sol-gel/rhodamine 6G composite films with tailored microstructures
| DE93-005364 | p 2208 N93-22504
Thin silicon solar cells
| DE93-007420 | p 2376 N93-22532
Investigation of the kinetics of surface-limited thin film growth of SiGe alloys
| DE93-005419 | p 2502 N93-22538
Metallo-organic solution deposition of ferroelectric PZT films
| AD-A260127 | p 2502 N93-22549

Optical and scratch resistant properties of diamondlike carbon films deposited with single and dual ion beams
| NASA-TM-105943 | p 2206 N93-22586
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
| DE93-006500 | p 2228 N93-22710
Experimental studies of critical behavior of systems with quenched disorder
| DE93-005090 | p 2228 N93-22717
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
| DE93-003792 | p 2504 N93-22808
Structure and dynamics in low dimensional guest-host solids
| DE93-006498 | p 2504 N93-22887
Computer simulation of the anomalous elastic behavior of thin films and superlattices
| DE93-004154 | p 2504 N93-22939
Substrate surface structure effects on microstructure of epitaxial films
| DE93-005562 | p 2504 N93-22944
Charge trapping centers in ferroelectric ceramics
| DE93-005359 | p 2238 N93-22954
Ion and electron beam processing of condensed molecular solids to form thin films
| DE93-007273 | p 2504 N93-22955
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
| DE93-005420 | p 2505 N93-22976
X ray absorption fine structure strain determination in thin films p 2326 N93-23072
Magnetotransport and magnetometer studies of magnetic thin, sandwich and multilayer films p 2505 N93-23100
Physical properties of ultrathin films of high-temperature superconductors p 2506 N93-23197
Plasma technology p 2496 N93-23263
Enhanced vortex pinning and critical current density in proton-irradiated YBa2Cu3O(7-delta) thin films
| DE93-005367 | p 2507 N93-23326
Amorphous diffusion barriers for electronic device applications
| ETN-93-93476 | p 2281 N93-23366
Process toward a comprehensive control system for molecular beam epitaxy
| AD-A259724 | p 2507 N93-23468
New 3-5 cell design approaches for very high efficiency
| DE92-010558 | p 2381 N93-23697
Spectroscopic ellipsometry and interference reflectometry measurements of CVD silicon grown on oxidized silicon
| DE93-005767 | p 2509 N93-24017
Nitride semiconductors for ultraviolet detection
| AD-A259545 | p 2510 N93-24040
Processing of patterned ferroelectric capacitors
| AD-A259936 | p 2284 N93-24131
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292
The surface plasmon spectroscopy applications in microgravity: The measurement theory and preliminary experimental layout p 2165 N93-24396
Distribution of trapped electrons at interface states in ACTFEL devices
| AD-A260396 | p 2484 N93-24427
Basic studies of 3-5 high efficiency cell components
| DE92-010563 | p 2382 N93-24432
Research on high efficiency, large-area CuInSe2-based thin-film modules
| DE93-000077 | p 2513 N93-24433
Low-temperature deposition of ZrC thin films from a single source precursor
| DE93-007333 | p 2514 N93-24518
Metrologic support for the DARPA/NRL-XRL Mask Program: Ellipsometric analyses of SiC thin films on Si
| PB93-152098 | p 2225 N93-24632

THIN WALLED SHELLS
Well-posedness of a model for structural acoustic coupling in a cavity enclosed by a thin cylindrical shell
| NASA-CR-191439 | p 2473 N93-22878

THIN WALLS
J-integral of circumferential crack in large diameter pipes
| DE93-003708 | p 2326 N93-23050
Inward electrostatic precipitation of interplanetary particles
| NASA-CR-192786 | p 2552 N93-24477
Inelastic nonuniform torsion of steel I-beams
| PB93-118776 | p 2333 N93-24589

THREADS
Blind fastening apparatus
| NASA-CASE-LAR-14542-1 | p 2311 N93-22384

THREE BODY PROBLEM
Configuration space Faddeev calculations
| DE93-006080 | p 2475 N93-23337

THREE DIMENSIONAL BODIES
3D object recognition: Symmetry and virtual views
| AD-A259738 | p 2460 N93-23474
Towards a vision algorithm compiler for recognition of partially occluded 3-D objects
| AD-A259711 | p 2440 N93-23638
Recognizing 3D objects for 2D images: An error analysis
| AD-A260150 | p 2469 N93-23707
Why do we see three-dimensional objects?
| AD-A259892 | p 2424 N93-23986
Representation and recognition of free-form surfaces
| AD-A259883 | p 2441 N93-24019

THREE DIMENSIONAL BOUNDARY LAYER
Three-dimensional turbulent boundary layer flow over a spinning cylinder
| NASA-TM-102240 | p 2300 N93-24533
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
| NASA-TM-102211 | p 2300 N93-24541

THREE DIMENSIONAL COMPOSITES
Viscoelastic properties of 3-D braided PEEK/graphite composites p 2214 N93-24103

THREE DIMENSIONAL FLOW
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
| NASA-CR-185677 | p 2109 N93-22802
The three-dimensional evolution of a plane mixing layer. Part 2: Pairing and transition to turbulence
| NASA-TM-103926 | p 2294 N93-23417
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481
Tip-vortex/airframe interactions p 2111 N93-23489
Three-dimensional isothermal flow simulations of an MHD secondary combustor
| DE93-006631 | p 2497 N93-24035
Analysis of a high speed civil transport configuration at subsonic flow conditions using a Navier-Stokes solver
| NASA-CR-4490 | p 2127 N93-24108
The effects of three-dimensional imposed disturbances on bluff body near wake flows
| AD-A259501 | p 2298 N93-24311
Development of code evaluation criteria for assessing predictive capability and performance
| NASA-CR-192623 | p 2442 N93-24473
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
| NASA-TM-103838 | p 2300 N93-24542

THREE DIMENSIONAL MODELS
ROBOSIM: An intelligent simulator for robotic systems p 2465 N93-22161
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Recent results of multimagnetical simulations of the Ising model
| DE93-005213 | p 2475 N93-22951
Optimization of flight trajectories in a 3D model of windshear flow field p 2110 N93-23203
Recognizing 3D objects for 2D images: An error analysis
| AD-A260150 | p 2469 N93-23707
Space efficient 3D model indexing
| AD-A259571 | p 2462 N93-24085
Distance metric between 3D models and 2D images for recognition and classification
| AD-A260069 | p 2463 N93-24313
Anisotropic reflections in mountainous terrain to determine the absorption of solar radiation from satellite data
| ESA-TT-1262 | p 2558 N93-24633

THROTTLING
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123

THRUST
Control of a varying thrust spacecraft for autonomous space rendezvous p 2139 N93-22246
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123
Thick-section structural composites and composite structures
| AD-A260081 | p 2215 N93-24316

THRUST AUGMENTATION
A full-scale STOVL ejector experiment
| NASA-TM-106019 | p 2129 N93-22480

THRUST CHAMBERS
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382

THRUST CONTROL
Control of a varying thrust spacecraft for autonomous space rendezvous p 2139 N93-22246

THUNDERSTORMS
An experimental search for gamma radiation associated with thunderstorm activity
| DE93-006939 | p 2403 N93-22584

TIBET
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period p 2405 N93-23219

TILES
Thermal protection system of the Space Shuttle's orbiter p 2176 N93-22107

TILT ROTOR AIRCRAFT
Tiltrotor aircraft noise: A summary of the presentations and discussions at the 1991 FAA/Georgia Tech Workshop
| AD-A260072 | p 2477 N93-24119

TIMBER IDENTIFICATION
Monitoring of growth environment of forest p 2336 N93-22135

TIME CONSTANT
Computer based analysis and synthesis of retinal function
| AD-A260514 | p 2423 N93-24420

TIME DEPENDENCE
A computational study of the time dependent crack growth process
| DE93-004397 | p 2324 N93-22751
Review of quantum computation
| DE93-003735 | p 2474 N93-22919
A combined Galerkin/collocation spectral method for transient solution of flow past a spherical droplet
| DE93-005251 | p 2293 N93-23300
Time-resolved reflectivity study of solid-phase epitaxial regrowth in relaxed and strained Si(1-x)Ge(x)
| DE93-005154 | p 2506 N93-23312
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
| AD-A259829 | p 2281 N93-23433
Effect of code augmentation or truncation on the signals produced by a time-integrating correlator
| AD-A259802 | p 2264 N93-23458
Normal modes of the atmosphere as estimated by principal oscillation patterns and derived from quasi-geostrophic theory
| MPIM-81 | p 2397 N93-23857
Time dependent classification of features with a nonlinear, dynamic network
| VTT-PUBS-83 | p 2448 N93-23868
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217
Numerical studies for the RAM accelerator
| AD-A259949 | p 2224 N93-24423

TIME LAG
Summary of the effects of engine throttle response on airplane formation-flying qualities
| NASA-TM-4465 | p 2131 N93-23123

TIME MARCHING
An analytical study of some problems in partial differential equations with applications to fluid dynamics and wave propagation
| AD-A260351 | p 2470 N93-24169

TIME MEASUREMENT
Journal of research of the National Institute of Standards and Technology, Nov. - Dec. 1992, volume 97, no. 6
| PB93-143923 | p 2571 N93-24570

TIME OF FLIGHT SPECTROMETERS
Laser range camera data fusion
| DE93-005159 | p 2263 N93-23313

TIME SERIES ANALYSIS
Market penetration of new energy technologies
| DE92-016409 | p 2375 N93-22323
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
Topological organization of (low-dimensional) chaos
| DE93-003693 | p 2514 N93-22753
Adaptive filters for monitoring localized brain activity from surface potential time series
| DE93-003795 | p 2420 N93-22774
Complex principal oscillation pattern analysis
| MPIM-86 | p 2468 N93-23061
Nonlinear dynamical modeling and prediction of the terrestrial magnetospheric activity p 2392 N93-23135

TIME TEMPERATURE PARAMETER
Time-temperature analysis of damage initiation and growth in composite laminates p 2215 N93-24217
Luminescence and picosecond photo-induced absorption of polyaniline
| AD-A260002 | p 2242 N93-24436

TIMING DEVICES
Manned versus unmanned rendezvous and capture p 2137 N93-22234

TIN ALLOYS
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
| DE93-006041 | p 2230 N93-23024

Characterization of SAES St198 zirconium-iron-tin alloy
| DE93-005697 | p 2230 N93-23036

TIP SPEED
Damping measurements from an operating wind turbine: Preliminary results and procedures
| DE93-005357 | p 2377 N93-22873
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
| NASA-TM-104224 | p 2116 N93-24532

TIRES
Method and apparatus for cleaning rubber deposits from airport runways and roadways
| NASA-CASE-LAR-14483-1 | p 2256 N93-22035

TITAN
Cassini/Huygens: A mission to Saturn and Titan
p 2539 N93-23918

TITANIUM
The role of passive surface films on corrosion fatigue crack initiation
| DE93-006512 | p 2325 N93-22888

TITANIUM ALLOYS
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
The surface interaction of oxygen with a gamma TiAl
| DE93-003847 | p 2227 N93-22517
Pressure-reaction synthesis of titanium composite materials
| PB93-135036 | p 2208 N93-22591
Theoretical study of electron-phonon interaction in beta-phase NiTi and Ni-Al alloys
| DE93-004733 | p 2228 N93-22738
An investigation into the multiaxial fatigue behavior of IMI 829 titanium alloy p 2327 N93-23182
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
| MBB-Z-0444-92-PUB | p 2239 N93-23365
Residual stress measurements in continuous fiber titanium matrix composites
| DE93-003733 | p 2232 N93-23686

TITANIUM CARBIDES
Strain measurement in individual phases of an Al/TiC composite during mechanical loading
| DE93-003806 | p 2208 N93-22432

TITANIUM OXIDES
Substrate surface structure effects on microstructure of epitaxial films
| DE93-005562 | p 2504 N93-22944

TOBACCO
Tobacco and health of the pilot
| ETN-93-93693 | p 2421 N93-23414

TOILETS
Variable-Volume Flushing (V-VF) device for water conservation in toilets p 2429 N93-22167

TOKAMAK DEVICES
Thermally driven turbulence and transport in a sheared system
| DE93-006125 | p 2491 N93-22053
The University of Wisconsin-Madison Torsatron/Stellarator Laboratory program
| DE93-005922 | p 2492 N93-22419
Low frequency RF current drive
| DE93-005130 | p 2260 N93-22421
Influence of alpha particle absorption on fundamental deuterium heating in a fusion plasma
| DE93-006824 | p 2492 N93-22513
High beta effects and nonlinear evolution of the TAE instability
| DE93-004170 | p 2492 N93-22522
Anomalous transport modelling of tokamak plasmas
| DE93-006160 | p 2493 N93-22764
Fusion plasma theory. Task 3: Auxiliary radiofrequency heating of tokamaks
| DE93-005129 | p 2493 N93-22796
Alpha effects on TAE modes and alpha transport
| DE93-004160 | p 2494 N93-22940
A high performance spectral code for nonlinear MHD stability
| DE93-004541 | p 2494 N93-22984
Applications of divertor biasing to the next generation tokamaks
| DE93-005848 | p 2494 N93-23023
Electron cyclotron emission measurements on the Texas Experimental Tokamak p 2494 N93-23066
Selection of an appropriate tokamak operating regime using magnetohydrodynamic and current drive constraints p 2495 N93-23167
Electron-beam rocket acceleration of hydrogen pellets
| DE93-002822 | p 2171 N93-23685
Recent D3-D results --- tokamak reactor
| DE93-004468 | p 2496 N93-23690
A transmission/escape probabilities model for neutral particle transport in the outer regions of a diverted tokamak
| DE93-006550 | p 2497 N93-24045
Analysis of non-thermal electron cyclotron emission during electron cyclotron current drive experiments on the D3-D tokamak p 2498 N93-24187
Poloidal magnetic field profile measurements on the microwave tokamak experiment using far-infrared polarimetry p 2498 N93-24294
Edge effects during DIII-D divertor biasing
| DE93-005847 | p 2498 N93-24325
An ICRF antenna edge plasma density profile diagnostic for DIII-D
| DE93-006729 | p 2498 N93-24328
Theoretical studies on plasma heating and confinement
| DE93-007617 | p 2499 N93-24452
Tritium permeation model for plasma facing components
| DE93-007044 | p 2499 N93-24465
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
| PB93-146215 | p 2499 N93-24606

TOLERANCES (MECHANICS)
Traceability for radio frequency coaxial line standards
| NPL-DES-114 | p 2277 N93-22451

TOLERANCES (PHYSIOLOGY)
Stress resistance as a diagnostic category in air traffic controller selection
| DLR-FB-92-13 | p 2422 N93-24092

TOLLMIEN-SCHLICHTING WAVES
Receptivity of the boundary layer over a flat plate with different leading-edge geometries: Numerical simulations p 2294 N93-23402

TOMATOES
P0004-1 quick look
| NASA-CR-192459 | p 2193 N93-23009

TOPEX
TOPEX/POSEIDON joint verification plan
| NASA-CR-192792 | p 2413 N93-22804

TOPOGRAPHY
Radar seeker based autonomous navigation update system using topography feature matching techniques p 2256 N93-22030
Tunneling magnetic force microscopy p 2514 N93-22194
NTIA Terrain Data Base System Documentation (Program DUMPTERS, Extract and Ternd). Version 4.0, October 1992
| PB93-108330 | p 2343 N93-23254
Studies of baroclinic flow
| AD-A259739 | p 2414 N93-23475
Innovative applications of repeated satellite SAR surveys p 2349 N93-23541
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
The orbital imaging system and its potential for digital terrain models of the Earth p 2350 N93-23548
Assessment and correction of the impact of topography and atmosphere on remote sensing forest mapping of alpine regions p 2370 N93-23832
Microtopography of manganese crusts
| PB93-120830 | p 2398 N93-23996

TOPOLOGY
Topological organization of (low-dimensional) chaos
| DE93-003693 | p 2514 N93-22753

TORCHES
Pipe crawler development for duct elbow removal
| DE93-002169 | p 2313 N93-22892

TOROIDAL PLASMAS
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
| DE93-005831 | p 2493 N93-22869
Poloidal variation of viscous forces in the banana collisionality regime
| DE93-006822 | p 2499 N93-24504

TORSION
Inelastic nonuniform torsion of steel I-beams
| PB93-118776 | p 2333 N93-24589
Suspension device for low-frequency structures
| NASA-CASE-LAR-14272-1-CU | p 2169 N93-24598

TORUSES
Numerical simulation of the Jovian torus-driven plasma transport p 2554 N93-23403

TOTAL ENERGY SYSTEMS
Communications and control for electric power systems
| NASA-CR-192794 | p 2261 N93-22477

TOTAL QUALITY MANAGEMENT
Process management: The quality way to improvement
| PB93-154532 | p 2321 N93-23445
You want it when: A TQM guide to customer service
| PB93-154540 | p 2520 N93-23446
Total quality implementation guide
| PB93-154524 | p 2520 N93-23447
Total Quality Management: Good enough for government work
| AD-A259847 | p 2520 N93-23954
Implementing total quality management (TQM) 1: The command imperative
| AD-A259885 | p 2520 N93-23981
Total quality management in the Federal Government. Implementation of TQM in federal agencies receiving the Federal Quality Institute Quality Improvement Prototype Award, 1990-1992
| PB93-154573 | p 2521 N93-24306
An evaluation of schedule metrics used within aeronautical systems center
| AD-A260113 | p 2521 N93-24413

TOUGHNESS
Experimental investigations of the fracture toughness enhancement associated with shallow flaws
| DE93-003100 | p 2322 N93-22412
Mechanical properties of ferritic and ferritic-pearlitic ductile iron
| DE93-007670 | p 2229 N93-22912
Two-parameter fracture mechanics theory and applications
| AD-A259907 | p 2330 N93-23993

TOXIC HAZARDS
The generation of carbon monoxide in compartment fires p 2117 N93-23093
Non-chromated surface pretreatments for aluminum
| AD-A260130 | p 2232 N93-23704
AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
| PB93-100113 | p 2443 N93-24587

TOXICITY
Active Hydrazine Vapor Sampler (AHVS)
p 2225 N93-22165
Practical problems related to flammability and combustion in space p 2226 N93-22839
Solid-state (31)P magic angle spinning (MAS) NMR study of the partitioning and reaction of organophosphorus esters adsorbed on synthetic resin catalysts
| AD-A259889 | p 2242 N93-24321

TRACE CONTAMINANTS
Gas separations using ceramic membranes
| DE93-003204 | p 2225 N93-24498

TRACKING (POSITION)
Advances in automatic electro-optical tracking systems p 2254 N93-22020
Multi-window registration algorithm for automatic detection and tracking of moving targets
p 2255 N93-22022
Image based tracking approaches to AR/C at the Johnson Space Center p 2140 N93-22256
Automated rendezvous and docking with video imagery p 2148 N93-22298
Near-earth object interception workshop summary
| DE93-003793 | p 2546 N93-22403
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
| AD-D015622 | p 2272 N93-24232

TRACKING FILTERS
Multivariable frequency response methods for optimal Kalman-Bucy filters with applications to radar tracking systems p 2255 N93-22024

TRACKING RADAR
Rendezvous radar for the orbital maneuvering vehicle
p 2145 N93-22283

TRACTORS
Bogie-gripping transfer device
| CA-PATENT-APPL-SN-024586 | p 2135 N93-24643
Wheeled transfer device for moving an aircraft
| CA-PATENT-APPL-SN-2-024584 | p 2135 N93-24644

TRADEOFFS
Space Biology Initiative. Trade Studies, volume 1
| NASA-CR-190989 | p 2417 N93-23068
Space biology initiative program definition review. Trade study 5: Modification of existing hardware (COTS) versus new hardware build cost analysis p 2417 N93-23069
Space Biology Initiative. Trade Studies, volume 2
| NASA-CR-190990 | p 2418 N93-23079
Cycle O (CY 1991) NLS trade studies and analyses, book 2. Part 1: Avionics and systems
| NASA-CR-184472 | p 2258 N93-23176

TRAFFIC
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903

TRAINING ANALYSIS
Space support forum p 2153 N93-23160

TRAINING DEVICES
Occurrence Reporting and Processing System (ORPS) lessons learned: Tools to improve workplace performance
| DE93-005241 | p 2522 N93-22498
The European astronauts training programme p 2156 N93-24346
Training facilities at the Crew Training Complex p 2156 N93-24347

TRAINING EVALUATION
Training high performance skills using above real-time training
| NASA-CR-192616 | p 2425 N93-24192

TRAINING SIMULATORS
Columbus program: Ground staff training simulation
| ETN-93-93694 | p 2194 N93-23415

TRAJECTORIES
Workshop on Trajectory Optimization Methods and Applications: Presentations from the 1992 AIAA Atmospheric Flight Mechanics Conference
| AD-A259761 | p 2126 N93-23482

TRAJECTORY ANALYSIS
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
| NASA-CR-185171 | p 2205 N93-24536

TRAJECTORY CONTROL
A berthing and fastening strategy for orbital replacement units p 2151 N93-22317
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension p 2318 N93-24184

TRAJECTORY MEASUREMENT
Testing of a GPS receiver GLOBUS AN 2000 of SEL: A study of selective availability
| DLR-MITT-92-07 | p 2123 N93-24138

TRAJECTORY OPTIMIZATION
Advanced launch system trajectory optimization using suboptimal control p 2171 N93-22010
Trajectory optimization based on differential inclusion
| NASA-CR-4501 | p 2181 N93-22459
Optimization of flight trajectories in a 3D model of windshear flow field p 2110 N93-23203
Workshop on Trajectory Optimization Methods and Applications: Presentations from the 1992 AIAA Atmospheric Flight Mechanics Conference
| AD-A259761 | p 2126 N93-23482
Vision-guided gripping of a cylinder
| NASA-CR-193199 | p 2465 N93-24657

TRAJECTORY PLANNING
Fuzzy logic path planning system for collision avoidance by an autonomous rover vehicle p 2451 N93-22217
A fuzzy logic controller for an autonomous mobile robot p 2452 N93-22220
An automated system for spacecraft proximity operations p 2136 N93-22230
The real-time operations of the Space Shuttle Orbiter during rendezvous and proximity operations p 2139 N93-22249
A synthetic environment for visualization and planning of orbital maneuvers p 2140 N93-22251
Use of automated rendezvous trajectory planning to improve spacecraft operations efficiency p 2146 N93-22292
Spacecraft rendezvous operational considerations affecting vehicle systems design and configuration p 2147 N93-22296
Path planning for manipulators
| DE93-004050 | p 2457 N93-22756
Time optimal paths for high speed maneuvering
| DE93-006251 | p 2458 N93-23338
Trajectory control of an articulated robot with a parallel drive arm based on splines under tension p 2318 N93-24184
A global path planning approach for redundant manipulators
| NASA-CR-193017 | p 2320 N93-24656

TRANSCONDUCTANCE
High-frequency BiCMOS transconductance integrators
| ISBN-0-315-60484-0 | p 2286 N93-24612

TRANSDUCERS
Communications and control for electric power systems
| NASA-CR-192794 | p 2261 N93-22477
The sensitivity in eddy current testing of austenitic material
| VTT-JULK-758 | p 2231 N93-23368
Research in ultrasonic measurements at NIST: 1982-1992
| PB93-152064 | p 2476 N93-23682

TRANSFER FUNCTIONS
Multivariable frequency response methods for optimal Kalman-Bucy filters with applications to radar tracking systems p 2255 N93-22024
ERS-1 scatterometer calibration and validation activities at ECMWF. A: The quality and characteristics of the radar backscatter measurements p 2359 N93-23763
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
SAXON-FPN NAWC/ERIM P-3 SAR data distribution and analysis
| AD-A259944 | p 2273 N93-24243

TRANSFER OF TRAINING
Centres for space science and technology education: A United Nations initiative p 2369 N93-23826

TRANSFER ORBITS
Mars transfer vehicle studies p 2173 N93-22088
Space transfer concepts and analysis for exploration missions. Implementation plan and element description document (draft final). Volume 6: Lunar systems
| NASA-CR-192494 | p 2179 N93-23007

TRANSFORMATIONS (MATHEMATICS)
Convergence rates of approximation by translates
| AD-A260100 | p 2470 N93-24055
Projective structure from two uncalibrated images: Structure from motion and recognition
| AD-A260102 | p 2470 N93-24056
Transformations of gaussian random fields and a test for independence of a survival time from a covariate
| AD-A260442 | p 2472 N93-24114

TRANSFORMERS
Monolithic, series connected GaAs photovoltaic power converters for optoelectronic component applications
| DE93-004385 | p 2380 N93-23293

TRANSIENT RESPONSE
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 1: Implementing exact mode superposition
| NASA-TM-106063 | p 2329 N93-23739
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 2: Coupled versus uncoupled integration
| NASA-TM-106064 | p 2330 N93-23740

TRANSISTOR AMPLIFIERS
JFET monolithic preamplifier with outstanding noise behaviour and radiation hardness characteristics
| DE93-006679 | p 2278 N93-22577

TRANSISTORS
GaAs-based optoelectronic neurons
| NASA-CASE-NPO-18497-1-CU | p 2464 N93-24599

TRANSITION FLOW
Surface acoustic wave sensors and piezoelectric actuators for investigations of transitional and turbulent flows
| AD-A260482 | p 2290 N93-22932
Numerical prediction of transition of the F-16 wing at supersonic speeds
| NASA-CR-192706 | p 2111 N93-23392
Determination and characteristics of the transition to two-phase slug flow in small channels
| DE93-004250 | p 2299 N93-24434

TRANSITION METALS
Atomic beam studies of the interaction of hydrogen with transition metal surfaces
| DE93-006500 | p 2228 N93-22710
Electronic and ionic transport in processable conducting polymers
| AD-A260223 | p 2238 N93-22918
The study of polyether solvation mechanisms using UV/visible spectroscopy
| AD-A260355 | p 2241 N93-24170
Study of the model of hole superconductivity in multiple band cases and its application to transition metals p 2511 N93-24195
Compositional superlattices based on PtCl/PtBr MX materials
| DE93-003700 | p 2513 N93-24496

TRANSITION PROBABILITIES
Inexpensive capillary discharge x ray laser driver
| AD-A260388 | p 2310 N93-24276

TRANSITION TEMPERATURE
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
| DE93-004854 | p 2503 N93-22745
Growth and characterization of laser-deposited superconducting Bi-Sr-Ca-Cu-O thin films
| DE93-003792 | p 2504 N93-22808
A theoretical analysis of the effect of uniaxial elastic strain on the critical temperature of cuprate superconductors
| DE93-005710 | p 2507 N93-23329
High temperature superconductivity
| AD-A259692 | p 2283 N93-24023

TRANSLATIONAL MOTION
GN/C translation and rotation control parameters for AR/C (category 2) p 2142 N93-22263
Development and implementation of the MotoMir experiment on the Mir Space Station p 2159 N93-24363
A demonstration of motion base design alternatives for the National Advanced Driving Simulator
| NASA-TM-103881 | p 2428 N93-24490

TRANSMISSION EFFICIENCY
The PNL high-transmission three-stage mass spectrometer
| DE93-006143 | p 2486 N93-22506

TRANSMISSION ELECTRON MICROSCOPY
Applications of TEM to interface in materials
| DE93-004776 | p 2501 N93-22492

TRANSMISSION LINES
Radio frequency cable to optical fiber cable
| AD-D015620 | p 2284 N93-24230

TRANSMISSIONS (MACHINE ELEMENTS)
Advanced Rotorcraft Transmission (ART) program
| NASA-CR-191057 | p 2311 N93-22466
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
| NASA-TM-105830 | p 2312 N93-22826
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
| NASA-TM-106080 | p 2313 N93-23019
Planetary gear train ring gear and support structure investigation p 2314 N93-23188
Pattern classifier for health monitoring of helicopter gearboxes
| NASA-TM-106099 | p 2316 N93-23741
Understanding and modeling the behavior of a harmonic drive gear transmission
| AD-A259610 | p 2317 N93-24152

TRANSMITTER RECEIVERS
Low-voltage-swing CMOS transceivers
| DE93-006607 | p 2277 N93-22511
Step stress testing of receiver/transmitter units, part 1
| AD-A260182 | p 2273 N93-24318

TRANSMITTERS
Multi-beam range imager for autonomous operations p 2310 N93-22160
A three channel telemetry system p 2180 N93-22162
Global Earth observation using modern communications satellite techniques p 2276 N93-23527
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders p 2265 N93-23601
Remotely piloted vehicle control and interface system
| AD-D015618 | p 2132 N93-24228

TRANSONIC FLOW
A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
| ETN-93-93701 | p 2299 N93-24487

TRANSONIC SPEED
Aerodynamic sensitivity analysis in the transonic regime p 2109 N93-22667
An experimental investigation of a supercritical airfoil at transonic speeds
| NASA-TM-103933 | p 2300 N93-24534

TRANSONIC WIND TUNNELS
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
| NASA-TM-107734 | p 2133 N93-22675
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
| NASA-TM-4436 | p 2110 N93-22876
Slotted-wall flow-field measurements in a transonic wind tunnel
| NASA-TM-4280 | p 2113 N93-24111

TRANSPORT AIRCRAFT
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575
Review of aeronautical fatigue investigation activities developed in Aeritalia-GAT during the period May 1987 - April 1989
| ETN-93-93702 | p 2126 N93-23401

TRANSPORT PROPERTIES
Thermally driven turbulence and transport in a sheared system
| DE93-006125 | p 2491 N93-22053
Thermophysical properties
| DE93-006427 | p 2216 N93-22056
Synthesis and analysis of novel polymers with high permselectivity and permeability in gas separation applications
| DE93-005883 | p 2235 N93-22422
Hypersonic three-dimensional nonequilibrium boundary-layer equations in generalized curvilinear coordinates
| NASA-CR-185677 | p 2109 N93-22802
Electronic and ionic transport in processable conducting polymers
| AD-A260223 | p 2238 N93-22918
Transport in amorphous semiconductors p 2506 N93-23101

Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
| DE93-005461 | p 2447 N93-23245
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence
| NASA-CR-191421 | p 2295 N93-23421
Measurement of the radiative transport properties of reticulated alumina foams
| DE93-000047 | p 2231 N93-23672
Effect of a poloidal electric field on neoclassical transport in a multispecies tokamak plasma
| PB93-146215 | p 2499 N93-24606

TRANSPORT THEORY
Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis
| DE93-006123 | p 2491 N93-22052
Advanced computational methods for nodal diffusion, Monte Carlo, and S(sub N) problems
| DE93-006816 | p 2480 N93-22714
Anomalous transport modelling of tokamak plasmas
| DE93-006160 | p 2493 N93-22764
A local exponential transform method for global variance reduction in Monte Carlo transport problems
| DE92-018992 | p 2468 N93-22926
Alpha effects on TAE modes and alpha transport
| DE93-004160 | p 2494 N93-22940
A transmission/escape probabilities model for neutral particle transport in the outer regions of a diverted tokamak
| DE93-006550 | p 2497 N93-24045
Poloidal variation of viscous forces in the banana collisionality regime
| DE93-006822 | p 2499 N93-24504

TRANSPORT VEHICLES
Lunar transfer vehicle studies p 2173 N93-22087

TRANSPORTATION
The ANL electric vehicle battery R/D program for DOE-EHP
| DE93-005689 | p 2278 N93-22688
The ANL Electrochemical Program for DOE on electric vehicle R/D
| DE93-005690 | p 2279 N93-22689
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903

TRANSPUTERS
AR/D image processing system p 2152 N93-22321
An integrated car navigation system using a single processor for GPS signal processing, positioning, map display, and reporting p 2124 N93-23533

TRANSVERSE ACCELERATION
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere p 2394 N93-23388

TRANSVERSE OSCILLATION
Space time neural networks for tether operations in space p 2456 N93-22370

TRAPPED PARTICLES
Dissipative trapped electron mode turbulence with ion Landau damping and FLR effects
| DE93-004524 | p 2494 N93-22942
Distribution of trapped electrons at interface states in ACTFEL devices
| AD-A260396 | p 2484 N93-24427

TRAPPING
Charge trapping centers in ferroelectric ceramics
| DE93-005359 | p 2238 N93-22954

TRAVELING WAVE TUBES
Simulation of TunneLadder traveling-wave tube cold-test characteristics: Implementation of the three-dimensional, electromagnetic circuit analysis code micro-SOS
| NASA-TP-3294 | p 2281 N93-23394

TREADMILLS
Two techniques for measuring locomotion impact forces during zero G
| NASA-TP-3305 | p 2421 N93-23410

TREES (MATHEMATICS)
Relationships between bankruptcy games and minimum cost spanning tree games
| MEMO-1058 | p 2469 N93-23356
A self growing binary tree neural network for the identification of multiclass systems
| RR-451 | p 2459 N93-23362

TREMORS
The effect of microgravity on tremor (microvibration) p 2160 N93-24368

TRENDS
Summary of the 1992 ACP Winter Conference on Future Trends in Low Temperature Physics
| AD-A259809 | p 2508 N93-23643
Applicability of trends in nuclear safety analysis to space nuclear power systems
| DE93-003169 | p 2205 N93-24497

TRIANGULATION
Block triangulation of SPOT data with particular reference to the OEEPE tests p 2349 N93-23542
The creation of a DEM from SPOT data p 2355 N93-23582
The promise of raster data processing in digital terrain modelling p 2356 N93-23585
Procedures for determining the location of an HF radio transmitter p 2267 N93-23610
Detection of active emitters using triangulation and trilateration techniques: Theory and practice p 2267 N93-23612

TRIBOLOGY
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
| NASA-TM-106014 | p 2236 N93-22560
Friction microprobe investigation of particle layer effects on sliding friction
| DE92-018868 | p 2313 N93-22925
Boundary film for structural ceramic materials
| DE93-004871 | p 2240 N93-23975
Ion beam modification of ceramics: Mechanical properties and structure
| AD-A260504 | p 2242 N93-24419

TRIGGER CIRCUITS
Charm physics at Fermilab E791
| DE93-006020 | p 2480 N93-22543

TRITIUM
Direct searches for neutrino mass
| DE93-003867 | p 2479 N93-22068
Tritium permeation model for plasma facing components
| DE93-007044 | p 2499 N93-24465

TROPICAL METEOROLOGY
Ground-based microwave radiometric remote sensing of the tropical atmosphere p 2343 N93-23352
Impact of a Newtonian assimilation and physical initialization on the initialization and prediction in a tropical mesoscale model p 2394 N93-23353
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
| AD-A259922 | p 2407 N93-23710
Equatorial atmospheric weather regimes: Their structure and role p 2411 N93-24580

TROPICAL REGIONS
A hybrid coupled tropical atmosphere ocean model: Sensitivities and hindcast skill
| MPIM-76 | p 2396 N93-23635
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
| AD-A259922 | p 2407 N93-23710
A strategy for monitoring the tropical forest with ERS-1 SAR imagery p 2358 N93-23758
Training courses on application of remote sensing and geographic information systems in monitoring and managing tropical rainforests and natural environment p 2367 N93-23812
Intraseasonal relationships between tropical heating and extratropical jets
| AD-A260212 | p 2408 N93-24004
Modeling of cloud/radiation processes for tropical anvils
| AD-A260203 | p 2410 N93-24470
Observed annual and interannual variations in tropospheric water
| PB93-123313 | p 2411 N93-24588

TROPICAL STORMS
Tropical Cyclone Forecasters Reference Guide 2: Tropical Climatology
| AD-A259922 | p 2407 N93-23710
Modeling the tropical ocean response to westerly wind forcing
| AD-A260230 | p 2416 N93-24099

TROPOSPHERE
Cloud influence on radiative cooling over the Tibetan Plateau during the summer monsoon period p 2405 N93-23219
Propagation effects on HF direction finding p 2265 N93-23602
Nonmigrating diurnal tides in the equatorial middle atmosphere p 2399 N93-24106
Determination of rates of reaction in the gas-phase in the troposphere. Theory and practice. 5. Rate of indirect photoreaction
| PB93-149334 | p 2402 N93-24569
Observed annual and interannual variations in tropospheric water
| PB93-123313 | p 2411 N93-24588

TRUCKS
1991 CRC octane number requirement survey
| AD-A259821 | p 2245 N93-23667

TRUSSES
A modal test of a space-truss for structural parameter identification
| DE93-004043 | p 2323 N93-22518
System identification of the JPL micro-precision interferometer truss
| DE93-004044 | p 2323 N93-22519
Precursor SSF utilization: The MODE experiments p 2188 N93-22633
Long Duration Space Materials Exposure (LDSE) p 2189 N93-22638
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
| NASA-TM-107729 | p 2327 N93-23235
Vibration control experiments on a 12-meter cantilever truss structure
| AD-A259764 | p 2328 N93-23484
Reliable vision-guided grasping
| NASA-CR-193197 | p 2464 N93-24603
Vision-guided gripping of a cylinder
| NASA-CR-193199 | p 2465 N93-24657

TUMBLING MOTION
MSFC Three Point Docking Mechanism design review
| NASA-CR-192462 | p 2181 N93-22013
TALON and CRADLE: Systems for the rescue of tumbling spacecraft and astronauts p 2142 N93-22268

TUNABLE LASERS
Molecular design concept for x ray laser research
| DE93-004561 | p 2306 N93-22046
Studies of tunable, high power excimer lasers p 2309 N93-23597

TUNGSTEN ALLOYS
Bend ductility of tungsten heavy alloys
| DE93-004839 | p 2232 N93-23971
Effects of rolling on the ductility of 80 percent tungsten heavy alloy
| DE93-004840 | p 2232 N93-23972

TUNING
Molecular design concept for x ray laser research
| DE93-004561 | p 2306 N93-22046
Application of genetic algorithms to tuning fuzzy control systems p 2450 N93-22209
Permissive planning: A machine-learning approach to planning in complex real-world domains
| AD-A260019 | p 2521 N93-24303

TURBINE BLADES
Stress calculation for the Sandia 34-meter wind turbine using the local circulation method and turbulent wind
| DE93-004480 | p 2375 N93-22045
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
| DE93-003253 | p 2324 N93-22721
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion data sets
| AD-A260211 | p 2129 N93-22735
Summary of experimental heat-transfer results from the turbine hot section facility
| NASA-TP-3250 | p 2290 N93-23059
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
| NASA-CR-190782 | p 2327 N93-23125
Measurement and prediction of tip-clearance effects in a linear turbine cascade
| ISBN-0-315-68826-2 | p 2130 N93-24176

TURBINE ENGINES
Multi-heat addition turbine engine
| NASA-CASE-LEW-15094-1 | p 2129 N93-22034
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326

TURBINE PUMPS
OTV bearing deflection investigation
| NASA-TM-106085 | p 2303 N93-22994
Assessment of crack growth in a space shuttle main engine first-stage, high-pressure fuel turbopump blade
| NASA-CR-190782 | p 2327 N93-23125
Development of code evaluation criteria for assessing predictive capability and performance
| NASA-CR-192623 | p 2442 N93-24473

TURBINES
Three-dimensional laser window formation for industrial application p 2310 N93-22197

TURBOGENERATORS
SSTAC/ARTS review of the draft Integrated Technology Plan (ITP). Volume 3: Space power and thermal management
| NASA-TM-108652 | p 2519 N93-23109

TURBOMACHINERY
Nonintrusive temperature measurements on advanced turbomachinery components
| DE93-005478 | p 2302 N93-22326
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
| NASA-TM-105978 | p 2130 N93-23013

TURBULENCE
Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
| DE93-000041 | p 2376 N93-22334
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
| NASA-TM-107734 | p 2133 N93-22675
Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
| AD-A259923 | p 2289 N93-22734
Dissipative trapped electron mode turbulence with ion Landau damping and FLR effects
| DE93-004524 | p 2494 N93-22942
Transient radiation properties of strongly radiating turbulent flames p 2221 N93-23181
The three-dimensional evolution of a plane mixing layer. Part 2: Pairing and transition to turbulence
| NASA-TM-103926 | p 2294 N93-23417
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel
| NASA-TM-103920 | p 2134 N93-23420
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence
| NASA-CR-191421 | p 2295 N93-23421
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
| AD-A259659 | p 2396 N93-23657
Nonlinear optics and turbulence
| AD-A259950 | p 2489 N93-24244
Collaborative testing of turbulence models
| AD-A260277 | p 2298 N93-24259
The 12th Symposium on Turbulence
| AD-A260353 | p 2298 N93-24274

TURBULENCE EFFECTS
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382

TURBULENCE MODELS
Thermally driven turbulence and transport in a sheared system
| DE93-006125 | p 2491 N93-22053
Reaction and diffusion in turbulent combustion
| DE93-006185 | p 2216 N93-22055
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382
Improved two-equation k-omega turbulence models for aerodynamic flows
| NASA-TM-103975 | p 2289 N93-22809
Navier-Stokes analysis of airfoils with leading edge ice accretions
| NASA-CR-191008 | p 2109 N93-22822
Automatic differentiation of advanced CFD codes for multidisciplinary design
| DE93-005685 | p 2290 N93-22867
Turbulence models for helical flow
| GKSS-92/E/12 | p 2291 N93-23189
A multiple-scale model for compressible turbulent flows
| NASA-TM-106072 | p 2296 N93-23736
The effect of large-scale unsteady motion on a turbulent reattaching shear layer: Application to the supersonic compression ramp p 2114 N93-24215
Collaborative testing of turbulence models
| AD-A260277 | p 2298 N93-24259

TURBULENT BOUNDARY LAYER
Swept wing attachment line contamination fence
| NASA-CASE-LAR-13400-1 | p 2107 N93-22015
Diagnostic determination of boundary-layer cumulus clouds using HAPEX aircraft data
| DE93-002164 | p 2402 N93-22337
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow p 2114 N93-24209
Collaborative testing of turbulence models
| AD-A260277 | p 2298 N93-24259
Turbulent microfronts
| AD-A260300 | p 2409 N93-24265
Hypersonic shock/boundary-layer interaction database
| NASA-CR-177577 | p 2299 N93-24526
Experimental study of the separating confluent boundary-layer. Volume 2: Experimental data. Appendices A-E: Data supplement
| NASA-CR-166018-SUPPL | p 2299 N93-24531
Three-dimensional turbulent boundary layer flow over a spinning cylinder
| NASA-TM-102240 | p 2300 N93-24533
Intersecting shock-wave/turbulent boundary-layer interactions at Mach 8.3
| NASA-TM-103909 | p 2300 N93-24537
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
| NASA-TM-102211 | p 2300 N93-24541
Documentation of two- and three-dimensional shock-wave/turbulent-boundary-layer interaction flows at Mach 8.2
| NASA-TM-103838 | p 2300 N93-24542

TURBULENT COMBUSTION
Reaction and diffusion in turbulent combustion
| DE93-006185 | p 2216 N93-22055
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481
High resolution measurements of mixing and reaction processes in turbulent flows
| AD-A259952 | p 2298 N93-24246
Combustion and heat transfer studies utilizing advanced diagnostics: Combustion studies
| AD-A260253 | p 2224 N93-24333

TURBULENT DIFFUSION
Tests of random flight and closure models in predicting turbulent scalar transport
| DE93-004123 | p 2288 N93-22521

TURBULENT FLOW
Simulation of a particle-laden combustion flow in an MHD second stage combustor
| DE93-004244 | p 2491 N93-22065
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows
| DE93-004122 | p 2287 N93-22071
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
Improved two-equation k-omega turbulence models for aerodynamic flows
| NASA-TM-103975 | p 2289 N93-22809
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Automatic differentiation of advanced CFD codes for multidisciplinary design
| DE93-005685 | p 2290 N93-22867
Surface acoustic wave sensors and piezoelectric actuators for investigations of transitional and turbulent flows
| AD-A260482 | p 2290 N93-22932
Incompressible Navier-Stokes algorithm for flow and heat transfer over rough surfaces p 2290 N93-23110
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
Evaluation of nozzle shapes for an optical flow meter
| PB93-124147 | p 2292 N93-23281
Numerical simulation of flow through orifice meters
| PB93-124121 | p 2293 N93-23349
Transverse injection of liquid and gaseous fuels into subsonic/supersonic flow
| AD-A259771 | p 2111 N93-23476
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481
An investigation of particle turbulence quantities in a dense two-phase pipe flow, using laser Doppler velocimetry p 2295 N93-23496
Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592
A multiple-scale model for compressible turbulent flows
| NASA-TM-106072 | p 2296 N93-23736
Bottom generated velocity fluctuations in one-dimensional open channel flow
| MEMO-1051 | p 2297 N93-23865
Three-dimensional isothermal flow simulations of an MHD secondary combustor
| DE93-006631 | p 2497 N93-24035
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
| AD-A260149 | p 2297 N93-24132
High resolution measurements of mixing and reaction processes in turbulent flows
| AD-A259952 | p 2298 N93-24246
Collaborative testing of turbulence models
| AD-A260277 | p 2298 N93-24259
The 12th Symposium on Turbulence
| AD-A260353 | p 2298 N93-24274
Spatial development of chaos in an open flow system p 2515 N93-24293
Numerical modeling of fluidic flow meters
| PB93-124139 | p 2301 N93-24577

TURBULENT HEAT TRANSFER
Wake-induced unsteady stagnation region heat transfer measurements p 2295 N93-23591

TURING MACHINES
Using recurrent networks for dimensionality reduction
| AD-A259497 | p 2459 N93-23464

TURNING FLIGHT
Fuzzy logic mode switching in helicopters p 2455 N93-22367

TVD SCHEMES
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
| NASA-TM-106056 | p 2466 N93-22664

TWO BODY PROBLEM
A detailed study of nonperturbative solutions of two-body Dirac equations
| DE93-004794 | p 2468 N93-22965
The two black hole problem in 3+1 general relativity: Analytical approximations and numerical solutions of the initial data p 2548 N93-23212

TWO DIMENSIONAL BODIES
Recognizing 3D objects for 2D images: An error analysis
| AD-A260150 | p 2469 N93-23707

TWO DIMENSIONAL BOUNDARY LAYER
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
| NASA-TM-102211 | p 2300 N93-24541

TWO DIMENSIONAL FLOW
Laminar and turbulent incompressible fluid flow analysis with heat transfer by the finite element method p 2291 N93-23180
Control of two- and three-dimensional wake instabilities from bluff-bodies
| AD-A260410 | p 2299 N93-24428

TWO DIMENSIONAL MODELS
Interaction of externally-driven acoustic waves with compressible convection
| DE93-003800 | p 2476 N93-22775
Advanced reinforcement systems for intermetallic applications
| NASA-CR-4488 | p 2209 N93-22875
Recent results of multimagnetical simulations of the Ising model
| DE93-005213 | p 2475 N93-22951
An MHD study of the interaction between the solar wind and the interstellar medium
| NASA-CR-192353 | p 2556 N93-23067
Focused two-dimensional radar imaging using coherent time domain signals
| ESA-TT-1272 | p 2263 N93-23331
Nonlinear gravity wave transport and its role in the general circulation of the atmosphere
| AD-A259659 | p 2396 N93-23657
Develop an x-windows tool to compute Gaussian beam synthetic seismograms
| AD-A260034 | p 2400 N93-24253

TWO PHASE FLOW
Simulation of a particle-laden combustion flow in an MHD second stage combustor
| DE93-004244 | p 2491 N93-22065
Theoretical and pragmatic modelling of governing equations for a two-phase flow in bubbly and annular flow regimes
| DE93-004200 | p 2289 N93-22757
Engineering aspects of two-phase flow systems for heat transport p 2247 N93-22833
First results of a Freon 12 capillary pumped loop p 2249 N93-22846
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations, predictions versus experimental results p 2252 N93-22866
An investigation of particle turbulence quantities in a dense two-phase pipe flow, using laser Doppler velocimetry p 2295 N93-23496
Determination and characteristics of the transition to two-phase slug flow in small channels
| DE93-004250 | p 2299 N93-24434
Design manual for two-phase components of spacecraft thermal management systems
| AD-A260027 | p 2196 N93-24439

U

U.S.S.R.
Soviet automated rendezvous and docking system overview p 2142 N93-22265
JPRS report: Science and technology. Central Eurasia: Space
| JPRS-USP-93-001 | p 2153 N93-23103
Parallel processing research in the former Soviet Union
| PB93-134435 | p 2447 N93-23204
Extraction of information from satellite imagery to a GIS for environmental monitoring of the mining areas in northeastern Estonia p 2352 N93-23560

Cesium-137 in soil texture fractions and its impact on cesium-137 soil-to-plant transfer
| OEFZS-4632 | p 2375 N93-24456
Penetration mechanics research in the former Soviet Union
| PB93-146488 | p 2259 N93-24495

U.S.S.R. SPACE PROGRAM
Research experiences on materials science in space aboard Salyut and Mir p 2185 N93-22620
French Mir missions p 2156 N93-24348
Mir '92 project p 2157 N93-24350
The joint Austro-Soviet space project Austromir-91 p 2157 N93-24353
Flight experiences on board Space Station Mir p 2157 N93-24355
VideoMir: Satellite video conferencing during the AustroMir spaceflight p 2158 N93-24356
Technical management and test procedures for AustroMir-1991 p 2158 N93-24357

UH-60A HELICOPTER
Variable control system limits on Black Hawk and Seahawk helicopters
| AD-A259624 | p 2132 N93-24153
An integrated Rotorcraft Avionics/Controls Architecture to support advanced controls and low-altitude guidance flight research
| NASA-TM-103983 | p 2134 N93-24493

UK SPACE PROGRAM
United Kingdom Earth observation programme p 2373 N93-23848

ULTRAHIGH VACUUM
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment
| DE93-005917 | p 2479 N93-22418

ULTRASONIC FLAW DETECTION
Localized damage development in notched composite plates subjected to compressive loading
| CTN-93-60663 | p 2209 N93-23113
Research in ultrasonic measurements at NIST: 1982-1992
| PB93-152064 | p 2476 N93-23682
Nondestructive evaluation of electrodeposited chromium
| AD-A259884 | p 2321 N93-24020
Ultrasonic inspection of filament wound graphite epoxy cylinders
| AD-A260361 | p 2321 N93-24173

ULTRASONIC TESTS
Zero sound experiments in superfluid He3
| ISBN-951-22-0841-5 | p 2476 N93-23005
Fluid density and concentration measurement using noninvasive in situ ultrasonic resonance interferometry
| DE93-003741 | p 2220 N93-23051
Research in ultrasonic measurements at NIST: 1982-1992
| PB93-152064 | p 2476 N93-23682
Acoustic emission of structural materials exposed to open flames
| PB93-138980 | p 2477 N93-23951
Ultrasonic inspection of filament wound graphite epoxy cylinders
| AD-A260361 | p 2321 N93-24173

ULTRASONIC WAVE TRANSDUCERS
Fluid density and concentration measurement using noninvasive in situ ultrasonic resonance interferometry
| DE93-003741 | p 2220 N93-23051

ULTRASONICS
Research in ultrasonic measurements at NIST: 1982-1992
| PB93-152064 | p 2476 N93-23682

ULTRAVIOLET ASTRONOMY
ASCHOT: Astrophysical Schmidt Orbital Telescope p 2539 N93-23919
The ROSAT standard analysis software system p 2445 N93-23930
EXSAS: The interactive analysis system for ROSAT data p 2541 N93-23934

ULTRAVIOLET DETECTORS
Inner Magnetosphere Imager (IMI) instrument heritage
| NASA-CR-4498 | p 2391 N93-22685

ULTRAVIOLET EMISSION
Spectroscopy of highly-ionized atoms using position-sensitive detection
| DE93-002914 | p 2482 N93-22985

ULTRAVIOLET LASERS
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044

ULTRAVIOLET PHOTOGRAPHY
Study of high spatial resolution narrow spectral band ultraviolet images of the earth's atmosphere
| AD-A260035 | p 2400 N93-24254

ULTRAVIOLET PHOTOMETRY
Inner Magnetosphere Imager (IMI) instrument heritage
| NASA-CR-4498 | p 2391 N93-22685

ULTRAVIOLET RADIATION
Design and manufacture of optical system for use in UV lithography with the free electron laser
| DE93-005440 | p 2307 N93-22539
In-situ characterization of growth and interfaces in a-Si:H devices
| DE93-000051 | p 2504 N93-22928
The effect of UV light on Ir absorption in chemically vapor deposited a-SiN(x):H films
| DE93-004502 | p 2486 N93-22941
Effects of UV-B and global climate change on rice
| PB93-135622 | p 2388 N93-23874
Multiple molecular scattering and albedo action on the solar spectral irradiance in the region of the UVB (less than or equal to 320 nm): A preliminary inventory
| AERONOMICA-ACTA-A-363-1991 | p 2558 N93-24637

ULTRAVIOLET SPECTROMETERS
Solar maximum mission/ultraviolet spectrometer and polarimeter studies
| NASA-CR-192463 | p 2555 N93-23011
SO2 on Venus: A final cross-calibration with Pioneer Venus
| NASA-CR-192273 | p 2554 N93-23096
ORFEUS: Scientific targets and optical performance p 2537 N93-23905

ULTRAVIOLET TELESCOPES
Inner Magnetosphere Imager (IMI) instrument heritage
| NASA-CR-4498 | p 2391 N93-22685
LUTE primary mirror materials and design study report
| NASA-CR-192487 | p 2487 N93-22961
The optical design of the spectrocoronagraph: An ultraviolet coronagraph payload for a sounding rocket platform p 2489 N93-24189

ULYSSES MISSION
Concept of a small satellite for URM p 2199 N93-23922
Search for gamma ray burst sources by coordinated observations from Ulysses, GRO, and PVO p 2540 N93-23929

UMBILICAL CONNECTORS
US automated rendezvous and capture capabilities review. Remote umbilical system abstract p 2138 N93-22239

UMBRAS
The source of five-minute period photospheric umbral oscillations p 2548 N93-23214

UNDERGROUND EXPLOSIONS
Effects of UGTs on the ionosphere
| DE93-000793 | p 2392 N93-22806

UNDERGROUND STORAGE
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803

UNDERWATER ACOUSTICS
Chinese research on underwater acoustics
| PB93-134468 | p 2476 N93-23229
Microtopography of manganese crusts
| PB93-120830 | p 2398 N93-23996
On the physical boundary conditions in the ocean/bottom acoustic interaction model
| FFI-92/7023 | p 2416 N93-24091

UNDERWATER STRUCTURES
Advanced underwater lift device
| NASA-CR-185709 | p 2169 N93-22877
A computer simulation of a hyperbaric chamber environment
| AD-A260137 | p 2134 N93-23705

UNDERWATER VEHICLES
Perception, scene reconstruction and world modeling for unmanned underwater vehicles
| PB93-146983 | p 2459 N93-23443

UNITED NATIONS
UNESCO remote sensing and GIS activities in the International Space Year p 2371 N93-23840
Space activities and environmental protection: Role of the United Nations p 2372 N93-23841
Satellite data protection from the point of view of a data user: Preparation for full utilization of remote sensing technology p 2374 N93-23854

UNITED STATES
Gridded state maps of wind electric potential
| DE93-004556 | p 2379 N93-22988
Nested Grid Model performance during cold offshore and warm onshore flow over the Gulf of Mexico
| PB93-108090 | p 2404 N93-23090
NTIA Terrain Data Base System Documentation (Program DUMPTERS, Extract and Ternd). Version 4.0, October 1992
| PB93-108330 | p 2343 N93-23254
Analysis of acid precipitation samples collected by state agencies
| PB93-144152 | p 2386 N93-23276
Public libraries in the US, 1990
| PB93-127926 | p 2525 N93-23285
Environmental quality
| PB93-139814 | p 2387 N93-23440
The role of GPS in a future radionavigation mix: Trends in the 1992 US Federal Radionavigation Plan p 2124 N93-23509
US data policy for Earth observation from space p 2373 N93-23852
Scenario development for the northeast United States 500 millibar height field p 2408 N93-23968
Total quality management in the Federal Government. Implementation of TQM in federal agencies receiving the Federal Quality Institute Quality Improvement Prototype Award, 1990-1992
| PB93-154573 | p 2521 N93-24306
In the national interest: The Federal Government and research-intensive universities
| PB93-140135 | p 2518 N93-24583
Future of the US space industrial base: A task group report
| PB93-139954 | p 2522 N93-24585

UNITS OF MEASUREMENT
The 77th National Conference on Weights and Measures
| PB93-130466 | p 2258 N93-23270

UNIVERSE
Mapping the Universe: Statistical measures of the galaxy distribution
| ETN-93-93456 | p 2542 N93-23116
A study of properties of dark galaxy halos in a CDM universe using N-body computer simulations p 2546 N93-23132
Stochastic inflation and inflationary density fluctuations p 2473 N93-24457

UNIVERSITIES
College education p 2516 N93-23143
Pipeline issues p 2517 N93-23148
State and local governments p 2517 N93-23149
Space support forum p 2153 N93-23160
The tropical school for atmospheric and space sciences: An international project proposal p 2369 N93-23828
In the national interest: The Federal Government and research-intensive universities
| PB93-140135 | p 2518 N93-24583

UNIVERSITY PROGRAM
The role of university research in aviation safety and competitiveness: Testimony to the US Congress
| NIAR-92-3 | p 2116 N93-22379
University guide to NASA, 1993
| NASA-EP-287 | p 2152 N93-22383
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems
| DE93-005795 | p 2376 N93-22417
Joint University Program for Air Transportation Research, 1991-1992
| NASA-CP-3193 | p 2105 N93-22561
First National Space Grant Conference report
| NASA-EP-275 | p 2516 N93-23140
Evaluation of NASA space grant consortia programs p 2516 N93-23141
College education p 2516 N93-23143
The use of continuing adult education p 2516 N93-23144
Publicity and public relations p 2516 N93-23145
Underrepresented groups p 2517 N93-23146
Outreach and public service p 2517 N93-23147
State and local governments p 2517 N93-23149
University-industry interaction p 2517 N93-23151
Organization and management of space grant programs p 2517 N93-23152
Communications p 2517 N93-23153
Use of fellowships p 2517 N93-23154
Pitfalls p 2517 N93-23155
NASA-UVA Light Aerospace Alloy and Structures Technology Program: LA(2)ST
| NASA-CR-192354 | p 2230 N93-23193
Research activities and highlights of the University of Maryland's Department of Aerospace Engineering p 2571 N93-24478
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
| PB93-152031 | p 2416 N93-24605

UNIX (OPERATING SYSTEM)
Network storage service usage characteristics
| DE93-003998 | p 2446 N93-22755

UNMANNED SPACECRAFT
Fuzzy logic path planning system for collision avoidance by an autonomous rover vehicle p 2451 N93-22217
Manned versus unmanned rendezvous and capture p 2137 N93-22234
Preparation for analysis of data from the langmuir probe instrument on the CRRES satellite
| AD-A260534 | p 2201 N93-24280

UNSTEADY AERODYNAMICS
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
| NASA-TM-107732 | p 2108 N93-22457
Algorithm and code development for unsteady three-dimensional Navier-Stokes equations
| NASA-CR-192760 | p 2292 N93-23234
An overview of aeroelasticity studies for the National Aerospace Plane
| NASA-TM-107728 | p 2111 N93-23422
UNSTEADY FLOW
Spatial adaptation procedures on tetrahedral meshes for unsteady aerodynamic flow calculations
| NASA-TM-107726 | p 2108 N93-22552
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
| NASA-TM-4436 | p 2110 N93-22876
Tip-vortex/airframe interactions p 2111 N93-23489
Active control of the separation region on a two-dimensional airfoil p 2112 N93-23589
Chaotic vibrations of tubes with nonlinear supports in crossflow
| DE93-004247 | p 2329 N93-23689
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
| AD-A260118 | p 2113 N93-23714
Development of iterative techniques for the solution of unsteady compressible viscous flows
| NASA-CR-192636 | p 2296 N93-23724
Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics
p 2113 N93-24136
An experimental study of the driving mechanism and control of the unsteady shock-induced turbulent separation in a Mach 5 compression corner flow
p 2114 N93-24209
The effect of large-scale unsteady motion on a turbulent reattaching shear layer: Application to the supersonic compression ramp p 2114 N93-24215
An oscillating three-dimensional wing experiment: Compressibility, sweep, rate, waveform, and geometry effects on unsteady separation and dynamic stall
| AD-A260530 | p 2114 N93-24224
Control of two- and three-dimensional wake instabilities from bluff-bodies
| AD-A260410 | p 2299 N93-24428
Numerical modeling of fluidic flow meters
| PB93-124139 | p 2301 N93-24577
UNSTEADY STATE
Fundamental design and numerical simulation of the nonsteady behavior of a solar-dynamic power module for space applications
| DLR-FB-92-09 | p 2382 N93-24139
UPPER ATMOSPHERE
Upper-air circulation systems p 2337 N93-22138
Effects of UGTs on the ionosphere
| DE93-000793 | p 2392 N93-22806
SUMS experiment flight results on STS-35
| NASA-TM-107738 | p 2201 N93-23407
Metallic ions and atoms in the upper atmosphere
| AD-A259741 | p 2394 N93-23478
Source mechanisms and radio effects of ionospheric plasma
| AD-A259743 | p 2395 N93-23480
UPPER ATMOSPHERE RESEARCH SATELLITE (UARS)
NASA's upper atmosphere research satellite: A program to study global ozone change p 2357 N93-23750
URANIUM
The nucleation and growth of uranium on the basal plane of graphite studied by scanning tunneling microscopy
| DE93-006279 | p 2501 N93-22510
URBAN DEVELOPMENT
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903
Results of international meeting held in Tunis (Tunisia) p 2368 N93-23818
Study of the cultivated land losses around Tunis p 2368 N93-23819
URINE
Survey of aviation medical examiners: Information and attitudes about the pre-employment and pre-appointment drug testing program
| DOT/FAA/AM-92/15 | p 2422 N93-24088
USER MANUALS (COMPUTER PROGRAMS)
User's guide to the Penn State/NCAR Mesoscale Modeling System
| PB93-126654 | p 2391 N93-22380
PLTPWR: A versatile tool for greyscale and power spectral display
| DREA-TC-92-306 | p 2435 N93-22473
GROPE: A GENESIS/EXODUS database examination program
| DE93-006963 | p 2523 N93-22514
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704
User's manual for the ALS base heating prediction code, volume 2
| NASA-CR-192457 | p 2203 N93-22962
VASGEN: A finite element model generation program for VAST. User's manual, version 4.0
| DREA-CR-91-447 | p 2437 N93-23089
Advanced communications technology satellite high burst rate link evaluation terminal communication protocol software user's guide, version 1.0
| NASA-CR-189162 | p 2437 N93-23134
Common Carrier Earth Station Application
| PB93-111722 | p 2263 N93-23268
NTIA Microcomputer Spectrum Analysis Models (MSAM). Version 4.0, August 1992
| PB93-108348 | p 2432 N93-23269
SPRING2: Helical compression spring geometry generator program manual
| DREA-TC-92-314 | p 2438 N93-23345
High Temperature Composite Analyzer (HITCAN) demonstration manual, version 1.0
| NASA-TM-106003 | p 2328 N93-23411
LARCRIM user's guide, version 1.0
| NASA-CR-191416 | p 2439 N93-23432
Nuclear Engine System Simulation (NESS). Version 2.0: Program user's guide
| NASA-CR-191081 | p 2204 N93-23875
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
| NASA-CR-191080 | p 2204 N93-23876
Soar-mode v5.0 user's manual for Soar release 5.2 and 6.0
| AD-A259914 | p 2441 N93-23997
Blade Assessment for Ice Impact (BLASIM). User's manual, version 1.0
| NASA-CR-191075 | p 2331 N93-24102
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. User's guide. Volume 1. NGDC key to geophysical records documentation No. 26
| PB93-146082 | p 2389 N93-24334
PROMISC user manual, appendix 2
| NASA-CR-192989 | p 2332 N93-24529
PROMISS user manual, appendix 1
| NASA-CR-192990 | p 2333 N93-24530
A trajectory generation and system characterization model for cislunar low-thrust spacecraft. Volume 1: User's manual
| NASA-CR-185171 | p 2205 N93-24536
User's guide to Flexible Membrane Liner Advisory Expert System, Flex version 3.0
| PB93-134872 | p 2259 N93-24559
AutoMOUSE: An improvement to the MOUSE computerized uncertainty analysis system operational manual
| PB93-100113 | p 2443 N93-24587
A user's manual for software GPR92
| MATHS-REPT-A-175 | p 2444 N93-24642
Global ecosystems database. Version 1.0 (on CD-ROM). EPA global climate research program. NOAA/NGDC global change database program. Documentation manual, DISC-A. Volume 1. NGDC key to geophysical records documentation No. 27
| PB93-146090 | p 2390 N93-24645
USER REQUIREMENTS
Advanced display object selection methods for enhancing user-computer productivity
p 2444 N93-22151
The use of remote sensing data in a statistical ground utilization information system p 2341 N93-22447
Assessing federal and commercial information security needs
| PB93-138956 | p 2525 N93-23228
Action 4 from image to statistics: Operational review after two years of rapid estimates of acreages and potential yields of major annual crops throughout the European community p 2360 N93-23770
Off-shore platform identification signs
| CAA-PAPER-92006 | p 2123 N93-24124
Environment Observation and Climate Modelling Through International Space Projects. Columbus Eight (COSY-8): Utilisation of Earth Orbiting Laboratories
| ESA-ISY-4 | p 2154 N93-24336
User support for the Spacelab mission D-2
p 2155 N93-24340
Columbus precursor Spacelab missions
p 2155 N93-24341
UTAH
Assessment of regional earthquake hazards and risk along the Wasatch Front, Utah
| PB93-115657 | p 2400 N93-24214
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
| PB93-110997 | p 2521 N93-24557
UTILITIES
Status report on renewable energy in the States
| DE93-000032 | p 2381 N93-23671
Electric and hybrid vehicle program; Site Operator Program
| DE93-005239 | p 2319 N93-24444
UTRICLE
Micromotional studies of utricular and canal afferents
| NASA-CR-192703 | p 2417 N93-22800

V

V/STOL AIRCRAFT
A full-scale STOVL ejector experiment
| NASA-TM-106019 | p 2129 N93-22480
VACUUM
Sample positioning in microgravity
| NASA-CASE-NPO-18448-1-CU | p 2253 N93-24600
VACUUM CHAMBERS
A new approach for helium backfilling and leak testing seal-welded capsules in a hot cell
| DE93-004519 | p 2317 N93-24049
VALENCE
Synchrotron studies of narrow band materials
| DE93-006981 | p 2502 N93-22526
A structural study of charge-density-wave perturbations in mixed-halide MX solids
| DE93-005449 | p 2503 N93-22747
VAN DE GRAAFF ACCELERATORS
Ultra-high velocity impacts: Cratering studies of microscopic impacts from 3 km/s to 30 km/s
| DE93-003846 | p 2327 N93-23291
VANADIUM ALLOYS
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
| MBB-Z-0444-92-PUB | p 2239 N93-23365
VANADIUM OXIDES
Reversible potassium vanadium bronze cathodes (K(x)V6O(13+y)) with various potassium to vanadium ratios
| CTN-93-60709 | p 2285 N93-24291
VANES
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
VAPOR DEPOSITION
A nonequilibrium model for a moderate pressure hydrogen microwave discharge plasma
| NASA-TM-104765 | p 2492 N93-22475
Lightweight solar concentrator structures, phase 2
| NASA-CR-191068 | p 2203 N93-22674
Tests of Hercules/Ultramet CVD coatings in hot hydrogen
| DE93-005533 | p 2237 N93-22909
In-situ characterization of growth and interfaces in a-Si:H devices
| DE93-000051 | p 2504 N93-22928
Substrate surface structure effects on microstructure of epitaxial films
| DE93-005562 | p 2504 N93-22944
Diamond homoepitaxy by chemical vapor deposition
| AD-A260551 | p 2512 N93-24281
VAPOR PHASE EPITAXY
Integration and use of Microgravity Research Facility: Lessons learned by the crystals by vapor transport experiment and Space Experiments Facility programs
p 2193 N93-22652
VAPOR PHASES
Structure of confined laminar spray diffusion flames: Numerical investigation
| NASA-TM-106038 | p 2288 N93-22596
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
| DE93-004432 | p 2228 N93-22724
In-situ characterization of growth and interfaces in a-Si:H devices
| DE93-000051 | p 2504 N93-22928
The influence of carbon dioxide on the catalytic oxidative coupling of methane over A-La2O3 and 2-La2O2CO3
| DE93-004800 | p 2220 N93-22989
Determination of rates of reaction in the gas-phase in the troposphere. Theory and practice. 5. Rate of indirect photoreaction
| PB93-149334 | p 2402 N93-24569
Spectroscopic study of different phases of the VPO system in relation to their catalytic properties: In situ catalyzer measurement by Raman spectroscopy
| ECL-91-21 | p 2225 N93-24623

VAPORIZING
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
|DE93-005474| p 2500 N93-22342
The combustion of droplets within gas turbine combustors: Some recent observations on combustion efficiency
|PERD-JO-194| p 2221 N93-23117
VAPORS
Active Hydrazine Vapor Sampler (AHVS)
p 2225 N93-22165
VARIABILITY
Temporal sampling requirements for low frequency temperature variability in the eastern equatorial Pacific Ocean
|PB93-136422| p 2413 N93-22893
X ray spectral structure of the Seyfert 2 galaxy NGC 5506 p 2536 N93-23898
VARIABLE CYCLE ENGINES
Conceptual design study of a variable cycle engine for a supersonic business jet
|ETN-93-93486| p 2130 N93-23371
New approaches for a second generation supersonic transport propulsion system
|DS-1934| p 2130 N93-23391
VARIATIONAL PRINCIPLES
A high performance spectral code for nonlinear MHD stability
|DE93-004541| p 2494 N93-22984
Variational theory of deformations of curved, twisted, and extensible elastic rods
|AD-A260331| p 2332 N93-24266
VECTOR ANALYSIS
A vector signal processing approach to color
|AD-A259499| p 2487 N93-23465
VECTOR PROCESSING (COMPUTERS)
Survey of benchmarks
|NPL-DITC-192/91| p 2436 N93-22816
Implementation of a Monte Carlo algorithm for neutron transport on a massively parallel SIMD machine
|DE93-005461| p 2447 N93-23245
Applications of parallel and vector algorithms in nonlinear structural dynamics using the finite element method
|PB93-142438| p 2439 N93-23436
A vector signal processing approach to color
|AD-A259499| p 2487 N93-23465
Development of iterative techniques for the solution of unsteady compressible viscous flows
|NASA-CR-192636| p 2296 N93-23724
VECTOR QUANTIZATION
An investigative study of multispectral data compression for remotely-sensed images using vector quantization and difference-mapped shift-coding p 2445 N93-22157
Two generalizations of Kohonen clustering
p 2449 N93-22207
Applications of wavelet-based compression to multidimensional Earth science data
p 2430 N93-24547
VECTORS (MATHEMATICS)
Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
|DE93-000041| p 2376 N93-22334
Combined magnetic vector-scalar potential finite element computation of 3D magnetic field and performance of modified Lundell alternators in Space Station applications
|NASA-CR-192348| p 2263 N93-23215
VEGETATION
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation
p 2407 N93-23495
Vegetation mapping and a statistical approach for the reconstruction of the potential forest cover using LANDSAT-5-TM-data and DTM p 2354 N93-23573
Simulation of MOMS-02 stereo band radiometric capability using field spectroscopy data
p 2365 N93-23802
On regional surface fluxes over partly forested areas
|MPIM-82| p 2397 N93-23858
The climate induced variation of the continental biosphere: A model simulation of the last glacial maximum
|AERONAUTICA-ACTA-A-366| p 2389 N93-24089
VEGETATION GROWTH
Monitoring of growth environment of forest
p 2336 N93-22135
The implications of concurrent increases in temperature and CO2 concentration for terrestrial C3 photosynthesis
|DE93-005590| p 2385 N93-23035
CO2 exchange, environmental productivity indices, and productivity of opuntia ficus-indica under current and elevated CO2 concentrations
|DE93-006091| p 2386 N93-23301
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
Contribution of remote sensing and GIS for rangeland management in the region of Ouarzazate (Morocco)
p 2367 N93-23814
VEGETATIVE INDEX
Vegetation distribution of South East Asia
p 2336 N93-22134
Monitoring of growth environment of forest
p 2336 N93-22135
Investigation of the surface condition in Taklimakan Desert p 2337 N93-22136
Vegetation index for Europe p 2340 N93-22443
VELOCITY DISTRIBUTION
Structure of confined laminar spray diffusion flames: Numerical investigation
|NASA-TM-106038| p 2288 N93-22596
Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
|NASA-TM-105986| p 2129 N93-22599
Marangoni convection in a spinning liquid column
|LRT-WE-9-FB-13-1991| p 2289 N93-22678
Electron-electron interactions in fast neutral-neutral collisions
|DE93-004841| p 2481 N93-22743
Physical interest of two-phase flow experiments at micro-g condition p 2249 N93-22848
Kinetic energy distributions of sputtered neutral aluminum clusters: Al-Al6
|DE93-004815| p 2230 N93-22991
Evaluation of nozzle shapes for an optical flow meter
|PB93-124147| p 2292 N93-23281
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
|AD-A260118| p 2113 N93-23714
Bottom generated velocity fluctuations in one-dimensional open channel flow
|MEMO-1051| p 2297 N93-23865
GX301-2/WRA9777 revisited: Probing the stellar wind through x ray optical data p 2537 N93-23911
Three-dimensional turbulent boundary layer flow over a spinning cylinder
|NASA-TM-102240| p 2300 N93-24533
An experimental investigation of subsonic flow in a two-dimensional U-duct
|NASA-TM-103931| p 2128 N93-24535
VELOCITY MEASUREMENT
Six-Degree-of-Freedom Test Facility
p 2136 N93-22231
Coherent Doppler lidar for automated space vehicle, rendezvous, station-keeping and capture
p 2139 N93-22250
Autonomous reconfigurable GPS/INS navigation and pointing system for rendezvous and docking
p 2151 N93-22316
Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
|NASA-TM-105986| p 2129 N93-22599
Optical diagnostic for heat and mass transfer in fluids in microgravity p 2246 N93-22831
Acoustic determination of dewpoints in natural gas mixtures and retrograde condensates
|PB93-142917| p 2221 N93-23274
Development of optical three-dimensional measurement techniques for fluid dynamics p 2294 N93-23398
Development of a laser-induced fluorescence system for application to rocket plumes
|AD-A259760| p 2205 N93-24025
A thermal type probe for low velocity measurements
p 2165 N93-24397
Control of two- and three-dimensional wake instabilities from bluff-bodies
|AD-A260410| p 2299 N93-24428
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
|NASA-TM-102642| p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
|NASA-TM-102643| p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
|NASA-TM-102645| p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
|NASA-TM-102644| p 2116 N93-24528
Experimental study of the separating confluent boundary-layer. Volume 2: Experimental data. Appendices A-E: Data supplement
|NASA-CR-166018-SUPPL| p 2299 N93-24531
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
|NASA-TM-101599| p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
|NASA-TM-101598| p 2116 N93-24540
Experimental study of a three-dimensional shear-driven turbulent boundary layer with streamwise adverse pressure gradient
|NASA-TM-102211| p 2300 N93-24541
VENUS (PLANET)
Model of Venus ionopause formation
p 2554 N93-23354
VENUS ATMOSPHERE
SO2 on Venus: A final cross-calibration with Pioneer Venus
|NASA-CR-192273| p 2554 N93-23096
VERTEBRATES
Computer based analysis and synthesis of retinal function
|AD-A260514| p 2423 N93-24420
VERTICAL MOTION SIMULATORS
Simulation evaluation of a low-altitude helicopter flight guidance system adapted for a helmet-mounted display
|NASA-TM-103883| p 2122 N93-23419
A demonstration of motion base design alternatives for the National Advanced Driving Simulator
|NASA-TM-103881| p 2428 N93-24490
VERTICAL ORIENTATION
AudiMir: Directional hearing at microgravity
p 2159 N93-24365
Optovert: An AustroMir-1991 experiment. Orientational effects from optokinetic stimulation
p 2160 N93-24366
VERTICAL PERCEPTION
Optovert: An AustroMir-1991 experiment. Orientational effects from optokinetic stimulation
p 2160 N93-24366
VERY HIGH FREQUENCIES
Widebanding techniques for VHF antennas, 1
|AD-A259301| p 2260 N93-22399
A hybrid voice/data modulation for the VHF aeronautical channels p 2106 N93-22567
VERY LARGE SCALE INTEGRATION
Driving a car with custom-designed fuzzy inferencing VLSI chips and boards p 2451 N93-22218
The multi-scale veto model: A two-stage analog network for edge detection and image reconstruction
|AD-A259600| p 2462 N93-24069
A method for skew-free distribution of digital signals using matched variable delay lines
|AD-A260171| p 2272 N93-24133
Hyperstructures as computer architectures for high performance multiprocessor systems
|ISBN-0-315-58975-2| p 2433 N93-24613
VLSI architectural synthesis for DSP custom applications
|ISBN-0-315-57793-2| p 2433 N93-24621
VERY LOW FREQUENCIES
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
VESTIBULAR TESTS
Micromotional studies of utricular and canal afferents
|NASA-CR-192703| p 2417 N93-22800
Neural processing of gravity information
|NASA-CR-192766| p 2419 N93-23233
VESTIBULES
Micromotional studies of utricular and canal afferents
|NASA-CR-192703| p 2417 N93-22800
VHF OMNIRANGE NAVIGATION
Toward achieving global sole means radionavigation systems p 2121 N93-22794
VIBRATION
A vibrational analysis of Au implanted Al2O3 single crystals: Ion and thermal annealing effects
|DE93-006216| p 2501 N93-22508
Hemispherical resonator gyro: Principle, design, and performance p 2120 N93-22784
Well-posedness of a model for structural acoustic coupling in a cavity enclosed by a thin cylindrical shell
|NASA-CR-191439| p 2473 N93-22878
Control and analysis of a single-link flexible beam with experimental verification
|DE93-003756| p 2314 N93-23289
A multiple scales approach to sound generation by vibrating bodies
|NASA-CR-191414| p 2294 N93-23409

Chaotic vibrations of tubes with nonlinear supports in crossflow
| DE93-004247 | p 2329 N93-23689

VIBRATION DAMPING
A modal test of a space-truss for structural parameter identification
| DE93-004043 | p 2323 N93-22518
System identification of the JPL micro-precision interferometer truss
| DE93-004044 | p 2323 N93-22519
Precursor SSF utilization: The MODE experiments p 2188 N93-22633
Modal identification experiment p 2188 N93-22635
Damping measurements from an operating wind turbine: Preliminary results and procedures
| DE93-005357 | p 2377 N93-22873
Vibration control experiments on a 12-meter cantilever truss structure
| AD-A259764 | p 2328 N93-23484
Maneuver and vibration control of flexible space structures by Lyapunov stability theory p 2195 N93-23956

VIBRATION EFFECTS
Influence due to satellite attitude jitter on estimation of Digital Elevation Model (DEM) p 2350 N93-23551
High-voltage failure mechanisms in liquid-filled, Fluorinert FC-40, capacitors
| DE93-006286 | p 2282 N93-23677

VIBRATION ISOLATORS
Experimental and analytical study of a hybrid isolation system using friction controllable sliding bearings
| PB93-150282 | p 2320 N93-24595

VIBRATION MEASUREMENT
Vibration Pattern Imager (VPI): A control and data acquisition system for scanning laser vibrometers
| NASA-TM-107721 | p 2476 N93-22553
Modal identification experiment p 2188 N93-22635
Dynamic response characteristics of two transport models tested in the National Transonic Facility
| NASA-CR-191420 | p 2125 N93-23047

VIBRATION METERS
Vibration Pattern Imager (VPI): A control and data acquisition system for scanning laser vibrometers
| NASA-TM-107721 | p 2476 N93-22553
Proposed ground-based control of accelerometer on Space Station Freedom
| NASA-TM-105960 | p 2201 N93-23738

VIBRATION MODE
Modal identification experiment p 2188 N93-22635
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704
The effects of delamination on the vibrational characteristics of composite structural elements p 2210 N93-23202
Damage evaluation of structures using frequencies and mode shapes extracted from laser interferometry
| AD-A260119 | p 2329 N93-23700

VIBRATION TESTS
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
| NASA-TM-106080 | p 2313 N93-23019
Experimental and analytical study of a hybrid isolation system using friction controllable sliding bearings
| PB93-150282 | p 2320 N93-24595

VIBRATIONAL SPECTRA
Local vibronic and electronic excitations of doping-induced states in the copper oxides
| DE93-003844 | p 2501 N93-22429
Coherent anti-Stokes Raman spectroscopy of highly vibrationally excited molecules
| AD-A260381 | p 2484 N93-24275
Laser spectroscopy of chemically reactive species
| DE93-006672 | p 2310 N93-24326

VIDEO COMMUNICATION
Video conferencing made easy p 2275 N93-22173
Automated rendezvous and docking with video imagery p 2148 N93-22298
Newly available technologies present expanding opportunities for scientific and technical information exchange
| NASA-CR-4494 | p 2261 N93-22470
An electronic stroll through the global village
| DE93-005962 | p 2446 N93-22763
VideoMir: Satellite video conferencing during the AustroMir spaceflight p 2158 N93-24356

VIDEO DATA
A study of video frame rate on the perception of moving imagery detail p 2431 N93-24552

VIDEO DISKS
Laser disc for Earth environment data set p 2338 N93-22142
Meteo Disc: Satellite cloud motion presentation by interactively controlled video disc for research, teaching, and training p 2371 N93-23835

VIDEO EQUIPMENT
Video guidance sensor for autonomous capture p 2142 N93-22267
Concurrent-scene/alternate-pattern analysis for robust video-based docking systems p 2150 N93-22315

VIDEO SIGNALS
Real-time transmission of digital video using variable-length coding
| NASA-TM-106092 | p 2261 N93-22483

VIEWING
A PARC system for terminal docking p 2141 N93-22259
A study of video frame rate on the perception of moving imagery detail p 2431 N93-24552

VINEYARDS
Vineyard cadastre monitoring using remote sensed data in an integrated GIS p 2351 N93-23556

VIRGINIA
State and local governments p 2517 N93-23149
Small business profiles, 1992. Region 3: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
| PB93-110948 | p 2520 N93-24157

VIRTUAL REALITY
Virtual reality applications to automated rendezvous and capture p 2141 N93-22261

VISCOELASTICITY
Incremental, quasistatic, uniaxial finite element analysis in the linear viscoelasticity theory, exemplarily demonstrated by the Burger material
| ETN-93-93422 | p 2324 N93-22680
Viscoelastic properties of 3-D braided PEEK/graphite composites p 2214 N93-24103
Basic research on macromolecular dynamics
| PB93-138907 | p 2240 N93-24142
Composite passive damping struts for large precision structures
| NASA-CASE-NPO-17914-1-CU | p 2333 N93-24596

VISCOMETERS
Oscillating-body viscometry and its application to phase-separating liquid mixtures p 2293 N93-23386

VISCOMETRY
Oscillating-body viscometry and its application to phase-separating liquid mixtures p 2293 N93-23386

VISCOPLASTICITY
Studies in penetration mechanics
| AD-A260436 | p 2332 N93-24304

VISCOSITY
On the nonlinear interfacial instability of rotating core-annular flow
| NASA-CR-191432 | p 2289 N93-22811
Thermophysical properties
| DE93-007807 | p 2220 N93-22916
Poloidal variation of viscous forces in the banana collisionality regime
| DE93-006822 | p 2499 N93-24504
Solubility, viscosity and density of refrigerant/lubricant mixtures
| DE93-007809 | p 2243 N93-24506

VISCOUS FLOW
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
Development of iterative techniques for the solution of unsteady compressible viscous flows
| NASA-CR-192636 | p 2296 N93-23724

VISIBILITY
Sensory sensitivities and discriminations and their roles in aviation
| AD-A259742 | p 2424 N93-23479
Development and application of procedures to evaluate air quality and visibility impacts of low-altitude flying operations
| AD-A259903 | p 2408 N93-23990

VISION
Valency of different information categories and its importance for the effectiveness of image analysis by the visual system and automatic systems p 2354 N93-23577

VISUAL AIDS
Sensory sensitivities and discriminations and their roles in aviation
| AD-A259742 | p 2424 N93-23479
Off-shore platform identification signs
| CAA-PAPER-92006 | p 2123 N93-24124

VISUAL FIELDS
Multidimensional signal coding in the visual system
| AD-A259836 | p 2488 N93-23696

VISUAL FLIGHT
Visual autonomous automatic landing of airplanes p 2121 N93-22791

VISUAL OBSERVATION
Apparatus and method for computer vision measurements
| PB93-135077 | p 2432 N93-22536

VISUAL PERCEPTION
A PARC system for terminal docking p 2141 N93-22259
A vector signal processing approach to color
| AD-A259499 | p 2487 N93-23465
Sensory sensitivities and discriminations and their roles in aviation
| AD-A259742 | p 2424 N93-23479
Multidimensional signal coding in the visual system
| AD-A259836 | p 2488 N93-23696
Theory of synaptic plasticity in visual cortex
| AD-A260052 | p 2424 N93-23960
Why do we see three-dimensional objects?
| AD-A259892 | p 2424 N93-23986
Apparent opacity affects perception of structure from motion
| AD-A260099 | p 2488 N93-24054
Theory of synaptic plasticity in visual cortex
| AD-A260322 | p 2422 N93-24238
What makes a good feature?
| AD-A259962 | p 2463 N93-24249
Eye movements and visual information processing
| AD-A259955 | p 2425 N93-24297
Human visual limitations on suprathreshold contrast perception through ANVIS
| AD-A259970 | p 2425 N93-24431

VISUAL SIGNALS
Visual system performance for driving simulators
| MBB-FE-521-S-PUB-0497 | p 2132 N93-22393

VISUAL TASKS
Visual system performance for driving simulators
| MBB-FE-521-S-PUB-0497 | p 2132 N93-22393

VITREOUS MATERIALS
Lightweight solar concentrator structures, phase 2
| NASA-CR-191068 | p 2203 N93-22674

VLASOV EQUATIONS
Equilibria and stability of non-adiabatic Vlasov-Maxwellian plasmas p 2497 N93-23998

VOICE COMMUNICATION
Newly available technologies present expanding opportunities for scientific and technical information exchange
| NASA-CR-4494 | p 2261 N93-22470
A hybrid voice/data modulation for the VHF aeronautical channels p 2106 N93-22567
High Arctic high frequency radio communications and a seven day polar cap absorption event
| DREP-TM-91-18 | p 2264 N93-23344
Airline applications in air-/ground communication using advanced technologies p 2275 N93-23514
A current assessment of single site locating technology p 2267 N93-23608
A low-delay backward-adaptive CELP speech coder
| ISBN-0-315-60461-1 | p 2274 N93-24618

VOICE CONTROL
Micro-video display with ocular tracking and interactive voice control p 2433 N93-22172

VOIDS
Solute binding at void surfaces in silicon and germanium
| DE93-004504 | p 2233 N93-24048

VOLCANOES
Verification of effectiveness of MOS-1b data in disaster area p 2337 N93-22137
Cartography of hazards from geological instabilities: Volcanic regions in Peru p 2368 N93-23815

VOLT-AMPERE CHARACTERISTICS
A model for voltammograms of the under-potential deposition of copper on solid gold (111) in the presence of bisulfate
| AD-A260309 | p 2234 N93-24237

VOLTAGE AMPLIFIERS
Design of low-voltage bipolar operational amplifiers
| ISBN-90-9004571-6 | p 2280 N93-23021

VORTEX ALLEVIATION
Active control of the separation region on a two-dimensional airfoil p 2112 N93-23589

VORTEX SHEETS
Tip-vortex/airframe interactions p 2111 N93-23489
Separated flow past smooth slender bodies p 2298 N93-24213

VORTICES
Dynamic response and control of a jet-transport aircraft encountering a single-axis vortex p 2107 N93-22575
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
| NASA-CR-192349 | p 2110 N93-23108
Experimental investigation of developing and fully developed flow in a curved duct of square cross section
| ISBN-0-315-70029-7 | p 2291 N93-23177
Turbulence models for helical flow
| GKSS-92/E/12 | p 2291 N93-23189

The three-dimensional evolution of a plane mixing layer. Part 2: Pairing and transition to turbulence
| NASA-TM-103926 | p 2294 N93-23417
Renormalization group estimates of transport coefficients in the advection of a passive scalar by incompressible turbulence
| NASA-CR-191421 | p 2295 N93-23421
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481
Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592
Analysis of a high speed civil transport configuration at subsonic flow conditions using a Navier-Stokes solver
| NASA-CR-4490 | p 2127 N93-24108
Measurement and prediction of tip-clearance effects in a linear turbine cascade
| ISBN-0-315-68826-2 | p 2130 N93-24176
Collaborative testing of turbulence models
| AD-A260277 | p 2298 N93-24259
The effects of three-dimensional imposed disturbances on bluff body near wake flows
| AD-A259501 | p 2298 N93-24311
A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
| ETN-93-93701 | p 2299 N93-24487
Role of acoustics in flame/vortex interactions
| NASA-CR-191429 | p 2299 N93-24494
Numerical modeling of fluidic flow meters
| PB93-124139 | p 2301 N93-24577

VORTICITY
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
The three-dimensional evolution of a plane mixing layer. Part 2: Pairing and transition to turbulence
| NASA-TM-103926 | p 2294 N93-23417
Studies of baroclinic flow
| AD-A259739 | p 2414 N93-23475
Vortex simulation of turbulent combustion
| AD-A259745 | p 2222 N93-23481

VULNERABILITY
Vulnerability assessment of aircraft: A review of the Department of Defense Live Fire Test and Evaluation Program
| PB93-149946 | p 2127 N93-23678

W

WAKES
Tip-vortex/airframe interactions p 2111 N93-23489
Wake-induced unsteady stagnation region heat transfer measurements p 2295 N93-23591
Computation of rotor aerodynamic loads in forward flight using a full-span free wake analysis
| NASA-CR-177611 | p 2113 N93-24058
Control of two- and three-dimensional wake instabilities from bluff-bodies
| AD-A260410 | p 2299 N93-24428

WALKING MACHINES
Kinematics and dynamics of robotic systems with multiple closed loops p 2318 N93-24218

WALL FLOW
Turbulence modelling of flow fields in thrust chambers
| NASA-CR-192466 | p 2202 N93-22382
Numerical study of axial turbulent flow over long cylinders p 2295 N93-23592
Slotted-wall flow-field measurements in a transonic wind tunnel
| NASA-TM-4280 | p 2113 N93-24111

WALL PRESSURE
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
| AD-A260149 | p 2297 N93-24132

WALL TEMPERATURE
Summary of experimental heat-transfer results from the turbine hot section facility
| NASA-TP-3250 | p 2290 N93-23059

WALLS
Analysis of upward flame spread
| DE93-752850 | p 2257 N93-22770
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864

WARNING SYSTEMS
Emergency vehicle alert system, phase 2
| NASA-CR-192464 | p 2260 N93-22455
Automated tools for testing computer system vulnerability
| PB93-146025 | p 2433 N93-23273
Condition based machinery maintenance (helicopter fault detection), phase 1
| AD-A259774 | p 2316 N93-23477
On-line health monitoring: An integrity improvement for the civil use of GPS and GLONASS p 2125 N93-23535
Ground proximity warning system for use with aircraft having degraded performance
| CA-PATENT-1-295-716 | p 2118 N93-24200
Neural networks for the monitoring of rotating machinery
| DE93-003549 | p 2464 N93-24503

WASHING
Method and apparatus for cleaning rubber deposits from airport runways and roadways
| NASA-CASE-LAR-14483-1 | p 2256 N93-22035

WASHINGTON
High speed ground transportation study: Executive summary
| PB93-141091 | p 2532 N93-22903
Small business profiles, 1992, Region 10: Alaska, Idaho, Oregon, and Washington
| PB93-111011 | p 2521 N93-24305

WASTE DISPOSAL
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803
Summary of activities of the Life Cycle Costing Workshop conducted by the Environmental Restoration Program of Oak Ridge National Laboratory
| DE93-000823 | p 2531 N93-22935
Treatment of human-computer interface in a decision support system
| DE93-002281 | p 2428 N93-24502

WASTE TREATMENT
Environmental projects. Volume 14: Removal of contaminated soil and debris
| NASA-CR-192803 | p 2384 N93-22803
Treatment of human-computer interface in a decision support system
| DE93-002281 | p 2428 N93-24502

WASTE WATER
Variable-Volume Flushing (V-VF) device for water conservation in toilets p 2429 N93-22167

WATER
Method and apparatus for cleaning rubber deposits from airport runways and roadways
| NASA-CASE-LAR-14483-1 | p 2256 N93-22035
Photovoltaic evaluation study
| DE93-761330 | p 2378 N93-22956
Solar pumping: An introduction and update on the technology, performance, costs, and economics
| WORLD BANK TP-168 | p 2381 N93-23444
Water regions extraction from radar imagery using a neural network
| AD-A259517 | p 2356 N93-23668
Correlation and prediction of snow water equivalent from snow sensors
| PB93-127413 | p 2374 N93-23870
Identification of specific protein markers that correlate with initiation and progression of microbially influenced corrosion
| AD-A258453 | p 2233 N93-23982
High performance nanocomposite desiccation materials
| PB93-127025 | p 2223 N93-24210
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment
| AD-A259986 | p 2401 N93-24424

WATER CIRCULATION
Coupling an ocean wave model to an atmospheric general circulation model
| MPIM-72 | p 2395 N93-23632
Climate variability in a coupled GCM. Part 1: The tropical pacific
| MPIM-73 | p 2407 N93-23633
On the space-time structure of ENSO
| MPIM-74 | p 2407 N93-23634
A hybrid coupled tropical atmosphere ocean model: Sensitivities and hindcast skill
| MPIM-76 | p 2396 N93-23635
Application of ocean models for the interpretation of AGCM experiments on the climate of the last glacial maximum
| MPIM-80 | p 2416 N93-24581

WATER COLOR
SeaWiFS Technical Report Series. Volume 8: Proceedings of the First SeaWiFS Science Team Meeting
| NASA-TM-104566 | p 2413 N93-23010
The program of oceanological experiments within the Priroda project p 2361 N93-23773
Ocean colour programmes for the European marine environment p 2366 N93-23808
Remote sensing and geographic informations systems: Implications for Global Marine Fisheries
| PB93-149409 | p 2374 N93-24309

WATER DEPTH
Evaluation of the Bathyscan sweep survey system
| AD-A260182 | p 2415 N93-23708

WATER FLOW
Measurement and interpretation for the turbulent flow wall pressure field of a dilute polymer solution within a rectangular channel containing smooth walls
| AD-A260149 | p 2297 N93-24132

WATER MANAGEMENT
Variable-Volume Flushing (V-VF) device for water conservation in toilets p 2429 N93-22167

WATER POLLUTION
The Mavale project: Evaluation of potential pollution sources to superficial and subterranean water resources in the Paraiba do Sul Valley, Brazil
| INPE-5318-PRE/1715 | p 2385 N93-23105
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
Use of coastal zone color scanner imagery to identify nearshore ocean areas affected by land-based pollutants
| PB93-136604 | p 2343 N93-23278
Susceptibility of East Coast estuaries to nutrient discharges: Passamaquoddy Bay to Chesapeake Bay
| PB93-136927 | p 2387 N93-23438
Arctic Contaminants Research Program: Research Plan
| PB93-135630 | p 2387 N93-23439
Environmental quality
| PB93-139814 | p 2387 N93-23440
Proceedings of the 12th Annual Gulf of Mexico Information Transfer Meeting
| PB93-152031 | p 2416 N93-24605

WATER QUALITY
Investigation of the applicability of remote sensing techniques for ecological water quality evaluation
| BCRS-91-37 | p 2342 N93-23106
Publications Office of Science and Technology: Catalog
| PB93-152577 | p 2529 N93-24560
Development of membrane film fiber optic based sensors for the remote monitoring of the quality of surface and groundwater
| PB93-150001 | p 2375 N93-24638

WATER RECLAMATION
Zero-G life support for Space Station Freedom p 2189 N93-22640
Global Climate Change Response Program: A mid-course evaluation
| PB93-146355 | p 2387 N93-23427

WATER RESOURCES
Global Climate Change Response Program: A mid-course evaluation
| PB93-146355 | p 2387 N93-23427
Correlation and prediction of snow water equivalent from snow sensors
| PB93-127413 | p 2374 N93-23870
Publications Office of Science and Technology: Catalog
| PB93-152577 | p 2529 N93-24560

WATER TEMPERATURE
Water temperature characteristics of lakes subjected to climate change
| PB93-135648 | p 2385 N93-23265

WATER VAPOR
Measurement of the critical level of moisture for initiation of water-vapor-induced environmental embrittlement in a Fe3Al-based alloy
| DE93-004104 | p 2226 N93-22069
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Generation of monodisperse droplets by spontaneous condensation of flow in nozzles
| NASA-CR-192356 | p 2287 N93-22401
Investigation of cloud/water vapor motion winds from geostationary satellite
| NASA-CR-192274 | p 2403 N93-22653
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
| DE93-000690 | p 2405 N93-23305
Analysis of H2O infrared radiance measured during the ELC-1 rocket experiment
| AD-A259986 | p 2401 N93-24424
Empirical determination of the effects of clouds on the Earth's Radiation Budget over the Pacific Ocean
| NASA-CR-192696 | p 2401 N93-24485
Observed annual and interannual variations in tropospheric water
| PB93-123313 | p 2411 N93-24588

WATER WAVES
ROWS wave spectral data collected in SAXON-FPN, November 1990
| NASA-TM-104582 | p 2412 N93-22387

On wave force analysis using system identification
| RR-450 | p 2293 N93-23361
The effects of multipath scatter from wind driven gravity waves on lines of bearing serving as direction finders
p 2265 N93-23601
Studies of mixing and internal waves in the upper ocean p 2415 N95-23962

WATERWAYS
Aids to Navigation Service Force Mix 2000 Project. Volume 2: Development and application of an Aids to Navigation Service Force Mix Decision Support System. Aid assignments and vessel summary reports
| PB93-142362 | p 2122 N93-23652

WATTMETERS
Journal of research of the National Institute of Standards and Technology, Nov. - Dec. 1992, volume 97, no. 6
| PB93-143923 | p 2571 N93-24570

WAVE AMPLIFICATION
Molecular design concept for x ray laser research
| DE93-004561 | p 2306 N93-22046

WAVE DIFFRACTION
Low altitude acoustic propagation analysis by use of a three-dimensional parabolic wave equation
| ONERA-P-1992-1 | p 2477 N93-24190
FESDIF: Finite Element Scalar Diffraction theory code
| DE93-007222 | p 2475 N93-24447

WAVE DISPERSION
Calculation of 3-D free electron laser gain: Comparison with simulation and generalization to elliptical cross section
| DE93-004768 | p 2308 N93-22920

WAVE DRAG
Automatic computation of wing-fuselage intersection lines and fillet inserts with fixed-area constraint
| NASA-TM-4406 | p 2108 N93-22487

WAVE EQUATIONS
Solution of the Helmholtz-Poincare Wave Equation using the coupled boundary integral equations and optimal surface eigenfunctions
| DE93-005300 | p 2470 N93-24038
Low altitude acoustic propagation analysis by use of a three-dimensional parabolic wave equation
| ONERA-P-1992-1 | p 2477 N93-24190

WAVE FRONTS
Prototyping of two-beam laser interferometer for measurement of optical turbulence along extended paths
| AD-A260229 | p 2310 N93-24320

WAVE FUNCTIONS
EXCPACK: A package of codes for electron impact excitation of ions by a distorted wave method
| DE93-006095 | p 2479 N93-22525
A detailed study of nonperturbative solutions of two-body Dirac equations
| DE93-004794 | p 2468 N93-22965

WAVE INTERACTION
Low frequency RF current drive
| DE93-005130 | p 2260 N93-22421
The collision of gravitational waves in a stiff perfect fluid
| MATHS-REPT-A-179 | p 2398 N93-24080
On the physical boundary conditions in the ocean/bottom acoustic interaction model
| FFI-92/7023 | p 2416 N93-24091

WAVE PACKETS
Numerical simulations of the control of wave packet disturbances in the boundary layer on a flat plate
| AD-A259923 | p 2289 N93-22734
Review of quantum computation
| DE93-003735 | p 2474 N93-22919

WAVE PROPAGATION
Contact-impact simulations on massively parallel SIMD supercomputers
| DE93-004188 | p 2445 N93-22060
A high-power 95 GHz gyro-TWT amplifier
| DE93-002332 | p 2277 N93-22425
Propagation of elastic waves through inhomogeneous, anisotropic materials
| DE93-006247 | p 2288 N93-22509
Photon acceleration via laser-produced ionization fronts
| DE93-005205 | p 2480 N93-22719
Interaction of externally-driven acoustic waves with compressible convection
| DE93-003800 | p 2476 N93-22775
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
| DE93-005833 | p 2493 N93-22779
Chinese research on underwater acoustics
| PB93-134468 | p 2476 N93-23229
Plasma theory p 2496 N93-23262
Source mechanisms and radio effects of ionospheric plasma
| AD-A259743 | p 2395 N93-23480
Spherical wave reflection and transmission
p 2487 N93 23499
Asymptotic analysis of: 1: Wave propagation in dispersive optical media with quadratic nonlinearity. 2: A hypersonic wing with three-dimensional self-similarity
p 2112 N93-23594
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
On the propagation of a gravitational wave in a stiff perfect fluid
| MATHS-REPT-A-178 | p 2398 N93-24079
On the physical boundary conditions in the ocean/bottom acoustic interaction model
| FFI-92/7023 | p 2416 N93-24091
The acoustical impedance at the junction of non-coaxial cylindrical ducts
| MATHS-REPT-A-157 | p 2477 N93-24123
An analytical study of some problems in partial differential equaticns with applications to fluid dynamics and wave propagation
| AD-A260351 | p 2470 N93-24169
Develop an x-windows tool to compute Gaussian beam synthetic seismograms
| AD-A260034 | p 2400 N93-24253
Atom wave interferometer
| AD-A260082 | p 2484 N93-24410
A semi-empirical analysis of strong-motion peaks in terms of seismic source, propagation path, and local site conditions
| PB93-150266 | p 2402 N93-24629

WAVE REFLECTION
Spherical wave reflection and transmission
p 2487 N93-23499
High resolution shear wave reflection surveying for hydrogeological investigations
| DE93-004732 | p 2398 N93-24006

WAVE SCATTERING
Solution of the Helmholtz-Poincare Wave Equation using the coupled boundary integral equations and optimal surface eigenfunctions
| DE93-005300 | p 2470 N93-24038

WAVE-PARTICLE INTERACTIONS
Transverse ion acceleration by localized lower hybrid waves in the topside auroral ionosphere
p 2394 N93-23388

WAVEFORMS
A comparison of deconvolution techniques
| DE93-007407 | p 2391 N93-22530
Unsteady blade pressures on a propfan: Predicted and measured compressibility effects
| NASA-CR-191087 | p 2111 N93-23431

WAVEGUIDES
A high-power 95 GHz gyro-TWT amplifier
| DE93-002332 | p 2277 N93-22425
Lateral deviation of VLF radio waves due to diffraction and scattering from coast-lines, mountain ranges, and polar ice caps p 2265 N93-23599
Characteristics of linearly tapered slot antenna with CPW feed on high resistivity silicon
| NASA-TM-106057 | p 2283 N93-23743
Millimeter-wave applications of semiconductor dielectric waveguides with plasma layers (surface or buried) generated from semiconductor lasers
| AD-A260484 | p 2510 N93-24134
The evaluation of hollow dielectric waveguides for thermometry and spectroscopy p 2285 N93-24295

WAVELENGTH DIVISION MULTIPLEXING
Intelligent, integrated fiber optic networks
| AD-A260282 | p 2490 N93-24260

WEAK INTERACTIONS (FIELD THEORY)
Color sextet quarks and new high-energy interactions
| DE93-004187 | p 2478 N93-22059
High sensitivity tests of the standard model for electroweak interactions
| DE93-006186 | p 2483 N93-23684
Study of electroweak interactions
| DE93-007261 | p 2484 N93-24510

WEAPON SYSTEMS
Advances in Guidance and Control of Precision Guided Weapons
| AGARD-CP-524 | p 2254 N93-22018
Linear payout systems for dispensing fiber-optic data links from precision-guided munitions or high-performance aircraft/missles p 2255 N93-22026
Versatile attack weapon p 2256 N93-22027
System concept for an advanced stand-off weapon
p 2256 N93-22029
Opportunities and challenges in avionics integration, INS/GPS: A case study p 2119 N93-22782
Trail maneuver generation and selection in the Paladin tactical decision generation system
| NASA-TM-107722 | p 2131 N93-23088
Vulnerability assessment of aircraft: A review of the Department of Defense Live Fire Test and Evaluation Program
| PB93-149946 | p 2127 N93-23678
Aircraft engine reliability analysis using lower confidence limit estimate procedures
| AD-A260386 | p 2131 N93-24271

WEAR
100-kW class applied-field MPD thruster component wear
| NASA-TM-106023 | p 2203 N93-22482
Friction microprobe investigation of particle layer effects on sliding friction
| DE92-018868 | p 2313 N93-22925
Boundary film for structural ceramic materials
| DE93-004871 | p 2240 N93-23975
Crystal chemistry of ceramic/mineral systems
| AD-A260440 | p 2241 N93-24193

WEAR RESISTANCE
Test requirements for coal-tar mixtures on airport pavements
| DOT/FAA/RD-92-27 | p 2134 N93-23137
Sputter ion plating on Ti6AlV4 and Ti(cp): Preparation and properties of oxidation and wear resistant coatings
| MBB-Z-0444-92-PUB | p 2239 N93-23365

WEAR TESTS
Test requirements for coal-tar mixtures on airport pavements
| DOT/FAA/RD-92-27 | p 2134 N93-23137

WEATHER
Air traffic operational evaluation plan of the automated surface observing system (ASOS) displays
| DOT/FAA/CT-TN92/36 | p 2121 N93-22801
Wind power plants in the weather conditions of Northern Finland
| DE93-752927 | p 2379 N93-22971
Water temperature characteristics of lakes subjected to climate change
| PB93-135648 | p 2385 N93-23265
Mariners weather log, volume 36, number 3, summer 1992
| PB93-132033 | p 2405 N93-23282
Mariners weather log, volume 36, number 4, fall 1992
| PB93-132041 | p 2405 N93-23283
The influence of variations of vegetation and soil moisture on surface weather and atmospheric circulation
p 2407 N93-23495
A comprehensive glossary of weather terms for storm spotters
| PB93-126940 | p 2407 N93-23649
Climatological probability of cloud-free line-of-sight
| AD-A260139 | p 2407 N93-23706
Equatorial atmospheric weather regimes: Their structure and role p 2411 N93-24580

WEATHER FORECASTING
Data sets for weather information services
p 2337 N93-22140
A convective drag theory for surface fluxes
| DE93-004037 | p 2403 N93-22722
Mariners weather log, volume 36, number 3, summer 1992
| PB93-132033 | p 2405 N93-23282
Impact of a Newtonian assimilation and physical initialization on the initialization and prediction in a tropical mesoscale model p 2394 N93-23353
Meteosat operational programme current missions and services p 2357 N93-23752
Intraseasonal relationships between tropical heating and extratropical jets
| AD-A260212 | p 2408 N93-24004
An investigation of the ERICA IOP-5A cyclone
| AD-A260214 | p 2408 N93-24097
The use of the Air Force cloud cover data to evaluate and improve cloud forecast and parameterization in mesoscale meteorology models
| AD-A260357 | p 2409 N93-24171
Meteorological data assimilation by adaptive Bayesian optimization p 2409 N93-24272

WEATHER STATIONS
US Navy regional climatic study of the Persian Gulf and the Northern Arabian Sea
| AD-A260363 | p 2409 N93-24239

WEATHERING
Workshop on chemical weathering on Mars, part 2
| NASA-CR-192261 | p 2554 N93-23192

WEIBULL DENSITY FUNCTIONS
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406
Aircraft engine reliability analysis using lower confidence limit estimate procedures
| AD-A260386 | p 2131 N93-24271

WEIGHT (MASS)
The 77th National Conference on Weights and Measures
| PB93-130466 | p 2258 N93-23270

WEIGHT INDICATORS
Specifications, tolerances, and other technical requirements for weighing and measuring devices as adopted by the 77th National Conference on Weights and Measures, 1992
| PB93-130474 | p 2257 N93-22895
WEIGHT MEASUREMENT
Specifications, tolerances, and other technical requirements for weighing and measuring devices as adopted by the 77th National Conference on Weights and Measures, 1992
| PB93-130474 | p 2257 N93-22895
WEIGHT REDUCTION
Vehicle systems p 2174 N93-22095
WEIGHTLESSNESS
Biomedical Monitoring and Countermeasures Facility p 2186 N93-22624
Zero-G life support for Space Station Freedom p 2189 N93-22640
Task Analysis of Shuttle Entry and Landing Activities
| NASA-TM-104761 | p 2178 N93-22702
Heat and mass transport in a hypercompressible fluid under zero gravity p 2250 N93-22852
Two techniques for measuring locomotion impact forces during zero G
| NASA-TP-3305 | p 2421 N93-23410
The joint Austro-Soviet space project Austromir-91 p 2157 N93-24353
Physiological experiments within the project AustroMir p 2157 N93-24354
Eye-head-arm coordination and spinal reflexes in weightlessness p 2159 N93-24362
Development and implementation of the MotoMir experiment on the Mir Space Station p 2159 N93-24363
Japanese treefrog experiment onboard the Space Station Mir p 2166 N93-24402
WEIGHTLESSNESS SIMULATION
Advanced underwater lift device
| NASA-CR-185709 | p 2169 N93-22877
WELD STRENGTH
Prediction of the quality of resistance welds by computer based color image analysis
| DE93-002402 | p 2312 N93-22818
WELDED JOINTS
GTAW penetration based on electrode tip location versus weld joint center line
| DE93-004910 | p 2311 N93-22494
Investigation of azimuthal stresses due to welding and cooldown
| DE93-005530 | p 2324 N93-22708
Prediction of the quality of resistance welds by computer based color image analysis
| DE93-002402 | p 2312 N93-22818
Investigation of gas metal arc welding characteristics of alloy 6013 p 2211 N93-23937
A new approach for helium backfilling and leak testing seal-welded capsules in a hot cell
| DE93-004519 | p 2317 N93-24049
WELDING
Investigation of azimuthal stresses due to welding and cooldown
| DE93-005530 | p 2324 N93-22708
Imaging technique for welding studies
| DE93-006449 | p 2316 N93-23694
WENTZEL-KRAMER-BRILLOUIN METHOD
Quantum mechanics of electrons in crystals with graded composition
| AD-A260294 | p 2512 N93-24262
WESTAR SATELLITES
Manned maneuvering unit applications for automated rendezvous and capture p 2137 N93-22233
WETLANDS
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
WETTABILITY
Wetting hysteresis of tin on silica solid surfaces of controlled periodic roughness p 2251 N93-22861
Study of the influence of the wettability of a wall on a thin film p 2252 N93-22864
WETTING
Wetting hysteresis of tin on silica solid surfaces of controlled periodic roughness p 2251 N93-22861
WHEAT
Analysis and synthesis of models for effects of climate change on agricultural systems
| DE93-007949 | p 2389 N93-24521
WHEELS
Life cycle testing of desiccant core samples
| PB93-127058 | p 2220 N93-23098
WHISKER COMPOSITES
Thermally induced micromechanical stresses in ceramic/ceramic composites
| DE93-004860 | p 2239 N93-23974
Effects of processing parameters on the microstructure of a 30 w/o SiCw-2080 aluminum composite
| NRC-IAR-CR-20 | p 2216 N93-24651
WHITE DWARF STARS
Model atmospheres for low temperature, helium-rich white dwarfs: Problems with the equation of state p 2546 N93-23065
WHITE NOISE
Performance analysis of the downlink DBPSK EHF-SATCOM system, part 1
| DREO-CR-041LM | p 2271 N93-23729
Suppression of power line harmonic interference in HF surface-wave radar
| AD-A259917 | p 2273 N93-24563
WICKS
Heat pipe fatigue test specimen: Metallurgical evaluation
| NASA-CR-189120 | p 2381 N93-23360
WIGGLER MAGNETS
A high-power 95 GHz gyro-TWT amplifier
| DE93-002332 | p 2277 N93-22425
Chaotic dynamics in accelerator physics
| DE93-004600 | p 2515 N93-22766
Calculation of 3-D free electron laser gain: Comparison with simulation and generalization to elliptical cross section
| DE93-004768 | p 2308 N93-22920
WILDERNESS
Correlation and prediction of snow water equivalent from snow sensors
| PB93-127413 | p 2374 N93-23870
WILDLIFE
Chesapeake Bay Program: Wetlands workgroup
| PB93-136893 | p 2385 N93-23266
WIND (METEOROLOGY)
Investigation of cloud/water vapor motion winds from geostationary satellite
| NASA-CR-192274 | p 2403 N93-22653
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
| NASA-CR-192349 | p 2110 N93-23108
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
| PB93-136497 | p 2396 N93-23650
WIND DIRECTION
ERS-1 scatterometer calibration and validation activities at ECMWF. B: From radar backscatter characteristics to wind vector solutions p 2359 N93-23764
WIND EFFECTS
The influence of wind-driven ocean circulation on Earth rotation p 2412 N93-22668
Direct numerical simulations and hydrodynamic stability problems in the upper oceanic mixed layer p 2414 N93-23490
Studies of mixing and internal waves in the upper ocean p 2415 N93-23962
WIND MEASUREMENT
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
Gridded state maps of wind electric potential
| DE93-004556 | p 2379 N93-22988
Application of spatially averaging optical techniques to the study of short-term flux changes associated with clouds
| DE93-000690 | p 2405 N93-23305
A satellite-based Radar Wind Sounder (RAWS) p 2406 N93-23384
Relationship of height gradients of passive atmospheric properties to their variances: Applications to the ground-based sensing of profiles
| PB93-136497 | p 2396 N93-23650
An advanced scatterometer for the European polar platform p 2363 N93-23787
Preliminary results from the analysis of wind component error, July data
| AD-A259654 | p 2408 N93-24022
WIND PROFILES
Mixed convective/dynamic roll vortices and their effects on initial wind and temperature profiles
| NASA-CR-192349 | p 2110 N93-23108
WIND SHEAR
Hazard evaluation and operational cockpit display of ground-measured windshear data
| AIAA PAPER 90-0566 | p 2105 N93-22564
Optimal recovery from microburst wind shear p 2107 N93-22574
Air traffic operational evaluation plan for the prototype Airport Surveillance Radar Wind Shear Processor (ASR-WSP) at Orlando International Airport
| DOT/FAA/CT-TN92/45 | p 2404 N93-23064
Annual and longitudinal variations of the Pacific North Equatorial Countercurrent
| NASA-CR-192805 | p 2414 N93-23138
Optimization of flight trajectories in a 3D model of windshear flow field p 2110 N93-23203
Modeling the tropical ocean response to westerly wind forcing
| AD-A260230 | p 2416 N93-24099
WIND TUNNEL APPARATUS
Icing research tunnel rotating bar calibration measurement system
| NASA-TM-106010 | p 2303 N93-22598
Fiber-optic interferometric sensors for measurements of pressure fluctuations: Experimental evaluation
| NASA-TM-104002 | p 2128 N93-23175
WIND TUNNEL CALIBRATION
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
WIND TUNNEL MODELS
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
| NASA-CR-189715 | p 2476 N93-22813
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
| NASA-TM-105267 | p 2325 N93-23015
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
| NASA-TM-102644 | p 2116 N93-24528
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
| NASA-TM-101599 | p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
| NASA-TM-101598 | p 2116 N93-24540
WIND TUNNEL TESTS
Comparison of anemometers for turbulence characterization
| DE93-004336 | p 2302 N93-22338
Subsonic aerodynamic characteristics of a proposed advanced manned launch system orbiter configuration
| NASA-TM-4439 | p 2108 N93-22558
Feasibility study on conducting overflight measurements of shaped sonic boom signatures using the Firebee BQM-34E RPV
| NASA-CR-189715 | p 2476 N93-22813
Shock tunnel studies of scramjet phenomena, supplement 6
| NASA-CR-191428 | p 2289 N93-22817
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
| NASA-TM-105267 | p 2325 N93-23015
Dynamic response characteristics of two transport models tested in the National Transonic Facility
| NASA-CR-191420 | p 2125 N93-23047
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel
| NASA-TM-103920 | p 2134 N93-23420
Wake-induced unsteady stagnation region heat transfer measurements p 2295 N93-23591
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
| AD-A260118 | p 2113 N93-23714
Experimental and numerical investigation of hydrogen combustion in a supersonic flow p 2223 N93-24212
Investigation of aerothermodynamics and optical radiation in the AFE hypersonic flow field
| NASA-CR-192844 | p 2114 N93-24475
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
| NASA-TM-101641 | p 2180 N93-24522
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
| NASA-TM-102643 | p 2115 N93-24525

Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
|NASA-TM-102645| p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
|NASA-TM-102644| p 2116 N93-24528
An experimental investigation of a supercritical airfoil at transonic speeds
|NASA-TM-103933| p 2300 N93-24534
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
|NASA-TM-101599| p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
|NASA-TM-101598| p 2116 N93-24540

WIND TUNNEL WALLS
Unsteady flow past a pitching airfoil at moderately high subsonic free stream Mach numbers
|AD-A260118| p 2113 N93-23714
Slotted-wall flow-field measurements in a transonic wind tunnel
|NASA-TM-4280| p 2113 N93-24111

WIND TUNNELS
Icing research tunnel rotating bar calibration measurement system
|NASA-TM-106010| p 2303 N93-22598
Annual progress report, 1990-1991
|CTN-93-60695| p 2570 N93-23115
Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 80- by 120-Foot Wind Tunnel
|NASA-TM-103920| p 2134 N93-23420

WIND TURBINES
Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
|DE93-000041| p 2376 N93-22334
An overview of DOE's wind turbine development programs
|DE93-000044| p 2376 N93-22335
Comparison of anemometers for turbulence characterization
|DE93-004336| p 2302 N93-22338
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade
|DE93-003253| p 2324 N93-22721
Damping measurements from an operating wind turbine: Preliminary results and procedures
|DE93-005357| p 2377 N93-22873
Wind power plants in the weather conditions of Northern Finland
|DE93-752927| p 2379 N93-22971
Fatigue and reliability analyses for wind turbines
|DE93-004497| p 2380 N93-23318

WIND VARIATIONS
The quasi-biennial oscillation in the middle atmosphere p 2397 N93-23965

WIND VELOCITY
Interannual variations of sea surface wind speed, water vapor retrieved from special sensor microwave/imager: El Nino/La Nina comparison p 2337 N93-22139
Comparison of anemometers for turbulence characterization
|DE93-004336| p 2302 N93-22338
Damping measurements from an operating wind turbine: Preliminary results and procedures
|DE93-005357| p 2377 N93-22873
Low-speed wind tunnel study of the direct lift and direct side-force characteristics of a joined-wing airplane
|DE93-767971| p 2115 N93-24508

WINDOWS (APERTURES)
High performance sapphire windows p 2310 N93-22198

WINDPOWER UTILIZATION
Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
|DE93-000041| p 2376 N93-22334
An overview of DOE's wind turbine development programs
|DE93-000044| p 2376 N93-22335
Wind power plants in the weather conditions of Northern Finland
|DE93-752927| p 2379 N93-22971
Gridded state maps of wind electric potential
|DE93-004556| p 2379 N93-22988

WINDPOWERED GENERATORS
Full vector (3-D) inflow simulation in natural and wind farm environments using an expanded version of the SNLWIND (Veers) turbulence code
|DE93-000041| p 2376 N93-22334
An overview of DOE's wind turbine development programs
|DE93-000044| p 2376 N93-22335

WING OSCILLATIONS
Wing flutter boundary prediction using an unsteady Euler aerodynamic method
|NASA-TM-107732| p 2108 N93-22457
Unsteady Euler and Navier-Stokes computations around oscillating delta wing including dynamics p 2113 N93-24136

WING TIP VORTICES
Tip-vortex/airframe interactions p 2111 N93-23489

WINGS
Automatic computation of wing-fuselage intersection lines and fillet inserts with fixed-area constraint
|NASA-TM-4406| p 2108 N93-22487
Aerodynamic sensitivity analysis in the transonic regime p 2109 N93-22667
A two-dimensional spoiler of arbitrary chordwise position in a low speed flow p 2127 N93-24211

WINTER
Real-time forcasts for WISP-91 using the Penn State/NCAR mesoscale model
|PB93-118586| p 2405 N93-23333

WIRE
Widebanding techniques for VHF antennas, 1
|AD-A259301| p 2260 N93-22399
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
|NASA-TM-105961| p 2231 N93-23418

WIRELESS COMMUNICATION
Wireless infrared communications for space and terrestrial applications p 2275 N93-22177

WIRING
Printed wiring assembly cleanliness
|DE93-006040| p 2277 N93-22524
Evaluation of Kapton pyrolysis, arc tracking, and flashover on SiO(x)-coated polyimide insulated samples of flat flexible current carriers for Space Station Freedom
|NASA-CR-191106| p 2258 N93-23430
Applicability of superconducting interconnection technology for high speed IC's and systems
|AD-A259706| p 2282 N93-23665
Applicability of superconducting interconnection technology for high speed IC's and systems
|AD-A259520| p 2285 N93-24302
Potential human health effects associated with power frequency electric and magnetic fields
|PB93-132678| p 2423 N93-24590

WISCONSIN
Small business profiles, 1992. Region 5: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
|PB93-110963| p 2520 N93-24158

WOOD
Design of gasifiers to optimize fuel cell systems
|DE93-000219| p 2379 N93-23049
Forest classification and dead wood mapping in the Bavarian Forest National Park (Germany) using LANDSAT TM and digital additional data
|DLR-FB-92-10| p 2374 N93-24140

WORDS (LANGUAGE)
Methods and means used in programming intelligent searches of technical documents p 2530 N93-22155
Knowledge From Pictures (KFP) p 2465 N93-22187

WORK HARDENING
Postirradiation deformation behavior in ferritic Fe-Cr alloys
|DE93-004833| p 2229 N93-22881

WORKLOADS (PSYCHOPHYSIOLOGY)
Operator interface assessment for the sensor fusion flight demonstration program
|AD-A260235| p 2129 N93-24416

WORKSTATIONS
Advanced software development workstation. Knowledge base design: Design of knowledge base for flight planning application
|NASA-CR-192818| p 2434 N93-22040
Advanced software development workstation. OOPSLA 1992 Conference. Trip report
|NASA-CR-192811| p 2432 N93-22041
Advanced software development workstation. Comparison of two object-oriented development methodologies
|NASA-CR-192819| p 2434 N93-22042
Video conferencing made easy p 2275 N93-22173
Treatment of human-computer interface in a decision support system
|DE93-002281| p 2428 N93-24502

WORLD DATA CENTERS
World data center A for solar-terrestrial physics. Catalog of coronal holes, 1970-1991
|PB93-138469| p 2556 N93-23334

WORLD METEOROLOGICAL ORGANIZATION
Programmes and strategy for the World Meteorological Organization with respect to Earth observation from space p 2372 N93-23842
World Meteorological Organization
|WMO-774| p 2408 N93-24061

WRENCHES
Wrench for installing an electrical connector
|AD-D015625| p 2318 N93-24220

WURTZITE
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
|DE93-005350| p 2505 N93-22974

WYOMING
Small business profile, 1992. Region 8: Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
|PB93-110997| p 2521 N93-24557

X

X RAY ABSORPTION
X ray absorption spectroscopy of dense, shock compressed, laser plasma p 2496 N93-23497

X RAY ANALYSIS
Pretransformation strain modulations in proper ferroelastics
|DE93-005468| p 2226 N93-22340
Localized damage development in notched composite plates subjected to compressive loading
|CTN-93-60663| p 2209 N93-23113
Plasma focus p 2496 N93-23264
X-ray computed tomography for advanced materials and processes
|AD-A259828| p 2213 N93-23953

X RAY APPARATUS
High performance microchannel heat exchanger for cooling high heat load x ray optical elements
|DE93-004245| p 2296 N93-23688

X RAY ASTRONOMY
Environment Observation and Climate Modelling Through International Space Projects. Space Sciences with Particular Emphasis on High-Energy Astrophysics
|ESA-ISY-3| p 2533 N93-23878
The ROSAT all-sky x ray survey p 2533 N93-23880
Overview of first observations with the French telescope Sigma on board Granat p 2533 N93-23881
Active galactic nuclei: The view from space p 2534 N93-23886
X ray morphology and the mass of clusters of galaxies p 2534 N93-23887
Observation of the extragalactic x ray background p 2535 N93-23892
X ray spectral structure of the Seyfert 2 galaxy NGC 5506 p 2536 N93-23898
ROSAT: The German x ray satellite nearly two years in orbit p 2538 N93-23916
Design and in orbit performance of the ROSAT PSPC p 2539 N93-23923
X raying the interstellar dust p 2540 N93-23925
SAX overview p 2540 N93-23927
The ROSAT standard analysis software system p 2445 N93-23930
EXSAS: The interactive analysis system for ROSAT data p 2541 N93-23934

X RAY BINARIES
Endpoints of stellar evolution: The incidence of stellar mass black holes in the galaxy p 2533 N93-23882
The x ray transient GS2023+338: The 0(sup d).24 and 6(sup d).5 modulations p 2536 N93-23901
Soft x ray emission from supergiant x ray binaries detected on the ROSAT all-sky survey p 2537 N93-23907
GX301-2/WRA9777 revisited: Probing the stellar wind through x ray optical data p 2537 N93-23911
The optical counterparts of the x ray binaries in NGC 6712 and 47 Tucanae p 2538 N93-23914

X RAY DIFFRACTION
Experimental demonstration of high resolution three-dimensional x ray holography
|DE93-004178| p 2302 N93-22072
Influence of addition elements in copper or implanted in aluminum on the adhesion to the solid state of the copper/aluminum (Cu/Al2O3) system
|ECL-91-34| p 2228 N93-22698
Pressure-induced amorphizations of silica analogues: A probe of the relationship between order and disorder
|DE93-007966| p 2237 N93-22730
A structural study of charge-density-wave perturbations in mixed-halide MX solids
|DE93-005449| p 2503 N93-22747

Modeling of x-ray diffraction line broadening with the Voigt function: Applications to high-T(c) superconductors
| PB93-152072 | p 2514 N93-24647

X RAY FLUORESCENCE
An x ray scatter approach for non-destructive chemical analysis of low atomic numbered elements
p 2485 N93-22184

X RAY IMAGERY
Applications of x ray lasers
| DE93-005299 | p 2308 N93-22953
Obtaining high-resolution images of ceramic from 3-D x-ray microtomography by region-of-interest reconstruction
| DE93-006796 | p 2243 N93-24461
Digital mammography, cancer screening: Factors important for image compression p 2424 N93-24551

X RAY INSPECTION
X ray computed tomography for whole system evaluation (small engines)
| AD-A259519 | p 2130 N93-23669

X RAY LASERS
Molecular design concept for x ray laser research
| DE93-004561 | p 2306 N93-22046
Application of 10 GeV electron driven x ray laser in gamma ray laser research
| DE93-003775 | p 2308 N93-22773
Applications of nanosecond, kilojoule lasers to the basic physics of waves in plasmas
| DE93-005833 | p 2493 N93-22779
Applications of x ray lasers
| DE93-005299 | p 2308 N93-22953
Inexpensive capillary discharge x ray laser driver
| AD-A260388 | p 2310 N93-24276

X RAY SCATTERING
X raying the interstellar dust p 2540 N93-23925

X RAY SOURCES
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas
| DE93-003834 | p 2492 N93-22428
Gamma ray pulsars and Geminga
| DE93-005452 | p 2559 N93-22749
Overview of first observations with the French telescope Sigma on board Granat p 2533 N93-23881
Observation of the extragalactic x ray background
p 2535 N93-23892
Extragalactic radio sources in the ROSAT survey
p 2536 N93-23899
ROSAT observations in star forming regions
p 2538 N93-23917
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933

X RAY SPECTRA
Gamma ray pulsars and Geminga
| DE93-005452 | p 2559 N93-22749
Radiation magnetohydrodynamic modeling of x ray output from perturbed plasma implosions
| DE93-005454 | p 2494 N93-22907
Active galactic nuclei: The view from space
p 2534 N93-23886
ROSAT observations of active galactic nuclei
p 2534 N93-23888
X ray spectral structure of the Seyfert 2 galaxy NGC 5506 p 2536 N93-23898
Soft x ray emission from supergiant x ray binaries detected on the ROSAT all-sky survey
p 2537 N93-23907
A2163: An exceptionally hot cluster of galaxies
p 2538 N93-23913

X RAY SPECTROSCOPY
An x ray scatter approach for non-destructive chemical analysis of low atomic numbered elements
p 2485 N93-22184
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
| NASA-TM-106014 | p 2236 N93-22560
Studies of cosmic dusts using synchrotron radiation
p 2549 N93-23390
X ray absorption spectroscopy of dense, shock compressed, laser plasma p 2496 N93-23497

X RAY STARS
An experimental study of the possible association of deep underground muons with astronomical point sources p 2549 N93-23596

X RAY TELESCOPES
Inner Magnetosphere Imager (IMI) instrument heritage
| NASA-CR-4498 | p 2391 N93-22685

X RAYS
An x ray scatter approach for non-destructive chemical analysis of low atomic numbered elements
p 2485 N93-22184
X ray computed tomography for whole system evaluation (small engines)
| AD-A259519 | p 2130 N93-23669
Low-damage multilayer mirror for the soft x ray region
| AD-D015621 | p 2489 N93-24231

X-30 VEHICLE
An overview of aeroelasticity studies for the National Aerospace Plane
| NASA-TM-107728 | p 2111 N93-23422

XENON
Generation of ultra-high magnetic fields by a degenerate, snow-plow pinch
| DE93-005831 | p 2493 N93-22869

XENON ISOTOPES
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
| DE93-004585 | p 2217 N93-22339

XENON 133
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
| DE93-004585 | p 2217 N93-22339

XENON 135
Isotope identification of purified xenon and krypton by low-background gamma spectroscopy
| DE93-004585 | p 2217 N93-22339

XV-15 AIRCRAFT
An improved CAMRAD model for aeroelastic stability analysis of the XV-15 with advanced technology blades
| NASA-TM-4448 | p 2125 N93-22486

XYLOSE
Xylose fermentation to ethanol
| DE93-000067 | p 2244 N93-22929

Y

YAG LASERS
Laser-induced breakdown spectroscopy for remote elemental analysis of planetary surfaces
| DE93-003865 | p 2553 N93-22949

YARNS
Approximating the stress field within the unit cell of a fabric reinforced composite using replacement elements
| NASA-CR-191422 | p 2211 N93-23877

YAWING MOMENTS
Flight investigation of the effect of tail boom strakes on helicopter directional control
| NASA-TP-3278 | p 2108 N93-22654

YBCO SUPERCONDUCTORS
Evolution and dynamics of excimer laser vaporized YBa2Cu3O(7-delta) plumes
| DE93-005474 | p 2500 N93-22342
An experimental investigation of high temperature superconducting microstrip antennas at K- and Ka-band frequencies
| NASA-CR-191089 | p 2277 N93-22479
Electronic structure studies of YBa2Cu3O(x)(6.2 less than equal to x less than or equal to 6.9) using angle resolved photoemission
| DE93-004811 | p 2501 N93-22493
Flux pinning structures in melt-processed YBa2Cu3O(7-x)
| DE93-005151 | p 2501 N93-22497
De Haas van Alphen effect in superconductors in megagauss fields
| DE93-005465 | p 2277 N93-22540
Design of high-T(sub c) bolometers on silicon membranes for a far infrared imaging array
| DE93-004784 | p 2303 N93-22706
A comparison of twin boundary pinning in nearly fully stoichiometric and oxygen deficient YBa2Cu3O(7-delta)
| DE93-004854 | p 2503 N93-22745
Superconductivity and flux pinning in Nd(1 + x)Ba(2-x)Cu(3)O(7 + delta)
| DE93-004444 | p 2505 N93-23052
Novel materials synthesis using an intense pulsed ion beam
| DE93-005470 | p 2506 N93-23314
Enhanced vortex pinning and critical current density in proton-irradiated YBa2Cu3O(7-delta) thin films
| DE93-005367 | p 2507 N93-23326
A theoretical analysis of the effect of uniaxial elastic strain on the critical temperature of cuprate superconductors
| DE93-005710 | p 2507 N93-23329
Magnetic anisotropy in the high transition temperature superconductor YBa2Cu3O(7-delta)
p 2509 N93-23985
Neutron measurements of the vortex lattice in YBa2Cu3O7
| DE93-005417 | p 2509 N93-24008
High temperature superconducting compounds
| AD-A259926 | p 2284 N93-24129
Superconductivity devices: Commercial use of space
| NASA-CR-192841 | p 2513 N93-24483
Studies of microstructure/critical current density relationships for grain boundaries in YBa2Cu3O(7-delta) bicrystals
| DE93-003000 | p 2513 N93-24512

YEAST
Biological production of hydrogen
| DE93-002604 | p 2219 N93-22736
Xylose fermentation to ethanol
| DE93-000067 | p 2244 N93-22929
Biotechnical production and use of pyruvic acid with special reference to coenzyme regeneration
| VTT-PUBS-77 | p 2419 N93-23369

YIELD STRENGTH
Optimal bolt preload for dynamic loading
| DE92-017527 | p 2313 N93-22923

YOUTH
Pre-college education p 2516 N93-23142
Pipeline issues p 2517 N93-23148

YTTRIUM OXIDES
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)
| DE93-004445 | p 2503 N93-22726
Recent progress in zirconia-based fuel cells for power generation
| DE93-003488 | p 2383 N93-24513

Z

ZEEMAN EFFECT
Low temperature transport through a quantum dot: The Anderson model out of equilibrium
| AD-A260184 | p 2484 N93-24467

ZEOLITES
High performance nanocomposite desiccation materials
| PB93-127025 | p 2223 N93-24210
Gas separations using ceramic membranes
| DE93-003204 | p 2225 N93-24498

ZINC SELENIDES
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
| DE93-005420 | p 2505 N93-22976
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292

ZINC SULFIDES
Epitaxial ZnS, ZnSe and ZnS-ZnSe superlattices grown on (001)GaAs by pulsed-laser ablation
| DE93-005420 | p 2505 N93-22976
Monte Carlo simulation of high-field electron transport in alternating-current thin-film electroluminescent devices
| AD-A260274 | p 2264 N93-24166
Aspects of single crystal and thin film high field electroluminescence p 2512 N93-24292

ZINC TELLURIDES
Growth and optical characterization of ZnMnTe grown by molecular beam epitaxy
| DE93-005350 | p 2505 N93-22974

ZIRCALOYS (TRADEMARK)
Amorphization kinetics of Zr(Cr,Fe)2 under ion irradiation
| DE93-005560 | p 2230 N93-22943

ZIRCONIUM ALLOYS
Generalized melting criterion for amorphization
| DE93-005557 | p 2226 N93-22345
Molecular dynamics simulation of radiation-induced amorphization of the ordered compound NiZr2
| DE93-005558 | p 2230 N93-22977
Characterization of SAES St198 zirconium-iron-tin alloy
| DE93-005697 | p 2230 N93-23036

ZIRCONIUM CARBIDES
Low-temperature deposition of ZrC thin films from a single source precursor
| DE93-007333 | p 2514 N93-24518

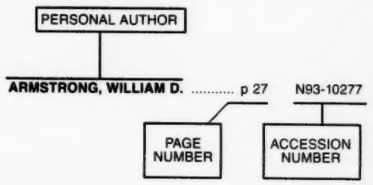
ZIRCONIUM OXIDES
Boundary film for structural ceramic materials
| DE93-004871 | p 2240 N93-23975
Mechanics and mechanisms of cyclic fatigue-crack propagation in transformation-toughened zirconia ceramics
| DE93-004716 | p 2330 N93-24051
Recent progress in zirconia-based fuel cells for power generation
| DE93-003488 | p 2383 N93-24513

ZONAL FLOW (METEOROLOGY)
The quasi-biennial oscillation in the middle atmosphere p 2397 N93-23965

ZONE MELTING
Excimer laser surface modification: Process and properties
| DE93-003726 | p 2306 N93-22044

ZOOPLANKTON
The environmental biogeochemistry of open ocean and partially enclosed marine systems p 2413 N93-23130

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

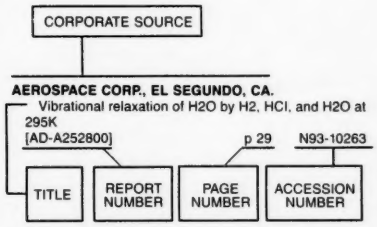
Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABB POWER GENERATION, INC., NORTH BRUNSWICK, NJ.
Advanced Turbine Design Program
[DE93-005077] p 2317 N93-24007

ACADEMIA SINICA, KUNMING (CHINA).
The relation between x ray-selected and radio-selected BL Lac objects p 2541 N93-23933

ACADEMY OF SCIENCES, GRAZ (AUSTRIA).
The joint Austro-Soviet space project Austromir-91 p 2157 N93-24353

ACADEMY OF SCIENCES, POTSDAM (GERMAN D.R.).
Applications of satellite data on seismic risk assessment: Strain analysis of fault lineament systems p 2349 N93-23546
ASCHOT: Astrophysical Schmidt Orbital Telescope p 2539 N93-23919
Nearby dwarf galaxies: Dust masses and their implications p 2540 N93-23928

ACADEMY OF SCIENCES, ULAN BATOR (MONGOLIA).
An application of remote sensing and GIS technique in Mongolia (on the example of experiment GEOMON-1990) p 2354 N93-23574

ACADEMY OF SCIENCES OF THE LATVIAN SSR, RIGA.
A thermal type probe for low velocity measurements p 2165 N93-24397

ACADEMY OF SCIENCES (USSR), MOSCOW.
The scientific program of the Priroda project p 2360 N93-23771
Evaluation of geosystem dynamics and their spatial structure benchmark for Priroda p 2361 N93-23772
Usage of small-sized aerospace plane in the infrastructure of space research of the Earth p 2362 N93-23781
Priroda project: Optical sensors for environment research p 2362 N93-23782

ADVANCED COMMUNICATIONS TECHNOLOGY, INC., SILVER SPRING, MD.
Universal Index System p 2530 N93-22152

ADVANCED TECHNOLOGY MATERIALS, INC., DANBURY, CT.
Gas source molecular beam epitaxial growth of GaN
[AD-A260524] p 2512 N93-24199

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
Advances in Guidance and Control of Precision Guided Weapons
[AGARD-CP-524] p 2254 N93-22018
Integrated and Multi-Function Navigation
[AGARD-CP-525] p 2119 N93-22780
Terminology and assessment methods of solid propellant rocket exhaust signatures
[AGARD-AR-287] p 2204 N93-22998
Radiolocation Techniques
[AGARD-CP-528] p 2265 N93-23598

AERITALIA S.P.A., POMIGLIANO D'ARCO (ITALY).
A system for the numerical simulation of complex configuration internal aerodynamic fields for the aerospace industry
[ETN-93-93698] p 2110 N93-23364
A method for the analysis of complex configuration three dimensional internal vortices based on the solution of Euler equations
[ETN-93-93701] p 2299 N93-24487

AERITALIA S.P.A., ROME (ITALY).
Review of aeronautical fatigue investigation activities developed in Aeritalia-GAT during the period May 1987 - April 1989
[ETN-93-93702] p 2126 N93-23401

AEROJET-GENERAL CORP., SACRAMENTO, CA.
Advanced rocket propulsion p 2174 N93-22091

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Designing for damage tolerant composite repairs
[AD-A260094] p 2214 N93-24053
Variable control system limits on Black Hawk and Seahawk helicopters
[AD-A259624] p 2132 N93-24153

AERONAUTICAL RESEARCH LABS., TAICHUNG (TAIWAN).
The characterization of impact properties of composites p 2213 N93-23945

AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OH.
Attitude awareness enhancements for the F-16 head-up display
[AD-A260280] p 2428 N93-24168

AEROSPACE CORP., EL SEGUNDO, CA.
Metallo-organic solution deposition of ferroelectric PZT films
[AD-A260127] p 2502 N93-22549

AEROSPACE MEDICAL DIV. AEROSPACE MEDICAL RESEARCH LABS. (6570TH), WRIGHT-PATTERSON AFB, OH.
Operator interface assessment for the sensor fusion flight demonstration program
[AD-A260235] p 2129 N93-24416

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Implementing total quality management (TQM) 1: The command imperative
[AD-A259885] p 2520 N93-23981

AEROSPATIALE, CANNES (FRANCE).
Potentialities and limitations of topographic mapping from synthetic aperture radar p 2350 N93-23547
Medium Resolution Imaging Spectrometer (MERIS) p 2363 N93-23785

AEROSPATIALE, MAGNY-LES-HAMEAUX (FRANCE).
Localization system based on data merging of images and inertia p 2269 N93-23623
Automatic feature extraction and localization using data fusion of radar and infrared images p 2270 N93-23628

AGRICULTURAL RESEARCH SERVICE, NEW ORLEANS, LA.
Applications of fibrous substrates containing insolubilized phase change polymers p 2320 N93-22181

AIR-CONDITIONING AND REFRIGERATION TECHNOLOGY INST., INC., ARLINGTON, VA.
Thermophysical properties
[DE93-006427] p 2216 N93-22056
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE93-006426] p 2237 N93-22884
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE93-007806] p 2237 N93-22915
ARTI refrigerant database
[DE93-006431] p 2239 N93-23949

AIR FORCE CIVIL ENGINEERING CENTER, TYNDALL AFB, FL.
Hydrazine decay in the atmosphere: Controlled-environment chamber studies and kinetic modeling
[AD-A260252] p 2389 N93-24165

AIR FORCE ENGINEERING AND SERVICES CENTER, TYNDALL AFB, FL.
Chlorotrifluoroethylene decay in the atmosphere: Controlled-environment chamber studies
[AD-A259902] p 2388 N93-23989

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, SCOTT AFB, IL.
Climatological probability of cloud-free line-of-sight
[AD-A260139] p 2407 N93-23706
ASPAM (Atmospheric Slant Path Analysis Model) statistical paired differences pilot study for sample size determination
[AD-A260288] p 2411 N93-24568

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.
Solution to a multicriteria aircraft routing problem utilizing parallel search techniques
[AD-A259293] p 2119 N93-22398
Comparison of four-cursor buttons versus joystick to access computerized technical information from an integrated maintenance information system
[AD-A259967] p 2526 N93-23462
Comparative evaluation of a monocular head mounted display device versus a flat screen display device in presenting aircraft maintenance technical data
[AD-A259684] p 2427 N93-23660
Support measurement and estimating for oracle database applications using Mark 2 function points
[AD-A259686] p 2440 N93-23661
Scientific visualization of volumetric radar cross section data
[AD-A259586] p 2272 N93-24065
Face recognition with neural networks
[AD-A259587] p 2462 N93-24066
An evaluation of schedule metrics used within aeronautical systems center
[AD-A260113] p 2521 N93-24413

AIR NAVIGATION TECHNICAL SERVICE, PARIS (FRANCE).
The future role of satellite communications in an improved air traffic management p 2275 N93-23518

AIR UNIV., MAXWELL AFB, AL.
Total Quality Management: Good enough for government work
[AD-A259847] p 2520 N93-23954

AIX-MARSEILLES UNIV. (FRANCE).
Adsorption kinetics at liquid-liquid interfaces in microgravity conditions. Experimental approach and theoretical background p 2248 N93-22843

AKRON UNIV., OH.
Compatibility of refrigerants and lubricants with elastomers
[DE93-006429] p 2216 N93-22057
Compatibility of refrigerants and lubricants with elastomers
[DE93-007808] p 2237 N93-22729
Navier-Stokes analysis of airfoils with leading edge ice accretions
[NASA-CR-191008] p 2109 N93-22822

AKUSTISCHE UND KINO-GERAETE G.M.B.H., VIENNA (AUSTRIA).
AudiMir: Directional hearing at microgravity p 2159 N93-24365

ALABAMA A & M UNIV., NORMAL.
A proposal to demonstrate production of salad crops in the Space Station Mockup Facility with particular attention to space, energy, and labor constraints
|NASA-CR-192815| p 2419 N93-23169
ALABAMA UNIV., BIRMINGHAM.
Approximation paper, part 1 p 2456 N93-22372
Commercial researcher perspective p 2184 N93-22615
Large scale crystallization of protein pharmaceuticals in microgravity via temperature change p 2191 N93-22648
An investigation of protein crystal growth by laser light scattering p 2507 N93-23393
ALABAMA UNIV., HUNTSVILLE.
A PARC system for terminal docking p 2141 N93-22259
Turbulence modelling of flow fields in thrust chambers
|NASA-CR-192466| p 2202 N93-22382
Consortium for materials development in space interaction with Space Station Freedom p 2192 N93-22650
Materials dispersion and biodynamics project research p 2192 N93-22651
Accurate computation and continuation of homoclinic and heteroclinic orbits for singular perturbation problems
|NASA-CR-4503| p 2466 N93-22672
Inner Magnetosphere Imager (IMI) instrument heritage
|NASA-CR-4498| p 2391 N93-22685
Repeatability and uncertainty analyses of NASA/MSFC light gas gun test data
|NASA-CR-192496| p 2325 N93-23012
Outreach and public service p 2517 N93-23147
Kinetics of diffusional droplet growth in a liquid/liquid two-phase system
|NASA-CR-192624| p 2292 N93-23220
Technology transfer from NASA to targeted industries, volume 1
|NASA-CR-192757| p 2532 N93-24482
Technology transfer from NASA to targeted industries, volume 2
|NASA-CR-192758| p 2533 N93-24484
ALABAMA UNIV., TUSCALOOSA.
Genetic learning in rule-based and neural systems p 2456 N93-22374
ALASKA UNIV., FAIRBANKS.
Environmental data sets at the University of Alaska p 2338 N93-22146
The influence of the hydrologic cycle on the extent of sea ice with climatic implications
|NASA-CR-192772| p 2413 N93-22700
ALBERTA UNIV., CALGARY.
Magnetic anisotropy in the high transition temperature superconductor YBa2Cu3O(7-delta) p 2509 N93-23985
ALBERTA UNIV., EDMONTON.
Experimental investigation of developing and fully developed flow in a curved duct of square cross section
|ISBN-0-315-70029-7| p 2291 N93-23177
A parameter-controlled relaxation algorithm for Bayesian restoration of images using the maximum entropy method (design, analysis, Mach band simulation and parallelization)
|ISBN-0-315-64776-0| p 2444 N93-24608
Microelectronic and micromechanical sensors and actuators in CMOS technology: A novel scheme toward s regularization and integration
|ISBN-0-315-60192-2| p 2305 N93-24609
The SSIMT: A CMOS based magnetic sensor
|ISBN-0-315-60334-8| p 2305 N93-24610
ALCATEL ESPACE, TOULOUSE (FRANCE).
Digital processing for positioning with one satellite p 2270 N93-23629
ALENIA, TORINO (ITALY).
Airborne system for detection and location of radio interference sources p 2269 N93-23622
ALENIA AERONAUTICA, POMIGLIANO D'ARCO (ITALY).
An investigation of multi-block structured algorithms for parallel CFD applications by a solution of 1D Burgers equation
|ETN-93-93703| p 2297 N93-23871
The role of fatigue testing in the design, development, and certification of the ATR 42/72
|ETN-93-93704| p 2127 N93-23969
ALENIA AERONAUTICA, TORINO (ITALY).
System concept for an advanced stand-off weapon p 2256 N93-22029
ALENIA SPAZIO S.P.A., ROME (ITALY).
The prospects of the Columbus programme ten years after its initiation p 2155 N93-24338
Damage tolerance approach
|ETN-93-93700| p 2332 N93-24486
Boundary element method
|ETN-93-93699| p 2333 N93-24593
ALFRED-WEGENER-INST. FOR POLAR RESEARCH, BREMERHAVEN (GERMANY).
Satellite-borne Earth observations in the framework of German global change research p 2357 N93-23755
Inter-comparison of satellite derived passive microwave ice products p 2371 N93-23836
ALLIED-SIGNAL AEROSPACE CO., KANSAS CITY, MO.
GTAW penetration based on electrode tip location versus weld joint center line
|DE93-004910| p 2311 N93-22494
Printed wiring assembly cleanliness
|DE93-006040| p 2277 N93-22524
High resolution three-dimensional solder joint measurement system evaluation
|DE93-005840| p 2437 N93-23000
Comparison of bismuth-lead and bismuth-tin to tin-lead as alternate solder alloys
|DE93-006041| p 2230 N93-23024
Statistical process control program at a ceramics vendor facility
|DE93-006043| p 2238 N93-23025
The determination of particulate contamination in miniature ball bearings
|DE93-006261| p 2316 N93-23675
Integrated Flexible Manufacturing Program for manufacturing automation and rapid prototyping
|DE93-006722| p 2442 N93-24327
Infrared vacuum soldering process for thick-film hybrid microcircuits
|DE93-007483| p 2285 N93-24451
ALLIED-SIGNAL CORP., KANSAS CITY, MO.
Integrated flexible manufacturing program for manufacturing automation and rapid prototyping p 2259 N93-22174
ALUMINUM CO. OF AMERICA, ALCOA CENTER, PA.
Investigation of gas metal arc welding characteristics of alloy 6013 p 2211 N93-23937
ALUMINUM CO. OF AMERICA, PITTSBURGH, PA.
Gas separations using ceramic membranes
|DE93-003204| p 2225 N93-24498
AMERICAN CHEMICAL SOCIETY, WASHINGTON, DC.
Organic Optoelectronic Materials: A Topical Workshop
|AD-A259695| p 2488 N93-23662
AMES LAB., IA.
Sputter-deposition and characterization of molybdenum disulfide thin films
|DE93-004801| p 2235 N93-22048
Propagation of elastic waves through inhomogeneous, anisotropic materials
|DE93-006247| p 2288 N93-22509
Micromagnetic surface studies of materials for nondestructive evaluation
|DE93-006303| p 2321 N93-22695
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals
|DE93-004432| p 2228 N93-22724
Growth of precipitates in Bi2Sr2CaCu2O8
|DE93-004443| p 2502 N93-22725
Phase diagram effects in rapid thermal processing of REBa2Cu3O(7-delta)

Flight investigation of the effect of tail boom strakes on helicopter directional control
| NASA-TP-3278 | p 2108 N93-22654
Structural dynamics division research and technology accomplishments for FY 1992 and plans for FY 1993
| NASA-TM-107713 | p 2109 N93-22671
Characteristics of vertical and lateral tunnel turbulence measured in air in the Langley Transonic Dynamics Tunnel
| NASA-TM-107734 | p 2133 N93-22675
SCBUCKLE user's manual: Buckling analysis program for simple supported and clamped panels
| NASA-TM-107741 | p 2324 N93-22704
Characterization of cavity flow fields using pressure data obtained in the Langley 0.3-Meter Transonic Cryogenic Tunnel
| NASA-TM-4436 | p 2110 N93-22876
Attenuation of empennage buffet response through active control of damping using piezoelectric material
| NASA-TM-107736 | p 2110 N93-23034
Polybenzoxazoles via aromatic nucleophilic displacement
| NASA-CASE-LAR-14606-1-CU | p 2207 N93-23077
Trail maneuver generation and selection in the Paladin tactical decision generation system
| NASA-TM-107722 | p 2131 N93-23088
Correlation of ground tests and analyses of a dynamically scaled Space Station model configuration
| NASA-TM-107729 | p 2327 N93-23235
Polarization correction for ionization loss in a galactic cosmic ray transport code (HZETRN)
| NASA-TM-4443 | p 2559 N93-23396
SUMS experiment flight results on STS-35
| NASA-TM-107738 | p 2201 N93-23407
Concepts for conformal and body-axis attitude information for spatial awareness presented in a helmet-mounted display
| NASA-TM-4438 | p 2129 N93-23408
An overview of aeroelasticity studies for the National Aerospace Plane
| NASA-TM-107728 | p 2111 N93-23422
surf3d: A 3-D finite-element program for the analysis of surface and corner cracks in solids subjected to mode-1 loadings
| NASA-TM-107710 | p 2329 N93-23735
Static and aerothermal tests of a superalloy honeycomb prepackaged thermal protection system
| NASA-TP-3257 | p 2297 N93-24096
Slotted-wall flow-field measurements in a transonic wind tunnel
| NASA-TM-4280 | p 2113 N93-24111
Aerodynamic characteristics of a proposed Personnel Launch System (PLS) lifting-body configuration at Mach numbers from 0.05 to 20.3
| NASA-TM-101641 | p 2180 N93-24522
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 8: Rectangular planform blades at an advance ratio of 0.23, 0.50 chord above the tip path plane
| NASA-TM-102642 | p 2115 N93-24524
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 9: Rectangular planform blades at an advance ratio of 0.23, 0.75 chord above the tip path plane
| NASA-TM-102643 | p 2115 N93-24525
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 11: Rectangular planform blades at an advance ratio of 0.30, 0.75 chord above the tip path plane
| NASA-TM-102645 | p 2115 N93-24527
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 10: Rectangular planform blades at an advance ratio of 0.30, 0.50 chord above the tip path plane
| NASA-TM-102644 | p 2116 N93-24528
Induced inflow velocity and blade surface pressure measurements for a helicopter model in forward flight. Volume 1: Advance ratio of 0.37, thrust coefficient of 0.0081, and hover tip speed of 710 ft/sec
| NASA-TM-104224 | p 2116 N93-24532
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 7: Rectangular planform blades at an advance ratio of 0.40
| NASA-TM-101599 | p 2116 N93-24538
Inflow measurements made with a laser velocimeter on a helicopter model in forward flight. Volume 6: Rectangular planform blades at an advance ratio of 0.35
| NASA-TM-101598 | p 2116 N93-24540
CONVEX mini manual
| NASA-TM-107564-REV | p 2433 N93-24594
Continuous fiber thermoplastic prepreg
| NASA-CASE-LAR-14459-1 | p 2215 N93-24597
Suspension device for low-frequency structures
| NASA-CASE-LAR-14272-1-CU | p 2169 N93-24598
Fiber optic microphone having a pressure sensing reflective membrane and a voltage source for calibration purpose
| NASA-CASE-LAR-14402-2-CU | p 2478 N93-24602

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. LEWIS RESEARCH CENTER, CLEVELAND, OH.

Multi-heat addition turbine engine
| NASA-CASE-LEW-15094-1 | p 2129 N93-22034
Space propulsion p 2174 N93-22092
Nuclear concepts/propulsion p 2174 N93-22093
An artificial intelligence-based structural health monitoring system for aging aircraft
p 2465 N93-22185
Optimal design of composite,hip implants using NASA technology p 2423 N93-22188
Three-dimensional laser window formation for industrial application p 2310 N93-22197
High performance sapphire windows
p 2310 N93-22198
A full-scale STOVL ejector experiment
| NASA-TM-106019 | p 2129 N93-22480
100-kW class applied-field MPD thruster component wear
| NASA-TM-106023 | p 2203 N93-22482
Real-time transmission of digital video using variable-length coding
| NASA-TM-106092 | p 2261 N93-22483
Techniques for improving the accuracy of cyrogenic temperature measurement in ground test programs
| NASA-TM-105996 | p 2302 N93-22484
Space Station Freedom beta gimbal control via sensitivity models
| NASA-TM-106000 | p 2182 N93-22551
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 1: Effect of spray parameters on the performance of several lots of partially stabilized zirconia-yttria powder
| NASA-TP-3295 | p 2227 N93-22556
Dynamic analysis of Free-Piston Stirling Engine/Linear Alternator-load system-experimentally validated
| NASA-TM-106034 | p 2473 N93-22559
Interfacial chemistry of a perfluoropolyether lubricant studied by XPS and TDS
| NASA-TM-106014 | p 2236 N93-22560
Optical and scratch resistant properties of diamondlike carbon films deposited with single and dual ion beams
| NASA-TM-105943 | p 2206 N93-22586
Jet Engine hot parts IR Analysis Procedure (J-EIRP)
| NASA-TM-105914 | p 2125 N93-22588
Analysis of MMIC arrays for use in the ACTS Aero Experiment
| NASA-TM-106073 | p 2180 N93-22589
Sliding durability of candidate seal fiber materials in hydrogen from 25 to 900 C
| NASA-TM-105939 | p 2206 N93-22590
Structure of confined laminar spray diffusion flames: Numerical investigation
| NASA-TM-106038 | p 2288 N93-22596
Icing research tunnel rotating bar calibration measurement system
| NASA-TM-106010 | p 2303 N93-22598
Mathematical relationship between two sets of laser anemometer measurements for resolving the total velocity vector
| NASA-TM-105986 | p 2129 N93-22599
Determination of atomic oxygen fluence using spectrophotometric analysis of infrared transparent witness coupons for long duration exposure tests
| NASA-TM-106021 | p 2206 N93-22605
Selected OAST/OSSA space experiment activities in support of Space Station Freedom p 2189 N93-22636
A time-accurate high-resolution TVD scheme for solving the Navier-Stokes equations
| NASA-TM-106056 | p 2466 N93-22664
Large-scale computation of incompressible viscous flow by least-squares finite element method
| NASA-TM-105904 | p 2467 N93-22825
Evaluation of an oil-debris monitoring device for use in helicopter transmissions
| NASA-TM-105830 | p 2312 N93-22826
OTV bearing deflection investigation
| NASA-TM-106085 | p 2303 N93-22994
Technical report writing
| NASA-TM-105419 | p 2523 N93-23002
Study of the capacitance technique for measuring high-temperature blade tip clearance on ceramic rotors
| NASA-TM-105978 | p 2130 N93-23013
An alternative model for estimating liquid diffusion coefficients requiring no viscosity data
| NASA-TM-106079 | p 2207 N93-23014
Structural analysis of high-rpm composite propfan blades for a cruise missile wind tunnel model
| NASA-TM-105267 | p 2325 N93-23015
Modelling a single phase voltage controlled rectifier using Laplace transforms
| NASA-TM-106005 | p 2474 N93-23016
Solar concentrators for advanced solar-dynamic power systems in space
| NASA-CR-187148 | p 2204 N93-23017
Changes in impedance of Ni/Cd cells with voltage and cycle life
| NASA-TM-106105 | p 2379 N93-23018
Low-noise, high-strength, spiral-bevel gears for helicopter transmissions
| NASA-TM-106080 | p 2313 N93-23019
Implementation of the block-Krylov boundary flexibility method of component synthesis
| NASA-TM-106065 | p 2325 N93-23044
Summary of experimental heat-transfer results from the turbine hot section facility
| NASA-TP-3250 | p 2290 N93-23059
Simulation of TunneLadder traveling-wave tube cold-test characteristics: Implementation of the three-dimensional, electromagnetic circuit analysis code micro-SOS
| NASA-TP-3294 | p 2281 N93-23394
Transient liquid-crystal technique used to produce high-resolution convective heat-transfer-coefficient maps
| NASA-TM-106083 | p 2294 N93-23404
Space chemical propulsion test facilities at NASA Lewis Research Center
| NASA-TM-106050 | p 2204 N93-23405
Fatigue criterion to system design, life and reliability: A primer
| NASA-TM-106022 | p 2328 N93-23406
Auger electron spectroscopy study of oxidation of a PdCr alloy used for high-temperature sensors
| NASA-TM-105961 | p 2231 N93-23418
A multiple-scale model for compressible turbulent flows
| NASA-TM-106072 | p 2296 N93-23736
Proposed ground-based control of accelerometer on Space Station Freedom
| NASA-TM-105960 | p 2201 N93-23738
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 1: Implementing exact mode superposition
| NASA-TM-106063 | p 2329 N93-23739
Solving modal equations of motion with initial conditions using MSC/NASTRAN DMAP. Part 2: Coupled versus uncoupled integration
| NASA-TM-106064 | p 2330 N93-23740
Pattern classifier for health monitoring of helicopter gearboxes
| NASA-TM-106099 | p 2316 N93-23741

Plasma chamber testing of APSA coupons for the SAMPIE flight experiment
|NASA-TM-106084| p 2195 N93-23742
Spray combustion experiments and numerical predictions
|NASA-TM-106069| p 2296 N93-23744
Mapping methods for computationally efficient and accurate structural reliability
|NASA-TM-105892| p 2330 N93-23745
Computational simulation for concurrent engineering of aerospace propulsion systems
|NASA-TM-106029| p 2330 N93-23746
Development of arcjet and ion propulsion for spacecraft stationkeeping
|NASA-TM-106102| p 2204 N93-23747
Nuclear Engine System Simulation (NESS). Version 2.0: Program user's guide
|NASA-CR-191081| p 2204 N93-23875
Nuclear Engine System Simulation (NESS). Volume 1: Program user's guide
|NASA-CR-191080| p 2204 N93-23876
Analytical and experimental studies of a short compact subsonic diffuser for a two-dimensional supersonic inlet
|NASA-TP-3247| p 2113 N93-24118

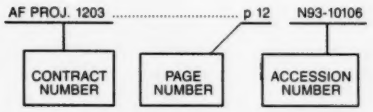
Assessment and correction of the impact of topography and atmosphere on remote sensing forest mapping of alpine regions p 2370 N93-23832

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

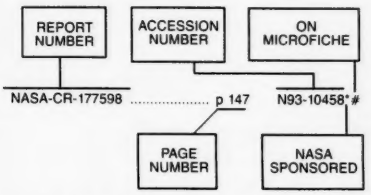
Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

Appendix

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (*STAR*) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications;
- Other U.S. Government agency and foreign patents and patent applications;
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *International Aerospace Abstracts* (*IAA*). *IAA* is issued on the 1st and 15th of each month and is available from the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, NY 10019.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points — central points of document acquisition and control within qualified organizations — or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *IAA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

16 SPACE TRANSPORTATION
Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance.* For space suits see *54 Man/System Technology and Life Support.*

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report/Accession Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is given in each citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, address inquiry to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum, Karlsruhe. Gesellschaft fur wissenschaftlich-technische Information mbH 7514 Eggenstein-Leopoldshafen 2, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARIES: To provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. (These libraries are not sales outlets.) At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, appears on page A-8. A local library can contact a regional depository library to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintianed by the British Library Lending Divison, Boston Spa, Wetherby, Yorkshire, England, for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*.

European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA—Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR*'s companion journal, *IAA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00 domestic, $117.00 foreign. Single copy prices: $33/domestic, $41/foreign.

An annual, cumulative *STAR Index* is also available at $54/domestic and $65/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Microfiche of the abstract sections of *STAR* are available, on annual subscription, from CASI. Annual subscription rates are $216.00 North America; $432.00 foreign.
